### **7TH INTERNATIONAL CONFERENCE, BPM 2009, ULM, GERMANY, SEPTEMBER 8-10, 2009, PROCEEDINGS**

---

**Springer** The BPM (Business Process Management) Conference series has the ambition to be the premier forum for researchers in the area of process-aware information systems. It has a record for attracting contributions in innovative research of the highest quality related to all aspects of business process management including theory, frameworks, methods, techniques, architectures, and empirical findings. BPM 2009 was the 7th instantiation of this series. It took place in Ulm, Germany, September 8-10, 2009, organized by the Institute of Databases and Information Systems of the University of Ulm. This volume contains 17 contributed research papers and two contributed industrial papers selected from 116 submissions from 31 countries. The thorough reviewing process—each paper was reviewed by three to five Program Committee members—was extremely competitive as the acceptance rate of 16% indicates. In addition to the contributed papers, these proceedings contain two papers and an outline documenting the invited keynote talks. Furthermore, a report is included on the collaboration structure in BPM research derived from an analysis of papers accepted for all past BPM conferences. In conjunction with the main conference, nine international workshops took place the day before the conference. These workshops fostered the exchange of fresh ideas and experiences between active BPM researchers, and stimulated discussions on new and emerging issues in line with the conference topics. The proceedings with the papers of all workshops will be published in a separate volume of Springer's Lecture Notes in Business Information Processing series.

### **SUPPLY CHAIN VISIBILITY**

---

---

#### **FROM THEORY TO PRACTICE**

---

---

**Routledge** Transparency and accurate management information are essential if you want to ensure that the supply chain is working for your business. Supply Chain Visibility is a critical primer for readers with backgrounds in supply chain management, system integration, strategy consulting, and enterprise software. Jonah McIntire sets the stage for a new framework that empowers business leaders to connect their projects, tasks or work streams back to the strategic message that it is worth applying organizational resources to supply chain visibility. Drawing on research findings, he reviews the prerequisites needed for a successful visibility solution and suggests a visibility fitness scorecard to compare the quality of widely varying approaches. The second section of the book reviews in detail the eight most common types of supply chain visibility and offers a set of indicators of potential fit for each one. The book also explains how to acquire visibility technology and the available options, and includes guidance on best practice for in-house designed

systems. If you or your organization are moving into this area, Jonah's insights will place you in a far stronger position to decide exactly how to leverage the benefits of supply chain visibility solutions; they also walk you carefully through the minefields of ineffective approaches or technologies to give you the greatest chance of success.

## **SUSTAINABILITY IN PROJECT MANAGEMENT**

---

**Gower Publishing, Ltd.** The concept of sustainability has grown in recognition and importance. The pressure on companies to broaden their reporting and accountability from economic performance for shareholders, to sustainability performance for all stakeholders is leading to a change of mindset in consumer behaviour and corporate policies. How can we develop prosperity without compromising the life and needs of future generations? Sustainability in Project Management explores and identifies the questions surrounding the integration of the concepts of sustainability in projects and project management and provides valuable guidance and insights. Sustainability relates to multiple perspectives, economical, environmental and social, but also to responsibility and accountability and values in terms of ethics, fairness and equality. The authors will inspire project managers to be

aware of these considerations, and to apply them to the role they play in projects, not just 'doing things right' but 'doing the right things right'.
