Educating Science Teachers for Sustainability Springer This volume contains a unique compilation of research and reflections representing multiple vantage points stemming from different parts of the world that can help science educators and teacher educators in finding ways to meaningfully and purposefully embed sustainability into teaching and learning. It is a rich resource for exploring and contextualizing sustainability-oriented science education. At this time we find ourselves in a situation in which the earth's ecological system is under significant strain as a result of human activity. In the developed world people are asking "How can we maintain our current standard of living?" while those in the developing world are asking "How can we increase the quality of our lives?" all while trying to do what is necessary to mitigate the environmental problems. This volume responds to these questions with a focus on educating for sustainability, including historical and philosophical analyses, and pedagogical and practical applications in the context of science teacher preparation. Included are many examples of ways to educate science teachers for sustainability from authors across the globe. This text argues that issues of sustainability are increasingly important to our natural world, built world, national and international economics and of course the political world. The ideas presented in the book provide examples for original, effective and necessary changes for envisioning educating science teachers for sustainability that will inform policy makers. **Questions and answers for job interview Offshore Oil & Gas Platforms** Petrogav International The job interview is probably the most important step you will take in your job search journey. With the fast development of the Internet, we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm, which locates people at the very centre of networks and exploits the value of people's connections, relations and collaboration. Social networks are also playing a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, virtual communities and organizations strongly leverage intelligent networking and collaborative systems by a great variety of formal and informal electronic relations, such as business-to-business, peer-to-peer and many types of online collaborative learning interactions, including the emerging e-learning systems. This has resulted in entangled systems that need to be managed efficiently and in an autonomous way. In addition, latest and powerful technologies based on grid and wireless infrastructure as well as cloud computing are currently enhancing collaborative and networking applications a great deal but also facing new issues and challenges. The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and, at longer-term, the development of adaptive, secure, mobile and intuitive intelligent systems for collaborative work and learning. **Design, Implementation, and Evaluation of Virtual Learning Environments** IGI Global "This book highlights invaluable research covering the design, development, and evaluation of online learning environments, examining the role of technology enhanced learning in this emerging area"--Provided by publisher.-- **NTA-UGC NET Psychology Subject Ebook-PDF Objective Questions From Various Similar Competitive Exams** Chandresh Agrawal SGN.The Ebook NTA-UGC NET Psychology Subject Covers Objective Questions From Various Similar Competitive Exams. **Biological Psychology** Learning Matters This accessible introductory text addresses the core knowledge domain of biological psychology, with focused coverage of the central concepts, research and debates in this key area. In Effective Knowledge Management For Law Firms, Matthew Parsons expertly fills this gap by drawing on his work with a leading commercial law firm, Mallesons Stephen Jaques. He examines how law firms can implement a knowledge strategy to support their business strategy, rather than getting beguiled by fads and technology. Parsons first outlines the terrain, including what knowledge management means, the business and economics of law firms, and how lawyers work as knowledge workers. He then introduces a methodology for creating and implementing law firm knowledge strategy, which combines for the first time the interrelated aspects of recruiting, training, research, document production, information management, and digital knowledge strategy. Parsons goes beyond theories to provide detailed, practical help for the analysis, implementation, and measurement of performance-increasing initiatives. This book will be an invaluable resource for all those involved with the management and leadership of law firms and knowledge management initiatives.* **Architectural Drafting and Design** Cengage Learning *ARCHITECTURAL DRAFTING AND DESIGN, Seventh Edition, is the definitive text for beginning, intermediate, or advanced architectural CAD operators. This full-color, comprehensive edition covers the basics of residential design while exploring numerous types of projects that a designer or architect is likely to complete during the design process. ICHL 2009 was an inventive experience for the Hong Kong and Macau tertiary higher education. The conference aims to provide a good platform for knowledge exchange on hybrid learning by focusing on student centered education. The technique is to supplement traditional classroom learning with eLearning. The slogan is "Education leads eLearning," not vice versa. The me- odology is that at least 30% of learning activities are done by eLearning. The outcome is for students to learn at any time at any place. eLearning can increase students' lea- ing productivity and reduce teachers' administration workload alike. It is a new culture for students, teachers and school administrators to adopt in the twenty-first century. The conference obtained sponsorship from Pei Hua Education Foundation Limited, City University of Hong Kong, ACM Hong Kong Section, and Hong Kong Computer Society. Hybrid learning originated from North America in 2000, and is an ongoing trend. It is not merely a simple combination of direct teaching and eLearning. It encompasses different learning strategies and important elements for teaching and learning. It - phasizes outcome-based teaching and learning, and provides an environment for knowledge learning. Students are given more opportunities to be active learners and practice practical skills such as communication, collaboration, critical thinking, cr- tivity, self-management, self-study, problem solving, analysis and numeracy.* **The Official DVSA Guide to Learning to Drive** *The official guide which explains the standards required to pass today's practical driving test.
