ANTISTATIC SPRAYS

Independently Published Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

BLOWOUT!**SAL CASTRO AND THE CHICANO STRUGGLE FOR EDUCATIONAL JUSTICE**

Univ of North Carolina Press In March 1968, thousands of Chicano students walked out of their East Los Angeles high schools and middle schools to protest decades of inferior and discriminatory education in the so-called "Mexican Schools." During these historic walkouts, or "blowouts," the students were led by Sal Castro, a courageous and charismatic Mexican American teacher who encouraged the students to make their grievances public after school administrators and school board members failed to listen to them. The resulting blowouts sparked the beginning of the urban Chicano Movement of the late 1960s and early 1970s, the largest and most widespread civil rights protests by Mexican Americans in U.S. history. This fascinating testimonio, or oral history, transcribed and presented in Castro's voice by historian Mario T. Garcia, is a compelling, highly readable narrative of a young boy growing up in Los Angeles who made history by his leadership in the blowouts and in his career as a dedicated and committed teacher. Blowout! fills a major void in the history of the civil rights and Chicano movements of the 1960s, particularly the struggle for educational justice.

THE NUMINOUS LEGACY

MODERN COSMOLOGY AND RELIGION

Albatross PressLtd Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha

TEN DRUGS

HOW PLANTS, POWDERS, AND PILLS HAVE SHAPED THE HISTORY OF MEDICINE

Abrams "The stories are skillfully told and entirely entertaining . . . An expert, mostly feel-good book about modern medicine" from the award-winning author (Kirkus Reviews, starred review). Behind every landmark drug is a story. It could be an oddball researcher's genius insight, a catalyzing moment in geopolitical history, a new breakthrough technology, or an unexpected but welcome side effect discovered during clinical trials. Piece together these stories, as Thomas Hager does in this remarkable, century-spanning history, and you can trace the evolution of our culture and the practice of medicine. Beginning with opium, the "joy plant," which has been used for 10,000 years, Hager tells a captivating story of medicine. His subjects include the largely forgotten female pioneer who introduced smallpox inoculation to Britain, the infamous knockout drops, the first antibiotic, which saved countless lives, the first antipsychotic, which helped empty public mental hospitals, Viagra, statins, and the new frontier of monoclonal antibodies. This is a deep, wide-ranging, and wildly entertaining book. "[An] absorbing new book." —The New York Times Book Review "[A] well-written and engaging chronicle." —The Wall Street Journal "Lucidly informative and compulsively readable." —Publishers Weekly "Entertaining [and] insightful." —Booklist "Well-written, well-researched and fascinating to read Ten Drugs provides an insightful look at how drugs have shaped modern medical practices. Towards the end of the book Hager writes that he 'came away surprised by some of the things he had learned.' I had the very same reaction." —Penny Le Couteur, coauthor of Napoleon's Buttons: How 17 Molecules Changed History

THREE BY ECHENOZ

BIG BLONDES, PIANO, AND RUNNING

New Press, The A single volume that gathers together three of the most remarkable novels from Jean Echenoz, the "most distinctive French voice of his generation" (The Washington Post), Three by Echenoz demonstrates the award-winning author's extraordinary versatility and elegant yet playful style at its finest. "A parodic thriller sparkling with wit" (L'Humanité), Big Blondes probes our universal obsession with fame as a television documentary producer tries to track down a renowned singer who has mysteriously disappeared. A darkly comedic, noir-style tour de force, it finally answers the age-old question: do blondes have more fun? "Fluid, never forced...like a garment that fits beautifully even inside-out" (Elle), Piano brings Dante's Inferno to contemporary Paris, following Max Delmarc, a concert pianist suffering from paralyzing stage fright and alcoholism, as he meets his untimely death and descends through purgatory—part luxury hotel, part minimum-security prison—into a modern vision of hell. Running is "a small wonder of writing and humanity" (L'Express)—a portrait of the legendary Czech athlete Emil Zátopek, who became a national hero, winning three gold medals at the 1952 Helsinki Olympics even as he was compelled to face the unyielding realities of life under an authoritarian regime.

THE GREATEST GAME

Ever since humans became self-aware, we have struggled to find the meaning of life. The price we paid for becoming intelligent was to become painfully ignorant of the difference between good and evil. Adi, a 10-year-old boy, works together with two old philosophers as they try to unravel the prophecy of a promised King. With insatiable curiosity, Adi must work with the wise men as they rationalize with each other on why and how humans became intelligent. Together they attempt to answer some of the most profound questions related to existence. Does evolution end with human beings or is there an 'Overman' who can reach evolution's pinnacle? Will this Overman be able to define values for humankind? Centuries later a young boy promises his mother that he will always uphold the love that she has taught him. It is a promise that drowns him in the nectar of the gods. Krish grows up to be an engineer and joins a team of scientists as they try to create artificial consciousness in a machine. Krish soon realizes that he has a bigger fight on his hands. A fight to preserve love in a desolate world. His quest for true love ultimately leads him down a path where he comes face to face with a fearsome snake delivering a kiss of death. Humans have come a long way by questioning the nature of objects around us and pushing the limits of our intelligence, but it's now time that we ask the greatest question yet: when does intelligence transcend to become consciousness?
