NETWORKED

THE NEW SOCIAL OPERATING SYSTEM

MIT Press *How social networks, the personalized Internet, and always-on mobile connectivity are transforming—and expanding—social life. Daily life is connected life, its rhythms driven by endless email pings and responses, the chimes and beeps of continually arriving text messages, tweets and retweets, Facebook updates, pictures and videos to post and discuss. Our perpetual connectedness gives us endless opportunities to be part of the give-and-take of networking. Some worry that this new environment makes us isolated and lonely. But in Networked, Lee Rainie and Barry Wellman show how the large, loosely knit social circles of networked individuals expand opportunities for learning, problem solving, decision making, and personal interaction. The new social operating system of “networked individualism” liberates us from the restrictions of tightly knit groups; it also requires us to develop networking skills and strategies, work on maintaining ties, and balance multiple overlapping networks. Rainie and Wellman outline the “triple revolution” that has brought on this transformation: the rise of social networking, the capacity of the Internet to empower individuals, and the always-on connectivity of mobile devices. Drawing on extensive evidence, they examine how the move to networked individualism has expanded personal relationships beyond households and neighborhoods; transformed work into less hierarchical, more team-driven enterprises; encouraged individuals to create and share content; and changed the way people obtain information. Rainie and Wellman guide us through the challenges and opportunities of living in the evolving world of networked individuals.*

VISUALISING FACEBOOK

A COMPARATIVE PERSPECTIVE

UCL Press *Since the growth of social media, human communication has become much more visual. This book presents a scholarly analysis of the images people post on a regular basis to Facebook. By including hundreds of examples, readers can see for themselves the differences between postings from a village north of London, and those from a small town in Trinidad. Why do women respond so differently to becoming a mother in England from the way they do in Trinidad? How are values such as carnival and suburbia expressed visually? Based on an examination of over 20,000 images, the authors argue that phenomena such as selfies and memes must be analysed in their local context. The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations, and explores the changing role of photography from that of recording and representation, to that of communication, where an image not only documents an experience but also enhances it, making the moment itself more exciting.*

DIGITAL ANTHROPOLOGY

Taylor & Francis *Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life. Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.*

GLOBALIZATION AND SOVEREIGNTY

BEYOND THE TERRITORIAL TRAP

Rowman & Littlefield *This provocative and important text offers a new way of thinking about sovereignty, both past and present. Distinguished geographer John Agnew boldly challenges the widely popular story that state sovereignty is in worldwide eclipse in the face of the overwhelming processes of globalization. He argues that this perception relies on ideas about sovereignty and globalization*

that are both overstated and misleading. Agnew contends that sovereignty-state control and authority over space is not necessarily neatly contained in state-by-state territories, nor has it ever been so. Yet the dominant image of globalization is the replacement of a territorialized world by one of networks and flows that know no borders other than those that define the Earth itself. In challenging this image, Agnew first traces the ways in which it has become commonplace. He then develops a new way of thinking about the geography of effective sovereignty and the various geographical forms in which sovereignty actually operates in the world, offering an exciting intellectual framework that breaks with the either/or thinking of state sovereignty versus globalization.

THE PARADOX OF LIBERATION

SECULAR REVOLUTIONS AND RELIGIOUS COUNTERREVOLUTIONS

Yale University Press Many of the successful campaigns for national liberation in the years following World War II were initially based on democratic and secular ideals. Once established, however, the newly independent nations had to deal with entirely unexpected religious fierceness. Michael Walzer, one of America's foremost political thinkers, examines this perplexing trend by studying India, Israel, and Algeria, three nations whose founding principles and institutions have been sharply attacked by three completely different groups of religious revivalists: Hindu militants, ultra-Orthodox Jews and messianic Zionists, and Islamic radicals. In his provocative, well-reasoned discussion, Walzer asks why these secular democratic movements have failed to sustain their hegemony: Why have they been unable to reproduce their political culture beyond one or two generations? In a postscript, he compares the difficulties of contemporary secularism to the successful establishment of secular politics in the early American republic—thereby making an argument for American exceptionalism but gravely noting that we may be less exceptional today.

WALLS

TRAVELS ALONG THE BARRICADES

Union Books DIV The world's walls are supposed to be coming down. We speak of globalization, international markets and global villages; barriers to trade keep falling, and it is now possible to communicate instantly from nearly anywhere in the world. But just as these virtual walls come down, real walls rise. In this evocative blend of travel writing, history and politics, Marcello Di Cintio visits the world's most disputed edges to meet those who live alongside the razor wire, concrete and steel. Along the way he shares tea with refugees on the wrong side of Morocco's desert wall; he encounters illegal immigrants circumventing high-tech fencing around the Spanish enclaves of Ceuta and Melilla; he walks Arizona's migrant trails, visits fenced-in villages in India, and stands with those who protest against Israel's security barrier to understand what these structures say about those who build them, and how they influence the cultures that they pen in. Venturing beyond politics, he encounters the infiltrators who circumvent the walls, the artists who transform them, and the fenced-in ignored and forgotten people who live in their shadow. The walls discussed are: 1. 'The Wall of Shame' in the Western Sahara, built by the Morrocans in 1987 following their defeat by the Spanish. 2. A high-tech 'fence' around the Spanish enclaves of Ceuta and Meilla. 3. The Indo Bangladesh 'fence', erected in 1947. 4. The West Bank Wall. 5. The 'green line' that separates the Greek from the Turkish-Cypriot quarters in Nicosia, the capital of Cypress, and Lefkosa, the capital of the Turkish Republic of Northern Cyprus. 6. The US-Mexico border. 7. The various barriers throughout Belfast. 8. The l'Acadie fence in Montreal, erected as a wall built of chains in 1960. /div

AMERICAN DIVERGENCES IN THE GREAT RECESSION

Routledge Globalization is quite different from internationalization: the by-now global market economy overwhelmed the sovereignty of the old national states. Close to the 2007 crisis, some de-coupling effects were consequent in most developed countries in comparison with the ex-Third World. Latin America seemed to entail a "divergence" with the First World, as unlike the past, it was not hit by the financial crisis, but old historical fragilities invalidated the short positive cycle produced by high international prices. This work deals with this crisis and its basic differences from the older crises of the Thirties and Seventies.

POLITICS AND FINANCE IN THE EUROPEAN UNION

THE REASONS FOR A DIFFICULT ENCOUNTER

CEDAM *The recent financial and sovereign debt crisis, while turning the spotlight into the degenerating effects of modern-day capitalism, has engendered a series of hard-to-control events that are severely testing the stability of the European institutions. The adjustments, to date, have proved unable to adequately tackle the financial turmoil that is undermining the construction of the EU. Hence the need to identify the reasons behind this situation, which is accompanied by the failure to achieve an osmosis between the member countries of the Union. The objective to be pursued is clarifying the uncertainties and contradictions within Europe, for the purpose of addressing what many see as a "systemic crisis".*

THE EVOLUTION OF CULTURE

THE DEVELOPMENT OF CIVILIZATION TO THE FALL OF ROME

Routledge *One of the major works of twentieth-century anthropological theory, written by one of the discipline's most important, complex, and controversial figures, has not been in print for several years. Now Evolution of Culture is again available in paperback, allowing today's generation of anthropologists new access to Leslie White's crucial contribution to the theory of cultural evolution. A new, substantial introduction by Robert Carneiro and Burton J. Brown assess White's historical importance and continuing influence in the discipline. White is credited with reintroducing evolution in a way that had a profound impact on our understanding of the relationship between technology, ecology, and culture in the development of civilizations. A materialist, he was particularly concerned with societies' ability to harness energy as an indicator of progress, and his empirical analysis of this equation covers a vast historical span. Fearlessly tackling the most fundamental questions of culture and society during the cold war, White was frequently a lightning rod both inside and outside the academy. His book will provoke equally potent debates today, and is a key component of any course or reading list in anthropological or archaeological theory and cultural ecology.*

THE LEGAL IMAGINATION

45TH ANNIVERSARY EDITION

Aspen Publishers *Revered for pioneering the law and literature movement, The Legal Imagination celebrates its 45th year of inspiring students and readers around the world. In this special Anniversary Edition, introduced with a new Foreword by author James Boyd White, the original, unabridged text has been carefully reproduced to challenge a new generation of readers to understand the language of the law through the prism of literature. The topics covered in The Legal Imagination are as eclectic as its readership, juxtaposing examples of legal writing alongside poetry, philosophy, and literary criticism. White frames thought-provoking discussions on topics that intersect both legal and non-legal discourse, like reading Edmund Burke's rhetoric alongside the homicidal persuasion of Lady Macbeth, or comparing elegiac poetry with the terminology of a final will and testament. White asks his readers not only to analyze legal and non-legal literature, but to consider the power of language, and how it can be reimagined. Excerpted authors include Fyodor Dostoevsky, Benjamin Cardozo, Albert Camus, Claude Lévi-Strauss, and Emily Dickinson. First published in 1973, The Legal Imagination broke convention and urged students to understand the law beyond memorization, encouraging readers "to trust and follow their own curiosity" and to come to terms with the nature and potential limits of legal language. It should be read not only by people of the law, but by anyone with an interest in language and power, and in writing as a way of thinking and creating. The book has a timeless quality. James Boyd White writes in the Foreword, "I think in fact that it may be of wider relevance now than when it was first published, for its central concern is with integrity--integrity of the law, of language, of the individual person--at a time when integrity itself sometimes seems to be threatened as a value."*

COMPARATIVE CORPORATE GOVERNANCE

A FUNCTIONAL AND INTERNATIONAL ANALYSIS

Cambridge University Press *The business corporation is one of the greatest organizational inventions, but it creates risks both for shareholders and for third parties. To mitigate these risks, legislators, judges, and corporate lawyers have tried to learn from foreign experiences and adapt their regulatory regimes to them. In the last three decades, this approach has led to a stream of corporate and capital market law reforms unseen before. Corporate governance, the system by which companies are directed and controlled, is today a key topic for legislation, practice, and academia all over the world. Corporate scandals and financial crises have repeatedly highlighted the need to better understand the economic, social, political, and legal determinants of corporate governance in individual countries. Comparative Corporate Governance furthers this goal by bringing together current scholarship in law and economics with the expertise of local corporate governance specialists from twenty-three countries.*

THE STATE OF ARCHITECTURE AT THE BEGINNING OF THE 21ST CENTURY

In March 2003, Bernard Tschumi convened forty of the world's leading architectural designers and theorists -- Elizabeth Diller, Peter Eisenman, Zaha Hadid, Steven Holl, Rem Koolhaas, Greg Lynn, Winy Maas, Thom Mayne, Ben van Berkel, Mark Wigley, Alejandro Zaera-Polo, and many others -- for a conference at Columbia University. The exceptional array was asked to predict the conversations and directions of architectural practice in the 21st century. Speakers addressed the categories of current architectural discourse -- form, aesthetics, material, detail, politics -- and questioned their future validity. Other topics included architects' obsession with the detail, the possibility of practicing a politics of material, the definition of an avant-garde urbanism, the importance of form beyond its aesthetic value, and whether architecture can directly influence the social world. The State of Architecture brings together manifestos, musings, and meditations to capture the key polemics raised by this extraordinary convocation of thinkers.
