Army, Navy, Air Force Journal & Register RIBA Journal Consolidated guidelines on HIV prevention, testing, treatment, service delivery and monitoring recommendations for a public health approach

World Health Organization These consolidated guidelines on HIV prevention, testing, treatment, service delivery and monitoring bring together existing and new clinical and programmatic recommendations across different ages, populations and settings, bringing together all relevant WHO guidance on HIV produced since 2016. It serves as an update to the previous edition of the consolidated guidelines on HIV. These guidelines continue to be structured along the continuum of HIV care. Information on new combination prevention approaches, HIV testing, ARV regimens and treatment monitoring are included. There is a new chapter on advanced HIV disease that integrates updated guidance on the management of important HIV comorbidities, including cryptococcal disease, histoplasmosis and tuberculosis. The chapter on general HIV care, contains a new section on palliative care and pain management, and up to date information on treatment of several neglected tropical diseases, such as visceral leishmaniasis and Buruli ulcer. New recommendations for screening and treating of cervical pre-cancer lesions in women living with HIV are also addressed in this chapter. Guidance on service delivery was expanded to help the implementation and strengthening the HIV care cascade. Importantly, this guidance emphasizes the need for differentiated approaches to care for people who are established on ART, such as reduced frequency of clinic visits, use of multi-month drug dispensing and implementation of community ART distribution. The adoption of these efficiencies is essential to improve the quality of care of people receiving treatment and reduce the burden on health facilities, particularly in resource limited settings.

Routledge Universal Design is Selwyn Goldsmith's new authoritative design manual, the successor to his internationally acclaimed Designing for the Disabled. A clear and concise design guide for practising and student architects, it describes and illustrates the differences there are between universal design and 'for the disabled' design. Universal Design presents detailed design guidance for architects in an easily referenced form. Covering both public buildings and private housing, it includes informative anthropometric data, along with illustrative examples of the planning of circulation spaces, sanitary facilities, car parking spaces and seating spaces for wheelchair users in cinemas and theatres. It is a valuable manual in enhancing understanding of the basic principles of 'universal design'. The aim - to encourage architects to extend the parameters of normal provision, by looking to go beyond the prescribed minimum design standards of the Part M building regulation, Access and facilities for disabled people. **Employment Gazette FRS 102 The Financial Reporting Standard Applicable in the UK and Republic of Ireland AJ Focus Architecture Today**
