Washington's Farewell Address to the People of the United States

Hardpress Publishing Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Knitting America

A Glorious Heritage from Warm Socks to High Art

Voyager Press (MN) Enhanced with more than three hundred images, a comprehensive history of knitting in America includes twenty historical knitting patterns.

George Washington, Entrepreneur

How Our Founding Father's Private Business Pursuits Changed America and the World

All Points Books A business biography of George Washington, focusing on his many innovations and inventions. George Washington: general, statesman...businessman? Most people don't know that Washington was one of the country's first true entrepreneurs, responsible for innovations in several industries. In George Washington, Entrepreneur, John Berlau presents a fresh, surprising take on our forefather's business pursuits. History has depicted Washington as a gifted general and political pragmatist, not an intellectual heavyweight. But he was a patron of inventors and inveterate tinkerer, and just as intelligent as Jefferson or Franklin. His library was filled with books on agriculture, history, and philosophy. He was the first to breed horses with donkeys to produce the American mule. On his estate, he grew countless varieties of trees and built a greenhouse full of exotic fruits, herbs, and plants. Unlike his Virginia neighbors who remained wedded to tobacco, Washington planted seven types of wheat. His state-of-the-art mill produced flour which he exported to Europe in sacks stamped "G. Washington"—one of the very first branded food products. Mount Vernon was also home to a distillery and became one of the largest American whiskey producers of the era. Berlau's portrait of Washington, drawn in large part from his journals and extensive correspondence, presents a side of him we haven't seen before. It is sure to delight readers of presidential biography and business history.

Contains original correspondence. Of note is an early (1745) mathematical exercise "Mensuration of solids" attributed to a 13-year-old Washington as well as a copy of Washington's Valley Forge announcement to the people of Delaware, New Jersey, Maryland, Virginia

and Pennsylvania. Also included are 14 letters to James McHenry, secretary of war.

Performance Incentives for Global Health Potential and Pitfalls

CGD Books "Describes the rationale for introducing incentives tied to achievement of specific health-related targets, and provides guidance about designing, implementing, and evaluating programs that provide incentives to health care providers and patients. Presents case studies that focus on recent uses of incentives addressing a range of health conditions in diverse countries"--Provided by publisher.

China-India Economics

Challenges, Competition and Collaboration

Routledge A review of the existing literature on the China-India comparative theme conveys the distinct impression that the literature largely projects China and India as intrinsically competitive entities. While much has been written on where and why China and India are contesting, particularly from a political sense, very little attention has been devoted to mutual collaboration, whether existing or potential. Such possibilities are at their greatest in economics, which will dominate the future China-India relationship. This book explores Sino-Indian ties from a comparative economic perspective and argues that it is erroneous to visualise the ties either from exclusively competitive or collaborative perspectives. The future relationship between the two countries will be characterised simultaneously by two ?C?s: competition and collaboration, which are both linked to common challenges facing them. Arguing that while competition in the economic sphere is inevitable, given their size and aspirations, the book contends that negative externalities from competition will encourage both countries to collaborate and expand the scope of such collaboration. The book's refreshing angle makes it a must-read for those interested in Sino-Indian relationship.

Ten Steps to a Results-based Monitoring and Evaluation System

A Handbook for Development Practitioners

World Bank Publications An effective state is essential to achieving socio-economic and sustainable development. With the advent of globalization, there are growing pressures on governments and organizations around the world to be more responsive to the demands of internal and external stakeholders for good governance, accountability and transparency, greater development effectiveness, and delivery of tangible results. Governments, parliaments, citizens, the private sector, NGOs, civil society, international organizations and donors are among the stakeholders interested in better performance. As demands for greater accountability and real results have increased, there is an attendant need for enhanced results-based monitoring and evaluation of policies, programs, and projects. This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system. These steps begin with a OC Readiness AssessmentOCO and take the practitioner through the design, management, and importantly, the sustainability of such systems. The Handbook describes each step in detail, the tasks needed to complete each one, and the tools available to help along the way."

When Scotland Was Jewish

DNA Evidence, Archeology, Analysis of Migrations, and Public and Family Records Show Twelfth Century Semitic Roots

McFarland The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

Composed of more than 600 objects dating from 1740 to 1945.

The First of Men

A Life of George Washington

Oxford University Press Written by John Ferling, one of America's leading historians of the Revolutionary era, The First of Men offers an illuminating portrait of George Washington's life, with emphasis on his military and political career. Here is a riveting account that captures Washington in all his complexity, recounting not only Washington's familiar sterling qualities--courage, industry, ability to make difficult decisions, ceaseless striving for self-improvement, love of his family and loyalty to friends--but also his less well known character flaws. Indeed, as Ferling shows, Washington had to overcome many negative traits as he matured into a leader. The young Washington was accused of ingratitude and certain of his letters from this period read as if they were written by "a pompous martinet and a whining, petulant brat." As commander-in-chief of the Continental Army, he lost his temper more than once and indulged flatterers. Aaron Burr found him "a boring, colorless person." As president, he often believed the worst about individual officials. Ferling concludes that Washington's personality and temperament were those of "a self-centered and self-absorbed man, one who since youth had exhibited a fragile self-esteem." And yet he managed to realize virtually every grand design he ever conceived. Ferling's Washington is driven, fired by ambition, envy, and dreams of fame and fortune. Yet his leadership and character galvanized the American Revolution--probably no one else could have kept the war going until the master stroke at Yorktown--and helped the fledgling nation take, and survive, its first unsteady steps. This superb paperback makes available once again an unflinchingly honest and compelling biography of the father of our country.

The Financial Crisis Inquiry Report

The Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States Including Dissenting Views

Cosimo, Inc. The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world.THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government."

News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film In Debt We Trust warned of the economic meltdown in 2006. He has since written three books on the subject including Plunder: Investigating Our Economic Calamity (Cosimo Books, 2008), and The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail (Disinfo Books, 2011), a companion to his latest film Plunder The Crime Of Our Time. Farewell Address to the People of the United States

What Works in Girls' Education

Evidence for the World's Best Investment

Brookings Institution Press Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

The Manchurian Candidate

Hachette UK 'Brilliant...wild and exhilarating' New Yorker Sgt Raymond Shaw is a hero of the first order. He's an ex-prisoner of war who saved the life of his entire outfit, a winner of the Congressional Medal of Honor, the stepson of an influential senator...and the perfect assassin. Brainwashed during his time as a POW he is a 'sleeper', a living weapon to be triggered by a secret signal. He will act without question, no matter what order he is made to carry out. To stop Shaw, his former commanding officer must uncover the truth behind a twisted conspiracy of torture, betrayal and power that will lead both to the highest levels of the government. - and to Shaw's own past...

Shi'ite Identities

Community and Culture in Changing Social Contexts

LIT Verlag Münster This volume covers the phenomenon of political assertiveness among contemporary Shi'ite Muslims in the Middle East, as well as among converts in Southeast Asia. It argues that Shi'ite identities are often based on local cultural heritage and history and are—contrary to what is usually assumed by the wider public—not to be considered monolithic.

The Ant Trap

Rebuilding the Foundations of the Social Sciences

Oxford Studies in Philosophy o We live in a world of crowds and corporations, legislatures and languages, money and markets. These are all social objects - they are made, at least in part, by people and communities. But what exactly are these things? How are they made, and what is the role of people in making them? 'The Ant Trap' rewrites our understanding of the nature of the social world and the foundations of the social sciences.

Pygmalion Illustrated

Pygmalion is a play by George Bernard Shaw, named after a Greek mythological figure. It was first presented on stage to the public in 1913.

The 1776 Report

"In the course of human events there have always been those who deny or reject human freedom, but Americans will never falter in defending the fundamental truths of human liberty proclaimed on July 4, 1776. We will-we must-always hold these truths. The declared purpose of the President's Advisory 1776 Commission is to "enable a rising generation to understand the history and

principles of the founding of the United States in 1776 and to strive to form a more perfect Union." This requires a restoration of American education, which can only be grounded on a history of those principles that is "accurate, honest, unifying, inspiring, and ennobling." And a rediscovery of our shared identity rooted in our founding principles is the path to a renewed American unity and a confident American future"--

Sustainable Development of Denmark in the World, 1970–2020

A Critical Introduction

Springer Nature This book provides a holistic overview of the history of sustainable development in Denmark over the last fifty years, covering a host of issues central to the Sustainable Development Goals (SDGs): ending poverty; ensuring inclusive and equitable education; reducing inequality; making cities and settlements inclusive, safe and resilient; and fostering responsible production and consumption patterns, to name a few. It argues for a new framework of sustainability history, one that is truly global in outlook. As such, it explores what truly global sustainable development would look like. It considers how economic growth has been the driver for prosperity in the global north, and considers whether sustainable development and continued economic growth are irreconcilable, and what the future of sustainable development initiatives in Denmark might look like.

Active Learning

Creating Excitement in the Classroom. 1991 ASHE-ERIC Higher Education Reports

This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques. A

preliminary section defines active learning and looks at the current climate surrounding the concept. A second section, entitled "The Modified Lecture" offers ways that teachers can incorporate active learning into their most frequently used format: the lecture. The following section on classroom discussion explains the conditions and techniques needed for the most useful type of exchange. Other ways to promote active learning are also described including: visual learning, writing in class, problem solving, computer-based instruction, cooperative learning, debates, drama, role playing, simulations, games, and peer teaching. A section on obstacles to implementing active learning techniques leads naturally to the final section, "Conclusions and Recommendations," which outlines the roles that each group within the university can play in order to encourage the implementation of active learning strategies. The text includes over 200 references and an index. (JB)

The Evening Star

The Rise and Fall of a Great Washington Newspaper

Rowman & Littlefield The Evening Star is the first comprehensive history of the most financially successful daily newspaper in the nation's capital until the 1970s. The book unravels the rise and fall of a once-great evening newspaper and the famous and quirky people who passed through its noisy, untidy newsroom to report a century of history.

Infantry in Battle

DIANE Publishing

Social Science Goes to War

The Human Terrain System in Iraq and Afghanistan

Oxford University Press The Human Terrain System (HTS) was catapulted into existence in 2006 by the US military's urgent need for knowledge of the human dimension of the battlespace in Iraq and Afghanistan. Its centrepiece was embedded groups of mixed military and civilian personnel, known as Human Terrain Teams (HTTs), whose mission was to conduct social science research and analysis and to advise military commanders about the local population. Bringing social science - and actual social scientists - to the wars in Iraq and Afghanistan was bold and challenging. Despite the controversy over HTS among scholars, there is little good, reliable source material written by those with experience of HTS or about the actual work carried out by teams in theatre. This volume goes beyond the anecdotes, snippets and blogs to provide a comprehensive, objective and detailed view of HTS. The contributors put the program in historical context, discuss the obstacles it faced, analyse its successes, and detail the work of the teams downrange. Most importantly, they capture some of the diverse lived experience of HTS scholars and practitioners drawn from an eclectic array of the social sciences.

Pregnancy Day By Day

Penguin The complete guide to pregnancy, day-by-day No other pregnancy book provides this level of detail, allied with such extraordinary photographs, 3D scans and illustrations which reveal in unprecedented clarity exactly what is happening to you and your baby every single day. From early fetal development to how your hormones prepare you for birth, learn from world-class experts. Plus, obstetricians, midwives and parents advise on your baby's development, medical matters, your changing body, diet, fitness and much more. A special hour-by-hour rundown of what to expect during and immediately after birth, plus further reassurance for the first two weeks of your baby's life, will give a helping hand through the culmination of your pregnancy, from pain relief to those first intimate and unique moments between you and your child.

Transforming Distressed Global Communities

Making Inclusive, Safe, Resilient, and Sustainable Cities

Routledge Many of our global cities are distressed and facing a host of issues: economic collapse in the face of rising expectations, social disintegration and civil unrest, and ecological degradation and the threats associated with climate change, including more frequent and more severe natural disasters. Our long-held assumptions about man and nature and how they interact are defunct. We realize now that we can no longer continue to build without addressing the long-term impacts of our actions and their spillovers. Energy and natural resources are finite. The way we configure economies has come into question. In the developed world, especially in the United States, infrastructure and the notions that underpin it are outdated. Meanwhile, the developing world is experiencing major, rapid transformations in lifestyles and economies that are affecting billions of people and requiring a whole new way of planning human settlements. Cities are the key to our future; they represent the most effective vehicle for positive advancements in the human condition and environmental change. This volume argues for the need to redesign and re-plan our cities in holistic ways that reflect our new understanding and relate to their diversity and multi-dimensionality. Presenting a range of case studies from around the world, this volume examines how these distressed cities are dealing with these issues in planning for their future. Alongside these empirical chapters are philosophical essays that consider the future of distressed cities. Bringing together a team of leading scholars, United Nations agencies, non-governmental organizations, private consulting firms, international organizations and

foundations, and policy officials, this volume provides a unique and comprehensive overview on how to transform distressed communities into more livable places.

Paper Towns

A&C Black Special edition slipcase edition of John Green's Paper Towns, with pop-up paper town. From the bestselling author of The Fault in our Stars. Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she one day climbs through his window and summons him on an all-night road trip of revenge he cannot help but follow. But the next day Margo doesn't come to school and a week later she is still missing. Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.

The Mueller Report

The Final Report of the Special Counsel on Russian Interference in the 2016 Presidential Election

Courier Dover Publications This is the full Mueller Report, as released on April 18, 2019, by the U.S. Department of Justice. A reprint of the report exactly as it was issued by the government, it is without analysis or commentary from any other source and with nothing subtracted except for the material redacted by the Department of Justice. The mission of the Mueller investigation was to examine Russian interference in the 2016 Presidential election, consisting of possible links, or "collusion," between the Donald Trump campaign and the Russian government of Vladimir Putin as well as any allegations of obstruction of justice in this regard. It was also intended to detect and prosecute, where warranted, any other crimes that surfaced during the course of the investigation. The report consists of a detailed summary of the various investigations and inquiries that the Special Counsel and colleagues carried out in these areas. The investigation was initiated in the aftermath of the firing of FBI Director James Comey by Donald Trump on May 9, 2017. The FBI, under Director Comey, had already been investigating links between Russia and the Trump campaign. Mueller submitted his report to

Attorney General William Barr on March 22, 2019, and the Department of Justice released the redacted report one month later.

Rip Van Winkle and The Legend of Sleepy Hollow

Hastings Journal

Metaphors We Live By

University of Chicago Press The now-classic Metaphors We Live By changed our understanding of metaphor and its role in language and the mind. Metaphor, the authors explain, is a fundamental mechanism of mind, one that allows us to use what we know about our physical and social experience to provide understanding of countless other subjects. Because such metaphors structure our most basic understandings of our experience, they are "metaphors we live by"—metaphors that can shape our perceptions and actions without our ever noticing them. In this updated edition of Lakoff and Johnson's influential book, the authors supply an afterword surveying how their theory of metaphor has developed within the cognitive sciences to become central to the contemporary understanding of how we think and how we express our thoughts in language.
