VAT and Government Departments

Spiramus Press Ltd **VAT and Government Departments** is intended to be both a reference manual and a practical guide for those managing VAT in Government Departments, their advisers and key suppliers. Government Department VAT has recently been the subject of an HMRC consultation and review with new guidance published in 2015 (consolidated with revised NHS guidance), making this book timely. Public sector organisations must be registered for VAT where they engage in “economic activities”, especially where there is any competition with the private sector. There are special rules for Government Departments (and the NHS) under section 41 VAT Act 1994 known as the contracted-out services or COS rules (in relation to non-business activities) and Value Added Tax itself, governed by the VAT legislation (in relation to business activities). To understand VAT in a Government Department context it is essential to understand the fundamental duality in the tax in relation to the public sector. This is often overlooked and because in certain situations VAT can apparently be recovered in both contexts COS eligibility to recover and input tax entitlement on VAT incurred can be confused. Many of the areas covered in the text are complex in themselves and VAT and Government Departments does not attempt to examine all possibilities in all circumstances or to reproduce the full technical guidance or statute. The objective is to identify all of the issues in the tax relevant to Government Departments and in a logical analysis, explain these from a compliance perspective and in relation to the organisational activities of Government Departments (providing further references where appropriate if more detailed information is required). VAT & Government Departments is based on published HMRC and Treasury guidance and policy and on current case law and legislation in force as at 30th April 2015.

VAT and the NHS

A technical guide

Spiramus Press Ltd **VAT & the NHS** is both a reference manual and a practical guide to managing VAT in the NHS. The book provides a comprehensive overview of VAT in the context of the NHS. It does not assume that readers are specialists in either subject, which means it should have a wide appeal among finance staff within the NHS as well as general practitioner accountants and VAT consultants. The second edition of VAT & the NHS is based on published HMRC and HM Treasury guidance and policy and on current case law and legislation in force as at 30 June 2016 and is revised to include the recent structural changes in the NHS and developments arising from the Budget 2015 and 2016 (as well as the potential implications of Brexit). The book helps to identify all of the issues in the tax relevant to the NHS and in a logical analysis explain these from an NHS compliance perspective and in relation to the organisational activities of the NHS (providing further references where appropriate if more detailed information is required). For reference there is a Glossary of Terms, a list of Definitions and a list of References. “The book provides a comprehensive overview of VAT in the context of the NHS. It does not assume that readers are specialists in either subject, which means it should have a wide appeal among finance staff within the NHS as well as general practitioner accountants and VAT consultants. VAT and the NHS should help tax practitioners who act for clients affected by the continuing organisational change within the NHS. It is certainly a welcome addition to my own library.” Taxation magazine (on the first edition)

Boatowner's Mechanical and Electrical Manual

Repair and Improve Your Boat's Essential Systems

[Adlard Coles](#) This manual takes both novice and experienced boatowner through minor to major repairs of electrical systems, engines, electronics, steering systems, generators, pumps, cookers, spars and rigging. When it was first published in 1990, the Boatowner's Mechanical & Electrical Manual broke new ground. It was hailed as the first truly DIY manual for boatowners and has sold in its thousands ever since. There have been significant changes in boat systems since then, particularly electrical systems, and this fourth edition has been fully updated to reflect these developments and expand its predecessor's worldwide popularity. TOLLEYS VAT PLANNING 202122 PART OF THE

Tax By Design

The Mirrlees Review

[Oxford University Press](#) Based on the findings of a commission chaired by James Mirrlees, this volume presents a coherent picture of tax reform whose aim is to identify the characteristics of a good tax system for any open developed economy, assess the extent to which the UK tax system conforms to these ideals, and recommend how it might be reformed in that direction.

How to Manage Value-Added Tax Refunds

[International Monetary Fund](#) The value-added tax (VAT) has the potential to generate significant government revenue. Despite its intrinsic self-enforcement capacity, many tax administrations find it challenging to refund excess input credits, which is critical to a well-functioning VAT system. Improperly functioning VAT refund practices can have profound implications for fiscal policy and management, including inaccurate deficit measurement, spending overruns, poor budget credibility, impaired treasury operations, and arrears accumulation. This note addresses the following issues: (1) What are VAT refunds and why should they be managed properly? (2) What practices should be put in place (in tax policy, tax administration, budget and treasury management, debt, and fiscal statistics) to help manage key aspects of VAT refunds? For a refund mechanism to be credible, the tax administration must ensure that it is equipped with the strategies, processes, and abilities needed to identify VAT refund fraud. It must also be prepared to act quickly to combat such fraud/schemes.
