**A Crucible Moment College Learning & Democracy's Future, a National Call to Action** This report from the National Task Force on Civic Learning and Democratic Engagement calls on the nation to reclaim higher education's civic mission. Commissioned by the Department of Education and released at a White House convening in January 2012, the report pushes back against a prevailing national dialogue that limits the mission of higher education to workforce preparation and training while marginalizing disciplines basic to democracy. It calls on educators and public leaders to advance a 21st century vision of college learning for all students, a vision with civic learning and democratic engagement an expected part of every student's college education. The report documents the nation's anemic civic health and includes recommendations for action that address campus culture, general education, and civic inquiry as part of major and career fields as well as hands on civic problem solving across differences. This report was prepared at the invitation of the U.S. Department of Education under the leadership of the Global Perspective Institute, Inc. (GPI) and AAC&U. It was developed with input from a series of national roundtables involving leaders from all parts of the higher education and civic renewal communities.

**Down to Earth Politics in the New Climatic Regime** *John Wiley & Sons* The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.

**Futures Thinking in Asia and the Pacific Why Foresight Matters for Policy Makers** *Asian Development Bank* Futures thinking and foresight is a powerful planning approach that can help Asia and the Pacific countries meet economic, political, social, and environmental and climate change challenges. This publication shows how the Asian Development Bank (ADB) piloted this approach to understand entry points to support transformational change in the region. It compiles lessons from an ADB initiative to apply futures and foresight tools in Armenia, Cambodia, Kazakhstan, Mongolia, the People's Republic of China, the Philippines, and Timor-Leste. Futures terminology is introduced as are specific tools such as emerging issues analysis, scenario planning, and backcasting. It also describes how futures and foresight tools were applied in the countries.

**Key Policies for Addressing the Social Determinants of Health and Health Inequities** *World Health Organization* Evidence indicates that actions within four main themes (early child development, fair employment and decent work, social protection, and the living environment) are likely to have the greatest impact on the social determinants of health and health inequities. A systematic search and analysis of recommendations and policy guidelines from intergovernmental organizations and international bodies identified practical policy options for action on social determinants within these four themes. Policy options focused on early childhood education and care; child poverty; investment strategies for an inclusive economy; active labour market programmes; working conditions; social cash transfers; affordable housing; and planning and regulatory mechanisms to improve air quality and mitigate climate change. Applying combinations of these policy options alongside effective governance for health equity should enable WHO European Region Member States to reduce health inequities and synergize efforts to achieve the United Nations Sustainable Development Goals.

**Department of Defense Dictionary of Military and Associated Terms The importance of teaching** *The Stationery Office* England's school system performs below its potential and can improve significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to determine their own development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government

will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand. Accountability for pupil performance is critical, and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

**Virtual Currencies and Beyond Initial Considerations** *International Monetary Fund* New technologies are driving transformational changes in the global financial system. Virtual currencies (VCs) and the underlying distributed ledger systems are among these. VCs offer many potential benefits, but also considerable risks. VCs could raise efficiency and in the long run strengthen financial inclusion. At the same time, VCs could be potential vehicles for money laundering, terrorist financing, tax evasion and fraud. While risks to the conduct of monetary policy seem less likely to arise at this stage given the very small scale of VCs, risks to financial stability may eventually emerge as the new technologies become more widely used. National authorities have begun to address these challenges and will need to calibrate regulation in a manner that appropriately addresses the risks without stifling innovation. As experience is gained, international standards and best practices could be considered to provide guidance on the most appropriate regulatory responses in different fields, thereby promoting harmonization and cooperation across jurisdictions.

**Bridging Occupational, Organizational and Public Health A Transdisciplinary Approach** *Springer Science & Business Media* In our complex, fast changing society, health is strongly influenced by the continuously changing interactions between organisations and their employees. Three major fields contribute to health-oriented improvements of these interactions: occupational health, organizational health and public health. As currently only partial links exist amongst these fields, the book aims to explore potential synergies more systematically. Considering the high mental and social demands in a service and knowledge sector economy, the first part of the book focuses on work-related psychosocial factors. As a large proportion of inequalities in health in developed countries can be explained by inequalities in working conditions, those psychosocial factors with a particularly high public health impact are highlighted. As addressing these psychosocial factors requires to involve the organization as the key change agent, the second part covers approaches to improve public health through organizational level health interventions. The last section takes a look into the future of occupational, organizational and public health: what are the future challenges regarding occupational health and how can they be tackled within and beyond the organizational level. Overall, this integrating book will help to broaden the evidence-base, legitimacy and efficacy of occupational- and organizational-level health interventions and thus increase their public health impact.

**The Spirit of Indian Nationalism Mental Capital and Wellbeing** *John Wiley & Sons* This major new reference presents The Foresight MentalCapital and Wellbeing Project (a UK Government project in the Government Office for Science). It offers a comprehensive exploration of how mental capital and wellbeing operate over the lifespan; how experiences in the family, in school, at work and following retirement augment or reduce mental capital and wellbeing, and the impact that this has for the individual and for the welfare and economic progress of the nation. Mental Capital and Wellbeing comprises a series of scientific reviews written by leading international scientists and social scientists in the field. The reviews undertake systematic analyses of the evidence base surrounding five key themes, on which they propose future policies will have to be based. An internationally renowned team of Editors introduce each theme and draw together conclusions in terms of both policy and practice. Section 1 (Mental Capital and Wellbeing Through Life) - Mental capital refers to the totality of an individual's cognitive and emotional resources, including their cognitive capability, flexibility and efficiency of learning, emotional intelligence and resilience in the face of stress. The extent of an individual's resources reflects his or her basic endowment (e.g. genes and early biological programming), motivation and experiences (e.g. education) which take place throughout the life course. This section presents the very latest on the science of mental capital throughout life. Section 2 (Learning Through Life) provides a coherent overview of a fast-moving and complex field of policy and practice. Educational attainment has a considerable impact on physical and mental wellbeing, both directly and indirectly, by enabling people better to achieve their goals. The ability to continue learning throughout the lifespan is critical to a successful and rewarding life in contemporary societies. Section 3 (Mental Health and Ill-Health) draws together the most recent evidence about positive mental health as well as a range of mental disorders to consider their importance to the population and economy in terms of prevalence and disability and the wider burden on society. Section 4 (Wellbeing and Work) - It is estimated that 13 million working days are lost through stress each year, costing the economy over £3.7 billion per annum. This theme explores those drivers that influence the nature and structure of work and the impact this has on employee wellbeing. Section 5 (Learning Difficulties) - This theme provides a cutting-edge picture of how recent insights from genetics, cognitive and neuroscience improve our understanding of learning difficulties such as dyslexia, dyscalculia and attention-deficit-hyperactivity disorder. Reviews focus on how current research can contribute to early diagnosis and improved intervention.

**Designing for Disabled Children and Children with Special Educational Needs Guidance**

**for Mainstream and Special Schools** *Stationery Office/Tso Building Bulletin 102* provides a framework for designing new school buildings for disabled children and children with special educational needs (SEN) within any setting, mainstream or special. The purpose of this title is to offer a strategic master plan and a carefully considered brief to ensure that the design takes on board the organisation, aims and priorities of the school. This bulletin sets out 'inclusive design principles' that should underpin every project for disabled children and those with SEN. Case studies and illustrated examples are provided to show how these design principles can be implemented. The central chapters are divided by phase of education, highlighting to local authorities and all those involved in the early stages of a project the key features when designing specific school spaces. Technical guidance follows, covering building construction, environmental services and the ICT needed to support children with SEN and disabilities. Supersedes and replaces Building bulletins 77, Designing for pupils with special educational needs (1992, ISBN 9780112707967), 91, Access for disabled people to school buildings (1999, ISBN 9780112710622) and 94, Inclusive school design (2001, ISBN 9780112711094).

**The Handbook of Communication Skills** *Routledge* The Handbook of Communication Skills is recognised as one of the core texts in the field of communication, offering a state-of-the-art overview of this rapidly evolving field of study. This comprehensively revised and updated fourth edition arrives at a time when the realm of interpersonal communication has attracted immense attention. Recent research showing the potency of communication skills for success in many walks of life has stimulated considerable interest in this area, both from academic researchers, and from practitioners whose day-to-day work is so dependent on effective social skills. Covering topics such as non-verbal behaviour, listening, negotiation and persuasion, the book situates communication in a range of different contexts, from interacting in groups to the counselling interview. Based on the core tenet that interpersonal communication can be conceptualised as a form of skilled activity, and including new chapters on cognitive behavioural therapy and coaching and mentoring, this new edition also places communication in context with advances in digital technology. The Handbook of Communication Skills represents the most significant single contribution to the literature in this domain. Providing a rich mine of information for the neophyte and practising professional, it is perfect for use in a variety of contexts, from theoretical mainstream communication modules on degree programmes to vocational courses in health, business and education. With contributions from an internationally renowned range of scholars, this is the definitive text for students, researchers and professionals alike.

**The Machine Gunners** *Nelson Thornes* It's 1940, and Britain is at war. Young Chas McGill has the second-best collection of war souvenirs in town, but desperately wants it to be the best. Amidst the bombs and air raids, Chas and his friends plan their own war effort in their newly built bunker. Friendships are forged and loyalties tested, in the adventure of a lifetime. Robert Westall's "The Machine Gunners" has been read, studied - and loved - by successive generations of younger readers. It won the Carnegie Medal and was voted one of the most important children's novels of the past seventy years. This thrilling stage adaptation comes from the award-winning playwright Ali Taylor, and premiered at the Polka Theatre, London. It provides rich opportunities for discussion in the classroom, and for staging by schools, youth theatres and amateur companies.

**Play for Health Delivering and Auditing Quality in Hospital Play Services** **What is Shadow Banking?** *International Monetary Fund* There is much confusion about what shadow banking is. Some equate it with securitization, others with non-traditional bank activities, and yet others with non-bank lending. Regardless, most think of shadow banking as activities that can create systemic risk. This paper proposes to describe shadow banking as "all financial activities, except traditional banking, which require a private or public backstop to operate". Backstops can come in the form of franchise value of a bank or insurance company, or in the form of a government guarantee. The need for a backstop is in our view a crucial feature of shadow banking, which distinguishes it from the "usual" intermediated capital market activities, such as custodians, hedge funds, leasing companies, etc.

**Intersectoral Governance for Health in All Policies Structures, Actions and Experiences** "Health 2020 is the new health policy framework of the WHO European Region. The policy aims at significantly improving the health and well-being of populations, reducing health inequalities, strengthening public health and ensuring sustainable people-centred health systems. Health 2020 is for the whole of government and the whole of society. It envisages actions and outcomes well beyond the boundaries of the health sector and beyond the remit of the ministry of health. Health 2020 therefore proposes reaching out and working together with other ministries, departments, sectors, organizations, stakeholders and civil society organizations. Health 2020 also proposes reaching out to, and working together with, citizens, patients and consumers, providing more opportunities for empowerment. Progress towards all these goals will be achieved by policy action in four areas: investing in health through a life-course approach and empowering

citizens; tackling Europe's major disease burdens of noncommunicable and communicable diseases; strengthening people-centred health systems and public health capacities, including preparedness and response capacity for dealing with emergencies; and creating supportive environments and resilient communities. This volume presents in a practical way an analysis of how to reach out and work together. It focuses and gives clear advice on intersectoral governance structures that can facilitate intersectoral action. It is hoped that the volume will help WHO Member States assess and revise their practices of intersectoral collaboration, and inspire new ways of reaching out and working together. We also hope that it will encourage the exchange of good practices between countries. The book was developed in parallel with Health 2020 and it has continuously informed the technical consultations with Member States and experts that have taken place over the last two years. It comes as part of a package of studies that has provided scientific background to the development of Health 2020, including a study on governance for health in the 21st century and a review of social determinants and the health divide, both of which also provide examples on how to implement whole-of-society and whole-of-government approaches."--P. [ix].

**Handbook on European Law Relating to Asylum, Borders and Immigration** The European Convention on Human Rights and European Union law provide an increasingly important framework for the protection of the rights of foreigners. European Union legislation relating to asylum, borders and immigration is developing fast. There is an impressive body of case law by the European Court of Human Rights relating in particular to Articles 3, 5, 8 and 13 of the ECHR. The Court of Justice of the European Union is increasingly asked to pronounce itself on the interpretation of European Union law provisions in this field. This handbook presents this European Union legislation and the body of case law by the two European courts in an accessible way. It is intended for legal practitioners, judges, prosecutors, immigration officials and nongovernmental organisations, in the EU and Council of Europe Member States.

**National Strategy for Pandemic Influenza Implementation Plan** Influenza viruses have threatened the health of animal and human populations for centuries. Their diversity and propensity for mutation have thwarted our efforts to develop both a universal vaccine and highly effective antiviral drugs. A pandemic occurs when a novel strain of influenza virus emerges that has the ability to infect and be passed between humans. Because humans have little immunity to the new virus, a worldwide epidemic, or pandemic, can ensue. Three human influenza pandemics occurred in the 20th century, each resulting in illness in approximately 30 percent of the world population and death in 0.2 percent to 2 percent of those infected. Using this historical information and current models of disease transmission, it is projected that a modern pandemic could lead to the deaths of 200,000 to 2 million people in the United States alone. The animal population serves as a reservoir for new influenza viruses. Scientists believe that avian, or bird, viruses played a role in the last three pandemics. The current concern for a pandemic arises from an unprecedented outbreak of H5N1 influenza in birds that began in 1997 and has spread across bird populations in Asia, Europe, and Africa. The virus has shown the ability to infect multiple species, including long-range migratory birds, pigs, cats, and humans. It is impossible to predict whether the H5N1 virus will lead to a pandemic, but history suggests that if it does not, another novel influenza virus will emerge at some point in the future and threaten an unprotected human population. The economic and societal disruption of an influenza pandemic could be significant. Absenteeism across multiple sectors related to personal illness, illness in family members, fear of contagion, or public health measures to limit contact with others could threaten the functioning of critical infrastructure, the movement of goods and services, and operation of institutions such as schools and universities.

**What Matters to Young Australians?** At a time where Australian democracy is under significant pressure, it is more important than ever to understand young people's views on social and political issues - and consider what they mean for governance and public policy. Since 2004, the Whitlam Institute within Western Sydney University has run a writing competition for Australian students posing the question What Matters? Since it began, more than 30,000 entries have been received. The Whitlam Institute has commissioned the authors to analyse writing submitted between 2010 - 2018. The aim of this work is to understand what young people are concerned with, how they conceptualise different issues, if and how those issues and concerns are changing over time, and what they reveal about the contemporary politics of young people.
