IN BATTLE FOR PEACE

THE STORY OF MY 83RD BIRTHDAY

Oxford University Press W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, *In Battle for Peace* frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, *In Battle for Peace* remains today a powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.

NEURAL NETWORKS FOR BEGINNERS

AN EASY TEXTBOOK FOR MACHINE LEARNING FUNDAMENTALS TO GUIDE YOU IMPLEMENTING NEURAL NETWORKS WITH PYTHON AND DEEP LEARNING

Do you want to understand Neural Networks and learn everything about them but it looks like it is an exclusive club? Are you fascinated by Artificial Intelligence but you think that it would be too difficult for you to learn? If you think that Neural Networks and Artificial Intelligence are the present and, even more, the future of technology, and you want to be part of it... well you are in the right place, and you are looking at the right book. If you are reading these lines you have probably already noticed this: Artificial Intelligence is all around you. Your smartphone that suggests you the next word you want to type, your Netflix account that recommends you the series you may like or Spotify's personalised playlists. This is how machines are learning from you in everyday life. And these examples are only the surface of this technological revolution. Either if you want to start your own AI enterprise, to empower your business or to work in the greatest and most innovative companies, Artificial Intelligence is the future, and Neural Networks programming is the skill you want to have. The good news is that there is no exclusive club, you can easily (if you commit, of course) learn how to program and use neural networks, and to do that Neural

Networks for Beginners is the perfect way. In this book you will learn: The types and components of neural networks The smartest way to approach neural network programming Why Algorithms are your friends The "three Vs" of Big Data (plus two new Vs) How machine learning will help you making predictions The three most common problems with Neural Networks and how to overcome them Even if you don't know anything about programming, Neural Networks is the perfect place to start now. Still, if you already know about programming but not about how to do it in Artificial Intelligence, neural networks are the next thing you want to learn. And Neural Networks for Beginners is the best way to do it. Download Neural Network for Beginners now to get the best start for your journey to Artificial Intelligence. 308 CIRCUITS

Elektor International Media This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

TRAINING TO PROFICIENCY

UNDER FIRE WITH ARVN INFANTRY

MEMOIR OF A COMBAT ADVISOR IN VIETNAM, 1966-1967

McFarland From 1945 to 1973, more than 100,000 members of the U.S. military were advisors in Vietnam. Of these, 66,399 were combat advisors. Eleven were awarded the Medal of Honor, 378 were killed and 1393 were wounded. Combat advisors lived and fought with South Vietnamese combat units, advising on tactics and weapons and liaising with local U.S. military support. Bob Worthington's first tour (1966-1967) began with training at the Army Special Warfare School in unconventional warfare, Vietnamese culture and customs, advisor responsibilities and Vietnamese language. Once in-country, he acted as senior advisor to infantry defense forces and then an infantry mobile rapid reaction force. Worthington worked alongside ARVN forces, staging operations against Vietcong and North Vietnamese Army units, and coordinated actions with the U.S. Marines. He describes a night helicopter assault by a 320-man ARVN battalion against a 1,200-man NVA regiment. On another night, the Vietcong ceased fire while Worthington arranged a Marine helicopter to medevac a wounded baby.

JACK MCAFEGHAN

REFLECTIONS ON LIFE WITH MY MASTER

An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend. Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

BEACON TECHNOLOGIES

THE HITCHHIKER'S GUIDE TO THE BEACOSYSTEM

Apres Learn the key standards—iBeacon, Eddystone, Bluetooth 4.0, and AltBeacon—and how they work with other proximity technologies. Then build your understanding of the proximity framework and how to identify and deploy the best solutions for your own business, institutional, or consulting needs. Proximity technology—in particular, Bluetooth beacons—is a major source of business opportunity, and this book provides everything you need to know to architect a solution to capitalize on that opportunity. What You'll Learn Understand the disruptive implications of digital-physical convergence and the new applications it makes possible Review the key standards that solutions developers need to understand to capitalize on the business opportunity of proximity technology Discover the new phenomenon of beacon networks, which will be hugely significant in driving strategic decisions and creating wealth See other technologies in the proximity ecosystem catalyzed by and complementary to Bluetooth beacons, including visual light communication, magnetic resonance, and RFID Examine the Beacosystem framework for analyzing the proximity ecosystem Who This Book Is For Solutions architects of all types—venture capitalists, founders, CEOs, strategists, product managers, CTOs, business developers, and programmers Stephen Statler is a writer, public speaker, and consultant working in the beacon ecosystem. He trains and advises retailers, venue owners, VCs, as well as makers of beacon software and hardware, and is a thought leader in the beacosystem community. Previously he was the Senior Director for Strategy and Solutions Management at Qualcomm's Retail Solutions Division, helping to incubate Gimbal, one of the leading Bluetooth beacons in the market. He is also the CEO of Cause Based Solutions, creators of Give the Change, democratizing philanthropy, enabling non-profit supporters to donate the change from charity branded debit cards, and developer of The Good Traveler program. BUILDING WIRELESS SENSOR NETWORKS USING ARDUINO

Packt Publishing Ltd Leverage the powerful Arduino and XBee platforms to monitor and control your surroundings About This Book Build your own low-power, wireless network using ready-made Arduino and XBee hardware Create a complex project using the Arduino prototyping platform A guide that explains the concepts and builds upon them with the help of examples to form projects Who This Book Is For This book is targeted at embedded system developers and hobbyists who have some working knowledge of Arduino and who wish to extend their projects using wireless connectivity. What You Will Learn Interact with XBee boards using the XCTU program

on Windows, OS X, or Linux Make your Arduino boards communicate wirelessly, using XBee modules in the advanced API mode Centrally collect and store measured sensor data, in the cloud or your own database Connect the coordinator Arduino to the Internet and send data to web services Control your environment automatically, based on sensor input from your network Interact with off-the-shelf ZigBee Home Automation devices Make your devices battery-powered and let them sleep to get months or even years of battery life In Detail Arduino has been established as the de facto standard microcontroller programming platform, being used for one-off do-it-yourself projects as well as prototypes for actual products. By providing a myriad of libraries, the Arduino community has made it very easy to interact with pretty much any piece of hardware out there. XBee offers a great range of low-power wireless solutions that are easy to work with, by taking all of the complexity of wireless (mesh) networking out of your hands and letting you focus on what to send without worrying about the how. Building wireless sensor networks is cost-effective as well as efficient as it will be done with Arduino support. The book starts with a brief introduction to various wireless protocols, concepts, and the XBee hardware that enables their use. Then the book expands to explain the Arduino boards to you, letting them read and send sensor data, collect that data centrally, and then even control your home from the Internet. Moving further more advanced topics such as interacting through the standard Zigbee Home Automation protocol, or making your application power-efficient are covered. By the end of the book, you will have all the tools needed to build complete, real-world solutions. Style and approach A hands-on guide, featuring a single home automation project that can be built as described or with endless variations. Every step is illustrated with complete examples and screenshots, allowing you to build the examples swiftly.

NOVEL PLANT BIORESOURCES

APPLICATIONS IN FOOD, MEDICINE AND COSMETICS

John Wiley & Sons *Novel Plant Bioresources: Applications in Food, Medicine and Cosmetics* serves as the definitive source of information on under-utilized plant species, and fills a key niche in our understanding of the relationship of human beings with under-utilized plants. By covering applications in food, medicine and cosmetics, the book has a broad appeal. In a climate of growing awareness about the perils of biodiversity loss, the world is witnessing an unprecedented interest in novel plants, which are increasingly prized for their potential use in aromas, dyes, foods, medicines and cosmetics. This book highlights these plants and their uses. After an introductory section which sets the scene with an overview of the historical and legislative importance of under-utilized plants, the main four parts of the book are dedicated to the diverse potential application of novel plant bioresources in Food, Medicine, Ethnoveterinary Medicine and Cosmetics. Examples and contributors are drawn from Africa, Europe, the USA and Asia. The economic, social, and cultural aspects of under-utilized plant species are addressed, and the book provides a much needed boost to the on-going effort to focus attention on under-utilized plant species

and conservation initiatives. By focusing on novel plants and the agenda for sustainable utilization, *Novel Plant Bioresources* highlights key issues relevant to under-utilized plant genetic resources, and brings together international scholars on this important topic.

POLICE & SOCIETY

Oxford University Press, USA *The Third Edition of Police & Society* offers a comprehensive introduction to policing in the United States. Author Roy Roberg is joined by prominent policing scholars Kenneth Novak and Gary Cordner. Their thoroughly revised text is both descriptive and analytical in nature--covering the process of policing, police behavior, organization, operations, and historical perspectives. To adequately explain the complex nature of police operations in a democracy, the authors have integrated the most important theoretical foundations, research findings, and contemporary practices in a comprehensible, yet analytical, manner. Contemporary issues and future prospects of policing are fully addressed. The text features an emphasis on the relationship between the police and the community--as well as how this relationship has evolved over time. The impact of this evolution on current police practices, especially with respect to community policing and policing in the post-9/11 era, is explored. The new edition has been substantially updated and revised, with four new or significantly revised chapters: "Community Policing," "Legal Issues," "Higher Education," and "Contemporary and Emerging Issues." Importantly, new "Voices From the Field" boxes have been added to each chapter. Here, nationally known police officials provide their insights into contemporary police practices and problems in a thought-provoking format. Topics New to the Third Edition: * Police auditor systems * Early warning systems * New forms of police stressors * Officer safety and fatality reduction * Terrorism and post-9/11 policing * Globalization * Policing and the mentally ill * Search and seizure

* *Legal issues in interrogations* * *Civil liability* * *Contemporary performance measures* * *Racially biased policing/racial profiling* Topics significantly expanded from the last edition include: * *The role of the police in history* * *Broken windows* * *Community policing today* * *Police ethics and deviant behavior* * *Use of force, brutality, and oversight mechanisms* * *Women in policing* * *Police suicide* * *Responses to stress* * *Officer culture* * *Officer discretion* * *Police paramilitary units (PPUs)* * *Compstat and Quality of Life policing* * *Chicago and Madison updates* * *Job satisfaction and community policing* * *Directed patrols/crackdowns* * *Higher education, satisfaction, and discipline* * *Demographic changes in American society* * *Police technology* *Police & Society* also offers "Inside Policing" themed boxes which feature important research findings and brief descriptions of exemplary police programs and operations. The Third Edition also features an expanded glossary, with key terms at the beginning of each chapter. Ancillaries to enhance instruction include: * *An Interactive Student Study Guide on CD--included with each copy of the book* * *A revised, dedicated Website* * *All figures and tables in the text available in PowerPoint on CD*

PERSONOLOGY

Running Press Astrology is finally getting personal! From the best-selling author of *The Secret Language of Birthdays* comes a revolution in charting your horoscope based on both the date and time of your birth that makes all other horoscope books irrelevant. With his "Personology" system, Gary Goldschneider has created a unique method which divides each of the twelve signs into five sub-types-such as *Aquarius-Pisces Cusp*, *Pisces I*, *Pisces II*, *Pisces III*, and *Pisces-Aries Cusp*-thereby sub-dividing the astrological year into 48 personology periods. The precision this allows is far beyond anything available in any other astrology book and provides a groundbreaking new way for readers to look not only at their own lives, but their interactions with those around them. The book comes packed with easy-to-follow charts covering the sun, eight different planets, and, unique to this book, the rapid fluctuations of the moon for every year from 1900 through 2025. The result is an unprecedented level of precision, as well as a beautifully illustrated volume destined to become the one and only book horoscope readers will treasure for the next twenty years.

LAROUSSE WINE

Hachette UK An expert guide to wine from the publishers of Larousse Gastronomique. This completely new and updated edition offers wide-ranging coverage of the key wine-producing regions of the world, with particular reference to French vineyards. A short history and analysis of each region is followed by a survey of the types of wines produced, the specific properties that make the region unique, and the appellations of the area. New to this edition are more than 60 features on key wine producers around the world, affording a fascinating insight into what is involved in high-quality wine-making. Boxes and features throughout also cover a vast range of subjects such as how to read a wine label and whether to decant wine, through to organic wine-growing and bio-dynamics.

RECREATIONAL PILOT

Aviation Supplies & Academics The FAA'S concise Study aids for passing the checkride. The Practical Test Standards (PTS) series guides student pilots, flight instructors, and FAA-designated examiners through checkrides, the final test in acquiring a pilot license. Each PTS guide details the skill and knowledge that must be successfully demonstrated before an examiner can issue a certificate or rating. The knowledge requirements detail which subjects will be covered--which weather reports and forecasts candidates will be asked to analyze, which physiological conditions (such as dehydration, spatial disorientation, and hypoxia) candidates will need to discuss, and what kind of flight planning exercises will need to be demonstrated. The skill requirements include what kind of takeoff and landing must be performed, such as crosswind or short-field; how a steep turn should be executed, with specifics that include what bank angle and airspeed to use; and what areas will be tested on a continuous basis, such as the checklist usage, positive exchange of

flight controls, and crew resource management. The tolerances are defined so the candidates know what altitude, airspeed, headings, and banks must be maintained to complete each maneuver successfully. Each PTS guide lists the knowledge and experience prerequisites for a particular certificate or rating and provides background information and study and reference materials.
