This conference was the second ECCOMAS thematic conference on computational vision and medical image processing. It covered topics related to image processing and analysis, medical imaging and computational modelling and simulation, considering their multidisciplinary nature. The book collects the state-of-the-art research, methods and new trends on the subject of computational vision and medical image processing contributing to the development of these knowledge areas.*

**Stress and Burnout Among Providers Caring for the Terminally Ill and Their Families** *Routledge Written primarily by individuals with hands-on hospice experience, this crucial volume identifies sources of stress among hospice workers and provides workers and managers with strategies to cope with those stressors. It is an enlightening examination of diverse theoretical perspectives and a much needed investigation on stress and burnout for hospice providers and caregivers. Readers*

will find concrete suggestions for the alleviation of stress and burnout in their work with the terminally ill, as well as theoretical and research discussions. The authors explore a wide range of subjects and problems faced by nurses, physicians, social workers, caregivers, hospice directors, and volunteers. They also discuss the many factors in hospice care that may foster unfavorable stress reactions and eventual burnout among hospice professionals. Current literature on job stress and burnout among those who care for the terminally ill is examined and a model of stress and burnout specific to hospice caregivers is presented. The authoritative chapters also identify theories of stress and burnout and the distinction between the two. Anyone who deals with chronic and terminal illness should read *Stress and Burnout Among Providers Caring for the Terminally Ill and Their Families*. Hospice caregivers and volunteers, social workers, clergy, and health care professionals who work with cancer, renal dialysis, and heart and stroke patients will appreciate the attention given to a subject that has received little study.

**Summaries of Research Abstracts Presented at the 36th Annual Scientific Meeting of the American Pain Society, Pittsburgh, Pennsylvania, May 17-20, 2017**

**Chicano Culture, Ecology, Politics** Subversive Kin *University of Arizona Press* Until recently, mainstream American environmentalism has been a predominantly white, middle-class movement, essentially ignoring the class, race, and gender dimensions of environmental politics. In this provocative collection of original essays, the environmental dimensions of the Chicana/o experience are explicitly expressed and debated. Employing a variety of genres ranging from poetry to autobiography to theoretical and empirical essays, the voices in this collection speak to the most significant issues of environmentalism and social justice, recognizing throughout the need for a pluralism of Chicana/o philosophies. The contributors provide an excellent basis for understanding how multiple Chicana/o views on the environment play out in the context of dominant social, political and economic views. *Chicano Culture, Ecology, Politics* examines a number of Chicana/o ecological perspectives. How can the ethics of reciprocity present in Chicana/o agropastoral life be protected and applied on a broader scale? How can the dominant society, whose economic structure is invested in "placeless mobility," take note of the harm caused to land-based cultures, take responsibility for it, and take heed before it is too late? Will the larger society be "ecologically housebroken" before it destroys its home? Grounded in actual political struggles waged by Chicana/o communities over issues of environmental destruction, cultural genocide, and socioeconomic domination, this volume provides an important series of snapshots of Chicana/o history. *Chicano Culture, Ecology, Politics* illuminates the bridges that exist—and must be understood—between race, ethnicity, class, gender, politics, and ecology.

**CONTENTS**

Part 1: IndoHispano Land Ethics

Los Animalitos: Culture, Ecology, and the Politics of Place in the Upper Río Grande, Devon G. Peña

Social Action Research, Bioregionalism, and the Upper Río Grande, Rubén O. Martínez
