Design, Automation, and Test in Europe The Most Influential Papers of 10 Years DATE Springer Science & Business Media In 2007 The Design, Automation and Test in Europe (DATE) conference celebrated its tenth anniversary. As a tribute to the chip and system-level design and design technology community, this book presents a compilation of the three most influential papers of each year. This provides an excellent historical overview of the evolution of a domain that contributed substantially to the growth and competitiveness of the circuit electronics and systems industry. All that is Solid Melts Into Air The Experience of Modernity Verso The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account. Film Form Essays in Film Theory HMH A classic on the aesthetics of filmmaking from the pioneering Soviet director who made Battleship Potemkin. Though he completed only a half-dozen films, Sergei Eisenstein remains one of the great names in filmmaking, and is also renowned for his theory and analysis of the medium. Film Form collects twelve essays, written between 1928 and 1945, that demonstrate key points in the development of Eisenstein's film theory and in particular his analysis of the sound-film medium. Edited, translated, and with an introduction by Jay Leyda, this volume allows modern-day film students and fans to gain insights from the man who produced classics such as Alexander Nevsky and Ivan the Terrible and created the renowned "Odessa Steps" sequence. The Craft of Ritual Studies Oxford University Press on Demand Readership: Students and scholars of ritual studies, religious studies, anthropology Dispositions Salt Publishing Armed with only a notebook and a handheld global positioning device, Wark tracks the secret passage free time and free thought through the spaces of an everyday life. Modular Narratives in Contemporary Cinema Springer Since the early 1990s there has been a trend towards narrative complexity within popular cinema. This book examines a number of contemporary films that play overtly with narrative structure, raising questions of chance and destiny, memory and history, simultaneity and the representation of time. Plural and Shared: The Sociology of a Cosmopolitan World BRILL How are individuals socialized today? To answer these questions, a unique investigation has been carried out using two scales of analysis: the scale of the cosmopolitan world as well as the scale of everyday life and socialization to otherness. The Book of Life Applewood Books Upton Sinclair, one of America's foremost and most prolific authors, addresses the cultivation of the mind and the body in this 1922 volume. Sinclair's goal was to attempt to tell the reader how to live, how to find health, happiness and success, and how to develop fully both the mind and the body. Part One: The Book of the Mind covers such subjects as faith, reason, morality, and the subconscious. Part Two: The Book of the Body develops such subjects as errors in diet, the fasting cure, food and poisons, work and play, and diseases and their cures. The Picasso Papers Farrar Straus & Giroux Examines the issue of whether Picasso brought new life to the works of Old Masters through his use of pastiche, or whether his art is a counterfeit that copies the styles and themes of others Leaves of Grass Charles Dickens The World of His Novels Harvard University Press A review of Dickens' works stressing the transformation of the real world of Dickens' experience into an imaginary one Roughing it in the Bush, Or, Life in Canada Prison Memoirs of An Anarchist BoD - Books on Demand Reproduction of the original: Prison Memoirs of An Anarchist by Alexander Berkman Reading for Working A Functional Literacy Anthology Our research on literacy has produced considerable information about literacy demands of jobs, job proficiency of men of various literacy skill levels, methodologies for estimating literacy demands of jobs, and efforts to modify men and jobs to better match men to jobs. While this research has been reported for public use, the information is presented in technical reports, journal articles, and HumRRO publications of limited distribution. Because many of these varied documents are widely dispersed and hard to obtain, it was deemed desirable to make a summation of this research available in this single volume. Part I reports research to develop general methodologies for estimating functional literacy demands of jobs. Each of four chapters describes an approach to this problem; a fifth chapter presents a general summary and critical discussion of the various methods of estimating reading requirements of jobs used in this research and by others. Part II is concerned with methods of reducing discrepancies between personnel literacy skills and the literacy demands of jobs. The first chapter describes basic research on reducing reading demands of training schools by substituting listening for reading, and comments on preparing job and training aids capable of being more effectively used by less literate personnel. The second chapter describes an extensive R & D effort to design, develop, and implement a job-related literacy training program for the Army - an effort still under way at this writing. While changes undoubtedly will be made to the program as reported, the chapter is offered as an example of one approach to teaching reading "in the content areas" on a large scale. Table of contents: Introduction Part I: Determining Functional Literacy Demands of Jobs * Introduction * Readability of Job Materials * Performing Job Reading Task * Literacy in Relation to Job Knowledge, Job Performance, and Supervisor Ratings * Using Personnel Data Files to Estimate Reading Demands of Jobs * Commentary on Methodologies for Determining Literacy Demands of Jobs Part II: Reducing Discrepancies Between Literacy Skills of Personnel and Literacy Demands of Jobs * Introduction * Methods for Reducing Literacy Demands of Jobs. * Functional Literacy Training: A Case Study Part III: Collected Papers on Functional Literacy * Introduction * Reading and Career Education * A Career-Oriented Literacy Training System for the Armed Services * Needed: A Functional Literacy Curriculum for the Secondary School. Networks on Chips Technology and Tools Elsevier The design of today's semiconductor chips for various applications, such as telecommunications, poses various challenges due to the complexity of these systems. These highly complex systems-on-chips demand new approaches to connect and manage the communication between on-chip processing and storage components and networks on chips (NoCs) provide a powerful solution. This book is the first to provide a unified overview of NoC technology. It includes in-depth analysis of all the on-chip communication challenges, from physical wiring implementation up to software architecture, and a complete classification of their various Network-on-Chip approaches and solutions. * Leading-edge research from world-renowned experts in academia and industry with state-of-the-art technology implementations/trends * An integrated presentation not currently available in any other book * A thorough introduction to current design methodologies and chips designed with NoCs Designing 2D and 3D Network-on-Chip Architectures Springer Science & Business Media This book covers key concepts in the design of 2D and 3D Network-on-Chip interconnect. It highlights design challenges and discusses fundamentals of NoC technology, including architectures, algorithms and tools. Coverage focuses on topology exploration for both 2D and 3D NoCs, routing algorithms, NoC router design, NoC-based system integration, verification and testing, and NoC reliability. Case studies are used to illuminate new design methodologies. The Upstairs Wife An Intimate History of Pakistan Beacon Press A memoir of Karachi through the eyes of its women An Indies Introduce Debut Authors Selection For a brief moment on December 27, 2007, life came to a standstill in Pakistan. Benazir Bhutto, the country's former prime minister and the first woman ever to lead a Muslim country, had been assassinated at a political rally just outside Islamabad. Back in Karachi—Bhutto's birthplace and Pakistan's other great metropolis—Rafia Zakaria's family was suffering through a crisis of its own: her Uncle Sohail, the man who had brought shame upon the family, was near death. In that moment these twin catastrophes—one political and public, the other secret and intensely personal—briefly converged. Zakaria uses that moment to begin her intimate exploration of the country of her birth. Her Muslim-Indian family immigrated to Pakistan from Bombay in 1962, escaping the precarious state in which the Muslim population in India found itself following the Partition. For them, Pakistan represented enormous promise. And for some time, Zakaria's family prospered and the city prospered. But in the 1980s, Pakistan's military dictators began an Islamization campaign designed to legitimate their rule—a campaign that particularly affected women's freedom and safety. The political became personal when her aunt Amina's husband, Sohail, did the unthinkable and took a second wife, a humiliating and painful betrayal of kin and custom that shook the foundation of Zakaria's family but was permitted under the country's new laws. The young Rafia grows up in the shadow of Amina's shame and fury, while the world outside her home turns ever more chaotic and violent as the opportunities available to post-Partition immigrants are dramatically curtailed and terrorism sows its seeds in Karachi. Telling the parallel stories of Amina's polygamous marriage and Pakistan's hopes and betrayals, The Upstairs Wife is an intimate exploration of the disjunction between exalted dreams and complicated realities. The New Machiavelli English Surnames Their Sources and Significations Tyranny of the Moment Fast and Slow Time in the Information Age Pluto Press (UK) 'Unapologetically top-down and confidently concise.' The Guardian. A fascinating study of the universal dilemma of the scarcity of time. How the Essay Film Thinks Oxford University Press " This book offers a novel understanding of the epistemological strategies that are mobilized by the essay film, and of where and how such strategies operate. Against the backdrop of Theodor W. Adorno's discussion of the essay form's anachronistic, anti-systematic and disjunctive mode of resistance, and capitalizing on the centrality of the interstice in Gilles Deleuze's understanding of the cinema as image of thought, the book discusses the essay film as future philosophy—as a contrarian, political cinema whose argumentation engages with us in a space beyond the verbal. A diverse range of case studies discloses how the essay film can be a medium of thought on the basis of its dialectic use of audiovisual interstitiality. The book shows how the essay film's disjunctive method comes to be realized at the level of medium, montage, genre, temporality, sound, narration, and framing—all of these emerging as interstitial spaces of intelligence that illustrate how essayistic meaning can be sustained, often in contexts of political, historical or cultural extremity. The essayistic urge is not to be identified with a fixed generic form, but is rather situated within processes of filmic thinking that thrive in gaps. "-- The Way of All Flesh Simon and Schuster A semi-autobiographical novel that attacks Victorian era hypocrisy as it traces four generations of the Pontifex family. Butler dared not publish it during his lifetime, but when it was published, it was accepted as part of the general revulsion against Victorianism. The Tradition of Scottish Philosophy A New Perspective on the Enlightenment Rowman & Littlefield Many previous works on Scottish Philosophy have tended to concentrate exclusively on the Scottish Enlightenment. Yet, two and a half centuries prior to that period, a circle of Scottish philosophers gained Europe-wide appreciation for their work. This study attempts to correct this bias in the history of thought. Broadie looks at the evolution of the subject from the beginning of the sixteenth-century in Scotland. He relates ideas and concerns in philosophy previous to the Enlightenment to those which followed, thereby revealing important similarities between the two. This is done in a highly accessible manner which makes these ideas available to the general reader for the first time. Buddha's Brain The Practical Neuroscience of Happiness, Love, and Wisdom New Harbinger Publications If you change your brain, you can change your life. Great teachers like the Buddha, Jesus, Moses, Mohammed, and Gandhi were all born with brains built essentially like anyone else's—and then they changed their brains in ways that changed the world. Science is now revealing how the flow of thoughts actually sculpts the brain,

and more and more, we are learning that it's possible to strengthen positive brain states. By combining breakthroughs in neuroscience with insights from thousands of years of mindfulness practice, you too can use your mind to shape your brain for greater happiness, love, and wisdom. Buddha's Brain draws on the latest research to show how to stimulate your brain for more fulfilling relationships, a deeper spiritual life, and a greater sense of inner confidence and worth. Using guided meditations and mindfulness exercises, you'll learn how to activate the brain states of calm, joy, and compassion instead of worry, sorrow, and anger. Most importantly, you will foster positive psychological growth that will literally change the way you live in your day-to-day life. This book presents an unprecedented intersection of psychology, neurology, and contemplative practice, and is filled with practical tools and skills that you can use every day to tap the unused potential of your brain and rewire it over time for greater well-being and peace of mind. Nowadays the 3D-Integration technologies, 3D-Design techniques, and 3D-Architectures are emerging as interesting, truly hot, broad topics. The present book gathers the recent advances in the whole domain by renowned experts in the field to build a comprehensive and consistent book around the hot topics of three-dimensional architectures and micro-architectures. This book includes contributions from high level international teams working in this field. The Every-day Book Or, Everlasting Calendar of Popular Amusements ... Free from Civilization Notes Toward a Radical Critique of Civilization's Foundations: Domination, Culture, Fear, Economics, Technology In clear, impassioned prose, Enrico Manicardi analyzes the evils of our age from their genesis. This or that economic, technological or cultural model is not to blame for our current crisis; the blame lies with economics, technology and culture as such. It is the ideology of fear that makes us afraid. It is the mentality of domination that jeopardizes all of our relationships. In short, the problem is civilization. Through its oppressive classes, values and processes that pervade everyone's life, civilization domesticates us, weakens our perceptiveness and distances us from the living world. We must radically change our way of thinking, feeling and behaving before it's too late-we must dam the flood of devitalization that is washing over us, and return to our wilder natures, both inside and outside ourselves. Manicardi's appeal is crystal clear: if we are to survive we must begin to search inside ourselves, not to celebrate the distant past as if it were a cult, but to return to ourselves, to grip life with our own two hands, and build upon that earlier ecocentric conscience which once held the place of the egocentric conscience now leading us astray. Enrico Manicardi was born in 1966 and is a member of La Scintilla, the Society for Libertarian Culture of Modena. A lawyer and founder of the antiauthoritarian media project "Infection," he has also played guitar and written music for an eponymous band since the 1980s. His lifelong wish has been to live in a free, radically off-kilter, ecologically sound world, one characterized by warm, spontaneous, non-hierarchical relationships rather than those consecrated by the cult of technology. Troubled by the way people have succumbed to a civilization that estranges, domesticates and regulates everything and everyone, he continues to protest against the modern world's project to enslave us. This book augurs the rise of an increasingly harmonious chorus loud enough to put an end to that project.
