The Cambridge Handbook of Copyright in Street Art and Graffiti

Cambridge University Press **In recent years, the number of conflicts related to the misuse of street art and graffiti has been on the rise around the world. Some cases involve claims of misappropriation related to corporate advertising campaigns, while others entail the destruction or 'surgical' removal of street art from the walls on which they were created. In this work, Enrico Bonadio brings together a group of experts to provide the first comprehensive analysis of issues related to copyright in street art and graffiti. Chapter authors shed light not only on the legal tools available in thirteen key jurisdictions for street and graffiti artists to object to unauthorized exploitations and unwanted treatments of their works, but also offer policy and sociological insights designed to spur further debate on whether and to what extent the street art and graffiti subcultures can benefit from copyright and moral rights protection.**

Neighbourhoods in Transition

Brownfield Regeneration in European Metropolitan Areas

[Springer Nature](#) This open access book is focused on the intersection between urban brownfields and the sustainability transitions of metropolitan areas, cities and neighbourhoods. It provides both a theoretical and practical approach to the topic, offering a thorough introduction to urban brownfields and regeneration projects as well as an operational monitoring tool. Neighbourhoods in Transition begins with an overview of historic urban development and strategic areas in the hearts of towns to be developed. It then defines several key issues related to the topic, including urban brownfields, regeneration projects, and sustainability issues related to neighbourhood development. The second part of this book is focused on support tools, explaining the challenges faced, the steps involved in a regeneration process, and offering an operational monitoring tool. It applies the unique tool to case studies in three selected neighbourhoods and the outcomes of one case study are also presented and discussed, highlighting its benefits. The audience for this book will be both professional and academic. It will support researchers as an up-to-date reference book on urban brownfield regeneration projects, and also the work of architects, urban designers, urban planners and engineers involved in sustainability transitions of the built environment.

Global Value Chains in a Postcrisis World

A Development Perspective

[World Bank Publications](#) The book looks to address the following questions in a post-crisis world: How have lead firms responded to the crisis? Have they changed their traditional supply chain strategy and relocated and/or outsourced part of their production? How will those changes affect developing countries? What should be the policy responses to these changes?

Exploring Geometry, Second Edition

[CRC Press](#) This text promotes student engagement with the beautiful ideas of geometry. Every major concept is introduced in its historical context and connects the idea with real-life. A system of experimentation followed by rigorous explanation and proof is central. Exploratory projects play an integral role in this text. Students develop a better sense of how to prove a result and visualize connections between statements, making these connections real. They develop the intuition needed to conjecture a theorem and devise a proof of what they have observed.

From Crisis to Communisation

[PM Press](#) “Communisation” means something quite straightforward: a revolution that starts to change social relations immediately. It would extend over years, decades probably, but from Day One it would begin to do away with wage-labour, profit, productivity, private property, classes, States, masculine domination, and more. There would be no “transition period” in the Marxist sense, no period when the “associated producers” continue furthering economic growth to create the industrial foundations of a new world. Communisation means a creative insurrection that would bring about communism, not its preconditions. Thus stated, it sounds simple enough. The questions are what, how, and by whom. That is what this book is about. Communisation is not the be-all and end-all that solves everything and proves wrong all past critical theory. The concept was born out of a specific period, and we can fully understand it by going back to how people personally and collectively experienced the crises of the 1960s and '70s. The notion is now developing in the maelstrom of a new crisis, deeper than the Depression of the 1930s, among other reasons because of its ecological dimension, a crisis that has the scope and magnitude of a crisis of civilisation. This is not a book that glorifies existing struggles as if their present accumulation were enough to result in revolution. Radical theory is meaningful if it addresses the question: How can proletarian resistance to exploitation and dispossession achieve more than aggravate the crisis? How can it reshape the world?

Accidental Injury Biomechanics and Prevention

[Springer](#) **This book provides a state-of-the-art look at the applied biomechanics of accidental injury and prevention. The editors, Drs. Narayan Yoganandan, Alan M. Nahum and John W. Melvin are recognized international leaders and researchers in injury biomechanics, prevention and trauma medicine. They have assembled renowned researchers as authors for 29 chapters to cover individual aspects of human injury assessment and prevention. This third edition is thoroughly revised and expanded with new chapters in different fields. Topics covered address automotive, aviation, military and other environments. Field data collection; injury coding/scaling; injury epidemiology; mechanisms of injury; human tolerance to injury; simulations using experimental, complex computational models (finite element modeling) and statistical processes; anthropomorphic test device design, development and validation for crashworthiness applications in topics cited above; and current regulations are covered. Risk functions and injury criteria for various body regions are included. Adult and pediatric populations are addressed. The exhaustive list of references in many areas along with the latest developments is valuable to all those involved or intend to pursue this important topic on human injury biomechanics and prevention. The expanded edition will interest a variety of scholars and professionals including physicians, biomedical researchers in many disciplines, basic scientists, attorneys and jurists involved in accidental injury cases and governmental bodies. It is hoped that this book will foster multidisciplinary collaborations by medical and engineering researchers and academicians and practicing physicians for injury assessment and prevention and stimulate more applied research, education and training in the field of accidental-injury causation and prevention.**

Handbook of Multilingualism and Multiculturalism

[Archives contemporaines](#) **Built around the concept of linguistic and cultural plurality, this book defines language as an instrument of action and symbolic power. Plurality is conceived here as : a complex array of voices, perspectives and approaches that seeks to preserve the complexity of the multilingual and multicultural enterprise, including language learning and teaching ; a coherent system of relationships among various languages, research traditions and research sites that informs qualitative methods of inquiry into multilingualism and its uses in everyday life ; a view of language as structured sociohistorical object, observable from several simultaneous spatiotemporal standpoints, such as that of daily interactions or that which sustains the symbolic power of institutions. This book is addressed to teacher trainers, young researchers, decision makers, teachers concerned with the role of languages in the evolution of societies and educational systems. It aims to elicit discussion by articulating practices, field observations and analyses based on a multidisciplinary conceptual framework.**

Standing up for a Sustainable World is written by and about key individuals who have not only understood the threats to our planet, but also become witness to them and confronted them.

Seeking the Best Master

State Ownership in the Varieties of Capitalism

Central European University Press The economic crisis of 2008-2009 signaled the end of the Post-Washington Consensus on restricting the role of the state in economic and development policy. Since then, state ownership and state intervention have increased worldwide. This volume offers a comparative analysis of the evolution of direct state intervention in the economy through state-owned companies in Austria, Brazil, France, Germany, Hungary, Poland, Turkey, Singapore, and Slovenia. Each case study includes substantial explanations of historical, cultural, and institutional contexts. All the contributors point to the complex nature of the current revival in state economic interventions. The few models that are successful cannot hide the potential problems of excessive state intervention, linked to high levels of moral hazard. State-owned enterprises are primary tools of market and price manipulation for political purposes. They can be used outright for rent seeking. Yet state-owned enterprises can also play important roles in prestigious national initiatives, like major public works or high-profile social and sports events. The authors conclude that after the uniform application of democratic market economic principles, the 2000s witnessed a path-dependent departure from standard economic and political operating procedures in developed countries.

The Classic Car Adventure

Driving Through History on the Road to Nostalgia

Casemate Publishers Nothing is new under the sun and classic cars books come and go. But here, instead of a heavy, large, glossy book of classic car images and details destined to stay on a shelf, is something new. This book is designed to be read as a companion, a book that can go in the car or on a 'plane, and which can be read in full, or dipped into anywhere for a classic car fix. Old stories and new details are presented and cover all eras of our cars. Gathered here is a compilation of the author's published and unpublished adventures and opinions about the design and the driving of some of the greatest cars in motoring history. From 'vintagent' to 'modern classic', pristine to oily-rag, up hill, down dale and across continents, award-winning motoring author, designer and serial classic car owner, Lance Cole, charts the great classic car enthusiasm in a series of engaging essays about cars, car design and the men that made the motor industry. From tales of Malcolm Sayer to Bedelia, and of BMW, Jaguar, Bugatti and Porsche, to tales of old Saabs and rusty Citroens, classic car life is here. Erik Carlsson, Jacques Gerin, Giovanni Michelotti and Innes Ireland are just a few of the names that can be found in these pages. From design to driving, here is a book that is a classic car adventure.

Rethinking EU Consumer Law

Routledge In Rethinking EU Consumer Law, the authors analyse the development of EU consumer law on the basis of a number of clear themes, which are then traced through specific areas. Recurring themes include the artificiality of the EU's consumer image, the problems created by the drive towards maximum harmonisation, and the unexpected effects EU Consumer Law has had on national law. The book argues that EU Consumer Law has the potential of enhancing the protecting of consumers throughout the EU and could offer a model for consumer law elsewhere in the world, but in order to unlock this potential, there needs to be a rethink with regard to the EU's approach to consumer law and policy.

The Legendary Custom Cars and Hot Rods of Gene Winfield

Motorbooks International Of all of the pioneering custom-car builders to come to prominence in the 1950s--Harry Westergard, George Barris, and Dean Jeffries, among others--one of the most prolific was a young man from Modesto, California, named Gene Winfield. Cutting his teeth in California's hopping postwar hot rod scene, Gene eventually gravitated toward custom cars, becoming one of the medium's preeminent and most-sought-after practitioners. For the first time, Gene's career is examined in this volume fully illustrated with photography from Gene's personal archive. Written by longtime Winfield employee David Grant, "The Legendary Hot Rods and Custom Cars of Gene Winfield" is culled from hours of interviews with Gene and recounts everything from his early days in Modesto and his first shop in a converted backyard chicken coop, to his role in forming the Century Toppers car club, his involvement in dry lakes and circle-track racing, the formation of Winfield's Custom Shop in 1955, and the impressive string of vehicles that followed. Cars featured include the Ford convertible that graced the second issue of Rod & Custom," the 1950 Solar Scene Mercury Coupe, the 1956 Mercury called Jade Idol, and the Ford King "T" that won the 1963 AMBR award, among dozens of others. Grant also delves into Winfield's involvement with model-maker AMT, movie and TV vehicles for such projects as The Man from U.N.C.L.E." and Get Smart," and reminisces from Winfield's contemporaries.
