Roman London's First Voices Writing Tablets from the Bloomberg Excavations, 2010-14 This publication presents research into Britain's largest, earliest and most significant collection of Roman waxed writing tablets. The collection, which boasts the first hand-written document known from Britain, was discovered during archaeological excavations for Bloomberg. The formal, official, legal and business aspects of life in the first decades of Londinium are revealed, with appearances from slaves, freedmen, traders, soldiers and the judiciary. Aspects of the tablets considered include their manufacture, analysis of the wax applied to their surfaces, their epigraphy and the content of over 80 legible texts. The Geography of Tourism of Central and Eastern European Countries Springer This book presents a comprehensive overview of the tourism market development in Central and Eastern European countries. It is divided into 13 chapters, including a chapter dedicated to Belarus, all richly illustrated with colorful maps and illustrations. The book presents the output of international conferences organized every two years by the Department of Regional Geography and Tourism of the University of Wroclaw which have served as inspiration for this book. Chapter 1 provides the characteristics of 20 post-communist countries of the region on the international tourism market and it sets the background and context for the following chapters. Chapters 2 to 13 present the condition of research on tourism, tourist attractions, tourist infrastructure, tourism movement, main types of tourism as well as tourist regionalization in 12 Central and Eastern European countries. All chapters have been updated with reference to the statistics. This book is a revised and updated version of "The Geography of Tourism of Central and Eastern Europe Countries" published by the Department of Regional Geography and Tourism of Wroclaw University in 2012. It has been developed by a group of specialists through their exchange of research experience in the scope of international tourism in Central and Eastern Europe. The ABC universal commercial electric telegraphic code Rediscovery of Genetic and Genomic Resources for Future Food Security Springer Nature This book describes how the latest genomic resources techniques can be efficiently used in plant breeding programmes to achieve food security in the future. It also shares insights on how to utilize the untapped and unexplored genetic diversity of wild species, wild relatives and landraces for crop improvement. Moreover, the book offers an impressive array of balanced analyses, fresh ideas and perspectives, and thoughtful and realistic proposals regarding the sustainable utilization of plant genetic resources with modern biotechnological techniques. The first book to address the importance of plant genetics and genomic resources for food security, it brings together a group of plant breeders and biotechnologists to investigate the use of genomic resources techniques in plant breeding programmes. Providing essential information on the efficient utilization of genomic resources in precision breeding, it offers a valuable asset for undergraduate and graduate students, teachers and professionals engaged in related fields. Genomics-Assisted Crop Improvement Vol 2: Genomics Applications in Crops Springer Science & Business Media This superb volume provides a critical assessment of genomics tools and approaches for crop breeding. Volume 1 presents the status and availability of genomic resources and platforms, and also devises strategies and approaches for effectively exploiting genomics research. Volume 2 goes into detail on a number of case studies of several important crop and plant species that summarize both the achievements and limitations of genomics research for crop improvement. Soapstone in the North Quarries, Products and People 7000 BC - AD 1700 Managing Weather and Climate Risks in Agriculture Springer Science & Business Media Based on an International Workshop held in New Delhi, India, this work should be of interest to all organizations and agencies interested in improved risk management in agriculture. In many parts of the world, weather and climate are one of the biggest production risks and uncertainty factors impacting on agricultural systems performance and management. Both structural and non-structural measures can be used to reduce the impacts of the variability (including extremes) of climate resources on crop production. Advances in Earth Science From Earthquakes to Global Warming World Scientific Advances in Earth Science outlines the latest developments and new research directions currently being made world-wide in the earth sciences. It contains invited and refereed articles by leading younger researchers on their cutting-edge research, but aimed at a general scientific audience. This exciting volume explains how powerful methodologies such as satellite remote sensing and supercomputing simulations are now profoundly changing research in the earth sciences; how the earth system is increasingly being viewed in a holistic way, linking the atmosphere, ocean and solid earth; and how the societal impact of the research in the earth sciences has never been more important. Published by Imperial College Press in collaboration with the Royal Society of London, the book features many articles originating from invited papers published in the Philosophical Transactions of the Royal Society. Eleven of the distinguished contributors hold prestigious Royal Society Research Fellowships. Contents: Environmental Change: The Price of Climate Change (D S Reay) Carbon in the Atmosphere and Terrestrial Biosphere in the Early Anthropocene (Y Malhi) Dust in the Earth System: The Biogeochemical Linking of Land, Air, and Sea (A Ridgwell & K E Kohfeld) The Late Permian Mass Extinction Event and Recovery: Biological Catastrophe in a Greenhouse World (R J Twitchett) Dynamics of the Earth: Space-Plasma Imaging — Past, Present and Future (C N Mitchell) Fault Structure, Stress, Friction and Rupture Dynamics of Earthquakes (E Fukuyama) Some Remarks on the Time Scales of Magmatic Processes Occurring Beneath Island Arc Volcanoes (S P Turner) The Break-Up of Continents and the Generation of Ocean Basins (T A Minshull) Properties and Evolution of the Earth's Core and Geodynamo (F Nimmo & D Alfè) Applied Earth Science: Giant Catastrophic Landslides (C R J Kilburn) Remote Monitoring of the Earthquake Cycle Using Satellite Radar Interferometry (T J Wright) Human Influence on the Global Geochemical Cycle of Lead (D J Weiss et al.) Furthermore, the millions of ponds which exist exhibit a particularly high biodiversity and have a high potential for ecosystem functions and services. Despite these impressive features, ponds face many threats from a variety of human activities and receive little or no protection under European and national legislation. Consequently, there is an urgent need to protect, consolidate and increase the pond resource in Europe. In order to achieve these objectives, the European Pond Conservation Network (EPCN) was launched 2004 in Geneva. Its aim is to promote the awareness, understanding and conservation of these small water bodies in the European landscape. This volume of "Developments in Hydrobiology" presents a selection of 31 papers presented during EPCN conferences held in 2006 in France (Toulouse) and in 2008 in Spain (Valencia). They represent a diverse collection of themes from across the continent and North Africa and present new and original insights into topics as wide ranging as pond biodiversity; human disturbance; landscape ecology; ecological assessment and monitoring; practical management measures; ecological restoration; hydrology and climate change; invasive species and threatened species. **National Avocational Organizations Acta Meteorologica Sinica Modern Photography Chemometrics with R Multivariate Data Analysis in the Natural and Life Sciences Springer Nature** This book offers readers an accessible introduction to the world of multivariate statistics in the life sciences, providing a comprehensive description of the general data analysis paradigm, from exploratory analysis (principal component analysis, self-organizing maps and clustering) to modeling (classification, regression) and validation (including variable selection). It also includes a special section discussing several more specific topics in the area of chemometrics, such as outlier detection, and biomarker identification. The corresponding R code is provided for all the examples in the

book; and scripts, functions and data are available in a separate R package. This second revised edition features not only updates on many of the topics covered, but also several sections of new material (e.g., on handling missing values in PCA, multivariate process monitoring and batch correction). .
