EMPOWERING FARMERS AND THEIR ORGANIZATIONS THROUGH THE CREATION OF SOCIAL CAPITAL

BOND LEARNING GUIDE FOR TRAINERS

Food & Agriculture Org. **Social capital is a key factor that concerns the ability of people to cooperate for common goals. What we have learned over the past decades, from organizational experiences in developing countries and countries in transition, is that physical and human capital accumulation by itself is not sufficient to induce development. Investments in physical capital (infrastructure and equipment) and human capital (skills development) are necessary conditions, but they are far from sufficient; they need to be complemented with the development of social capital (Stiglitz, 1998). This Learning Guide for Trainers focuses on "Empowering farmers through the creation of social capital," recognizing the fundamental role that social capital plays for healthy and sustainable organizations. Encouraging farmers and their groups to form associations or federations enhances their capacities to learn from each other, exchange reliable information about what works and what does not work, and monitor the accountability of their members.**

WOMEN'S AGENCY AND SOCIAL CHANGE

ASSAM AND BEYOND

SAGE Publishing India **Women's Agency and Social Change: Assam and Beyond focuses on varied oppression, power relations and ideologies embedded in the complex yet interdependent social, political, economic and legal structures, and women's subordination therein. British intervention, 1826-1947, by itself did not impact the agency aspect on**

women directly, but the emergence of new forces and factors sowed the seeds of women's agency to impact social change, even if minimal. In the post-Independence period, British colonial legacy perpetuated the subordination of women through caste and class hierarchy at several levels, but an undercurrent of a feminist struggle persisted, not merely as a movement but also at individual levels. The book is written with the hope of encouraging future research on women's experiences in the Northeastern region of India, and elsewhere; hence, a discussion on sources, methods and methodology is included in the conclusion. This book is based on the belief that knowledge production is, in itself, the praxis against oppressive structures and the need to understand the historical processes that slowly transformed women to become catalysts of social transformation.

THE MIGRATION APPARATUS

SECURITY, LABOR, AND POLICYMAKING IN THE EUROPEAN UNION

Stanford University Press Every year, millions of people from around the world grapple with the European Union's emerging migration management apparatus. Through border controls, biometric information technology, and circular migration programs, this amorphous system combines a whirlwind of disparate policies. The Migration Apparatus examines the daily practices of migration policy officials as they attempt to harmonize legal channels for labor migrants while simultaneously cracking down on illegal migration. Working in the crosshairs of debates surrounding national security and labor, officials have limited individual influence, few ties to each other, and no serious contact with the people whose movements they regulate. As Feldman reveals, this complex construction creates a world of indirect human relations that enables the violence of social indifference as much as the targeted brutality of collective hatred. Employing an innovative "nonlocal" ethnographic methodology, Feldman illuminates the danger of allowing indifference to govern how we regulate population—and people's lives—in the world today.

CONTEMPORARY ISSUES IN SOCIAL MARKETING

Cambridge Scholars Publishing Having celebrated its 40th anniversary in 2011, social marketing is increasingly accepted today as an effective behavioural change tool that can be used to change social behaviours, such as encouraging people to recycle more, make healthier eating choices, increase the amount of sunscreen used, and to use condoms to prevent disease transmission, amongst many other desired social behaviours. The growing popularity of using social marketing to change behaviour is reflected in increasing research interest and a growth in people practising in the social marketing field. As social marketing matures into an academic discipline in its own right, we are beginning to see diversity in the way it is understood and implemented by governments, commercial organisations and third sector organisations in different parts of the world. Contemporary Issues in Social Marketing is an outcome of the discussions held between social marketing academics and practitioners at the 2012 International Social Marketing Conference (ISM 2012), which was held in June 2012 in Brisbane, Australia. ISM 2012 drew together 180 social marketing researchers and practitioners in the corporate and not for profit sector, along with representatives of all levels of government to delve into the challenges currently faced in social marketing. Contemporary Issues in Social Marketing is a scholarly resource bringing together current knowledge and contemporary debate in the field, in addition to exploring areas that are currently underdeveloped in the literature. This book covers arguments relating to numerous hot topics and controversial issues, such as ethics in social marketing; climate change; energy consumption; smoking; healthy eating habits; blood donation; social marketing theory; and the evaluation of social marketing interventions.

SAGE Rev. ed. of: Handbook of mixed methods in social & behavioral research.

IMPLEMENTING CORPORATE SOCIAL RESPONSIBILITY

INDIAN PERSPECTIVES

Springer Science & Business Media This book is a compilation of Corporate Social Responsibility (CSR) theory and practices, with special reference to the Indian context. Over the last few decades, which have seen the onset of globalization, emergence of the industrial sector and an increased focus on community development, much attention has been focused on the role of corporations towards developing those societies where their operations are based. The introduction and evolution of CSR theories and practice in the developed countries has given CSR theorists and practitioners the guidance to appropriately place and implement CSR initiatives to help develop their role in the developed societies. However, while ample literature exists on such CSR practices, little has been done to aid the development of CSR in developing countries. Characterized by peculiar economic, political and social settings, the developing world needed its own blueprint for how CSR works and how it could best succeed. The need for doing is especially pertinent to a country like India, which is presently at a very crucial threshold, economically, politically and socially. Given the need to contextualize CSR theory and practice to the developing context, several CSR theories and practices have been explored in this book, which will provide readers with a thorough understanding of CSR and its successful implementation.

SELECTED ESSAYS ON CORPORATE REPUTATION AND SOCIAL MEDIA

COLLECTION OF EMPIRICAL EVIDENCE

Springer In four empirical studies, this cumulative work provides valuable insights for marketing executives of statutory health insurance funds and social media responsible. By introducing the “social media brand value chain” paper III conducts a literature review of state of the art social media research. By means of a field experiment on Facebook, paper IV shows that brands do not necessarily have to communicate via their brand fan pages in a highly interactive and vivid way to positively influence attitudinal measures among their fan base.

CITIZENSHIP ACROSS BORDERS

THE POLITICAL TRANSNATIONALISM OF EL MIGRANTE

Cornell University Press Michael Peter Smith and Matt Bakker spent five years carrying out ethnographic field research in multiple communities in the Mexican states of Zacatecas and Guanajuato and various cities in California, particularly metropolitan Los Angeles. Combining the information they gathered there with political-economic and institutional analysis, the five extended case studies in *Citizenship across Borders* offer a new way of looking at the emergent dynamics of transnational community development and electoral politics on both sides of the border. Smith and Bakker highlight the continuing significance of territorial identifications and state policies—particularly those of the sending state—in cultivating and sustaining transnational connections and practices. In so doing, they contextualize and make sense of the complex interplay of identity and loyalty in the lives of transnational migrant activists. In contrast to high-profile warnings of the dangers to national cultures and political institutions brought about by long-distance nationalism and dual citizenship, *Citizenship across Borders* demonstrates that, far from undermining loyalty and diminishing engagement in U.S. political life, the practice of dual citizenship by Mexican migrants actually provides a sense of empowerment that fosters migrants' active civic engagement in American as well as Mexican politics.
