Elasmobranch Biodiversity, Conservation and Management

Proceedings of the International Seminar and Workshop, Sabah, Malaysia, July 1997

IUCN The Darwin Elasmobranch Biodiversity Conservation and Management project in Sabah held a three-day international seminar that included a one-day workshop in order to highlight freshwater and coastal elasmobranch conservation issues in the region and worldwide, to disseminate the result of the project to other Malaysian states and countries, and to raise awareness of the importance of considering aspects of elasmobranch biodiversity in the context of nature conservation, commercial fisheries management, and for subsistence fishing communities. These proceedings contain numerous peer-reviewed papers originally presented at the seminar, which cover a wide range of topics, with particular reference to species from freshwater and estuarine habitats. The workshop served to develop recommendations concerning the future prospects of elasmobranch fisheries, biodiversity, conservation and management. This paper records those conclusions, which highlight the importance of elasmobranchs as top marine predators and keystone species, noting that permanent damage to shark and ray populations are likely to have serious and unexpected negative consequences for commercial and subsistence yields of other important fish stocks.

Schizophrenia Treatment Outcomes

An Evidence-Based Approach to Recovery

Springer Nature This book analyzes schizophrenia management in the context of recent clinical therapeutic advances that have transformed the measurements and outcomes landscape. Unlike any other resource, this volume carefully develops the social and clinical guidelines that affect the life of the patient and defines its role in schizophrenia treatment outcomes. The text begins by determining the concepts, development, neuroscience, and guidelines for positive outcomes before analyzing the gaps in the literature. The text addresses medical concerns in relation to outcomes in schizophrenic patients, including substance use, impact from antipsychotic medications, and medical comorbidities. The text also covers external determinants that may inhibit positive outcomes, including cultural factors, stigma, and environmental issues. Written by experts in schizophrenia care, this book compiles sound research, current clinical trends, and modern measurement markers into a well-organized compendium that delivers this data into a practical guide for measuring treatment outcomes in patients suffering from the disease. Schizophrenia Treatment Outcomes is the ultimate guide for psychiatrists, psychologists, nurses, social workers, and all medical practitioners interested in improving outcomes for schizophrenia patients.

The Imperial Cruise

A Secret History of Empire and War

Hachette UK In 1905 President Teddy Roosevelt dispatched Secretary of War William Howard Taft on the largest U.S. diplomatic mission in history to Hawaii, Japan, the Philippines, China, and Korea. Roosevelt's glamorous twenty-one year old daughter Alice served as mistress of the cruise, which included senators and congressmen. On this trip, Taft concluded secret agreements in Roosevelt's name. In 2005, a century later, James Bradley traveled in the wake of Roosevelt's mission and discovered what had transpired in Honolulu, Tokyo, Manila, Beijing and Seoul. In 1905, Roosevelt was bully-confident and made secret agreements that he thought would secure America's westward push into the Pacific. Instead, he lit the long fuse on the Asian firecrackers that would singe America's hands for a century.

The Founding of New Acadia

The Beginnings of Acadian Life in Louisiana, 1765-1803

LSU Press In this penetrating study, Carl Brasseaux looks beyond long-standing mythology to provide a critical account of early Acadian culture in Louisiana and the reasons for its survival. He convincingly dispels many received notions about the routes Acadians traveled from Nova Scotia to Louisiana, their original settlement sites, and the patterns of their subsequent migrations within the state, and closely examines the relations of Louisiana's Acadians with their black, Spanish, Indian, and Creole neighbors. In adapting to subtropical Louisiana, with its turmoil of alternating French and Spanish regimes, the Acadians exhibited industry, pragmatism, individualism, and the ability to close ranks in the face of a general threat. As Brasseaux reveals, Acadians' cohesiveness and insularity preserved the core elements of their culture and helped them adjust to new physical and social demands.

The Spirit of 'seventy-six

The Story of the American Revolution as Told by Participants

Who shall write the history of the American Revolution? Who can write it? asked John Adams in 1815. Renowned scholars Henry Steele Commager and Richard B. Morris have provided a prudent, perceptive answer--the participants themselves--and in the process have fashioned from the vast source material a thrilling chronological narrative. The Spirit of 'Seventy-Six allows readers to experience events long-entombed in textbooks as they unfold for the first time for both Loyalists and Patriots: the Boston Tea Party, Bunker Hill, the Declaration of Independence, and more. In letters, journals, diaries, official documents, and personal recollections, the timeless figures of the Revolution emerge in all their human splendor and folly to stand beside the nameless soldiers. Profusely illustrated and enhanced by cogent commentary, this book examines every aspect of the war, including the Loyalist and British views; treason and prison escapes; songs and ballads; the home front and diplomacy abroad. In short, the editors have wrought a balanced, sweeping, and compelling documentary history.

Intellectual Leadership in Higher Education

Renewing the Role of the University Professor

Routledge "There is growing research and literature about Intellectual Leadership and management in higher education. However, there has been little consideration of the formal and informal leadership role of full professors. This group of individuals are key to the leadership of universities and they represent a group of individuals at the apex of their discipline or profession with considerable expertise across many elements of academic practice including research, teaching and service activities incorporating leadership and management roles. In this context, the role of professors as 'intellectual leaders' is under-theorised and higher education institutions make insufficient use of professors as an internal resource. This book tackles the question of what intellectual leadership actually is and analyses other question marks associated with the role of senior academics Intellectual Leadership in Higher Education provides a theoretical exploration of the meaning of intellectual leadership with particular reference to university professors and other senior academics. It draws on new international research data involving several hundred university professors in Europe, North America, Asia and Africa and also provides a series of practical ideas and recommendations for defining the role of a university professor more clearly. This careful analysis of academic roles will prove invaluable for all those working in Higher Education"-- Provided by publisher.

Twenty Small Sailboats to Take You Anywhere

John Vigor turns the spotlight on twenty seaworthy sailboats that are at home on the ocean in all weather. These are old fiberglass boats, mostly of traditional design and strong construction. All are small, from 20 feet to 32 feet overall, but all have crossed oceans, and all are cheap. Choosing the right boat to take you across an ocean or around the world can be confusing and exasperating, particularly with a tight budget. Vigor sets out to remedy that in this book. He compares the designs and handling characteristics of 20 different boats whose secondhand market prices start at about \$3,000. Interviews with experienced owners (featuring valuable tips about handling each boat in heavy weather) are interspersed with line drawings of hulls, sail plans, and accommodations. Vigor has unearthed the known weaknesses of each boat and explains how to deal with them. He rates their comparative seaworthiness, their speed, and the number of people they can carry in comfort. If you have ever dreamed the dream this book can help you turn it into reality.
