MOON-FACE & OTHER STORIES

Lulu.com **MOON-FACE (Excerpt) John Claverhouse was a moon-faced man. You know the kind, cheek-bones wide apart, chin and forehead melting into the cheeks to complete the perfect round, and the nose, broad and pudgy, equidistant from the circumference, flattened against the very centre of the face like a dough-ball upon the ceiling. Perhaps that is why I hated him, for truly he had become an offense to my eyes, and I believed the earth to be cumbered with his presence. Perhaps my mother may have been superstitious of the moon and looked upon it over the wrong shoulder at the wrong time. Be that as it may, I hated John Claverhouse. Not that he had done me what society would consider a wrong or an ill turn. Far from it. The evil was of a deeper, subtler sort; so elusive, so intangible, as to defy clear, definite analysis in words. We all experience such things at some period in our lives. For the first time we see a certain individual, one who the very instant before we did not dream existed; and yet…**

GERMAN ARMY UNIFORMS OF WORLD WAR II

A PHOTOGRAPHIC GUIDE TO CLOTHING, INSIGNIA AND KIT

Bloomsbury Publishing **In the years after World War I, the defeated and much-reduced German Army developed new clothing and personal equipment that drew upon the lessons learned in the trenches. In place of the wide variety of uniforms and insignia that had been worn by the Imperial German Army, a standardized approach was followed, culminating in the uniform items introduced in the 1930s as the Nazi Party came to shape every aspect of German national life. The outbreak of war in 1939 prompted further adaptations and simplifications of uniforms and insignia, while the increasing use of camouflaged items and the accelerated pace of weapons development led to the appearance of new clothing and personal equipment. Medals and awards increased in number as the war went on, with grades being added for existing awards and new decorations introduced to reflect battlefield feats. Specialists such as mountain troops, tank crews and combat engineers were issued distinctive uniform items and kit, while the ever-expanding variety of fronts on which the German Army fought – from the North African desert to the Russian steppe – prompted the rapid development of clothing and equipment for different climates and conditions. In addition, severe shortages of raw materials and the demands of clothing and equipping an army that numbered in the millions forced the simplification of many items and the increasing use of substitute materials in their manufacture. In this fully illustrated book noted authority Dr Stephen Bull examines the German Army's wide range of uniforms, personal equipment, weapons, medals and awards, and offers a comprehensive guide to the transformation that the German Army soldier underwent In the period from September 1939 to May 1945.**

THE NUMINOUS LEGACY

MODERN COSMOLOGY AND RELIGION

Albatross PressLtd **Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha**

NEXT EXTINCT MAMMAL

Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.
