Bell X-1a Rocket Plane Pilot's Flight Operating Instructions

[Lulu.com](http://Lulu.com) An improvement over the Bell X-1 - the first plane to break the sound barrier in level flight - the X-1A was designed to reach Mach 2.0. Initial test flights commenced in January of 1953. On December 12th, test pilot Charles "Chuck" Yeager set a record with the aircraft, reaching a speed of Mach 2.43 at 75,000 feet. In 1954, pilot Maj. Arthur Murray flew the plane to a new altitude record of 90,440 feet. Roughly a year later, the X-1A was severely damaged by an explosion while strapped to its B-29 mother ship. The plane was jettisoned and destroyed. Variants of the design, including the X-1B, X-1D, and X-1E continued to fly as late as 1958. Originally printed by the U.S. Air Force and NACA / NASA, this handbook provides a fascinating glimpse inside the cockpit of one of history's great planes. Classified "Restricted", the manual was declassified. This affordable facsimile has been slightly reformatted. Care has been taken to preserve the integrity of the text.

## Moggy's Tuna Manual

[Createspace Independent Publishing Platform](#) 'Moggy's Tuna Manual' is based on five years of experience flying Bell 47's and Hughes 500's off Taiwanese and Korean tuna fishing vessels in the Western Pacific. Francis Meyrick describes the risks, the thrills and the beauty of nature. His stories include wry humour, first person accounts, and many cautionary tales. But his main emphasis is on safety: tips, anecdotes and techniques to fly safely and successfully. He dedicates his book "To all my tuna friends and in memory of too many guys who didn't make it home..." Francis has logged over 12,500 flight hours including a wide variety of helicopter applications all over the world. Based on this personal experience, his 'Tuna Manual' describes the many pitfalls that face raw, inexperienced recruits to the 'Tuna Fields'. Both low-time pilots and experienced pilots have praised this safety initiative as a sincere effort to mitigate the world-wide sky-high accident rate in the Tuna Helicopter Industry. Written with humility and respect for Man and Nature, this manual will appeal to all helicopter addicts.
