## Dust Off

# Army Aeromedical Evacuation in Vietnam

*DIANE Publishing During a tour with The Historical Unit, U.S. Army Medical Dept., from 1974-1977, Peter Dorland, then a captain and a former Dust Off pilot in Vietnam, completed the basic research for this book and drafted a lengthy manuscript. In 1971, James Nanney, an editor at the U.S. Army Center of Military History conducted further research on Dust Off, reorganized and redrafted portions of the original manuscript, and added Chapter 4 and the Epilogue. Chapters include: the early years of medical evacuation, and the Korean War; birth of a tradition; the system matures; the pilot at work; from Tet 1968 to stand-down; statistics; doctrine and lessons learned; a historical perspective; and bibliography.*

## The Boat Repair Manual

*Taylor Pub This book opens with a maintenance survey to help identify likely problems and to guide the reader to the appropriate sepcialized sections. A chapter devoted to tools and techniques precedes the coverage of hull types.*

## Boating

## Personal Watercraft Safety

### Safety Study

### Zero Error Margin

### Airshow Display Flying Analysed

### Mighty Machines

## Questions and Answers

*Answers over two hundred questions about different kinds of machinery and vehicles, including steam trains, submarines, automobiles, trucks and diggers, aircrafts, and spacecrafts.*

## Aeronautical Engineering

*A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports (STAR) and International aerospace abstracts (IAA).*

### White Death.

### 400 Grundwörter.

## Aeronautical Engineering: A Cumulative Index to the 1984 Issues of the Continuing Bibliography

# Objective First Student's Book with Answers with CD-ROM

*Cambridge University Press* Third edition of the best-selling Cambridge English: First (FCE) course. The Student's Book contains fresh, updated texts and artwork that provide solid language development, lively class discussion and training in exams skills. The 24 topic-based units include examples from the Cambridge English Corpus to highlight common learner errors while vocabulary sections informed by the English Vocabulary Profile ensure that students are learning the most useful language required at this level. A phrasal verb list provides a handy reference for students. The interactive CD-ROM provides comprehensive extra practice of the language and topics covered in the book.

# Aeronautical Engineering: A Cumulative Index to a Continuing Bibliography

# The Biology of Sharks and Rays

*University of Chicago Press* The Biology of Sharks and Rays is a comprehensive resource on the biological and physiological characteristics of the cartilaginous fishes: sharks, rays, and chimaeras. In sixteen chapters, organized by theme, A. Peter Klimley covers a broad spectrum of topics, including taxonomy, morphology, ecology, and physiology. For example, he explains the body design of sharks and why the ridged, toothlike denticles that cover their entire bodies are present on only part of the rays' bodies and are absent from those of chimaeras. Another chapter explores the anatomy of the jaws and the role of the muscles and teeth in jaw extension, seizure, and handling of prey. The chapters are richly illustrated with pictures of sharks, diagrams of sensory organs, drawings of the body postures of sharks during threat and reproductive displays, and maps showing the extent of the species' foraging range and long-distance migrations. Each chapter commences with an anecdote from the author about his own personal experience with the topic, followed by thought-provoking questions and a list of recommended readings in the scientific literature. The book will be a useful textbook for advanced ichthyology students as well as an encyclopedic source for those seeking a greater understanding of these fascinating creatures.

# The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson

Springer Science & Business Media *The elasmobranch fishes include the living sharks, skates and rays that are important members of nearly all marine ecosystems. Their large size, secretive behavior, and wide-ranging habits make them difficult to observe in the field or to maintain in captivity. Consequently, little is known about their natural behavior and how it is mediated by their sensory systems. This volume is dedicated to the scientific contributions and memory of Donald Nelson, a pioneer in the study of shark behavior, sensory biology, and remote instrumentation. The two opening papers review Don Nelson's unique scientific accomplishments and provide insight into his strong bias towards study of animals in the field. These are followed by 14 scientific papers on elasmobranch behavior, sensory biology, and current monitoring technologies. The papers on elasmobranch sensory biology and behavior address questions on hearing, the lateral line, electroreception, the brain, orientation behavior, chemical irritants, feeding, and reproduction. The latter section of the volume presents papers on conventional tagging techniques, ultrasonic telemetry, physiological telemetry, remote monitoring techniques, archival tagging and satellite tagging. The intent of this volume is to familiarize both new and established scientists with the sensory biology and behavior of sharks and rays, and to encourage further behavioral research on these animals in their natural environment.*

## The First Immortal

Del Rey *When physician Benjamin Smith wakes up eighty-three years in the future--in the year 2071--after a cryonic sleep, he finds that although humankind has mastered cloning and eternal youth, emotional and ethical predicaments are still prevalent*

## This Time the World

## Airmen Against the Sea

# An Analysis of Sea Survival Experiences

*Airmen Against The Sea is the fourth in a series of ADTIC studies to determine how military personnel survived under meegency conditions in variaous parts of the world. Its predecessors, 999 Survived, Sun, Sand and Survival, and Down In the North, dealt with survival respectively in the Southwest pacific Tropics, in ther African Deserts, and in the Arctic. This study concerns survival at sea dn, like its predecessors, employs the topical approach. It is not a water survival manual, but is a factual report of what happened to men who bailed out or ditched at sea, and whose only refuge for days on end was a rubber lifeaft. Under such topical headings as bailout versus ditching, survival equipment, the lifeaft, food, hazards, injuries, morale, and many others, the experiences of the survivors themselves are emphasized. The result is a new and fresh insight into the problems of survival at sea which will eb of inteest to all those wh ofly over water, and of particular value to those concerned directly with rescue operations, with water survival training, and with the development of survival materiel.*

## The Cold War and Beyond

# Chronology of the United States Air Force, 1947-1997

Department of the Air Force *Air Force 50th Anniversary Commemorative Edition. Commemoratesthe golden anniversary of the establishment of the United States Air Force as an independent service. Presents a chronology of the events which shaped the Air force during the Cold War from 1947 to 1997.*

## The Art of Hand Sewing Leather

*Learn how to hand sew leather projects from master craftsman Al Stholman. Complete stitching instructions plus information on tools and materials needed to get started.*

## Ecotourism's Promise and Peril

# A Biological Evaluation

Springer *Intended as a guide for wildlife managers and ecotourism operators, as well as interested ecotourists, this book addresses the biological principles governing how ecotourism affects wildlife. The introductory chapters focus on four key*

responses to human visitation—behavioral, physiological, ecological, and evolutionary. Readers will discover ecotourism's effects on biodiversity in connection with various industries that are habitat or taxonomically specific: fish tourism (including both freshwater and marine), marine mammal tourism, the huge industry centered on terrestrial animals, and the well-studied industry of penguin tourism. Given that the costs and benefits of ecotourism cannot be meaningfully assessed without understanding the human context, particular attention is given to how ecotourism has been used as part of community development. In closing, the book synthesizes the current state of knowledge regarding best practices for reducing human impacts on wildlife. The final chapter highlights key research questions that must be addressed to provide more evidence-based guidelines and policy.

## Kawasaki 750 Air-Cooled Fours Owners Workshop Manual

### 1980-91

Haynes Manuals N. America, Incorporated Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer.

## Guidelines for Safe Recreational Water Environments: Coastal and fresh waters

World Health Organization The new guidelines are meant to protect public health, help evaluate development projects near freshwater and recreational sites and assess potential health aspects of recreational projects.

## Vulcan 607

Random House It was to be one of the most ambitious operations since 617 Squadron bounced their revolutionary bombs into the dams of the Ruhr Valley in 1943... When Argentine forces invaded the Falklands in the early hours of 2 April 1982, Britain's military chiefs were faced with a real-life Mission Impossible.

## Design of Fishways and Other Fish

# Facilities

CRC Press *This new edition of the best-selling book describes the main types of fishways and fish facilities used around the world to assist the passage of fish over dams and other obstructions to their migration. It also focuses on the protection of fish (mainly young fish) from the hazards encountered in their downstream migrations. The book brings together the type of knowledge and research needed to decide on the facility used as well as its design and operation. It emphasizes the need for both biologists and engineers to collaborate in the design and indicates in what fields such collaboration would benefit fisheries conservation in the future. This is the Second Edition of the only book to bring together all of these topics worldwide under one cover.*

# Boating Skills and Seamanship

# Tourists in Space

# A Practical Guide

Springer *Forget Hawaii or the Mediterranean. Soon - very soon - you'll be able to add a much more exotic stamp to your passport: space. How will you get there, what will the trip be like and how much training will you need? All you need to know is right here in this guide.
