THE LAST LECTURE

Hachette UK 'A phenomenon' *SUNDAY TIMES* A lot of professors give talks titled 'The Last Lecture'. Professors are asked to consider their demise and to ruminate on what matters most to them: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave, 'Really Achieving Your Childhood Dreams', wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humour, inspiration, and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

THE LAST DAYS OF OUR LORD'S MINISTRY. A COURSE OF LECTURES, ETC

LAST LOOKS, LAST BOOKS

STEVENS, PLATH, LOWELL, BISHOP, MERRILL

Princeton University Press *Modern American poets writing in the face of death* In *Last Looks, Last Books*, the eminent critic Helen

Vendler examines the ways in which five great modern American poets, writing their final books, try to find a style that does justice to life and death alike. With traditional religious consolations no longer available to them, these poets must invent new ways to express the crisis of death, as well as the paradoxical coexistence of a declining body and an undiminished consciousness. In *The Rock*, Wallace Stevens writes simultaneous narratives of winter and spring; in *Ariel*, Sylvia Plath sustains melodrama in cool formality; and in *Day by Day*, Robert Lowell subtracts from plenitude. In *Geography III*, Elizabeth Bishop is both caught and freed, while James Merrill, in *A Scattering of Salts*, creates a series of self-portraits as he dies, representing himself by such things as a Christmas tree, human tissue on a laboratory slide, and the evening/morning star. The solution for one poet will not serve for another; each must invent a bridge from an old style to a new one. Casting a last look at life as they contemplate death, these modern writers enrich the resources of lyric poetry.

LAST LECTURES ON THE PREVENTION AND INTERVENTION OF GENOCIDE

Routledge *Last Lectures on the Prevention and Intervention of Genocide* is a collection of hypothetical 'last lectures' by some of the top scholars and practitioners across the globe in the fields of human rights and genocide studies. Each lecture purportedly constitutes the last thing the author will ever say about the prevention and intervention of genocide. The contributions to this volume are thought-provoking, engaging, and at times controversial, reflecting the scholars' most advanced thinking about issues of human rights and genocide. This book will be of great interest to professors, researchers, and students of political science, international relations, psychology, sociology, history, human rights, and genocide studies.

SUPERCONDUCTIVITY: FROM BASIC PHYSICS TO THE LATEST DEVELOPMENTS

World Scientific This volume contains the lecture notes of the "Spring College on Superconductivity" held from 27 April to 19 June 1992 at ICTP. The distinguished faculty of lecturers has provided a wide coverage of topics on the fascinating subject of superconductivity, ranging from basic physics to the latest developments. The comprehensive reviews included in this volume will prove invaluable for research workers and graduate students in the field. Contents: Theory of Normal Metals (G D Mahan) Strong-Coupling Theory of Superconductivity (D Rainer & J A Sauls) Heavy Fermions and Superconductivity: Theory (G Zwicknagl) On the Electronic Structure and Related Physical Properties of 3d Transition Metal Compounds (G A Sawatzky) Theory of Superconductivity in the High Tc Materials (P W Anderson) Specific Heat Studies of Superconductivity (R Srinivasan) Optical Investigations of High-Temperature Superconducting Cuprates (D Mihailovic) Investigation of Magnetic Properties in High Tc Oxides by Muon Spin Rotation (C Bucci) Charge and Spin Separation in One-Dimensional Systems (C A Balseiro et al.) Readership: Researchers in condensed matter physics. Keywords: Strong-Coupling; Superconductivity; High Tc; Charge; Spin

THE LOWENFELD LECTURES

VIKTOR LOWENFELD ON ART EDUCATION AND THERAPY

Penn State University Press *The seminal ideas of the most influential modern art educator are presented here as he developed them, in edited transcripts of Viktor Lowenfeld's 1958 class lectures and discussions on art education and art therapy. The transcripts serves as explication of Lowenfeld's Creative and Mental Growth, now going into a seventh edition--with posthumous collaborators since the author's death in 1960--translated into all the world's major languages. The experiential basis of Lowenfeld's ideas is revealed through the autobiographical and reflective quality of his lectures and his Socratic dialogs with students. Both his vicarious experience, arising from his erudition, and his immediate experience, stemming from his sensitivity to everyday stimuli, are focused on the problem at hand. The result is a freshness and immediacy as though the author were speaking directly to the reader about mutual concerns. The book presents transcripts of 31 class sessions conducted by Lowenfeld on Art and the Child, Art and the Adolescent, and Art Education Therapy in the year after his election as "Art Educator of the Year" by national Art Education Association. The editor's introduction gives the highlights of Lowenfeld's life and work and the circumstances surrounding the recorded class meetings. The book concludes with a selected bibliography of the works of Viktor Lowenfeld.*

CLINICAL LECTURES ON THE DISEASES OF WOMEN
