The book provides a comprehensive record of what took place in library and information management during a decade of considerable change and

challenges. **Winning Elections and Influencing Politicians for Library Funding** *American Library Association* As the saying goes, all politics is local. And 90% of funding for public libraries comes from the will of local politicians and, in turn, from local voters. So it's urgent that librarians, library supporters, and anyone interested in running an election or campaign for a library understand the strategies, resources, and tactics necessary for positive political action. Whether election day is four months away or four years away, there are immediate steps library leaders and local library ballot committees should take to help secure a successful ballot initiative later. Written by two experienced library campaigners, this action-driven manual for anyone running a political campaign for libraries dives into proven successful campaigning techniques for rural, suburban, and urban settings; expert analysis on how political perceptions are formed, how political power works, and ways libraries can reach funding or political goals; starting the discussion internally; the right approach to setting up the committee structure, and identifying the core leadership team for the committee; tips on networking, cultivating good relationships with the power players in the community, and building a winning coalition; canvassing and direct voter contact; responding effectively to opposition, including voters who habitually resist taxes or library funding increases; the differences between paid media and earned media; and best practices for marketing and message development, fundraising, volunteer engagement, and other key areas. Filled with easy to follow strategies, this book will guide ballot committees, librarians, trustees, and library advocates through the process of winning an election for funding their library. LIS students will also benefit from the early exposure to political literacy skills provided by this book.

Government Documents Librarianship A Guide for the Neo-depository Era *Information Today, Inc.* This guide breaks down the components of government documents librarianship into manageable, easy to understand parts. Lisa Ennis, a "tried by fire" documents librarian, begins by looking at career opportunities in both Federal Depository Libraries (FDLs) and non-depository libraries with government document collections. She discusses skills and traits; networking and training options; managing and administering people, paperwork, and collections; and both public service and technical service issues. She provides essential background on the GPO and the FDLP, covering the shift to a digital environment and publication of the new Electronic FDL Manual. Ennis's informative coverage is matched by an enthusiastic "can-do" approach that will appeal to any librarian considering or already engaged in government documents work.

Government Information Management in the 21st Century International Perspectives *Routledge* **Government Information Management in the 21st Century** provides librarians, information professionals, and government information policy leaders with a comprehensive and authoritative state-of-the-art review of current issues in government information management with a global perspective. The widespread use of the Internet to provide

government information and services has altered the landscape dramatically for those who organize, store, and provide access to government content. Technical challenges include digital preservation, authentication, security, and accessibility for a diverse user base. Management challenges include changes to costs, workflow, staff skills and resources, and user expectations. Public policies based on distributed paper collections must also change to address issues that are inherent to digital, networked, public content; such issues include the maintenance of personal privacy, re-use of government information, and the digital divide. The authors in this timely book are practitioners, scholars, and government officials. Together they provide an informed look at how managing government information is being tested at a time of rapid change. Part I addresses key issues for public, academic, and government libraries in organizing and providing access to government information. Part II features chapters on the diverse information issues facing governments, such as managing Freedom of Information requirements, opening government data to the public, and deploying new online technologies.

Government Information in Canada Access and Stewardship *University of Alberta* A critical analysis of Canadian government information publishing--essential reading for librarians, archivists, and researchers.

Impeccably researched, cross referenced, alphabetized by subject, and generously illustrated, the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field." **Federal Librarian Guide to Library and Information Agency Management** *Scarecrow Press* This guide identifies major concerns and involves interested parties in thoughtful consideration and discussion of challenges and opportunities embedded in managerial and administrative practice. By talking about the management of information places and with managers and managers-to-be, authors Curran and Miller provide a more thorough and realistic outlook on the managerial experience. The authors assert that: - Information agencies of all stripes share a common purpose - The act of deciding is the primary administrative/managerial responsibility - Knowledge Management must replace mere acquisition, storage and dissemination - The budget process is every bit as important as the budget document - Interpersonal issues dominate - Meetings soak up time Tackling many issues that other management books won't touch (e.g. sex in the office place, cliques, emphasis on political behavior, specific mistakes that

cripple managers, and managing contradictions and paradoxes), this book is an excellent resource for all administrators. **Official Publications in Britain** *Library Assn Pub Limited* The pattern of official publishing in Britain continues to change. This second edition aims to present a concise and up-to-date overview of the range of current official publishing. It is intended for practising librarians, students in departments of library and information studies and users of official publications to help them to discern the pattern of official publishing today. Her Majesty's Stationary Office is the largest single general publisher of official material, but its output represents only a small proportion of the total. The great majority of official publications are published directly by government departments, public bodies and local authorities. Despite advances in bibliographic control, some of these publications are still relatively little known and underused. Developments in electronic publishing have begun to have a significant impact in the official publications field with online and CD-ROM databases becoming more common. **Library & Information Science Abstracts Resources in Education Library of Congress Information Bulletin Museum Librarianship, 2d ed.** *McFarland* In this second edition to **Museum Librarianship**, the author offers guidance in planning and providing information services in a museum—beginning or revitalizing the library; collection development and the bibliographic process; technical services; administration; space and equipment requirements; fundamental services; extended information services; and the information partnership between museums and their libraries. The Internet and other electronic resources are fully covered. The focus of this new edition has shifted slightly from mainly dealing with the start-up aspects to an emphasis on the goals of library and information services in a museum, and the processes through which such services can be achieved. The author's underlying goal is to help enhance and enrich the encounter of the museum-goer with enduring objects, in a time when we all seem to be assailed on every side by random noise and flickering image. **Oversight Hearings on the Reauthorization of the Library Services and Construction Act Hearings Before the Subcommittee on Postsecondary Education of the Committee on Education and Labor, House of Representatives, Ninety-eighth Congress, First Session, Hearings Held in Washington, D.C. on March 15, 16, 17, 1983** *Routledge Library Editions: Political Protest* *Taylor & Francis* This 26-volume set is a wide-ranging, time- and subject-spanning examination of the phenomenon of political protest. What drives people to take to the streets, and how do their governments respond? These questions and many more are analysed in areas as varied as sixteenth-century German peasant uprisings, revolutionary Russians at the Paris Commune, women protesting nuclear weapons at Greenham Common, and the role Christianity played in protests across the ages. An impressive reference resource, this set also looks at the policing of protests and official responses to them. **The University of Michigan Library Newsletter Leisure and Recreation Management** *Psychology Press* 'Leisure and Recreation Management' is

essential reading for anyone interested in exploring both the theory and the practicalities of managing leisure and recreational facilities. **Monthly Catalog of United States Government Publications** **The Politics of Personal Information Surveillance, Privacy, and Power in West Germany** *Berghahn Books* In the 1970s and 1980s West Germany was a pioneer in both the use of the new information technologies for population surveillance and the adoption of privacy protection legislation. During this era of cultural change and political polarization, the expansion, bureaucratization, and computerization of population surveillance disrupted the norms that had governed the exchange and use of personal information in earlier decades and gave rise to a set of distinctly postindustrial social conflicts centered on the use of personal information as a means of social governance in the welfare state. Combining vast archival research with a groundbreaking theoretical analysis, this book gives a definitive account of the politics of personal information in West Germany at the dawn of the information society. **Government Publications Key Papers** *Elsevier* **Government Publications: Key Papers** is a compilation of papers that covers various topics related to government publications. The book presents materials drawn from a variety of sources, such as public domains, book chapters, and periodicals from different countries. The text contains 61 chapters organized into 15 parts; each part covers a specific area, such as sorting and labeling of publications, library systems, reference services, and municipal and state publications. The book dedicates several parts to British, Canadian, and Australian publications. This book will be of great value to individuals who have an interest in government information. **Vertical File Index** **The modernisation review of public libraries a policy statement** *The Stationery Office* This paper puts forward policy proposals based on a consultation exercise launched in December 2009 by Margaret Hodge, Minister for Culture. The proposals presented are grouped under 6 main aims gleaned from the exercise: to drive the quality of all library services up to the level of the best; to reverse the current trend of decline in library usage and grow the numbers using the library service; that the library service is able to respond to limited public resources and public pressures; to ensure that all libraries respond to a 24/7 culture; that all libraries grasp the opportunities presented by digitisation; and to demonstrate to citizens, commentators and politicians that libraries are still relevant and vital. **Post-Truth, Fake News and Democracy Mapping the Politics of Falsehood** *Routledge* Western societies are under siege, as fake news, post-truth and alternative facts are undermining the very core of democracy. This dystopian narrative is currently circulated by intellectuals, journalists and policy makers worldwide. In this book, Johan Farkas and Jannick Schou deliver a comprehensive study of post-truth discourses. They critically map the normative ideas contained in these and present a forceful call for deepening democracy. The dominant narrative of our time is that democracy is in a state of emergency caused by social media, changes to journalism and misinformed masses. This crisis needs to be

resolved by reinstating truth at the heart of democracy, even if this means curtailing civic participation and popular sovereignty. Engaging with critical political philosophy, Farkas and Schou argue that these solutions neglect the fact that democracy has never been about truth alone: it is equally about the voice of the democratic people. *Post-Truth, Fake News and Democracy* delivers a sobering diagnosis of our times. It maps contemporary discourses on truth and democracy, foregrounds their normative foundations and connects these to historical changes within liberal democracies. The book will be of interest to students and scholars studying the current state and future of democracy, as well as to a politically informed readership. *Collection Development and Management for 21st Century Library Collections An Introduction, Second Edition American Library Association* Packed with discussion questions, activities, suggested additional references, selected readings, and many other features that speak directly to students and library professionals, Gregory's *Collection Development and Management for 21st Century Library Collections* is a comprehensive handbook that also shares myriad insightful ideas and approaches valuable to experienced practitioners. This new second edition brings an already stellar text fully up to date, presenting top-to-bottom coverage of the impact of new technologies and developments on the discipline, including discussion of e-books, open access, globalization, self-publishing, and other trends; needs assessment, policies, and selection sources and processes; budgeting and fiscal management; collection assessment and evaluation; weeding, with special attention paid to electronic materials; collaborative collection development and resource sharing; marketing and outreach; self-censorship as a component of intellectual freedom, professional ethics, and other legal issues; diversity and ADA issues; preservation; and the future of the field. Leanne C. Powner's new title *Empirical Research and Writing: A Student's Practical Guide* provides valuable advice and guidance on conducting and writing about empirical research. Chapter by chapter, students are guided through the key steps in the research process. Written in a lively and engaging manner and with a dose of humor, this practical text shows students exactly how to choose a research topic, conduct a literature review, make research design decisions, collect and analyze data, and then write up and present the results. The book's approachable style and just-in-time information delivery make it a text students will want to read, and its wide-ranging and surprisingly sophisticated coverage will make it an important resource for their later coursework. *Commerce Business Daily Library Juice Concentrate Library Juice Press, LLC* *Library Juice Concentrate* is a compilation of the best of *Library Juice*, an e-zine published by Rory Litwin between 1998 and 2005

that dealt with foundational questions of librarianship during a period of rapid change. *Library Juice* served as the record for the "library left" during this period, including its veterans and newcomers, while at the same time offering original reflections on traditional questions. The book includes essays and other artifacts that investigate professional neutrality, intellectual freedom, alternative literature, the social effects of technological change, the cultural identity of the librarian, "anarchist librarianship," the Cuba debate, Google's scanning project, subject heading reform, and other issues. The aim of the essays in *Library Juice* Concentrate is to provoke original thought and to encourage newcomers in the field to participate in professional discourse with confidence and with attention to the intellectual and political struggles of the past. *Research in Education Reference and Information Services An Introduction American Library Association* Search skills of today bear little resemblance to searches through print publications. Reference service has become much more complex than in the past, and is in a constant state of flux. Learning the skill sets of a worthy reference librarian can be challenging, unending, rewarding, and-- yes, fun. *Information for Academic Library Decision Making The Case for Organizational Information Management Praeger* Annual Report - National Commission on Libraries and Information Science *The Reference Library User Problems and Solutions Psychology Press* Provide the best possible service to your library patrons. With a healthy respect for those who seek assistance at the reference desk, a group of library and information service specialists examine the public whom they serve. *The Reference Library User* focuses on the possible interactions between the reference librarian and the library user. The authoritative contributors discuss many problems in the relationship between the public and the library, and all offer suggestions that will at least help librarians to better serve the public on a daily basis. A major emphasis of *The Reference Library User* is on the various populations using the library and their particular needs. For example, one chapter examines the information needs of deinstitutionalized patrons and presents methods of providing service and a rationale for community outreach. The state program in Rhode Island is outlined, describing efforts to reach community residents through public libraries and the state operated Bookmobile. Other chapters provide strategies for providing reference services to older adults, the learning disabled, the blind, and the physically handicapped. This informative new volume also deals with general concerns facing librarians today, including determining the audience for both public and academic libraries, educating the user, encouraging nonusers to become library users, and calming irate patrons. Reference librarians will be particularly interested in the problems and solutions discussed in this new volume, as will library managers and administrators who will always benefit from a fresh perspective on public service for the library user. *Public Libraries, Public Policies, and Political Processes Serving and Transforming Communities in Times of Economic and Political Constraint Rowman &*

Littlefield Over the past thirty years, significant shifts in technology, political ideologies, and policy goals have resulted in an environment in which public libraries face the highest expectations to serve community needs against unprecedented political, economic, and policy challenges. Drawing on two decades of original research conducted by the authors, this book provides a data-driven examination of the interrelated impacts of political discourse and public policy processes on public libraries and the ways in which they are able to serve their communities, explaining the complex current circumstances and offering strategies for effectively creating a better future for public libraries. *Library Journal Fundamentals of Collection Development and Management, Fourth Edition American Library Association Technical Services Quarterly* declared that the third edition "must now be considered the essential textbook for collection development and management ... the first place to go for reliable and informative advice." For the fourth edition expert instructor and librarian Johnson has revised and freshened this resource to ensure its timeliness and continued excellence. Each chapter offers complete coverage of one aspect of collection development and management, including numerous suggestions for further reading and narrative case studies exploring the issues. Thorough consideration is given to traditional management topics such as organization of the collection, weeding, staffing, and policymaking; cooperative collection development and management; licenses, negotiation, contracts, maintaining productive relationships with vendors and publishers, and other important purchasing and budgeting topics; important issues such as the ways that changes in information delivery and access technologies continue to reshape the discipline, the evolving needs and expectations of library users, and new roles for subject specialists, all illustrated using updated examples and data; and marketing, liaison activities, and outreach. As a comprehensive introduction for LIS students, a primer for experienced librarians with new collection development and management responsibilities, and a handy reference resource for practitioners as they go about their day-to-day work, the value and usefulness of this book remain unequalled.
