Introduction to Social Work, Fourth Edition

The People's Profession

Oxford University Press There are certain questions that all students considering social work ask. Who are social workers? What is it that social workers do? How is the social work profession changing? What does it take to become a social worker? Ira Colby and Sophia Dziegielewski bring their decades of experience in social work practice and education to answer these questions. This engaging text gives readers a practical guide to the many ways in which social workers effect change in their communities and the world. The authors offer an overview and history of the profession; introduce readers to the practice of social work at the micro, mezzo, and macro level; and finally look closely at the many settings and populations that social workers work with. While realistically portraying the pressures and obstacles that social workers face, Colby and Dziegielewski communicate their own passion for social work.

Men Without Work

Post-Pandemic Edition (2022)

Templeton Foundation Press Nicholas Eberstadt's landmark 2016 study, *Men Without Work*, cast a spotlight on the collapse of work for men in modern America. Rosy reports of low unemployment rates and "full or near full employment" conditions, he contends, were overlooking a quiet, continuing crisis: Depression-era work rates for American men of "prime working age" (25-54). The grim truth: over six million prime-age men were neither working nor looking for work. Conventional unemployment measures ignored these labor force dropouts, but their ranks had been rising relentlessly for half a century. Eberstadt's unflinching analysis was, in the words of *The New York Times*, "an unsettling portrait not just of male unemployment, but also of lives deeply alienated from civil society." The famed American work ethic was once near universal: men of sound mind and body took pride in contributing to their communities and families. No longer, warned Eberstadt. And now—six years and one catastrophic pandemic later—the problem has not only worsened: it has seemingly been spreading among prime-age women and workers over fifty-five. In a brand new introduction, Eberstadt explains how the government's response to Covid-19 inadvertently exacerbated the flight from work in America. From indiscriminate pandemic shutdowns to almost unconditional "unemployment" benefits, Americans were essentially paid not to work. Thus today, despite the vaccine rollouts, inexplicable numbers of working age men and women are sitting on the sidelines while over 11 million jobs go unfilled. Current low rates of unemployment, touted by pundits and politicians, are grievously misleading. The truth is that fewer prime-age American men are looking for readily available work than at any previous juncture in our history. And others may be catching the "Men Without Work" virus too. Given the devastating economic impact of the Covid calamity and the unforeseen aftershocks yet to come, this reissue of Eberstadt's groundbreaking work is timelier than ever.

Innovative Approaches to Supporting Families of Young Children

Springer This invaluable reference introduces successful strengths-based programs for aiding families of young children in critical social contexts: family, school, community, and policy. The wide range of systems/contextual approaches described here are based in current understanding of children's development, stress and resilience in families, cultural competence, and the two-generational approach to intervention. Research-based examples across early care and early learning platforms illustrate the links between parental protective factors and children's academic and social outcomes, and between family stability and larger social goals. By supporting parents and children equally, the contributors assert, these

interventions more fully address developmental and family issues than programs that mainly serve one generation or the other. Included in the coverage: • Parent and community focused approaches to supporting parents of young children: the Family Networks Project./div • Honoring parenting values, expectations, and approaches across cultures. • Building young children's executive functions at home and in early care and education settings. • Promoting early childhood development in the pediatric medical home. • Neighborhood approaches to supporting families of young children. • Public policy strategies to promote the well-being of families with young children. Innovative Approaches for Supporting Parents of Young Children benefits professionals and practitioners working to support families of young children, particularly those interested in social work, psychology, public policy, and public health.

A Transdisciplinary History of the Right to Education in America

Cambridge University Press Examines the law governing American education and proposes social constructivist pedagogy as a model for reform efforts.

Student Loans and the Dynamics of Debt

W.E. Upjohn Institute The papers included in this volume represent the most current research and knowledge available about student loans and repayment. It serves as a valuable reference for researchers and policymakers who seek a deeper understanding of how, why, and which students borrow for their postsecondary education; how this borrowing may affect later decisions; and what measures can help borrowers repay their loans successfully.

Transforming the Financing of Early Care and Education

National Academies Press High-quality early care and education for children from birth to kindergarten entry is critical to positive child development and has the potential to generate economic returns, which benefit not only children and their families but society at large. Despite the great promise of early care and education, it has been financed in such a way that high-quality early care and education have only been available to a fraction of the families needing and desiring it and does little to further develop the early-care-and-education (ECE) workforce. It is neither

sustainable nor adequate to provide the quality of care and learning that children and families need—a shortfall that further perpetuates and drives inequality. *Transforming the Financing of Early Care and Education* outlines a framework for a funding strategy that will provide reliable, accessible high-quality early care and education for young children from birth to kindergarten entry, including a highly qualified and adequately compensated workforce that is consistent with the vision outlined in the 2015 report, *Transforming the Workforce for Children Birth Through Age 8: A Unifying Foundation*. The recommendations of this report are based on essential features of child development and early learning, and on principles for high-quality professional practice at the levels of individual practitioners, practice environments, leadership, systems, policies, and resource allocation.

Social Policy for Effective Practice

A Strengths Approach

Taylor & Francis Helping to Get Policy Enacted

Sociology in Our Times: The Essentials

Cengage Learning Current and relevant to today's students, *SOCIOLOGY IN OUR TIMES: THE ESSENTIALS*, 10th Edition presents the latest available data and new insights on behaviors, issues, and trends in our nation and world from a sociological perspective. The new edition of this bestselling text emphasizes the theme of social change and the ways in which media—particularly social media—and other forms of technology inevitably bring about new ways of living, interacting with others, or doing certain activities or task. New sections on social change have been added throughout the book, and the theme also appears in the “Sociology Works!” and “Media” features. “Sociology and Social Policy” boxes return to this edition, examining issues such as gun control, prevention of military suicides, and whether employers should be allowed to “spy” on their employees. First-person accounts of individuals' lived experiences draw students into the chapter content by illuminating topics that reflect the text's primary themes of diversity, the application of sociology to everyday life, global comparisons, media, and social change. New timely topics include environmental activism, immigration, bullying and social media, and same-sex marriage. What Is Enough?

Sufficiency, Justice, and Health

Oxford University Press What is a just way of spending public resources for health and health care? Several significant answers to this question are under debate. Public spending could aim to promote greater equality in health, for example, or maximize the health of the population, or provide the worst off with the best possible health. Another approach is to aim for each person to have "enough" so that her health or access to health care does not fall under a critical level. This latter approach is called sufficientarian. Sufficientarian approaches to distributive justice are intuitively appealing, but require further analysis and assessment. What exactly is sufficiency? Why do we need it? What does it imply for the just distribution of health or healthcare? This volume offers fresh perspectives on these critical questions. Philosophers, bioethicists, health policy-makers, and health economists investigate sufficiency and its application to health and health care in fifteen original contributions.

Austerity

The Lived Experience

University of Toronto Press Bryan M. Evans, Stephen McBride, and their contributors delve further into the more practical, ground-level side of the austerity equation in *Austerity: The Lived Experience*. Economically, austerity policies cannot be seen to work in the way elite interests claim that they do. Rather than soften the blow of the economic and financial crisis of 2008 for ordinary citizens, policies of austerity slow growth and lead to increased inequality. While political consent for such policies may have been achieved, it was reached amidst significant levels of disaffection and strong opposition to the extremes of austerity. The authors build their analysis in three sections, looking alternatively at theoretical and ideological dimensions of the lived experience of austerity; how austerity plays out in various public sector occupations and policy domains; and the class dimensions of austerity. The result is a ground-breaking contribution to the study of austerity politics and policies.

China's Economic Challenge: Unconventional Success

World Scientific This book analyzes economic strategies responsible for China's 40 years of 40-fold growth, suggesting how such strategies might be applied elsewhere. It combines a seven-chapter chronological analysis of China's growth with three additional chapters on the government's leadership role, success in poverty reduction, and China's combined international finance and trade experience. The book recaps why China's success challenges the United States and the field of development economics. One of its emphases, the 1980s, reports how generous rural price and land-tenure reforms caused a rural income boom that threatened urban subsidized livelihoods and underpinned consequent violence. It describes how China will likely face a similar challenge moving forward, during the planned merger of rural and urban workforces. The book includes an analysis of the US-China trade war and China's economic prospects in the wake of COVID-19. It is a clear and timely account for anyone interested in understanding the institutions and policies

responsible for China's successful development and its likely continuation.

Scratching Out a Living

Latinos, Race, and Work in the Deep South

Univ of California Press "What does globalization look like in the rural South? Scratching Out a Living takes readers deep into Mississippi's chicken processing communities and workplaces, where large numbers of Latin American migrants began arriving in the mid-1990s to labor alongside an established African American workforce in some of the most dangerous and lowest paid jobs in the country. Based on six years of collaboration with a local workers' center, activist anthropologist Angela Stuesse explores how Black, white, and new Latino residents have experienced and understood these transformations. Illuminating connections between the area's long history of racial inequality, the poultry industry's growth, immigrants' contested place in contemporary social relations, and workers' prospects for political mobilization, Scratching Out a Living calls for organizing strategies that bring diverse working communities together in mutual construction of a more just future"--Provided by publisher.

Population Health Intervention Research

Geographical perspectives

Routledge Health geographers are well situated for undertaking population health intervention research (PHIR), and have an opportunity to be at the forefront of this emerging area of inquiry. However, in order to advance PHIR, the scientific community needs to be innovative with its methodologies, theories, and ability to think critically about population health issues. For example, using alternatives (e.g. community-based participatory research) to traditional study designs such as the randomised control trial, health geographers can contribute in important ways to understanding the complex relationships between population health (both intended and unintended consequences), interventions and place. Representing a diverse array of health concerns ranging across chronic and infectious diseases, and research employing varied qualitative and quantitative methodologies, the contributions to this book illustrate how geographic concepts and approaches have informed the design and planning of intervention(s) and/or the evaluation of health impacts. For example, the authors argue that geographically targeting interventions to places of high-need and tailoring interventions to local place contexts are critically important for intervention success. Including an afterword by Professor Louise Potvin, this book will appeal to researchers interested in population and public/community health and epidemiology as well as health geography.

Caesar Ate My Jesus

A Baby Boomer’s Reflection on Spirituality in the American Empire

Wipf and Stock Publishers What the hell happened on the way to making the world a better place? We boomers were told our success would be unlimited. We had democracy and capitalism, and God was on our side. We took our religious teachings seriously, and set out to end bigotry, violence, and destitution. Inevitably, we collided with American Caesars, whose power and wealth was sufficient to dominate national and international affairs. Political and religious Caesars appropriated Jesus and used him to justify war, sexism, racism, dictatorships, and poverty. What were the faithful to do? Lots of boomers I know tossed the spiritual baby out with the religious institution’s bathwater, and became cynical about civic engagement. It is not time to abandon hope in our goodness, however, and it is not time to surrender our conscience to Caesar. Our experiences as boomers teach us that it is possible to bring the love of God to bear in our lives, despite Caesar’s constant pressure to cherish power, wealth, celebrity, and things more than we cherish people. This book is for folks who are ready to get off Caesar’s treadmill and dig deeply into their hearts and minds to see what remains of the Kingdom of God within.

Care of Adults with Chronic Childhood Conditions

A Practical Guide

Springer This book addresses the unique healthcare needs of adults with chronic childhood illnesses. It presents a model of primary and secondary prevention for emerging adulthood—primary prevention in which all young adults are screened for high-risk behaviors and health needs and secondary prevention in which young adults with chronic childhood conditions are optimized through coordinated care, connections to community resources and social/family support. This book is organized in five parts. Part I provides a detailed overview of the health care transition from pediatrics to adult medicine from both a policy and practice perspective. In Part II, the concept of emerging adulthood as a developmental period

is explored and strategies for providing improved comprehensive care for this age group are discussed. Part III reviews specific chronic childhood conditions, such as attention-deficit/hyperactivity disorder, autism, cystic fibrosis, and diabetes mellitus, and offers clinical cases and summary reports that can be used as a quick guides to each condition. In Part IV, additional clinical considerations that are not necessarily condition-specific but are highly relevant to the care of young adults with chronic childhood conditions are examined. Part V describes the socio-legal issues involved in caring for this population. *Care of Adults with Chronic Childhood Conditions* provides primary care providers with a new framework for the care of young adults and identifies opportunities to influence patient health outcomes over a life trajectory.

Geek Heresy

Rescuing Social Change from the Cult of Technology

Hachette UK After a decade designing technologies meant to address education, health, and global poverty, award-winning computer scientist Kentaro Toyama came to a difficult conclusion: Even in an age of amazing technology, social progress depends on human changes that gadgets can't deliver. Computers in Bangalore are locked away in dusty cabinets because teachers don't know what to do with them. Mobile phone apps meant to spread hygiene practices in Africa fail to improve health. Executives in Silicon Valley evangelize novel technologies at work even as they send their children to Waldorf schools that ban electronics. And four decades of incredible innovation in America have done nothing to turn the tide of rising poverty and inequality. Why then do we keep hoping that technology will solve our greatest social ills? In this incisive book, Toyama cures us of the manic rhetoric of digital utopians and reinvigorates us with a deeply people-centric view of social change. Contrasting the outlandish claims of tech zealots with stories of people like Patrick Awuah, a Microsoft millionaire who left his engineering job to open Ghana's first liberal arts university, and Tara Sreenivasa, a graduate of a remarkable South Indian school that takes impoverished children into the high-tech offices of Goldman Sachs and Mercedes-Benz, *Geek Heresy* is a heartwarming reminder that it's human wisdom, not machines, that move our world forward.

Game of Loans

The Rhetoric and Reality of Student

Debt

Princeton University Press College tuition and student debt levels have been rising at an alarming pace for at least two decades. These trends, coupled with an economy weakened by a major recession, have raised serious questions about whether we are headed for a major crisis, with borrowers defaulting on their loans in unprecedented numbers and taxpayers being forced to foot the bill. Game of Loans draws on new evidence to explain why such fears are misplaced—and how the popular myth of a looming crisis has obscured the real problems facing student lending in America. Bringing needed clarity to an issue that concerns all of us, Beth Akers and Matthew Chingos cut through the sensationalism and misleading rhetoric to make the compelling case that college remains a good investment for most students. They show how, in fact, typical borrowers face affordable debt burdens, and argue that the truly serious cases of financial hardship portrayed in the media are less common than the popular narrative would have us believe. But there are more troubling problems with student loans that don't receive the same attention. They include high rates of avoidable defaults by students who take on loans but don't finish college—the riskiest segment of borrowers—and a dysfunctional market where competition among colleges drives tuition costs up instead of down. Persuasive and compelling, Game of Loans moves beyond the emotionally charged and politicized talk surrounding student debt, and offers a set of sensible policy proposals that can solve the real problems in student lending.

It's Not Like I'm Poor

How Working Families Make Ends Meet in a Post-Welfare World

Univ of California Press "This book chronicles the impact of the sweeping transformation of the social safety net that occurred in the mid-1990s. With the dramatic expansion of tax credits--a combination of the Earned Income Tax Credit and other refunds--the economic fortunes of the working poor have been bolstered as never before. 'It's Not Like I'm Poor' looks at how working families plan to use their annual windfall to build up savings, go back to school, and send their kids to college. But dreams of economic mobility are often dashed by the reality of making monthly ends meet on meager wages."--Provided by publisher.

A Global Perspective of Social Justice Leadership for School Principals

IAP Within education there have been some notable attempts to frame social justice in ways that can help to explain and understand the practices of those working in schools, especially school leaders. The research contained in this book seeks to enhance our understanding of school leaders' actions as they work to promote socially just practices and/or outcomes in a range of different national contexts. The unique nature of this research is that studies took place in numerous schools across the globe in a variety of contexts yet utilized the same research protocols. This has allowed the researchers to draw conclusions at an international level about social justice decision making, the supports and barriers brought on school leaders by national policy and mandates, and the essential nature of context in the work of social justice leadership. The audience will include scholars on a global scale, given that cases in the book include authors and principals from around the world. The book can also serve as a text for leadership preparation courses as well as courses in social justice, research design, and qualitative research methodologies. Courses in human relations and communication can use the content as examples of the negotiations and challenges of teamwork in international settings. A primary audience for the book is system/school level leaders in contexts and communities

throughout the world for understanding comparative leadership and social justice decision making. Current principals will find the cases useful as reflexive tools for their own work. Educational leaders, educational reformers, and policy makers will benefit from this book as they seek to understand the impact of their work and its influence on promoting equity in schools across the globe.

Counseling the Culturally Diverse Theory and Practice

John Wiley & Sons The standard bearing guide for multicultural counseling courses now enhanced with research-based, topical, and pedagogical refinements Counseling the Culturally Diverse: Theory and Practice, 7th Edition is the new update to the seminal work on multicultural counseling. From author Derald Wing Sue – one of the most cited multicultural scholars in the United States – this comprehensive work includes current research, cultural and scientific theoretical formations, and expanded exploration of internalized racism. Replete with real-world examples, this book explains why conversations revolving around racial issues remain so difficult, and provides specific techniques and advice for leading forthright and productive discussions. The new edition focuses on essential instructor and student needs to

facilitate a greater course-centric focus. In response to user feedback and newly available research, the seventh edition reflects: Renewed commitment to comprehensiveness. As compared to other texts in the field, CCD explores and covers nearly all major multicultural counseling topics in the profession. Indeed, reviewers believed it the most comprehensive of the texts published, and leads in coverage of microaggressions in counseling, interracial/interethnic counseling, social justice approaches to counseling, implications of indigenous healing, the sociopolitical nature of counseling, racial identity development, and cultural use of evidence-based practice. Streamlined Presentation to allow students more time to review and analyze rather than read more detailed text New advances and important changes, such as expanded coverage of internalized racism, cultural humility, expansion of microaggression coverage to other marginalized groups, social justice/advocacy skills, recent research and thinking on evidence-based practice, and new approaches to work with specific populations. Most current work in multicultural mental health practice including careful consideration of the multicultural guidelines proposed by the American Psychological Association and the draft guidelines for Multicultural and Social Justice Counseling Competencies (MSJCC) (2015) from the American Counseling Association's Revision Committee. Expanded attention to the emotive nature of the content so that the strong emotive reaction of students to the material does not prevent self-exploration (a necessary component of cultural competence in the helping professions). Strengthened Pedagogy in each chapter with material to facilitate experiential activities and discussion and to help students digest the material including broad Chapter Objectives and more specific and oftentimes controversial Reflection and Discussion Questions. Every chapter opens with a clinical vignette, longer narrative, or situational example that previews the major concepts and issues discussed in the chapter. The Chapter Focus Questions serve as prompts to address the opening 'course objectives,' but these questions not only preview the content to be covered, but are cast in such a way as to allow instructors and trainers to use them as discussion questions throughout the course or workshop. We have retained the 'Implications for Clinical Practice' sections and added a new Summary after every chapter. Instructor's Handbook has been strengthened and expanded to provide guidance on teaching the course, anticipating resistances, overcoming them, and providing exercises that could be used such as case studies, videos/movies, group activities, tours/visits, and other pedagogy that will facilitate learning. Easier comparison between and among groups made possible by updating population specific chapters to use common topical headings (when possible). Offering the perfect blend of theory and practice, this classic text helps readers overcome the discomfort associated with discussions of race, provides real-world examples of how to discuss diversity and difference openly and honestly, and closely examines the hidden and unwritten rules that dictate many aspects of diversity in today's world.

Texas Vs. California

A History of Their Struggle for the Future of America

Oxford University Press, USA "Texas and California are the leaders of red and blue America. As the nation has polarized, its most populous and economically powerful states have taken charge of the opposing camps. These states now advance sharply contrasting political and policy agendas and view themselves as competitors for control of the nation's future. This book provides a detailed account of the rivalry's emergence, present state, and possible future. First, it explores why, despite their many similarities, the two states have become so deeply divided. The explanations focus on critical differences in the state's origins as well as in their later demographic, economic, cultural, and political development. Second, the book analyzes how the two states have translated their competing visions into policy. It describes how Texas and California have constructed opposing, comprehensive policy models—one conservative, the other progressive. It describes how these models operate and how they have produced widely different outputs in a range of domestic policy areas. In separate chapters, the book highlights the states' contrasting policies in five areas: tax, labor, energy and environment, poverty, and social issues. It also shows how Texas and California have led the red and blue state blocs in seeking to influence federal policy in these and other areas. Finally, the book assesses the two models' strengths, vulnerabilities, and potential futures, providing a balanced analysis of their competing visions"--

School Nursing

A Comprehensive Text

F.A. Davis Produced in cooperation with the National Association of School Nurses, this text includes comprehensive coverage of the multiple facets of school nursing—from the foundations of practice and the roles and functions of a school nurse through episodic and chronic illness and behavioral issues, to legal issues and leading and managing within school settings. In the Midst of Plenty

Homelessness and What To Do About It

John Wiley & Sons Foreword by Nan Roman, President and CEO of the National Alliance to End Homelessness This book explains how to end the U.S. homelessness crisis by bringing together the best scholarship on the subject and sharing solutions that both local communities and national policy-makers can apply now In the Midst of Plenty shifts our understanding of the phenomenon of homelessness away from issues of individual disability and embeds it in larger contexts of poverty, income inequality, housing affordability, and social exclusion. Homelessness experts Shinn and Khadduri provide guidance on how to end homelessness for people who experience it and how to prevent so many people from reaching the point where they have no alternative to sleeping on the street or in emergency shelters. The book is organized around four questions: Who becomes homeless? Why do people become homeless? How do we end homelessness? How do we prevent it? Based on a comprehensive look at relevant research, the authors show that we know how to end homelessness—if we devote the necessary resources to doing so. In the Midst of Plenty: Homelessness and What to Do About It is an excellent resource for professionals and decision-makers in the homeless services system, as well as for anyone who is interested in helping to end homelessness. It also can be used as a text in undergraduate or masters courses in public policy, sociology, psychology, social work, urban studies, or housing policy. “The knowledgeable and thoughtful authors of this book—two brilliant women who know as much as anyone in the country about the nature of homelessness and its solutions—have done a great service by taking us on a journey through the history of homelessness, how our responses have changed, and how we can end it.” Nan Roman, President and CEO National Alliance to End Homelessness. “Shinn and Khadduri’s new book is a thorough yet concise examination of what we know about the nature and causes of homelessness, and the crucial lessons learned. This critically important work provides a roadmap to restoring basic housing and income security as viable policy options, in the face of our daunting inequality divide that otherwise threatens millions with destitution and homelessness.” Dennis Culhane, Dana and Andrew Stone Professor of Social Policy, University of Pennsylvania “Marybeth Shinn and Jill Khadduri have combined their significant expertise to create an essential guide about the history of modern homelessness and to offer a clear path forward to end this American tragedy. Their policy recommendations on ending homelessness are culled from the best about what we know works.” Barbara Poppe, Executive Director US Interagency Council on Homeless, 2009-2014.

Exposing the Twenty Medical Myths Why Everything You Know about Health Care Is Wrong and How to Make It Right

Rowman & Littlefield Publishers Despite intense political focus and debate for the past 10 years, Americans remain deeply worried about the availability and affordability of health care for themselves and their families. In clear and accessible prose, journalist Ryan Holeywell and medical doctor and health policy expert Arthur Garson provide Americans with the tools we need to have an honest, unbiased view of the state of health care policy in America. By fact checking 20 enduring health care myths they move the debate beyond Obamacare v. repeal and replace and give citizens the tools they need to evaluate the major policy issues confronting our health care system.

Learning Together

The Law, Politics, Economics, Pedagogy, and Neuroscience of Early Childhood Education

Rowman & Littlefield This book makes a comprehensive, multi-disciplinary argument for investing in effective early childhood education programs, especially those that develop in children their proven natural capacity to construct knowledge by building meaningful relationships. Recent insights in the fields of law, policy, economics, pedagogy, and neuroscience demonstrate that these particular programs produce robust educational, social, and economic benefits for children and for the country. The book also provides legal and political strategies for achieving these proven benefits as well as pedagogical strategies for developing the most effective early childhood education programs. The book concludes by making visible the wonderful learning that can take place in an early education environment where teachers are afforded the professional judgment to encourage children to construct their own knowledge through indispensable learning relationships.

Beyond Elite Law

Cambridge University Press This book describes the access to justice crisis facing low- and middle-income Americans and the current reforms to address it.

Dying at the Margins

Reflections on Justice and Healing for Inner-City Poor

Oxford University Press *Dying at the Margins: Reflections on Justice and Healing for Inner-City Poor* gives voice to the most vulnerable and disempowered population—the urban dying poor—and connects them to the voices of leaders in end-of-life-care. Chapters written by these experts in the field discuss the issues that challenge patients and their loved ones, as well as offering insights into how to improve the quality of their lives. In an illuminating and timely follow up to *Dancing with Broken Bones*, all discussions revolve around the actual experiences of the patients previously documented, encouraging a greater understanding about the needs of the dying poor, advocating for them, and developing best practices in caring. *Demystifying stereotypes that surround poverty*, Moller illuminates how faith, remarkable optimism, and an unassailable spirit provide strength and courage to the dying poor. *Dying at the Margins* serves as a rallying call for not only end-of-life professionals, but compassionate individuals everywhere, to understand and respond to the needs of the especially vulnerable, yet inspiring, people who comprise the world of the inner city dying poor.
