NIKON SPEEDLIGHT HANDBOOK

FLASH TECHNIQUES FOR DIGITAL PHOTOGRAPHERS

Debunking the common misconception that a flash is only necessary in low-light situations, this DVD guide provides professional instruction on how to properly direct and shape light in order to marshal mood, shape, texture, and color to make photographs more

dynamic and visually interesting. Beginning with an introduction to the basic characteristics of light—the quality and diffusion of light, the direction of the light, and the color of the light—it goes on to discuss aperture, shutter speed, and ISO and their relation to Nikon flash systems. After teaching how to master these fundamentals, the DVD discusses how to use Nikon flashes, how to modify the light from flashes, and what subject matter looks good in different lighting situations.
