Public Management as a Design-Oriented Professional Discipline [Edward Elgar Publishing](#) **While public management has become widely spoken of, its identity and character is not well-defined. Such disparity is an underlying problem in developing public management within academia, and in the eyes of practitioners. In this book, Michael Barzelay tackles the challenge of making public management into a true professional discipline. Barzelay argues that public management needs to integrate contrasting conceptions of professional practice. By pressing forward an expansive idea of design in public management, Barzelay formulates a fresh vision of public management in practice and outlines its implications for research, curriculum development and disciplinary identity. We are living in an era of digitization thus moving towards a digital government. The use of ICT in public-administration is beneficial and it is not mere a coincidence that the top 10 countries in e-government implementation (according to UN E-Government Survey 2016) are flourishing democracies. There has been a sharp rise in the number of countries using e-government to provide public services online through one stop-platform. According to the 2016 survey, 90 countries now offer one or more single entry portal on public information or online services, or both and 148 countries provide at-least one form of online transaction services. More and more countries are making efforts through e-government to ensure and increase inclusiveness, effectiveness, accountability and transparency in their public institutions. Across the globe, data for public information and security is being opened up. The 2016 survey shows that 128 countries now provide data-sets on government spending in machine readable formats. E-government and innovation seems to have provided significant opportunities to transform public administration into an instrument of sustainable development. The governments around the globe are rapidly transforming. The use of information and communication technology in public administration - combined with organizational change and new skills- seems to be improving public services and democratic processes and strengthening support to public policies. There has been an increased effort to utilize advanced electronic and mobile services that benefits all. Fixed and wireless broadband subscriptions have increased unevenly across regions, with Europe leading, but Africa still lagging behind. We have to focus on these substantial region disparities and growing divide. All countries agreed, in SDG 9, that a major effort is required to ensure universal access to internet in the least developed countries. The rise of Social media and its easy access seems to have enabled an increasing number of countries moving towards participatory decision making, in

which developed European countries are among the top 50 performers. But, the issues of diminishing collective thinking and rising Individual thinking are some rising issues that we will have to deal with in the future. There are more sensitive issues like the new classification of citizens into literate-illiterate, e-literate and e-illiterate, that the governments need to look upon. It is a good sign that many developing countries are making good progress. Enhanced e-participation can support the realization of the SDGs by enabling more participatory decision making, but the success of e-government will ultimately depend upon our ability and capability to solve the contrasting issues raised due to this transition with sensitivity. In this issue of SOCRATES we have discussed, this new era of Digital Government. We have focused on what we have learned from the past and the future we want. From discussions on the role of e-governance within the local government settings in a modern democratic state to the experience of an academia with online examination, we have tried to include every possible aspect of e-government. Paper authored by Dr. Hoff Maarten, aims to outline the role of e-governance within the setting of a local government in a modern democratic state. It is agreed that a local governmental organization needs to be fit for the purpose of serving its citizens. Fits can be tested both through universally acknowledged principles, and drivers that suit modern on-demand organizations. Paper authored by Mr. Alsaeed Abraheem and Dr. Carl, proposes a conceptual framework which captures the main factors (both enablers and barriers) influence and contributes toward a successful implementation of eServices in countries that have unstable status. The paper draws upon Osborn and Gaebler's work, 'reinventing government', which identifies 10 principles of government transformation. This is used to examine eGov examples in the case of Syria along with previous work covering barriers and enablers to eGov activities within countries that have unstable status. The resulting derived conceptual framework provides a base to understand eGov activity for nations going through geopolitical uncertainty. Paper authored by Mr. Saurabh Chandra highlights the initiatives taken by the Governments in India at various levels to modernise their processes and functions for delivery of information and services to the citizens, using the Information and Communication technology [ICT]. It also highlights E-Government uptake in different parts of the world, highlighting its need in India, as in developing countries like India, there is no comprehensive data on actual e-government uptake on a global scale. Paper authored by Mr. Peter Asare-Nuamah and Mr. Darko Emmanuel Agyepong highlights the various legal policies and framework that support e-governance in Ghana as well as the challenges of implementing e-governance initiatives. The findings of the study indicate that several polices and frameworks support e-governance in Ghana but their implementations are burdened with social, cultural, political and legal constraints. The study provides some recommendations that are necessary to tackle the challenges of e-governance implementation. Paper authored by Mr. Ojo Patrick highlights battling sub-Saharan African

countries. The perspective in this paper is that the emergence of democratic governments in this region occurred through lopsided process which impacts on their governance structures. Consequently, the institutionalization of liberal democracy has been omitted; the absence of which creates gaps between aspiration for and struggle by African people for democracy on the one hand, and the actual performance of democratic governments on the other hand. The paper identifies structural deficiencies in the current pattern of governance as the political missing link in the value chain between democracy and development in the region. The paper recommends e-governance; an administrative process that guarantees good governance through accountability and transparency, as the necessary connecting link and panacea to bridging the observable existing gaps. Paper authored by Dr. Nandita Kaushal highlights the Plausibility of E-Governance as a Public Service Delivery Mechanism in India. It argues that there is no doubt, wherever e-governance projects have been conceived, designed and implemented with due regard to the needs of the people there positive outcomes have been visible. However, it has to be acknowledged that most of the projects are facing multiple challenges which are reducing their success rate. It recommends serious consideration to all the issues which are hampering their efficiency. At the same time it suggests measures that must be taken up to maintain the human face of these initiatives. Paper authored by Dr. Inderjeet Singh Sodhi reviews the achievements and progress of e-government in India. The paper briefly discusses various e-government projects in India. The purpose of the paper is to delve into policy and issue of the government of India in making e-government accessible to the common person. It briefly identifies the strategic issues for achievement of e-government. This paper derives a list of key strategic factors that are appropriate for planning, designing, development and implementation of e-government. The paper identifies the range of diverse problems, challenges and barriers planners and developers must face as they work in the e-government projects. The paper discusses prospects and future of e-government in India. The paper highlights the role of government to develop richer and deeper understanding of e-government. Paper authored by Ms. Shreyasi Ghosh attempts to trace the essence of e-government in the modern era of Indian Public Administration today as another new paradigm shift is in the offspring and slowly becoming distinct from the amorphous shape of Public Administration in the Indian context with the ICT-blessed governance, or e-Governance. Paper authored by Ms. Stuti Saxena probes the OGD platform using a qualitative and quantitative lens. This paper shows that OGD usage is popular among the end-users in terms of the number of views and downloads of the datasets. Future research might undertake the empirical investigation of the research hypotheses advanced in the paper. Paper authored by Dr. Jyotirmoy W. Singh is developed by a contributor who has been a national and International online examiner for past six or more years. This paper is based on his experience. It seeks to compare the traditional mode of examination with that of the online

examination in citing the mode of High School Leaving Examination of Board of Secondary Education Manipur and International Baccalaureate Organisation (IBO) examination as case studies. I wish scholars and potential readers will find this issue useful. We will bring more special issues focused on e-government and other various dimensions of governance in the near future. Corporal Punishment in U.S. Public Schools Legal Precedents, Current Practices, and Future Policy [Springer](#) This Brief reviews the past, present, and future use of school corporal punishment in the United States, a practice that remains legal in 19 states as it is constitutionally permitted according to the U.S. Supreme Court. As a result of school corporal punishment, nearly 200,000 children are paddled in schools each year. Most Americans are unaware of this fact or the physical injuries sustained by countless school children who are hit with objects by school personnel in the name of discipline. Therefore, **Corporal Punishment in U.S. Public Schools** begins by summarizing the legal basis for school corporal punishment and trends in Americans' attitudes about it. It then presents trends in the use of school corporal punishment in the United States over time to establish its past and current prevalence. It then discusses what is known about the effects of school corporal punishment on children, though with so little research on this topic, much of the relevant literature is focused on parents' use of corporal punishment with their children. It also provides results from a policy analysis that examines the effect of state-level school corporal punishment bans on trends in juvenile crime. It concludes by discussing potential legal, policy, and advocacy avenues for abolition of school corporal punishment at the state and federal levels as well as summarizing how school corporal punishment is being used and what its potential implications are for thousands of individual students and for the society at large. As school corporal punishment becomes more and more regulated at the state level, **Corporal Punishment in U.S. Public Schools** serves an essential guide for policymakers and advocates across the country as well as for researchers, scientist-practitioners, and graduate students.

Governance Framework For a New Africa [Exceller Books](#) The book is bringing to fore new ways and approaches to governance in Africa and it underscores what politics can do in realizing this to modern states, including those in Africa. It captures the beyond 21st Century moment for Africa in lieu of the vast resources associated with the continent. The questions asked pertinently in the book include; What should a new Africa (same resources, same methods of governance, recycled leadership, Western leaning academicians, same traditional export-import trade) entail? The authors yearn for good agricultural forms, profitable business models, seeing ills and rectifying them, and dealing with power dispositions responsibly.

The Future of Public Administration around the World [The Minnowbrook Perspective](#) [Georgetown University Press](#) A once-in-a-generation event held every twenty years, the Minnowbrook conference brings together the top scholars in public

administration and public management to reflect on the state of the field and its future. This unique volume brings together a group of distinguished authors—both seasoned and new—for a rare critical examination of the field of public administration yesterday, today, and tomorrow. The book begins by examining the ideas of previous Minnowbrook conferences, such as relevance and change, which are reflective of the 1960s and 1980s. It then moves beyond old Minnowbrook concepts to focus on public administration challenges of the future: globalism, twenty-first century collaborative governance, the role of information technology in governance, deliberative democracy and public participation, the organization of the future, and teaching the next generation of leaders. The book ends by coming full circle to examine the current challenge of remaining relevant. There is no other book like this—nor is there ever likely to be another—in print. Simply put, the ideas, concepts, and spirit of Minnowbrook are one-of-a-kind. This book captures the soul of public administration past, present, and future, and is a must-read for anyone serious about the theory and practice of public administration. Foundations for Public Administration Science in the 21st Century INAP This book is About the Science of Public Administration about what we know and what we need to know about it, as well as what we can do to make science more useful to the state and society. The disarticulation between the Science of Public Administration and the administrative practice of the XXI century causes that the public administrator does not have the theoretical elements and the sufficient tools for the efficient and effective treatment of public affairs. The administration Public and its science have to be rethought not only from their inheritance, but also from their potential to provide intellectual tools and practices that increase public capacity. That is, make a stronger, smarter and more efficient state, which can only be achieved with a solid and useful body of knowledge. From the detailed study of the State, the Science of Public Administration and its practice, facing the current needs of the governments, the autor proposes elements for its consolidation and strengthening in the XXI century. Public Administration Key Issues Challenging Practitioners Author House How public affairs are run depends upon the degree of authority and control central government decides to relinquish to regional and local governments, and the extent to which it favors citizen involvement in the governing process. Public administrators do not operate in a vacuum. The context within which decision-making takes place greatly influences public administrators approach to public issues. Consequently, what government decides to do and how it decides to carry it out affects the lives of people and how people perceive their role in the unfolding of public affairs. While public administration varies from one country to another, public administrators inevitably face similar challenges. Running a government is not easy; it is complex, dynamic, contested, supported, subject to special interests, both demand- and supply-driven, just to name a few. In executing government functions, public administrators unsurprisingly contend with major decision-making questions. While obviously not

exhaustive, this book addresses some key issues challenging practitioners. These challenges include questions on what gets included in the policy agenda, questions on policy response to problems through adoption and/or adaptation of exogenous policies, questions on the dangers of displacing policy goals, questions on transferring government activities to specialized agency, questions on decentralizing powers to regional and local governments, questions on combating corruption, and questions on managing public resources. It is widely recognized that policy implementation is much more challenging than its design. Nonetheless, it is the manner in which public administrators address these challenges that creates opportunities for a more effective long-term policy prioritization, design and coordination, a more effective and inclusive public governance, and a more effective use of public resources for the delivery of needed public services. **The Public Sector in Hong Kong, Second Edition** [Hong Kong University Press](#) This book describes and analyses the role of the public sector in the often-charged political atmosphere of post-1997 Hong Kong. In this second edition, Ian Scott explores public sector accountability in terms of Hong Kong's constitutional framework and the structure, functions, and personnel policies of its civil service system. He examines critical issues facing the administration of the public sector and the formulation and implementation of public policy with particular attention to the political challenges confronting the Hong Kong government over the past decade. A concluding chapter assesses how contested values in a changing political environment have affected the public sector in recent years. This edition has been fully updated to incorporate the latest statistics and research, including Scott's work in such areas as integrity management, corruption prevention, and policing. This book is an essential resource for scholars and students of public administration and public policy in Hong Kong and more broadly for those who are interested in how a particular jurisdiction deals with common administrative problems such as centralisation, the role of statutory bodies, corruption prevention, and the redress of citizens' grievances. 'Professor Ian Scott's book, *The Public Sector in Hong Kong*, now in a second much-expanded and up-to-date edition, offers a thorough and rigorous analysis of contemporary governance in Hong Kong, focusing on all the key stakeholders. The book is essential reading for government officials, politicians, journalists, academics, students, and the general public.' —John P. Burns, The University of Hong Kong 'The second edition not only updates the development in the public sector of Hong Kong, but also provides an important perspective to help readers understand the contexts that navigate its latest developments. This edition, along with Ian Scott's earlier work, will be judged by many in the field to be among the best books on Hong Kong politics.' —Hon S. Chan, City University of Hong Kong [Theory of Public Administration](#) [Discovery Publishing House](#) Contents: Theory of Public Administration, Definition of Administration, Nature, Scope and Importance of Public Administration, Methodology, Basic Principles of Public Administration, The Principles of Administration,

In addition to drawing attention to the issue of corporal punishment in rural schools, it equips readers with an in-depth understanding of these practices.

Undergraduate Education for Public Health in the United States [Frontiers Media SA](#)

Undergraduate programs in public health are growing rapidly. At colleges and universities throughout the United States, both the number of programs and the number of students have expanded greatly in the past decade. In response to this trend, the Council for Education of Public Health (CEPH) has begun to accredit undergraduate public health programs, with the first programs approved in 2014. Around the country programs exhibit wide variation, from concentrations in liberal arts colleges to pre-clinical foundations at doctorate-granting universities to undergraduate programs in accredited schools of public health. Faculty, both new and seasoned, are fully aware of the need to integrate undergraduate education in public health with graduate education—but the roadmaps of exactly how to do so are still nascent. The purpose of this Research Topic is to gather articles describing this variation, with the intent that

the collective body of work will facilitate analysis and discussion of what makes a quality education and builds a competent workforce. Professionalism and Public Service Essays in Honour of Kenneth Kernaghan [University of Toronto Press](#) The contributors to this volume trace the evolution of public administration institutions and explore issues such as the protection and improvement of the public service, recent innovations in the area of service delivery, and how this has created increased legitimacy and recognition from citizens. Reimagining School Discipline for the 21st Century Student Engaging Students, Practitioners, and Community Members [IAP](#) Regularly, schools and their personnel enact school disciplinary practices without considering how to harness the engagement of students, practitioners, and communities to enact transformative changes that reduce if not eliminate punitive school discipline approaches. Reimagining School Discipline for the 21st Century centralizes the assets and strengths of historically marginalized students and the professional knowledge of school personnel as possible avenues to implement solutions to eliminate school discipline disproportionality. Rather than redressing the issues of school discipline disproportionality overall, this book examines the existence of school on student groups who, according to research and national and state reports, are afflicted the most: African American, Latinx, Native American, and LGBTQ+ population. A confluence of these identities can exacerbate such disproportionality, which based on the literature decreases the academic growth of students. However, situated within these disparities are opportunities to better and critically engage students based on their cultural, racial/ethnic, and social emotional learning assets. The significant feature of this book lies in its purpose and audience reach. Each chapter was written based on the scholar's affinity to that student group or practitioner's affiliation to that specific profession. This provides a genuine perspective and knowledge based on first hand experiences concerning school discipline and applicable approaches to remedy such issues. Additionally, all the chapters articulate the pressing issue of school discipline according to their group, and explicates best-practices to best serve the assets of students in K-12 school settings. As this book is situated, the intended audience is for the following stakeholders, policy makers, social workers, school counselors, school administrators, teachers, and community organizers who want to make impactful and socially-just changes in their school(s) immediately. Public Management As a Design-Oriented Professional Discipline [Edward Elgar Publishing](#) What, fundamentally, is public management? This question is rarely answered clearly and confidently, whether by students of public management or academics in the field. This book answers this question, as its readers come to know why and how public management is a design-oriented professional discipline. The argument of the book is grounded in Herbert Simon's ideas about design-oriented professional disciplines. However, Michael Barzelay's argument runs counter to the idea that public management is a design science. It envisions the discipline as a professional practice that requires the thoughtful and

skilful use of purposive theories of public organizations, along with reverse-engineered design-precedents, in problem-solving for public programs and organizations. How professional knowledge about public management is to be expanded through research and analytical synthesis is therefore a major thrust of the book's overall argument. Michael Barzelay develops these arguments in a unique way, including guiding the reader through a fictional "Public Management Gallery" featuring key contributions to purposive theorizing about public management as a professional practice. The book is an essential resource for those wishing to strengthen the professional practice of public management - and the discipline - through education and research immediately and for years to come. **The State of Public Administration Issues, Challenges and Opportunities** [Routledge](#) The trends and practices of public administration are ever changing and it is essential that they be appraised from time to time. Designed as a capstone survey of the field, **The State of Public Administration** focuses on leading edge issues, challenges, and opportunities that confront PA study and practice in the 21st Century. **Institutional Reforms in the Public Sector What Did We Learn?** [Emerald Group Publishing](#) What does it take to build and sustain effective government institutions? What have we learnt about the attempts to design and redesign public sector institutions in different countries? What works and what doesn't, and why? This book intends to answer these questions and presents analytical tools essential in planning for institutional reform, **Person-Job Fit Changes As A Consequence Of Public Management Reforms In Self-Governmental Units** [epubli](#) The research is based on the assumption that management reforms cause changes in municipal administration and its person-job fit. The theoretical description of the problem is possible by drawing on Edward's (1991) person-job fit theorem. Literature on modernisation concepts as e.g. the New Public Management (NPM) shows a general awareness of reforms' consequences on the personnel. The human capital theory delivers explanations for the incentive to react of both the organisation's executive level as well as the employees, in case management reforms cause a discrepancy in person job-fit. The conducted empirical studies confirm that management reforms do result in changes with impact on the person-job fit. The literature research brought evidence that NPM has only been adopted partially. Since the transformation, some reforms and changes in legislation have laid the foundation for a self-governmental administration that scores compared to the EU standard as relatively modern. The investigated Polish municipalities react on the changes in the person job fit. For example, employees do learn in a self-organised way. The administration reacts on the discrepancies mainly by recruiting new staff and by reallocating the tasks. Training is not applied systematically as means to problem solving and is available in many cases only in the context of externally financed projects, and even then not oriented towards individual needs. Changes do have enormous consequences for the personnel management of municipal administration. They change the requirements for the job holders substantially,

and the administrations seem not able to react on the changes in a way that the personnel is enabled to meet the requirements. Unclear is if such an objective seems feasible if one considers the extreme dimensions of change, that spread between the paradigms of socialist administration and modernisation concepts in the sense of NPM. World Public Sector Report 2015 Responsive and Accountable Public Governance [United Nations](#) This publication is based on highlights of the discussion held during the 12th Session of the UN Committee of Experts on Public Administration (CEPA), in 2013, on “The Role of Responsive and Accountable Public Governance in achieving the MDGs and the Post-2015 Development Agenda,” which observed that responsive and accountable governance, including effective, responsive and accountable public administration, is key in accelerating the progress on the MDGs and in the implementation of the post-2015 development agenda. It also encompasses research and analysis of the United Nations Public Administration Country Studies (UNPACS) on themes such as codes of conduct, citizen engagement (in terms of its oversight role), ICTs in the work of e-government, and citizen engagement for public policy definition and development management planning. This unique approach captivates students and encourages them to think critically about the nature of public administration today. Handbook of Classroom Management Routledge The field of classroom management is not a neatly organized line of inquiry, but rather consists of many disparate topics and orientations that draw from multiple disciplines. Given the complex nature of the field, this comprehensive second edition of the Handbook of Classroom Management is an invaluable resource for those interested in understanding it. This volume provides up-to-date summaries of research on the essential topics from the first edition, as well as fresh perspectives and chapters on new topics. It is the perfect tool for both graduate students and practitioners interested in a field that is fascinating but not immediately accessible without the proper guidance.

Disciplining Judges Contemporary Challenges and Controversies Edward Elgar Publishing Globally, countries are faced with a complex act of statecraft: how to design and deploy a defensible

complaints and discipline regime for judges. In this collection, contributors provide critical analyses of judicial complaints and discipline systems in thirteen diverse jurisdictions, revealing that an effective and legitimate regime requires the nuanced calibration of numerous public values including independence, accountability, impartiality, fairness, reasoned justification, transparency, representation, and efficiency. **Public Budgeting in African Nations Fiscal Analysis in Development Management** [Routledge](#) **Public Budgeting in African Nations** aims to provide usable budgeting and fiscal policy management information to development practitioners interested in improving the performance of governments in the context of good governance. It shares regional and cross-cultural experiences with international audiences and gives reflective attention to comparative budgeting and fiscal policy management. With a promising economic and fiscal forecast, such information is timely for international development practitioners and for scholars and researchers interested in advancing development management. This book adopts an interdisciplinary/pragmatic approach to analyze and present research findings on public budgeting as a sustainable development tool. The central argument is that development practice will benefit from a bottom-up, decentralized approach to budgeting and fiscal policy management, involving national, sub-national, and civil society institutions. From this perspective, a balanced budget should draw from and reflect values and priorities across the full spectrum of social and political life. **Public Administration in South Asia India, Bangladesh, and Pakistan** [CRC Press](#) A state-of-the-art, one-stop resource, **Public Administration in South Asia: India, Bangladesh, and Pakistan** examines public administration issues and advances in the Indian subcontinent. The book fulfills a critical need. These nations have the largest public administration programs in South Asia, yet existing knowledge on them is fragmented at best. Bringing together leading scholars from these countries, this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region. Focusing on the machinery of government, the book explores questions such as: What is the history of public administration development? How are major decisions made in the agencies? Why are anti-corruption efforts so much a challenge? What is the significance of intergovernmental relations? What is the success of administrative reform? What are examples of successful social development programs? How successful is e-government, and what are its challenges? Why is civil service reform difficult to achieve? How is freedom of information being used as a means to combat corruption and invoke grassroots activism? What can be learned from the successes and failures? While public administration practice and education have become considerably professionalized in the last decade, a sufficiently in-depth and well-rounded reference on public administration in these countries is sorely lacking. Most available books tackle only aspects of public administration such as administrative reforms, civil service, economic developments, or public policy, and are country specific. None provide the in-depth

analysis of the sphere of public action in South Asia found in this book. It supplies an understanding of how public administration can be either the source of, or solution to, so many of the problems and achievements in the Indian subcontinent. **Administrative Theories And Management Thought 2Nd Ed.** [PHI Learning Pvt. Ltd.](#) **Corporal Punishment, Religion, and United States Public Schools** [Springer](#) This book examines corporal punishment in United States public schools. The practice—which is still legal in nineteen states—affects approximately a quarter million children each year. Justification for the use of physical punishment is often based on religious texts. Rather than simply disregarding the importance of religious commitment, this volume presents an alternative faith-based response. The book suggests the “hermeneutical triad,” of sacred text, tradition, and reason as an acceptable approach for those seeking to be faithful to religious text and tradition. **Public Administration Evolving From Foundations to the Future** [Routledge](#) **Public Administration Evolving: From Foundations to the Future** demonstrates how the theory and practice of public administration has evolved since the early decades of the twentieth century. Each chapter approaches the field from a unique perspective and describes the seminal events that have been influential in shaping its evolution. This book presents major trends in theory and practice in the field, provides an overview of its intellectual development, and demonstrates how it has professionalized. The range from modernism to metamodernism is reflected from the perspective of accomplished scholars in the field, each of whom captures the history, environment, and development of a particular dimension of public administration. Taken together, the chapters leave us with an understanding of where we are today and a grounding for forecasting the future. **Public Human Resource Management** [SAGE](#) This book offers a novel take on public human resource management (PHRM) by providing practical guidance for practitioners operating in a drastically reformed HR environment. Reviewing foundational topics like recruitment and retention, pay and benefits, equal employment opportunity, and performance appraisal in light of five key reforms (decentralization, deregulation, declassification, privatization, and performance-based pay), author R. Paul Battaglio assesses how the traditional practice of public HR has changed--and not necessarily for the better. New material on human resource information systems, managing motivation in the public sector, and public HR management education is included -- a topic rarely found in contemporary PHRM texts. **Public Human Resource Management** is an essential guide to public HR management and navigating the challenges and opportunities posed in the changing landscape of HR reform. **Local Government in Australia History, Theory and Public Policy** [Springer](#) This book offers a general introduction to and analysis of the history, theory and public policy of Australian local government systems. Conceived in an international comparative context and primarily from within the discipline of political studies, it also incorporates elements of economics and public administration. Existing research tends to conceptualise Australian local government as an

element of public policy grounded in an 'administrative science' approach. A feature of this approach is that generally normative considerations form only a latent element of the discussions, which is invariably anchored in debates about institutional design rather than the normative defensibility of local government. The book addresses this point by providing an account of the terrain of theoretical debate alongside salient themes in public policy. **New Public Management in Turkey Local Government Reform** [Routledge](#) The last three decades in Turkey have seen an extensive shift towards a neoliberal agenda.
