Faces of Lake Superior Northmont Pub Incorporated Start With Why How Great Leaders Inspire Everyone To Take Action Penguin UK *Simon Sinek's recent video on 'The Millennial Question' went viral with over 150 million views. Start with Why is a global bestseller and the TED Talk based on it is the third most watched of all time. Why are some people and organisations more inventive, pioneering and successful than others? And why are they able to repeat their success again and again? In business, it doesn't matter what you do, it matters WHY you do it. Start with Why analyses leaders like Martin Luther King Jr and Steve Jobs and discovers that they all think in the same way - they all started with why. Simon Sinek explains the framework needed for businesses to move past knowing what they do to how they do it, and then to ask the more important question-WHY? Why do we do what we do? Why do we exist? Learning to ask these questions can unlock the secret to inspirational business. Sinek explains what it truly takes to lead and inspire and how anyone can learn how to do it.* **Substance Abuse Inpatient and Outpatient Management for Every Clinician Springer** *This book is written for any clinician who encounters substance abuse in a patient and wonders what to do. Experts from a cross-section of specialties and health professions provide up-to-date, evidence-based guidance on how non-expert clinicians can recognize, understand, and approach the management of substance abuse in their patients. They detail the range of treatments available and whether and how they work. The central importance of using a carefully selected multimodal approach that is tailored to the individual patient is emphasized throughout and illustrated in case scenarios from actual clinical practice.* **Messages, Signs, and Meanings A Basic Textbook in Semiotics and Communication Canadian Scholars' Press** *Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads*

them to think critically about the world in which they live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms. The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages.

Cheap The High Cost of Discount Culture Penguin A myth-shattering investigation of the true cost of America's passion for finding a better bargain From the shuttered factories of the Rust Belt to the strip malls of the Sun Belt-and almost everywhere in between-America has been transformed by its relentless fixation on low price. This pervasive yet little- examined obsession with bargains is arguably the most powerful and devastating market force of our time, having fueled an excess of consumerism that blights our landscapes, escalates personal debt, lowers our standard of living, and even skews of our concept of time. Spotlighting the peculiar forces that drove Americans away from quality, durability, and craftsmanship and towards quantity, quantity, and more quantity, Ellen Ruppel Shell traces the rise of the bargain through our current big-box profusion to expose the astronomically high cost of cheap.

How To Watch Television NYU Press Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, How to Watch Television is designed to engender classroom discussion among television critics of all backgrounds.

Comeback The Fall & Rise of the American Automobile Industry Simon and Schuster *In Comeback, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.*

Twelve Years a Slave Prabhat Prakashan *"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."* -an excerpt

Enlisting Madison Avenue The Marketing Approach to Earning Popular Support in Theaters of Operation Rand Corporation *Virtually every action, message, and decision of a military force shapes the opinions of an indigenous population: strategic communication, treatment of civilians at vehicle checkpoints, and the accuracy or inaccuracy of aerial bombardment. Themes of U.S. goodwill mean little if its actions convey otherwise. Consequently, a unified message in both word and deed is fundamental to success. Business marketing practices provide a useful framework for improving U.S. military efforts to shape the attitudes and behaviors of local populations in a theater of operations as well as those of a broader, international audience. Enlisting Madison Avenue extracts lessons from these business practices and adapts them to U.S. military efforts, developing a unique approach to shaping that has the potential to improve military-civilian relations, the accuracy of media coverage of operations,*

communication of U.S. and coalition objectives, and the reputation of U.S. forces in theater and internationally. Foremost among these lessons are the concepts of branding, customer satisfaction, and segmentation of the target audience, all of which serve to maximize the impact and improve the outcome of U.S. shaping efforts. **Global Marketing, Global Edition Pearson Higher Ed** For undergraduate and graduate courses in global marketing The excitement, challenges, and controversies of global marketing. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and

modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

Dutch Paintings of the Seventeenth Century Oxford University Press, USA From the hardships of a long and arduous war with Spain, the seventeenth-century Dutch seem to have drawn strength and expressed pride in their unique social and cultural heritage, especially in their art. Arthur K. Wheelock Jr., the Gallery's curator of northern Baroque painting, has carefully studied the Gallery's collection by masters of the Golden Age of Dutch art--notably Cuyp, De Hooch, Rembrandt, Ruisdael, and Vermeer. The twenty-three paintings by Rembrandt and his school are elucidated by an essay on the question of attribution, while an appendix of artists' signatures amplifies and supports the author's wide-ranging discussions of this remarkably cohesive collection.
