COMPUTERS IN RAILWAYS XVI

RAILWAY ENGINEERING DESIGN AND OPERATION

WIT Press Forming the 16th volume from this successful series, this book contains papers from the 16th International Conference on Railway Engineering Design and Operation. The included papers are a collection of works from researchers, academics and practitioners involved in railway engineering. There is a continuing need to update the use of advanced systems, promoting their general awareness throughout the management, design, manufacture and operation of railways and other emerging passenger, freight and transit systems. By emphasising the use of computer systems in advanced railway engineering, this book contributes to this goal. These research studies will be of interest to all those involved in the development of railways, including managers, consultants, railway engineers, designers of advanced train control systems and computer specialists.

THE DEFECTIVE COPY THEORY OF MOVEMENT

EVIDENCE FROM WH-CONSTRUCTIONS IN CAPE VERDEAN CREOLE

John Benjamins Publishing Within the framework of Chomsky's Principles and Parameters Theory and the Minimalist Program, this work presents a detailed discussion of the different types of wh-question formation and relativization strategies in Cape Verdean Creole (Santiago variety), especially focusing on wh-movement of PPs. The book explores the Copy Theory of Movement, discussing a defective copy construction involving wh-movement of PPs which poses interesting theoretical questions as to how the defective copy is to be generated and form a chain with the relevant displaced wh-constituent. It is also shown that the defective copy strategy ([wh[PL] el[3SG]]) is distinct from resumption ([wh[PL] es[3PL]]) due to some properties of PPs in Cape Verdean Creole and to the nature of the pronominal element that occurs at the foot of the wh-chain. This book relates well with those on Cape Verdean Creole and highlights the need to look more closely at deeper syntactic issues in more creole languages, inspiring further comparative work amongst creole linguists.

RETHINKING CLIMATE CHANGE, CONFLICT AND SECURITY

Routledge Is global climate change likely to become a significant source of violent conflict, and should it therefore be seen as a national security challenge? Most Northern governments, militaries, think tanks and NGOs believe so, as do many academic researchers, on the grounds that increased temperatures, changing precipitation patterns and rising sea levels will worsen existing social stresses, especially within poor societies and marginal communities across Africa and Asia. This book argues otherwise. The first collection of its kind, it brings together leading scholars of Anthropology, Geography, Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate-security nexus. It shows how policy discourse on climate conflict consistently misrepresents the causes of violence, especially by obscuring its core political dimensions. It demonstrates that quantitative research provides a flawed basis for understanding climate-conflict linkages. It argues that climate security discourse is in hoc with a range of questionable military, authoritarian and developmental agendas. And it reveals that the greening of global capitalism is already having violent consequences across the global South. Climate change, the book argues, does indeed have serious conflict and security implications - but these are quite different from how they are usually imagined. This book was published as a special issue of Geopolitics.

PATHWAYS TO URBAN SUSTAINABILITY

CHALLENGES AND OPPORTUNITIES FOR THE UNITED STATES

National Academies Press Cities have experienced an unprecedented rate of growth in the last decade. More than half the world's population lives in urban areas, with the U.S. percentage at 80 percent. Cities have captured more than 80 percent of the globe's economic activity and offered social mobility and economic prosperity to millions by clustering creative, innovative, and educated individuals and organizations. Clustering populations, however, can compound both positive and negative conditions, with many modern urban areas experiencing growing inequality, debility, and environmental degradation. The spread and continued growth of urban areas presents a number of concerns for a sustainable future, particularly if cities cannot adequately address the rise of poverty, hunger, resource consumption, and biodiversity loss in their borders. Intended as a comparative illustration of the types of urban sustainability pathways and subsequent lessons learned existing in urban areas, this study examines specific examples that cut across geographies and scales and that feature a range of urban sustainability challenges and opportunities for collaborative learning across metropolitan regions. It focuses on nine cities across the United States and Canada (Los Angeles, CA, New York City, NY, Philadelphia, PA, Pittsburgh, PA, Grand Rapids, MI, Flint, MI, Cedar Rapids, IA, Chattanooga, TN, and Vancouver, Canada), chosen to represent a variety of metropolitan regions, with consideration given to city size, proximity to coastal and other waterways, susceptibility to hazards, primary industry, and several other factors.

WORDS WHISPERED IN WATER

WHY THE LEVEES BROKE IN HURRICANE KATRINA

Mango Media Inc. The New Orleans Flood, U.S. Corruption, and Other Types of Disasters In the aftermath of one of the worst disasters in U.S. history, Words Whispered in Water tells the story of one woman's fight—against all odds—to expose a mammoth federal agency—and win. It's a horror story, a mystery, and David and Goliath story all in one. In 2005, the entire world watched as a major U.S. city was nearly wiped off the map. The levees ruptured and New Orleans drowned. But while newscasters attributed the New Orleans flood to "natural catastrophes" and other types of disasters, citizen investigator Sandy Rosenthal set out to expose the true culprit and compel the media and

government to tell the truth. This is her story. When the protective steel flood-walls broke, the Army Corps of Engineers—with cooperation from big media—turned the blame on natural types of disasters. In the chaotic aftermath, Rosenthal uncovers the U.S. corruption, and big media at root. Follow this New Orleans hero as she exposes the federal agency's egregious design errors and eventually changes the narrative surrounding the New Orleans flood. In this engaging and revealing tale of man versus nature and man versus man, Words Whispered in Water proves that the power of a single individual is alive and well. If you enjoyed books like The Johnstown Flood, Breach of Faith, or The Great Deluge, then Words Whispered in Water is your next read!

A NEW COAST

STRATEGIES FOR RESPONDING TO DEVASTATING STORMS AND RISING SEAS

More severe storms and rising seas will inexorably push the American coastline inland with profound impact on communities, infrastructure, and natural systems. In A New Coast, Jeffrey Peterson presents the science behind predictions for coastal impacts and explains how current policies fall short of what's needed to prepare for these changes. He outlines a framework of bold, new national policies and funding to support local and state governments. Peterson calls for engagement of citizens, the private sector, as well as local and national leaders in a "campaign for a new coast." This is a forward-looking volume offering new insights for policymakers, planners, business leaders preparing for the changes coming to America's coast.

EDUCATING RITA

A&C Black 'One way of describing Educating Rita would be to say that it was about the meaning of education ... Another would be to say that it was about the meaning of life. A third, that it is a cross between Pygmalion and Lucky Jim. A fourth, that it is simply a marvellous play, painfully funny and passionately serious; a hilarious social documentary; a fairy-tale with a quizzical, half-happy ending.' Sunday Times Educating Rita, which portrays a working-class Liverpool woman's hunger for education, premiered at the RSC Warehouse, London, in 1980 and won the SWET award for Best Comedy of the Year. It was subsequently made into a highly successful film with Michael Caine and Julie Walters and won the 1983 BAFTA award for Best Film. Commentary and notes by Steve Lewis.

MORAL INJURY AFTER ABORTION

EXPLORING THE PSYCHOSPIRITUAL IMPACT ON CATHOLIC WOMEN

Taylor & Francis Moral Injury After Abortion delves deeply into the psychospiritual responses that some women experience when an abortive act conflicts with their moral beliefs and values. The book is grounded in a qualitative, phenomenological study that examined the lived experiences of thirty Christian women after abortion. The study participants' voices are woven throughout the book in a way that offers the reader a narrative understanding of their experiences and a thick description of the psychospiritual impact of moral injury after abortion. The book provides mental health scholars and professionals with strategies for assessing for moral injury experiences among women post-abortion as well as a guide for addressing the spiritual and psychological impact of post-abortive moral injury.

FIFTY YEARS AT THE US ENVIRONMENTAL PROTECTION AGENCY

PROGRESS, RETRENCHMENT, AND OPPORTUNITIES

Rowman & Littlefield Publishers In conjunction with the 50th anniversary of the creation of the Environmental Protection Agency, this book brings together leading scholars and EPA veterans to provide a comprehensive assessment of the agency's key decisions and actions in the various areas of its responsibility. Themes across all chapters include the role of rulemaking, negotiation/compromise, partisan polarization, judicial impacts, relations with the White House and Congress, public opinion, interest group pressures, environmental enforcement, environmental justice, risk assessment, and interagency conflict. As no other book on the market currently discusses EPA with this focus or scope, the authors have set out to provide a comprehensive analysis of the agency's rich 50-year history for academics, students, professional, and the environmental community.

LOST KIDS

VULNERABLE CHILDREN AND YOUTH IN TWENTIETH-CENTURY CANADA AND THE UNITED STATES

UBC Press Children and youth occupy important social and political roles, even as they sleep in cribs or hang out on street corners. Conceptualized as either harbingers or saboteurs of a bright, secure tomorrow, they have motivated many adult-driven schemes to effect a positive future. But have all children benefited from these programs and initiatives? Lost Kids examines adults' misgivings about, and the inadequate care of, vulnerable children. From explorations of interracial adoption and the treatment of children with disabilities to discussions of the cultural construction of the hopeless child, this multifaceted collection rejects the essentialism of the "priceless child" or "lost youth" ↻ simplistic categories that continue to shape the treatment of those who deviate from the so-called norm.

CRISIS STANDARDS OF CARE

A TOOLKIT FOR INDICATORS AND TRIGGERS

National Academies Press Disasters and public health emergencies can stress health care systems to the breaking

point and disrupt delivery of vital medical services. During such crises, hospitals and long-term care facilities may be without power; trained staff, ambulances, medical supplies and beds could be in short supply; and alternate care facilities may need to be used. Planning for these situations is necessary to provide the best possible health care during a crisis and, if needed, equitably allocate scarce resources. **Crisis Standards of Care: A Toolkit for Indicators and Triggers** examines indicators and triggers that guide the implementation of crisis standards of care and provides a discussion toolkit to help stakeholders establish indicators and triggers for their own communities. Together, indicators and triggers help guide operational decision making about providing care during public health and medical emergencies and disasters. Indicators and triggers represent the information and actions taken at specific thresholds that guide incident recognition, response, and recovery. This report discusses indicators and triggers for both a slow onset scenario, such as pandemic influenza, and a no-notice scenario, such as an earthquake. **Crisis Standards of Care** features discussion toolkits customized to help various stakeholders develop indicators and triggers for their own organizations, agencies, and jurisdictions. The toolkit contains scenarios, key questions, and examples of indicators, triggers, and tactics to help promote discussion. In addition to common elements designed to facilitate integrated planning, the toolkit contains chapters specifically customized for emergency management, public health, emergency medical services, hospital and acute care, and out-of-hospital care.
