Yet, despite unprecedented health care spending, the U.S. health system is substantially underperforming, especially with respect to what should be possible, given current knowledge. Although the United States is currently devoting 18% of its Gross Domestic Product to delivering medical care, more than \$3 trillion annually and nearly double the expenditure of other advanced industrialized countries, the U.S. health system ranked only 37th in performance in a World Health Organization assessment of member nations. In *Vital Directions for Health & Health Care: An Initiative of the National Academy of Medicine*, the U.S. National Academy of Medicine (NAM, formerly the Institute of Medicine), which has long stood as the nation's most trusted independent source of guidance in health, health care, and biomedical science, has marshaled the wisdom of more than 150 of the nation's best researchers and health policy experts to assess opportunities for substantially improving the health and well-being of Americans, the quality of care delivered, and the contributions of science and technology. This publication identifies practical and affordable steps that can and must be taken across eight action and infrastructure priorities, ranging from paying for value and connecting care, to measuring what matters most and accelerating the capture of real-world evidence. work with the devotion of a Steinitz? At what age should study begin? What toll does age take, and when does it begin? Development of the performance data, covering hundreds of years and thousands of players, has revealed a fresh and exciting version of chess history. One of the many tables identifies 500 all-time chess great personal data and top lifetime performance ratings. Just what does government assistance do for chess? What is the Soviet secret? What can we learn from the Icelanders? Why did the small city of Plovdiv produce three Grandmasters in only ten years? Who are the untitled dead? Did Euwe take the championship from Alekhine on a fluke? How would Fischer fare against Morphy in a ten-wins match? It was inevitable that this fascinating story be written, ' asserts FIDE President Max Euwe, who introduces the book and recognizes the major part played by ratings in today's burgeoning international activity. Among the issues raised and examined are the following: · payment of adverse costs; · "Before-the-Event" (BTE) and "After-the-Event" (ATE) insurance; · attorney financing; pro bono representation, contingency representation, conditional fee arrangements; · loans; · ethical doctrines affecting the third-party funding industry; · possible future bundling, securitization, and trading of legal claims; · risk that the funder may put its own interests ahead of the client's interests; and · whether the existence of a funding agreement must or should be disclosed to the decision maker. The second edition also includes discussion of recent institutional developments as they relate to third-party funding, including the work of the ICCA-Queen Mary Task Force on Third-Party Funding and how third-party funding is being incorporated into arbitral rules and investment treaties.
