#### CHARACTERISTIC CLASSES

---

*Princeton University Press* **The theory of characteristic classes provides a meeting ground for the various disciplines of differential topology, differential and algebraic geometry, cohomology, and fiber bundle theory. As such, it is a fundamental and an essential tool in the study of differentiable manifolds. In this volume, the authors provide a thorough introduction to characteristic classes, with detailed studies of Stiefel-Whitney classes, Chern classes, Pontrjagin classes, and the Euler class. Three appendices cover the basics of cohomology theory and the differential forms approach to characteristic classes, and provide an account of Bernoulli numbers. Based on lecture notes of John Milnor, which first appeared at Princeton University in 1957 and have been widely studied by graduate students of topology ever since, this published version has been completely revised and corrected.**

#### BOLOGNA (ITALY) - WINK TRAVEL GUIDE

---

Although it is well known by Italians, it is less so among foreign visitors. Bologna is the capital and largest city of Emilia-Romagna (a region in northern Italy). Bologna is famed for the oldest university in the Western world, lively student population, exquisite food, typical brick terracotta-roofed architecture and porticos, theatre and nightlife. It is considered second only to Venice in beauty by many Italians and certainly has one of the largest and best preserved historic centers among Italian cities. Its architecture is noted for its palette of terracotta reds, burnt oranges, and warm yellows, hence the name of Bologna la rossa (Bologna the red). Wink Travel Guides introduce you to the best world travel destinations, in a clear and concise way, illustrated by photos.

#### CHINA'S BUSINESS REFORMS

---

##### INSTITUTIONAL CHALLENGES IN A GLOBALISED ECONOMY

---

*Routledge* **China's recent economic reforms have led to impressive growth, and an unprecedented enthusiasm for establishing foreign enterprises in China. Since 1993, China has been the second largest recipient of foreign direct investment in the world and is now considered to be the world's third biggest economy. Its greater economic integration with the rest of the world, especially since its accession to the World Trade Organisation (WTO), has further accelerated its market-oriented economic reforms. China is now opening its protected markets and beginning to submit to the rule of international law. This ongoing transition and increasing participation in the world economy has resulted in significant changes in human resource management and social welfare practices in China's enterprises. The book examines the key areas, all of which are linked, where China is grappling with institutional reforms as it opens up to the outside world: state-owned enterprise reform, capital markets and financial reform, human resources and labour market reform, social welfare reform, and China's accession to the WTO and the growth of the private sector.**

##### ÉCOLE D'ÉTÉ DE PROBABILITÉS DE SAINT-FOUR XLII - 2012

---

*Springer* **Providing an elementary introduction to branching random walks, the main focus of these lecture notes is on the asymptotic properties of one-dimensional discrete-time supercritical branching random walks, and in particular, on extreme positions in each generation, as well as the evolution of these positions over time. Starting with the simple case of Galton-Watson trees, the text primarily concentrates on exploiting, in various contexts, the spinal structure of branching random walks. The notes end with some applications to biased random walks on trees.**

##### SEX AND IDENTITY IN 1 CORINTHIANS 5-7

---

*A&C Black* **Alistair May explores the part played by sexual ethics and the rhetoric of sexual morality in the formation of Christian identity by focusing on the longest discussion of sex in the New Testament - 1Corinthians 5-7. Viewing this passage as a unified discourse, he considers how Paul's ethics serve to give his converts a distinct identity. Although tools from the social sciences are used, the major focus of the work is in careful exegesis of the text. As the study progresses through the text of 1Corinthians 5-7, May argues that**

Paul strives to maintain an absolute distinction between insider and outsider in regard to morality. Immorality belongs exclusively to the outside and to the pre-conversion identity of the Corinthians. Hence those labelled immoral can no longer remain in the community. 1 Corinthians 6.12-20 reveals that, for Paul, sexual sin is unique in its destruction of Christian identity and that any sexual participation is a potential conflict with participation in Christ. Thus, chapter 6 is directly connected with the discussion of the legitimacy of marriage in 1Corinthians 7. Rejecting the scholarly consensus that Paul is reacting to ascetics, May controversially argues that chapter 7 should be read as Paul's commendation of singleness to a reluctant Corinthian audience. This is volume 278 in the Journal for the Study of the New Testament Supplement series.

## ASSUMING BOYCOTT

---

---

---

## RESISTANCE, AGENCY, AND CULTURAL PRODUCTION

---

*OR Books* Boycott and divestment are essential tools for activists around the globe. Today's organizers target museums, universities, corporations, and governments to curtail unethical sources of profit, discriminatory practices, or human rights violations. They leverage cultural production - and challenge its institutional supports - helping transform situations in the name of social justice. The refusal to participate in an oppressive system has long been one of the most powerful weapons in the organizer's arsenal. Since the days of the 19th century Irish land wars, when Irish tenant farmers defied the actions of Captain Charles Boycott and English landlords, "boycott" has been a method that's shown its effectiveness time and again. In the 20th century, it notably played central roles in the liberation of India and South Africa and the struggle for civil rights in the U.S.: the 1955 Montgomery bus boycott is generally seen as a turning point in the movement against segregation. Assuming Boycott is the essential reader for today's creative leaders and cultural practitioners, including original contributions by artists, scholars, activists, critics, curators and writers who examine the historical precedent of South Africa; the current cultural boycott of Israel; freedom of speech and self-censorship; and long-distance activism. Far from withdrawal or cynicism, boycott emerges as a productive tool of creative and productive engagement. Including essays by Nasser Abourahme, Ariella Azoulay, Tania Bruguera, Noura Erakat, Kareem Estefan, Mariam Ghani with Haig Aivazian, Nathan Gray and Ahmet Ögüt, Chelsea Haines, Sean Jacobs, Yazan Khalili, Carin Kuoni and Laura Raicovich, Svetlana Mintcheva, Naeem Mohaiemen, Hlonipha Mokoena, John Pepper, Joshua Simon, Ann Laura Stoler, Radhika Subramaniam, Eyal Weizman and Kareem Estefan, and Frank B. #### THE POLEMIC OF THE PASTORALS

---

#### A SOCIOLOGICAL EXAMINATION OF THE DEVELOPMENT OF PAULINE CHRISTIANITY

---

*Bloomsbury Publishing* Much historical-critical work on the opponents in the Pastoral Epistles has resulted in sweeping generalizations concerning their Jewish and/or Gnostic nature. Literary analyses have been somewhat more promising in focusing on the stereotypical nature of the polemic, but either fail to do justice to the urgency of the language in the Pastorals or do not provide a convincing description of the opponents. Here Pietersen approaches the problem of the opponents from a socio-scientific perspective. Utilizing labeling theory and social control theory from the sociology of deviance, he argues that the Pastorals function as a literary version of a status degradation ceremony whereby previously influential insiders within the community are transformed into outsiders.

#### FUNDAMENTALS OF CHEMICAL ENGINEERING THERMODYNAMICS

---

*Prentice Hall* The Clear, Well-Organized Introduction to Thermodynamics Theory and Calculations for All Chemical Engineering Undergraduate Students This text is designed to make thermodynamics far easier for undergraduate chemical engineering students to learn, and to help them perform thermodynamic calculations with confidence. Drawing on his award-winning courses at Penn State, Dr. Themis Matsoukas focuses on “why” as well as “how.” He offers extensive imagery to help students conceptualize the equations, illuminating thermodynamics with more than 100 figures, as well as 190 examples from within and beyond chemical engineering. Part I clearly introduces the laws of thermodynamics with applications to pure fluids. Part II extends thermodynamics to mixtures, emphasizing phase and chemical equilibrium. Throughout, Matsoukas focuses on topics that link tightly to other key areas of undergraduate chemical engineering, including separations, reactions, and capstone design. More than 300 end-of-chapter problems range from basic calculations to realistic environmental applications; these can be solved with any leading mathematical software. Coverage includes • Pure fluids, PVT behavior, and basic calculations of enthalpy and entropy • Fundamental relationships and the calculation of properties from equations of state • Thermodynamic analysis of chemical processes • Phase diagrams of binary and simple ternary systems • Thermodynamics of mixtures using equations of state • Ideal and nonideal solutions • Partial miscibility, solubility of gases and solids, osmotic processes • Reaction equilibrium with applications to single and multiphase reactions

*Robert Hale Limited* When a remote valley deep in East Africa is discovered, a handsome tribe, descended from the Queen of Sheba, is found living there. The Sultan of Zanzibar is keen to establish his presence. Tippu Tip, the Sultan's Machiavellian minister, orders a heavily armed expedition, led by the unwilling Captain Khalil, to seize the valley as a stepping-stone towards the sultan's ambition of ruling the whole of Africa. #### IRONY, OR, THE SELF-CRITICAL OPACITY OF POSTMODERN ARCHITECTURE

---

In this fascinating reassessment of postmodern architecture at the end of the 20th century, Emmanuel Petit addresses the role of irony and finds a vitality and depth of dialectics largely ignored by historical critiques. A look at five individual architects—Peter Eisenman (b. 1932), Arata Isozaki (b. 1931), Rem Koolhaas (b. 1944), Stanley Tigerman (b. 1930), and Robert Venturi (b. 1925)—reveals the beginning of a phenomenology of irony in architecture. As Petit explains, irony is manifested in the work of these architects as an aesthetic tool, as existential comedy, and as cultural satire. Petit frames his discussion between the destruction of two utopian structures by architect Minoru Yamasaki (1912-1986): the demolition of the Pruitt-Igoe housing complex in St. Louis in 1972 and the collapse of the World Trade Center in 2001. Meticulously researched and drawing widely from philosophy and literary criticism, Petit crafts a compelling case for the role of irony during a period when architects struggled to come to terms with significant contradictions within cultural modernity.
