Halter-Tying Success, Second Edition

A Step-by-Step Guide for Making Hand-Tied Rope Halters for Horses

Making a halter for a horse, by tying a few well-placed knots in a single length of rope, is an age-old skill historically passed directly from one horseman to the next. This traditional word-of-mouth knowledge has been carefully captured and presented in *Halter-Tying Success, Second Edition*, a book on how to tie correct-fitting rope halters for horses. This edition presents the halter-tying process, which includes the Fiador Knot, in a simple, easy-to-follow format. The step-by-step directions have been expanded and revised, new illustrations have been added, and a hitch for safely tying a horse has been included. A chart lists measurements for six "standard" halter sizes, from foal to large horse. Guidelines for tying a custom-fit halter are also provided. A unit on measuring a horse allows readers to decide which approach, standard-size or custom-fit, will result in the best-fitting halters for their horses. (It's perfect for ponies and mules, too.)

The Royal Corps of Signals

Unit Histories of the Corps (1920-2001) and Its Antecedents

Helion & Company Limited **The ability to communicate is a prerequisite for success both in military and civil life. Surprisingly, everyone expects access to communications, but rarely wonders how it is achieved. The purpose of this book is to bring into focus one of the cornerstones of the success of the British Army, and to provide an insight into the complexity and diversity of the Royal Corps of Signals. This is done, not by narrative, but by delving into unit history rather than campaign history, thus offering a different perspective for the historian. Royal Signals is one of the largest Corps in the British Army, and consists of a body of very highly trained and dedicated personnel to manage, operate, and repair the advanced technology that is theirs to administer. Signals are the Invisible Elite, without them there is no victory. Before the independent Corps of Signals was formed in 1920, Royal Engineers provided communications for much of the Army. Details of their signal units are included. Reflecting the new technologies as they occur, the reader will see the new signal units being raised to facilitate the exigencies of the time. For example, during the Second World War the Golden Arrow Detachments were created as independent, mobile, high-speed transmitting and receiving stations to provide links to Britain, and thus provide High Command with the information from Commanders in the Field that was desperately needed. These units also passed intercepted enemy signals back to England for the**

code breakers at Bletchley Park. Other specialist Signal units were created for Air Support, Para Signals, Commandos, Interception, Fixed Communications, Peacekeeping and a multitude of other reasons. In today's changing world signals continue to get their message through - Swift and Sure. This book is a must for historians, genealogists, and those that served. It contains: - Overviews of the Signals Order of Battle at specific times in history- Detailed précis of specialist signal units including Commando, and Para units.- History of 35 Commonwealth and related Signal Corps- Photographs of many rare signal badges- Scores and scores of unit histories both Regular and Territorial from the past to the present

How to Make Whips

Cornell Maritime Press/Tidewater Publishers Ron Edwards was born in Australia in 1930 and brought up in the country where small farmers still plowed with horses and harvested their half acres with sickles and scythes, and larger properties relied on the annual visit of the steam-driven threshing machines. By the 1940s all this had vanished, and Edwards had realized that the countrys traditional crafts also were disappearing. He began making drawings and notes of them and published these materials in his native country. *How to Make Whips* is the American edition of his ninth book. The first section gives instructions for a basic eight-strand whip; the second deals with the making of fine kangaroo hide whips. Other chapters explain the making of bullwhips, snake whips, and whips made from precut lace. Also included are instructions on plaiting names in whips and using plaiting designs for whip handles.

Textbook of Acute Trauma Care

Springer Nature This book provides a systemic approach to acute trauma care in line with the ABCDE paradigm and up-to-date information on assessing and managing major trauma from the pre-hospital to the rehabilitation phase. The book's early sections are dedicated to identifying and managing pathology caused by massive haemorrhage, airway, breathing, circulation or neurological trauma and examining the current evidence base relating to their management. The book then builds from fundamental skills to advanced interventions so that each level of responder can identify and implement aspects of clinical practice that will be of benefit to them at their stage. This approach also explains advanced interventions that may be executed subsequently, explaining how each phase of care sits together. This has a further benefit of producing seamless care for patients by practitioners of different levels using this book as a reference point. Later sections deal with specifics of in-hospital trauma care by specialty, including the explanation of decision making processes by specialties, use of diagnostic and interventional radiology, rehabilitation and psychological aspects of trauma care. The Textbook of Acute Trauma Care also focuses on non-clinical issues relevant to trauma such as training and logistics of retrieval and repatriation, aviation considerations in HEMS, legal and forensic evidence considerations and ethical issues dealing with trauma patients. In addition, the book contains chapters from international experts on cognitive and human factors relating to healthcare and suggests strategies for training and minimising errors. This book is an essential resource for all grades of practitioner, from first responders to Consultant/Attending Physician level providers.
