"Senza proprietà non c'è libertà" Falso!

Gius. Laterza & Figli Spa La proprietà privata, celebrata come base della libertà della persona, fonda il nostro intero sistema giuridico, economico e culturale. Ma è un nodo ideologico: mettiamolo in discussione e ci porremo domande essenziali. Perché la libertà è concepita come accumulo senza limite? Perché l'ineguaglianza è pensata come una condizione naturale e non come un'ingiustizia sociale? Perché nella proprietà privata non abbiamo riconosciuto un potere che sottrae a tutti natura e beni comuni? Sciogliere il legame fra proprietà e libertà obbliga ad avvicinare un vaso di Pandora di contraddizioni della modernità che troppi, anche i più insospettabili, non si sentono di scoperciare.

The Ecology of Law

Toward a Legal System in Tune with Nature and Community

Berrett-Koehler Publishers The Ecology of Law Fritjof Capra and Ugo Mattei argue that at the root of many of the environmental, economic, and social crises we face today is a legal system based on an obsolete worldview. Capra, a bestselling author, physicist, and systems theorist, and Mattei, a distinguished legal scholar, explain how, by incorporating concepts from modern science, the law can become an integral part of bringing about a better world, rather than facilitating its destruction. This is the first book to trace the fascinating parallel history of law and science from antiquity to modern times, showing how the two disciplines have always influenced each other—until recently. In the past few decades, science has shifted from seeing the natural world as a kind of cosmic machine best understood by analyzing each cog and sprocket to a systems perspective that views the world as a vast network of fluid communities and studies their dynamic interactions. The concept of ecology exemplifies this approach. But law is stuck in the old mechanistic paradigm: the world is simply a collection of discrete parts, and ownership of these parts is an individual right, protected by the state. Capra and Mattei show that this has led to overconsumption, pollution, and a general disregard on the part of the powerful for the common good. Capra and Mattei outline the basic concepts and structures of a legal order consistent with the ecological principles that sustain life on this planet. This is a profound and visionary reconceptualization of the very foundations of the Western legal system, a kind of Copernican revolution in the law, with profound implications for the future of our planet.

Le edizioni Laterza

Catalogo Storico 1901-2020

Gius. Laterza & Figli Spa Il 10 maggio 1901 Giovanni Laterza diffondeva una circolare nella quale annunciava l'esordio della casa editrice Laterza con i volumi della "Piccola biblioteca di cultura moderna" e il cantiere della "Biblioteca di Cultura Moderna". Ai primi, incerti, passi di un'iniziativa con forte matrice locale seguì l'incontro con Croce e il decollo di una sigla che da allora ha acquisito un solido posto nell'editoria italiana ed europea. Nel 2001 è stata realizzata la prima edizione di questo Catalogo storico, per celebrare il centenario della casa editrice ma anche per onorare la memoria di chi l'ha guidata, trasformata, rilanciata, dal secondo dopoguerra alle soglie del Duemila: Vito Laterza, scomparso nel maggio di quell'anno. Questa edizione del Catalogo, aggiornata al 31 dicembre 2020, viene pubblicata vent'anni dopo per testimoniare come l'impegno di Vito Laterza, al pari di quello del fondatore Giovanni Laterza, è stato portato avanti. Con problemi, soluzioni e iniziative nuovi, ma sempre con l'obiettivo di selezionare, dare forma, diffondere contenuti culturali di qualità. Nel Catalogo storico sono contenuti tutti i titoli pubblicati in centoventi anni dalle Edizioni Laterza. Nell'arco della sua storia, la casa editrice ha cercato di mantenere fermi alcuni principi ispiratori che ne costituiscono la mappa genetica: il rigore delle scelte; il coraggio di sostenere idee controcorrente di orientamento anche assai diverso; lo sforzo di coniugare ricerca e divulgazione; l'attenzione alla formazione critica nella scuola e nell'università; l'innovazione progettuale, tecnologica e commerciale come strumenti per valorizzare il lavoro degli autori. Legal Aspects of the European System of Central Banks

Liber Amicorum Paolo Zamboni Garavelli

"The book contains a collection of articles on the European Union and the European System of Central Banks (ESCB), the Eurosystem, monetary law, central bank independence and central bank statutes as well as on financial law. The authors are current or former members of the Legal Committee of the ESCB (LEGCO). This book commemorates ten years of work by the Working Group of Legal Experts of the European Monetary Institute and by the LEGCO. It is dedicated to Mr Paolo Zamboni Garavelli, former Head of the Legal Department at the Banca d'Italia and member of LEGCO, who died in 2004."-- Editor.

Handbook on European data protection law

2018 Edition

Council of Europe The rapid development of information technology has exacerbated the need for robust personal data protection, the right to which is safeguarded by both European Union (EU) and Council of Europe (CoE) instruments. Safeguarding this important right entails new and significant challenges as technological advances expand the frontiers of areas such as surveillance, communication interception and data storage. This handbook is designed to familiarise legal practitioners not specialised in data protection with this emerging area of the law. It provides an overview of the EU's and the CoE's applicable legal frameworks. It also explains key case law, summarising major rulings of both the Court of Justice of the European Union and the European Court of Human Rights. In addition, it presents hypothetical scenarios that serve as practical illustrations of the diverse issues encountered in this ever-evolving field.

Against Intellectual Monopoly

Cambridge University Press "Intellectual property" - patents and copyrights - have become controversial. We witness teenagers being sued for "pirating" music - and we observe AIDS patients in Africa dying due to lack of ability to pay for drugs that are high priced to satisfy patent holders. Are patents and copyrights essential to thriving creation and innovation - do we need them so that we all may enjoy fine music and good health? Across time and space the resounding answer is: No. So-called intellectual property is in fact an "intellectual monopoly" that hinders rather than helps the competitive free market regime that has delivered wealth and innovation to our doorsteps. This book has broad coverage of both copyrights and patents and is designed for a general audience, focusing on simple examples. The authors conclude that the only sensible policy to follow is to eliminate the patents and copyright systems as they currently exist.

The Crowd

A Study of the Popular Mind

The Floating Press The following work is devoted to an account of the characteristics of crowds. Organized crowds have always played an important part in the life of peoples, but this part has never been of such moment as at present. The substitution of the unconscious action of crowds for the conscious activity of individuals is one of the principal characteristics of the present age. Crowds, doubtless, are always unconscious, but this very unconsciousness is perhaps one of the secrets of their strength. In the natural world beings exclusively governed by instinct accomplish acts whose marvelous complexity astounds us. Reason is an attribute of humanity of too recent date and still too imperfect to reveal to us the laws of the unconscious, and still more to take its place. The part played by the unconscious in all our acts is immense, and that played by reason very small.

Handbook on European Law Relating to Asylum, Borders and Immigration

The European Convention on Human Rights and European Union law provide an increasingly important framework for the protection of the rights of foreigners. European Union legislation relating to asylum, borders and immigration is developing fast. There is an impressive body of case law by the European Court of Human Rights relating in particular to Articles 3, 5, 8 and 13 of the ECHR. The Court of Justice of the European Union is increasingly asked to pronounce itself on the interpretation of European Union law provisions in this field. This handbook presents this European Union legislation and the body of case law by the two European courts in an accessible way. It is intended for legal practitioners, judges, prosecutors, immigration officials and nongovernmental organisations, in the EU and Council

of Europe Member States.

The Gift

The Form and Reason for Exchange in Archaic Societies

Routledge First published in 1990. Routledge is an imprint of Taylor & Francis, an informa company.

Ocean Sea

Canongate Books A handful of disparate lives converge at a remote seaside inn: a lovelorn professor, a renowned painter, an inscrutable seductress - and a beautiful young girl, fatally ill, brought to the sea by a desperate father's last hope. An intricate web of destinies and associations begins to reveal itself, but it is not until the arrival of a mysterious sailor called Adams that the truth in all its dreamlike beauty and cruelty becomes clear. Adams may furnish the key to the girl's salvation, but only the fulfilment of his obsessive secret purpose - to answer murder with murder - can conclude the journey that has brought him from the ends of the earth. Alternately playful and profoundly serious, Baricco's novel surges with the hypnotic power of the ocean sea.

Claiming the Stones, Naming the Bones

Cultural Property and the Negotiation of National and Ethnic Identity

Getty Publications These fourteen essays address controversies over a variety of cultural properties, exploring them from perspectives of law, archeology, physical anthropology, ethnobiology, ethnomusicology, history, and cultural and literary study. The book divides cultural property into three types: Tangible, unique property like the Parthenon marbles; intangible property such as folktales, music, and folk remedies; and communal "representations," which have lead groups to censor both outsiders and insiders as cultural traitors.

Privilege and Property

Essays on the History of Copyright

Open Book Publishers What can and can't be copied is a matter of law, but also of aesthetics, culture, and economics. The act of copying, and the creation and transaction of rights relating to it, evokes fundamental notions of communication and censorship, of authorship and ownership - of privilege and property. This volume conceives a new history of copyright law that has its roots in a wide range of norms and practices. The essays reach back to the very material world of craftsmanship and mechanical inventions of Renaissance Italy where, in 1469, the German master printer Johannes of Speyer obtained a five-year exclusive privilege to print in Venice and its dominions. Along the intellectual journey that follows, we encounter John Milton who, in his 1644 Areopagitica speech 'For the Liberty of Unlicensed Printing', accuses the English parliament of having been deceived by the 'fraud of some old patentees and monopolizers in the trade of bookselling' (i.e. the London Stationers' Company). Later revisionary essays investigate the regulation of the printing press in the North American colonies as a provincial and somewhat crude version of European precedents, and how, in the revolutionary France of 1789, the subtle balance that the royal decrees had established between the interests of the author, the bookseller, and the public, was shattered by the abolition of the privilege system. Contributions also address the specific evolution of rights associated with the visual and performing arts. These essays provide essential reading for anybody interested in copyright, intellectual history and current public policy choices in intellectual property. The volume is a companion to the digital archive Primary Sources on Copyright (1450-1900), funded by the UK Arts and Humanities Research Council (AHRC): www.copyrighthistory.org.

Self-regulation and the Internet

Kluwer Law International B.V. Every day, societal demand grows for some form of control or supervision over something that appears inherently beyond governance: the Internet. The gulf between community aspiration and the perceived limits on government capacity forces each entity, industry, and regulator to conduct a thorough and painstaking search for an appropriate solution. The resolution to this dilemma requires the innovation of regulatory design for the Internet. Without flexibility and responsiveness, traditional law and regulation cannot adequately address the transnational, intangible, and ever changing Internet space. Attempts at Internet regulation generally have moved away from direct legal control and toward more flexible variations of what can be termed 'self-regulation.' This ground-breaking book by two leading authorities in this new field of law concerns the mushrooming growth of institutions and systems of self-regulation on the Internet. Internet self-regulation involves many issues, including e-commerce, technical protocols, and domain names management, but most public concern and debate has been over illegal and harmful content on the Internet. Self-Regulation and the Internet examines how self-regulatory entities for content relate to other quasi-legal and state institutions, what powers are accorded to or seized by self-regulatory institutions, and how the use of self-regulation can contribute to the more effective and more efficient realization of both economic and societal goals. This book offers: a general and theoretical examination of self-regulation, focusing on codes of conduct; approaches to the methodology and process for adopting such codes; descriptions and evaluations of technical devices as self-regulatory tools; and an analysis of Internet self-regulation in a converged and digital environment. The analysis encompasses a wide spectrum, from technical matters of filters and transmission streams to such important legal issues as the possible meanings of such terms as 'illegal and harmful.' Crucial topics include ISP service agreements, anti-spam measures, regulation of hate speech, digital television, defining a common language for metainformation, and a great deal more. The geographic scope is global, with numerous detailed references to developments in Europe, North America, Asia, and Australia. The breadth and depth of this analysis, and the vast quantity of information that underpins it, give this book an authoritative preeminence not to be found elsewhere. In the coming years, as the material it examines continues to grow and change in ever more dramatic ways, it will be turned to again and again for its invaluable insights and recommendations.

The Plastics Paradox

Facts for a Brighter Future

The Plastics Paradox is the first and only book to reveal the truth about plastics and the environment. Based on over 400 scientific articles, it dispels the myths that the public believe today. We are told that plastics are not green when in fact, they are usually the greenest choice according to lifecycle analysis (LCA) We are told that plastics create a waste problem when they are proven to dramatically reduce waste, for example replacing 1lb of plastic requires 3-4lb of the replacement material We are told that plastics take 1000 years to degrade when in fact a plastic bag disintegrates in just one year outdoors We are led to believe that plastic bags and straws are an issue when in fact they barely register in the statistics The list goes on... Everything you believe now is untrue and we are making policies that harm the environment based on bad information. After reading The Plastics Paradox you will be able to make wise choices that help create a brighter future for us and for our children.

Decoding the Stars: A Biography of Angelo Secchi, Jesuit and Scientist

BRILL In Decoding the Stars, Ileana Chinnici offers an account of the life of the Jesuit scientist Angelo Secchi (1818-1878) and his important contributions to the development of many sciences, paying special attention to his studies in early astrophysics.

In the Sea There Are Crocodiles

Random House I read somewhere that the decision to emigrate comes from a need to breathe. The hope of a better life is stronger than any other feeling. My mother decided it was better to know I was in danger far from her; but on the way to a different future, than to know I was in danger near her; but stuck in the same old fear. At the age of ten, Enaiatollah Akbari was left alone to fend for himself. This is the heartbreaking, unforgettable story of his journey from Afghanistan to Italy in an attempt to find a safe place to live.

History of Architectural Conservation

Routledge A History of Architectural Conservation expands knowledge about the conservation of ancient monuments, works of art and historic buildings. It includes the origins of the interest in conservation within the European context, and the development of the concepts from Antiquity and the Renaissance to the present day. Jokilehto illustrates how this development has influenced international collaboration in the protection and conservation of cultural heritage, and how it has formed the principal concepts and approach to conservation and restoration in today's multi-cultural society. This book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement. Accessible and of great interest to students and the general public it includes conservation trends in Europe, the USA, India, Iran and Japan.

The Book of Disquiet

Profile Books Sitting at his desk, Bernardo Soares imagined himself free forever of Rua dos Douradores, of his boss Vasques, of Moreira the book-keeper, of all the other employees, the errand boy, the post boy, even the cat. But if he left them all tomorrow and discarded the suit of clothes he wears, what else would he do? Because he would have to do something. And what suit would he wear? Because he would have to wear another suit. A self-deprecating reflection on the sheer distance between the loftiness of his feelings and the humdrum reality of his life, The Book of Disquiet is a classic of existentialist literature.

Il sospetto

Adelphi Edizioni spa Il vecchio commissario Bärlach è a fine corsa. A pochi giorni dalla pensione, giace in un letto d'ospedale. Il complesso intervento a cui è stato sottoposto è andato bene, sì, ma gli è stata diagnosticata una malattia senza scampo. È messo male, Bärlach, e le riviste che ha a disposizione per distrarsi non lo distraggono affatto: «Erano bestie, Samuel ... Tu sei un medico e puoi renderti conto. Guarda un po' questa fotografia» dice all'amico Hungertobel porgendogli un numero di «Life» del '45. Una scena di inaudita efferatezza: nel campo di concentramento di Stutthof il dottor Nehle, medico del lager, con «l'imperturbabilità di un idolo» sta operando un prigioniero senza narcosi. Di colpo Hungertobel impallidisce. In quella foto gli è parso di riconoscere il suo antico compagno di studi Emmenberger, ora stimato proprietario della più esclusiva clinica di Zurigo, un luminare amato dai suoi pazienti, che «credono in lui come in un dio». L'atroce sospetto, però, non tarda a rivelarsi infondato, anzi «una follia»: dalle informazioni che Bärlach riesce a ottenere risulta infatti che Nehle si è tolto la vita alla fine della guerra. Eppure qualcosa non gli torna. Ci sono strane discrepanze – e ancor più strane somiglianze: le figure di Nehle ed Emmenberger sembrano confondersi. Negli occhi di Bärlach, stretti a fessura, torna a brillare l'antica vitalità quando convince Hungertobel a farlo trasferire sotto falso nome, come paziente, nella clinica di Emmenberger. Lì potrà condurre la sua ultima, solitaria battaglia contro il Male.

The Age of Eclecticism

Literature and Culture in Britain, 1815-1885

"The burden of the past" invoked by any discussion of eclecticism is a familiar aspect of modernity, particularly in the history of literature. This book aims to place this dynamic in a broader context by examining the rise of a manifold eclecticism in the nineteenth century. It focuses on two understandings of eclecticism in the period—one understood as an unreflective embrace of either conflicting beliefs or divergent historical styles, the other a mode of critical engagement that ultimately could lead to a rethinking of the contrast between creation and criticism and of the very idea of the original.

The Nature of Gothic

A Chapter from The Stones of Venice

The Individual Without Passions

Modern Individualism and the Loss of the Social Bond

Lexington Books The innovative characteristic of the book lies in its tackling the topic of individualism from the original point of view of a theory of passions. It underlines the importance of the problem of the passions both in forming individual identity and building the social bond. It proposes to contrast the pathological effects of egoistical passions (acquisitive passion and passion of the Self), which are dominant in modernity, with empathetic and solidaristic passions, exemplified in the phenomenon of the gift.

The Life of Cesare Borgia of France

Duke of Valentinois and Romagna, Prince of Andria and Venafri, Count of Dyois, Lord of Piombino, Camerino and Urbino, Gonfalonier and Captain-General of Holy Church. a History and Some Criticisms

Franklin Classics Trade Press This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Introduction to Italian Law

Springer Introduction to the Laws.....Series Volume 4 This is a methodologically advanced introduction to the main features of the Italian Legal System. Its eighteen chapters cover all the significant changes and innovations that have recently taken place, including: a new system of private international law; a greatly altered and expanded body of family law; a new code of criminal procedure; fundamental changes in civil procedure; the effects of European legislation on Italian municipal law; the reformation of administrative law; and the latest computer-assisted research tools and techniques used to research Italian law. Written for academics and lawyers alike, this book is an indispensable tool for those wishing to grasp the context of Italian legal activity. Written by Italian experts at the top of their respective fields, An Introduction to Italian Law is a readable yet technically sophisticated and critical discussion of the systemic features that make the Italian legal system a landmark of the civil law tradition.

Emile

BookRix Emile is a treatise on the nature of education and on the nature of man written by Jean-Jacques Rousseau, who considered it to be the "best and most important of all my writings". Due to a section of the book entitled "Profession of Faith of the Savoyard Vicar," Emile was banned in Paris and Geneva and was publicly burned in 1762, the year of its first publication. During the French Revolution, Emile served as the inspiration for what became a new national system of education. The work tackles fundamental political and philosophical questions about the relationship between the individual and society—how, in particular, the individual might retain what Rousseau saw as innate human goodness while remaining part of a corrupting collectivity. Its opening sentence: "Everything is good as it leaves the hands of the Author of things; everything degenerates in the hands of man." Rousseau seeks to describe a system of education that would enable the natural man he identifies in The Social Contract to survive corrupt society. He employs the novelistic device of Emile and his tutor to illustrate how such an ideal citizen might be educated. Emile is scarcely a detailed parenting guide but it does contain some specific advice on raising children.[5] It is regarded by some as the first philosophy of education in Western culture to have a serious claim to completeness

Principles of Marketing

An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

The Turning Point in Private Law

Edward Elgar Publishing Can private law assume an ecological meaning? Can property and contract defend nature? Is tort law an adequate tool for paying environmental damages to future generations? This book explores potential resolutions to these questions, analyzing the evolution of legal thinking in relation to the topics of legal personality, property, contract and tort. In this forward thinking book, Mattei and Quarta suggest a list of basic principles upon which a new, ecological legal system could be based. Taking private law to represent an ally in the defence of our future, they offer a clear characterization of the fundamental legal institutions of common law and civil law, considering the challenges of the Anthropogenic era, technological tools of the Internet era, and the global rise of the commons. Summarizing the fundamental institutions of private law: property rights, legal personality, contract, and tort, the authors reveal the limits of these legal institutions in relation to historical international evolution and their regulation in the contexts of catastrophic ecological issues and technological developments. Engaging and thoughtful, this book will be interesting reading for legal scholars and academics of private law and, in particular, those wishing to understand the role of law when facing technological and ecological challenges.

Data-Driven Innovation Big Data for Growth and Well-Being

Big Data for Growth and Well-Being

OECD Publishing This report improves the evidence base on the role of Data Driven Innovation for promoting growth and well-being, and provide policy guidance on how to maximise the benefits of DDI and mitigate the associated economic and societal risks.

The Spirit of Laws Of Crimes and Punishments

ReadHowYouWant.com

Parliamo Italiano!

Houghton Mifflin College Division The Second Edition of Parliamo italiano! instills five core language skills by pairing cultural themes with essential grammar points. Students use culture—the geography, traditions, and history of Italy—to understand and master the language. The 60-minute Parliamo italiano! video features stunning, on-location footage of various cities and regions throughout Italy according to a story line corresponding to each unit's theme and geographic focus.

The Grammar of Fantasy

An Introduction to the Art of Inventing Stories

Enchanted Lion Books A collection of essays from the visionary storyteller Gianni Rodari about fairy tales and folk tales and their great advantages in teaching creative storytelling. "Rodari grasped children's need to play with life's rules by using the grammar of their own imaginations. They must be encouraged to question, challenge, destroy, mock, eliminate, generate, and reproduce their own language and meanings through stories that will enable them to narrate their own lives." --Jack Zipes "I hope this small book," writes renowned children's author Gianni Rodari, "can be useful for all those people who believe it is necessary for the imagination to have a place in education; for all those who trust in the creativity of children; and for all those who know the liberating value of the word." Full of ideas, glosses on fairytales, stories, and wide-ranging activities, including the fantastic binomial, this book changed how creative arts were taught in Italian schools. Translated into English by acclaimed children's historian Jack Zipes and illustrated for the first time ever by Matthew Forsythe, this edition of The Grammar of Fantasy is one to live with and return to for its humor, intelligence, and truly deep understanding of children. A groundbreaking pedagogical work that is also a handbook for writers of all ages and kinds, The Grammar of Fantasy gives each of us a playful, practical path to finding our own voice through the power of storytelling. Gianni Rodari (1920-1980) grew up in Northern Italy and wrote hundreds of stories, poems, and songs for children. In 1960, he collaborated with the Education Cooperation Movement to develop exercises to encourage children's creative and critical thinking abilities. Jack Zipes is a renowned children's historian and folklorist who has written, translated, and edited dozens of books on fairytales. He is a professor at the University of Minnesota. Matthew Forsythe lives in Montreal where he draws and paints for picture books, comics, and animations.

A Farewell to Truth

Columbia University Press With Western cultures becoming more pluralistic, the question of "truth" in politics has become a game of interpretations. Today, we face the demise of the very idea of truth as an objective description of facts, though many have yet to acknowledge that this is changing. Gianni Vattimo explicitly engages with the important consequences for democracy of our changing conception of politics and truth, such as a growing reluctance to ground politics in science, economics, and technology. Yet in Vattimo's conception, a farewell to truth can benefit democracy, exposing the unspoken issues that underlie all objective claims. The end of absolute truth challenges the legitimacy of policies based on perceived objective necessities protecting the free market, for example, even if it devastates certain groups or classes. Vattimo calls for a truth that is constructed with consensus and a respect for the liberty of all. By taking into account the cultural paradigms of others, a more "truthful" society freer and more democratic becomes possible. In this book, Vattimo continues his reinterpretation of Christianity as a religion of charity and hope, freeing society from authoritarian, metaphysical dogmatism. He also extends Nietzsche's "death of God" to the death of an authoritarian God, ushering in a new, postreligious Christianity. He connects the thought of Martin Heidegger, Karl Marx, and Karl Popper with surprising results and accommodates modern science more than in his previous work, reconciling its validity with an insistence that knowledge is interpretive. Vattimo's philosophy justifies Western nihilism in its capacity to dispense with absolute truths. Ranging over politics, ethics, religion, and the history of philosophy, his reflections contribute deeply to a modern reconception of God, metaphysics, and the purpose of reality.

Wordplay and Metalinguistic / Metadiscursive Reflection

Authors, Contexts, Techniques, and Meta-Reflection

Walter de Gruyter GmbH & Co KG Wordplay can be seen as a genuine interface phenomenon. It can be found both in everyday communication and in literary texts, and it can fulfil a range of functions – it may be entertaining and comical, it may be used to conceal taboo, and it may influence the way in which the speaker's character is perceived. Moreover, wordplay also reflects on language and communication: it reveals surprising alternative readings, and emphasizes the phonetic similarity of linguistic signs that also points towards relations on the level of content. Wordplay unravels characteristics of literary language in everyday communication and opens up the possibility to analyze literary texts from a linguistic perspective. The first two volumes of the series The Dynamics of Wordplay therefore aim at bringing together contributions from linguistics and literary studies, focusing on theoretical issues such as basic techniques of wordplay, and its relationship to genres and discourse traditions. These issues are complemented by a series of case studies on the use of wordplay in individual authors and specific historical contexts. The contributions offer a fresh look on the multifaceted dynamics of wordplay in different communicative settings.

Discourse on the Origin of Inequality

e-artnow Rousseau first exposes in Discourse on the Origin of Inequality his conception of a human state of nature, presented as a philosophical fiction and of human perfectibility, an early idea of progress. He then explains the way, according to him, people may have established civil society, which leads him to present private property as the original source and basis of all inequality. Jean-Jacques Rousseau (1712 – 1778) was a Genevan philosopher, writer, and composer of the 18th century, mainly active in France. His political philosophy influenced the Enlightenment across Europe, as well as aspects of the French Revolution and the overall development of modern political and educational thought.

A Vindication of Catholic Morality

Or a Refutation of the Charges Brought Against it by Sismondi in His "History of the Italian Republics During the Middle Ages"

Laudato Si'

On the care of the common home

Le vie della Cristianità Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. In fact, the Holy Father in his encyclical urges all men and women of good will, the rulers and all the powerful on earth to reflect deeply on the theme of the environment and the care of our planet. This is our common home, we must take care of it and love it - the Holy Father tells us - because its end is also ours.

Curating Art

Routledge Curating Art provides insight into some of the most socially and politically impactful curating of historical and contemporary art since the late 1990s. It offers up a museological framework for understanding watershed developments of curating in art museums. Representing the plurality of theory and practice around the expanded field of relational curating, the book focuses on curating that prioritises the quality of relationships between people and objects, between institutions and people and among people. It has wide international breadth, with particularly strong representation in East and Southeast Asia, including four papers never before translated into English. This Asian cluster illuminates the globalisation of the field and challenges dichotomies of East and West while acknowledging distinctions within specific, but often transnational, cultural spheres. The compelling philosophical perspectives and case studies included within Curating Art will be of interest to students and researchers studying curating, exhibition development and art museums. The book will also inspire current and emerging curators to pose challenging but important questions about their own practice and the relationships that this work sustains.

The Late Mattia Pascal

New York Review of Books Mattia Pascal endures a life of drudgery in a provincial town. Then, providentially, he discovers that he has been declared dead. Realizing he has a chance to start over, to do it right this time, he moves to a new city, adopts a new name, and a new course of life—only to find that this new existence is as insufferable as the old one. But when he returns to the world he left behind, it's too late: his job is gone, his wife has remarried. Mattia Pascal's fate is to live on as the ghost of the man he was. An explorer of identity and its mysteries, a connoisseur of black humor, Nobel Prize winner Luigi Pirandello is among the most teasing and profound of modern masters. The Late Mattia Pascal, here rendered into English by the outstanding translator William Weaver, offers an irresistible introduction to this great writer's work
