## INDEXING

---

**47North** For most people, the story of their lives is just that: the accumulation of time, encounters, and actions into a cohesive whole. But for an unfortunate few, that day-to-day existence is affected by memetic incursion: where fairy tale narratives become reality, often with disastrous results. That's where the ATI Management Bureau steps in, an organization tasked with protecting the world from fairy tales, even while most of their agents are struggling to keep their own fantastic archetypes from taking over their lives. In the real world, no one gets a happily ever after.

---

## THE VIROPOLITICS OF HORROR AND DESIRE IN CONTEMPORARY DISCOURSE

---

**University of Wales Press** From *Outbreak* to *The Walking Dead*, apocalyptic narratives of infection, contagion and global pandemic are an inescapable part of twenty-first-century popular culture. Yet these fears and fantasies are too virulent to be simply quarantined within fictional texts; vocabulary and metaphors from outbreak narratives have now infiltrated how news media, policymakers, and the general public view the real world and the people within it. In an age where fact and fiction seem increasingly difficult to separate, contagious bodies (and the discourses that contain them) continually blur established boundaries between real and unreal, legitimacy and frivolity, science and the supernatural. Where previous scholarly work has examined the spread of epidemic realities in horror

fiction, the essays in this collection also consider how epidemic fantasies and fears influence reality. Bringing scholarship from cultural and media studies into conversation with scholarship from the medical humanities and social sciences, this collection aims to give readers a fuller picture of the viro politics of contagious bodies in contemporary global culture.

## THE END HAS COME

---

**CreateSpace** Famine. Death. War. Pestilence. These are the harbingers of the biblical apocalypse, of the End of the World. In science fiction, the end is triggered by less figurative means: nuclear holocaust, biological warfare/pandemic, ecological disaster, or cosmological cataclysm. But before any catastrophe, there are people who see it coming. During, there are heroes who fight against it. And after, there are the survivors who persevere and try to rebuild. THE APOCALYPSE TRIPTYCH tells their stories. Edited by acclaimed anthologist John Joseph Adams and bestselling author Hugh Howey, THE APOCALYPSE TRIPTYCH is a series of three anthologies of apocalyptic fiction. THE END IS NIGH focuses on life before the apocalypse. THE END IS NOW turns its attention to life during the apocalypse. And THE END HAS COME focuses on life after the apocalypse. THE END HAS COME features all-new, never-before-published works by Hugh Howey, Seanan McGuire, Ken Liu, Carrie Vaughn, Mira Grant, Jamie Ford, Tananarive Due, Jonathan Maberry, Robin Wasserman, Nancy Kress, Charlie Jane Anders, Elizabeth Bear, Ben H. Winters, Scott Sigler, and many others. THE END IS NIGH is about the match. THE END IS NOW is about the conflagration. THE END HAS COME is about what will rise from the ashes.

## AN INCRYPTID NOVEL

---

**Hachette UK** The Price family has spent generations studying the monsters of the world, working to protect them from humanity-- and humanity from them. Enter Verity Price. Despite being trained from birth as a cryptozoologist, she'd rather dance a tango than tangle with a demon, and when her work with the cryptid community took her to Manhattan, she thought she would finally be free to pursue competition-level dance in earnest. It didn't quite work out that way... But now, with the snake cult that was killing virgins all over Manhattan finally taken care of, Verity is ready to settle down for some serious ballroom dancing—until her on-again, off-again, semi-boyfriend Dominic De Luca, a member of the monster-hunting Covenant of St. George, informs her that the Covenant is on their way to assess the city's readiness for a cryptid purge. With everything and everyone she loves on the line, there's no way Verity can take that lying down. Alliances will be tested, allies will be questioned, lives will be lost, and the talking mice in Verity's apartment will immortalize everything as holy writ--assuming there's anyone left standing when all is said and done. It's a midnight blue-light special, and the sale of the day is on betrayal, deceit...and carnage.

## **BILLION-DOLLAR KISS**

---

### **THE KISS THAT SAVED DAWSON'S CREEK, AND OTHER ADVENTURES INTV WRITING**

---

**Penguin** When Jeffrey Stepakoff was graduating with an MFA in playwriting, he imagined a life in the New York theater, wearing a beret and smoking clove cigarettes. Writing for the "boob tube" didn't even cross his mind. But he ended up in L.A. in the late 80's, when television writers were experiencing their equivalent of a gold rush. After the billion-dollar syndication of *Seinfeld*, when studios were paying astronomical amounts of money to writers to create the next *Friends* or *ER*, the sudden mania for scripted entertainment made the TV writer a hot commodity. He found himself meeting with big agents, inside primetime story rooms, pitch meetings, and on the set of some of TV's most popular shows, and making more money than he'd ever thought possible. Weaving his personal story with television's, Stepakoff takes us behind the scenes to show what it's like to have a story idea one week and see it come to life and be seen by millions of people just a week later. Stepakoff also takes us inside the industry to explain what we're watching and why by exploring the growing problems of media consolidation, the effects of interference from executives, the lack of diversity, and what reality television is doing to quality scripted television. When the market crashed and the dust settled, TV executives and the media conglomerates they worked for were sitting on a broken business model. Slowly, a new programming idea began to take hold—what if the writer and their salaries were removed from the equation? Reality TV was born and the TV writer suddenly became obsolete— at least temporarily.

## THINKING SENSIBLY ABOUT SECURITY IN AN UNCERTAIN WORLD

---

---

**Springer Science & Business Media** Many of us, especially since 9/11, have become personally concerned about issues of security, and this is no surprise. Security is near the top of government and corporate agendas around the globe. Security-related stories appear on the front page everyday. How well though, do any of us truly understand what achieving real security involves? In *Beyond Fear*, Bruce Schneier invites us to take a critical look at not just the threats to our security, but the ways in which we're encouraged to think about security by law enforcement agencies, businesses of all shapes and sizes, and our national governments and militaries. Schneier believes we all can and should be better security consumers, and that the trade-offs we make in the name of security - in terms of cash outlays, taxes, inconvenience, and diminished freedoms - should be part of an ongoing negotiation in our personal, professional, and civic lives, and the subject of an open and informed national discussion. With a well-deserved reputation for original and sometimes iconoclastic thought, Schneier has a lot to say that is provocative, counter-intuitive, and just plain good sense. He explains in detail, for example, why we need to design security systems that don't just work well, but fail well, and why secrecy on the part of government often undermines security. He also believes, for instance, that national ID cards are an exceptionally bad idea: technically unsound, and even destructive of security. And, contrary to a lot of current nay-sayers, he thinks online shopping is fundamentally safe, and that many of the new airline security measure (though by no means all) are actually quite effective. A skeptic of much that's promised by highly touted technologies like biometrics, Schneier is also a refreshingly positive, problem-solving force in the often self-dramatizing and fear-mongering world of security pundits. Schneier helps the reader to understand the issues at stake, and how to best come to one's own conclusions, including the vast infrastructure we already have in place, and the vaster systems--some useful, others useless or worse--that we're being asked to submit to and pay for. Bruce Schneier is the author of seven books, including *Applied Cryptography* (which *Wired* called "the one book the National Security Agency wanted never to be published") and *Secrets and Lies* (described in *Fortune* as "startlingly lively...[a] jewel box of little surprises you can actually use."). He is also Founder and Chief Technology Officer of Counterpane Internet Security, Inc., and publishes *Crypto-Gram*, one of the most widely read newsletters in the field of online security.

**Astra Publishing House** Now in hardcover, the sixteenth novel of the Hugo-nominated, New York Times-bestselling October Daye urban fantasy series. October Daye is finally something she never expected to be: married. All the trials and turmoils and terrors of a hero's life have done very little to prepare her for the expectation that she will actually share her life with someone else, the good parts and the bad ones alike, not just allow them to dabble around the edges in the things she wants to share. But with an official break from hero duties from the Queen in the Mists, and her family wholly on board with this new version of "normal," she's doing her best to adjust. It isn't always easy, but she's a hero, right? She's done harder. Until an old friend and ally turns out to have been an enemy in disguise for this entire time, and October's brief respite turns into a battle for her life, her community, and everything she has ever believed to be true. The debts of the Broken Ride are coming due, and whether she incurred them or not, she's going to be the one who has to pay.

Today, zombies and vampires have taken over TV shows, comic books, cartoons, video games, and movies. *Zombies, Vampires, and Philosophy* drags the theories of famous philosophers like Socrates and Descartes into the territory of the undead, exploring questions like: Why do vampires and vegetarians share a similar worldview? Why is understanding zombies the key to health care reform? And what does "healthy in mind and body" mean for vampires and zombies? Answers to these questions and more await readers brave enough to make this fun, philosophical foray into the undead.

## OUT OF JOINT

---

**Yale University Press** How constructions of time shape political beliefs about what is possible--and what is inevitable To secure power in a crisis, leaders must sell deep change as a means to future good. But how could we know the future? Nomi Claire Lazar

draws on stories across a range of cultures and contexts, ancient and modern, to show how leaders use constructions of time to frame events. These frames carry an implicit promise to secure or subvert an expected future, shaping belief in what is possible--and what is inevitable. "Ranging imaginatively across history and geography, this elegant book probes temporal sources of order and transformation. Its analytical wisdom discloses how calendars and representations of time shape political legitimacy, dispositions, and action."--Ira I. Katznelson, author of *Fear Itself: The New Deal and the Origins of Our Time* "Great political leaders, for good or ill, seek to shape our daily lives by playing with time itself. That is the central insight of this elegant, erudite volume, one that means I will henceforth listen to speeches and manifestos with new ears and new tools to rebut them."--Anne-Marie Slaughter, President and CEO, New America "Nomi Lazar gives us a fascinating exploration of the political construction of time itself, as structured by calendars, dating systems, and other mechanisms used for legitimation, revolution, and a myriad of other political purposes. **Spectra** An Imploding Star System. A Murdered Galactic Spy. A Woman Seeking the Truth—and Finding the Unbelievable... The Erasmus System is a sprawling realm of slavery, smugglers, spies—and constant, creeping decrepitude. Here everyone who is not part of the ruling Four Families is a slave of one kind or another. But the Guardians, a special-forces branch inside the United World Government for Earth, have deemed Erasmus a “hot spot.” Somehow, it is believed, this failing colony intends to launch a war upon the solar system. Ex-Field Commander Terese Drajeske, now a mother of three, has been called back to active duty and sent to Erasmus, ostensibly to investigate the murder of her colleague—and friend—Bianca Fayette. At first blush, the death defies explanation: Bianca was immortal. But beneath that single murder lies a twisted foundation of deceptions. Suddenly Terese is plunged into a vortex of shattered lives, endemic deceit, and one dreadful secret. In this society without hope, someone has put into motion a plan that will cast humanity into chaos. And Terese, who has given up her family and her sanity to prevent war, may be asked to make the ultimate sacrifice....
