# Schooling for Sustainable Development in South America

## Policies, Actions and Educational Experiences

*Springer Science & Business Media* **This book supplies both empirical evidence and scholarly analysis that exemplify successful innovation in South America in the field of sustainability education. Examining the issues from a three-fold perspective, of national policy, regional planning and grassroots projects in schools and communities, the volume offers a comprehensive overview of the contemporary situation in Brazil, Chile, Bolivia, Argentina and Venezuela. It provides case studies as detailed illustrations of the recipe for success as well as to inform researchers and practitioners of the kinds of obstacles and challenges they might face in seeking to manifest sustainability. A good deal of the research and scholarly studies in the field of education for sustainability and sustainable development is underpinned by 'Western' norms and culture. This book draws on that literature, yet also teases out features in the case studies that are particular to the region. South America itself encompasses a rich variety of natural and cultural environments—within individual nations as much as continent-wide. This diversity is a recurring theme in the book. The volume's three sections provide first a general survey, enriched with material from studies conducted in a number of different polities. The second section covers developments in Brazil, South America's largest nation and one that exhibits many of the features of education for sustainability found across the continent. Part three sets out and explores future trends. As with other books in the Schooling for Sustainable Development series, this volume will add impetus to scholarly exchange as well as contributing insights on education policy and curriculum changes across South American communities that exist in an increasingly globalized world.**

Voyaging With Kids

A Guide to Family Life Afloat

*Lin and Larry Pardey* “A treasure-trove of useful, well-organized information on sea-going parenting.” —Gary “Cap’n Fatty” Goodlander, Author of *Buy, Outfit and Sail* Choosing a boat that is right for your family; handling the naysayers; keeping your children safe, healthy and entertained afloat—this inspirational and comprehensive guide may be just what you need to turn your dream into a reality. The three authors, who have each voyaged thousands of miles with children on board, provide a factual and balanced look at the realities of family life on the sea. From their own experience and with information from interviews with dozens of other voyaging parents, they discuss caring for an infant on board, handling the changing needs of children as they grow, education options, ensuring parents find the private time to keep their relationships in tune, and helping children make the eventual transition back to shore life. Added to the authors’ voices are sidebars from other cruising parents with specialized information on subjects as diverse as handling special diets and how your children can keep in touch with friends around the world. A unique bonus chapter, written by a dozen former cruising kids, looks at the long-term effects of breaking away from shoreside normalcy. A substantial appendix of resources provides valuable further information on the subjects covered in this book. It is said that every parent inflicts their lifestyle choices on their children. Read this book to find why heading out to sea with your children may be the most rewarding infliction of all.
