## Greater Cincinnati Religious Peacemakers

Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original

religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

## Using Game Theory to Optimize the Pace of New

# Technology Adoption

Pearson Education “Many books discuss high-tech decision making, but this is the only book I know of that provides a systematic approach based on objective analysis.” —Matthew Scarpino, author of *Programming the Cell Processor*  
“This book offers a unique approach to analyzing business strategy that changes the focus and attitude to a lively and fun exercise of treating business strategy as a game.” —Dave Hendricksen, Architect, Thomson-Reuters **USE GAME THEORY TO SOLVE THE #1 PROBLEM THAT CAUSES NEW TECHNOLOGIES TO FAIL IN THE MARKETPLACE: LACK OF COORDINATION** Too many advanced technologies fail the test of adoption, at immense cost to their creators and investors. Why? Many new technologies are launched into complex ecosystems where hardware, software, and/or connectivity components must work together—for instance, next-generation gaming and video platforms that can only succeed if they offer attractive, compatible content. Often, users aren’t ready to give up existing systems, and content or connectivity providers aren’t ready to move away from existing markets. In either case, the real issue is a lack of coordination. Fortunately, coordination problems have specific, proven solutions, and *Winning the Hardware-Software Game* shows you exactly how to find them. Drawing on advanced ideas from game theory, economics, sociology, and business strategy, author Ruth D. Fisher presents a systematic framework for identifying, assessing, and resolving coordination problems among all the participants in a product ecosystem. Writing in plain, nontechnical, nonmathematical English, Dr. Fisher helps you discover specific steps that will prepare your customers and partners for successful adoption. Using these techniques, you can shape strategy, systematically reduce risk, and dramatically increase profitability. Topics covered in this book include: Discovering the forces that drive or delay adoption by users and content providers Understanding networks, network effects, switching costs, technology compatibility, and other crucial issues Speeding the pace of adoption, and getting to the “tipping point” sooner Clarifying and restructuring the incentives that motivate users and software providers Engineering new systems to maximize the likelihood of adoption Creating expectations of adoption and decreasing the relative value of older systems Learning from Apple Newton versus Palm Pilot, HD DVD versus Blu-Ray, and other significant technology battles Leveraging lock-in, path dependence, standardization, and first-mover advantage With so much at stake, *Winning the Hardware-Software Game* is a required resource for everyone concerned with new technology adoption—executives, strategists, R&D leaders, marketers, product managers, industry analysts, and investors alike.

# Komodo Dragons

## Biology and Conservation

Smithsonian Institution More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, “The species may well indeed survive in the wild for generations to come while countless other organisms are lost.”

## Ground-penetrating Radar and Magnetometry for Buried Landscape Analysis

**Springer This book presents the integrated use of magnetometry and ground-penetrating radar geophysical mapping to understand the human presence within buried archaeological landscapes. Ground-penetrating radar can be used to identify buried living surfaces, geological stratigraphy and the architectural remains of sites in three-dimensions. Magnetometry can produce images denoting differences on the composition of those materials, both anthropogenic and natural, but with more limited three-dimensional resolution. The integration of the two has a unique ability to**

resolve and interpret these buried materials, differentiated between the human-caused and natural layers, and place all buried features within historic landscapes. The final product of geophysical integration, along with some limited subsurface testing, produces a holistic analysis of human adaptations to, and modifications of, the ancient landscape. Examples are shown from sites in Roman Croatia and Britain, Medieval Ireland, Colonial Connecticut, and an Archaic site in the Colorado Rocky Mountains. These examples from very different environments, time periods and cultural groups illustrate how the integrated geophysical methodology can interpret, on a scale approaching many hectares, the ancient landscapes within which people lived.

### Time and Tide

Lucy Nash has just finished up her sophomore year of high school and is anticipating an uneventful summer at her rural Georgia home. . . that is, until a weird twist of fate and physics takes her on a trip back through time to the year 1975 with Cameron Hall, a boy her age whose own time is thirty years into her future. Cameron is hoping to stop a series of child disappearances, one of which deeply affected his family, and ends up teaming up with his accidental "passenger" to solve the crime. But despite their access to resources from the future, can two teenagers resolve a mystery that has remained a cold case for over sixty years. . . and what impact will their presence in the past have on their own lives - and their own futures?

## The Real Name of God

## Embracing the Full Essence of the Divine

Simon and Schuster **Reveals the real, whole name of God and its place within each of us • Explains how none of the God-names commonly used in the Bible is God's real name • Shows how the real name of God unites all religions from both West and East • Includes spiritual techniques, prayers, poems, and meditative chants to bring each of us into deep, personal, intimate, living relationship with God Of the many names of God commonly used in the Bible and other sacred literature, none is God's real name. Every God-name, including YHWH, reflects only one of God's many aspects, such as the loving creator, the militaristic authoritarian, or the all-knowing judge. None embodies the wholeness, the totality, the full Essence of God. Who then are we to speak to when we seek God? If you can't truly know something**

until you know its name, how can we truly know God? The culmination of years of translation research and etymological investigation, Rabbi Wayne Dosick's work digs through many layers of presumption and deeply ingrained beliefs to reveal the real name of God hiding in plain sight in the Bible: Anochi. He shows how this sacred name unites all religions--both of the West and the East. The name Anochi enables us to finally meet the whole, complete, real God--both the grand God of the vast universe and the God of breath, soul, and heart who dwells within each of us. This in-depth exploration of God's name includes spiritual techniques, poems, guided prayers, and meditative chants to bring each of us into personal, intimate, and purposeful relationship with God. By knowing the real name of God, we can affirm the connection to the Divine at the core of our being. We can touch the face of God that resides deep within us all.

## Moment Maker

### You Can Live Your Life or It Will Live You

Zondervan **How to Make Every Moment of Every Day Count** Every moment of every day, you have a choice to make. You can either let the minutes pass you by or you can claim them for what they are: opportunities to unlock the full depth of life's potential. For Carlos Whittaker, renowned blogger, musician and worship leader, and husband and dad, living deliberately is a way of life. Making moments that are significant, memorable, or impactful are a part of how he navigates each day, and it has forever changed the landscape of his story. In *Moment Maker*, Carlos explains his methodology for living intentionally and claiming moments that touch the lives of others, whether that be his family, his friends, his colleagues, or total strangers. Carlos isn't asking anyone to make a big investment in time, energy, or money. He is simply uncovering the investment of attention. You don't have to buy tickets to special events or orchestrate elaborate surprises. You just have to be aware—of your surroundings, the people you encounter, the things that interest those important to you, the opportunities that present themselves—and be prepared to seize those moments and see lives changed.
