QUALITATIVE RESEARCH FOR THE SOCIAL SCIENCES

SAGE Publications Focusing on the integral role of the researcher, Qualitative Research for the Social Sciences uses a conversational writing style that draws readers into the excitement of the research process. Marilyn Lichtman offers a balanced and nuanced approach, covering the full range of qualitative methodologies and viewpoints about the field, including coverage of social media as a tool to facilitate research or as a venue for study. After presenting theoretical concepts and a historical overview, Lichtman guides readers, step by step, through the research process, addressing issues of analyzing data, presenting completed research, and evaluating research. Real-world examples from across the social sciences provide both practical and theoretical information, helping readers understand abstract ideas and apply them to their own research.

GENOME MAPPING AND GENOMICS IN ANIMAL-ASSOCIATED MICROBES

Springer Science & Business Media Achievements and progress in genome mapping and the genomics of microbes supersede by far those for higher plants and animals, in part due to their enormous economic implication but also smaller genome size. In the post-genomic era, whole genome sequences of animal-associated microbes are providing clues to depicting the genetic basis of the complex host-pathogen relationships and the evolution of parasitism; and to improving methods of controlling pathogens. This volume focuses on a globally important group of intracellular prokaryotic pathogens which affect livestock animals. These include *Brucella*, *Mycobacterium*, *Anaplasma* and *Ehrlichia*, as well as the protozoan pathogens *Cryptosporidium* and *Theileria*, for which genome sequence data is available. Insights from comparative genomics of the microbes described provide clues to the adaptation involved in host-microbe interactions, as well as resources potentially useful for application in future research and product development.

WHITE MASCULINITY IN CRISIS IN HOLLYWOOD'S FIN DE MILLENNIUM CINEMA

Rowman & Littlefield This book claims that Hollywood cinema had a significant relationship with the millennial crisis of masculinity, as the films of the fin de millennium movement reflected the cultural discourse of concern over the crisis of masculinity through a dichotomous structure of either feminine or hyper-masculine representations of male identity.

MUSLIM WOMEN ONLINE

FAITH AND IDENTITY IN VIRTUAL SPACE

Routledge While issues surrounding Muslim women are common in the international media, the voices of Muslim women themselves are largely absent from media coverage and despite the rapidly increasing presence of Muslim women in online groups and discussions, it is still a relatively unexplored topic. This book examines Muslim women in transnational online groups, and their views on education, culture, marriage, sexuality, work, dress-code, race, class and sisterhood. Looking at both egalitarian and traditionalist Muslim women's views, the author considers their interpretations of Islam and identifies a new category of holists who focus on developing the Islamic sisterhood. Drawing on detailed analysis of online transcripts, she highlights women's rhetorical techniques and the thorough knowledge of Islamic sources which they use to justify their points in online discussions. She details how in the online context, as opposed to offline interactions, Muslim women are much more willing to cross boundaries between traditionalist and egalitarian interpretations of Islam and women's Islamic rights and responsibilities and to develop collaborative interpretations with supporters of different views. Shedding light on a candid and forthright global community, this book is an important contribution to the debate on women in Islam, and as such will be of interest to scholars and students of Islamic studies, gender studies, media studies and the Middle East.

UNDERSTANDING DEATH AS LIFE'S PARADOX

Cambridge Scholars Publishing This book focuses on death as life's paradox in order to test, to put on trial, what it means for us human beings to exist. No one of us chooses to be born. Yet, having been born, we must choose to have been born, to live, to exist. To exist is to choose to exist. To choose to exist is to live with our choices. This text argues that death is the limit of life, that we can live freely and lovingly, at once justly and compassionately, solely within the limit of death. It shows that we can develop a comprehensive conception of life, and also of death, solely insofar as we learn to overcome the dualistic opposition between philosophy and theology that continues today to falsify our understanding of not only the secular, but also the sacred.

LOGIC SYNTHESIS AND VERIFICATION

Springer Science & Business Media Research and development of logic synthesis and verification have matured considerably over the past two decades. Many commercial products are available, and they have been critical in harnessing advances in fabrication

technology to produce today's plethora of electronic components. While this maturity is assuring, the advances in fabrication continue to seemingly present unwieldy challenges. *Logic Synthesis and Verification* provides a state-of-the-art view of logic synthesis and verification. It consists of fifteen chapters, each focusing on a distinct aspect. Each chapter presents key developments, outlines future challenges, and lists essential references. Two unique features of this book are technical strength and comprehensiveness. The book chapters are written by twenty-eight recognized leaders in the field and reviewed by equally qualified experts. The topics collectively span the field. *Logic Synthesis and Verification* fills a current gap in the existing CAD literature. Each chapter contains essential information to study a topic at a great depth, and to understand further developments in the field. The book is intended for seniors, graduate students, researchers, and developers of related Computer-Aided Design (CAD) tools. From the foreword: "The commercial success of logic synthesis and verification is due in large part to the ideas of many of the authors of this book. Their innovative work contributed to design automation tools that permanently changed the course of electronic design." by Aart J. de Geus, Chairman and CEO, Synopsys, Inc.

THE ART OF NOT BEING GOVERNED

AN ANARCHIST HISTORY OF UPLAND SOUTHEAST ASIA

Yale University Press From the acclaimed author and scholar James C. Scott, the compelling tale of Asian peoples who until recently have stemmed the vast tide of state-making to live at arm's length from any organized state society For two thousand years the disparate groups that now reside in Zomia (a mountainous region the size of Europe that consists of portions of seven Asian countries) have fled the projects of the organized state societies that surround them—slavery, conscription, taxes, corvée labor, epidemics, and warfare. This book, essentially an "anarchist history," is the first-ever examination of the huge literature on state-making whose author evaluates why people would deliberately and reactively remain stateless. Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain; agricultural practices that enhance mobility; pliable ethnic identities; devotion to prophetic, millenarian leaders; and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states. In accessible language, James Scott, recognized worldwide as an eminent authority in Southeast Asian, peasant, and agrarian studies, tells the story of the peoples of Zomia and their unlikely odyssey in search of self-determination. He redefines our views on Asian politics, history, demographics, and even our fundamental ideas about what constitutes civilization, and challenges us with a radically different approach to history that presents events from the perspective of stateless peoples and redefines state-making as a form of "internal colonialism." This new perspective requires a radical reevaluation of the civilizational narratives of the lowland states. Scott's work on Zomia represents a new way to think of area studies that will be applicable to other runaway, fugitive, and marooned communities, be they Gypsies, Cossacks, tribes fleeing slave raiders, Marsh Arabs, or San-Bushmen.

NEW CRITICAL STUDIES ON EARLY QUAKER WOMEN, 1650-1800

Oxford University Press *New Critical Studies on Early Quaker Women, 1650-1800* offers a reassessment of early Quaker women. With a central focus on gender, the contributors highlight new discoveries and interpretations about these transatlantic women Friends. It is

the first edited collection to approach the gendered dimension of the Quaker movement. Divided into three parts, the volume connects the richly woven threads of Quaker women's studies: *Revolutions, Disruptions, Networks*. This authoritative collection crosses divides - between centuries, spanning continents and cultures - and is the first to merge academic disciplines that are often artificially separated and that do not foreground the intricacies of women's experience.

FROM HOBBITS TO HOLLYWOOD

ESSAYS ON PETER JACKSON'S LORD OF THE RINGS

BRILL Peter Jackson's film version of *The Lord of the Rings* (2001-2003) is the grandest achievement of 21st century cinema so far. But it is also linked to topical and social concerns including war, terrorism, and cultural imperialism. Its style, symbols, narrative, and structure seem always already linked to politics, cultural definition, problems of cinematic style, and the elemental mythologies that most profoundly capture our imaginations. *From Hobbits to Hollywood: Essays on Peter Jackson's Lord of the Rings* treats Jackson's trilogy as having two conditions of existence: an aesthetic and a political. Like other cultural artefacts, it leads a double life as objet d'art and public statement about the world, so that nothing in it is ever just cinematically beautiful or tasteful, and nothing is ever just a message or an opinion. Written by leading scholars in the study of cinema and culture *From Hobbits to Hollywood* gives Jackson's trilogy the fullest scholarly interrogation to date. Ranging from interpretations of *The Lord of the Rings'* ideological and philosophical implications, through discussions of its changing fandoms and its incorporation into the Hollywood industry of stars, technology, genre, and merchandising, to considerations of CGI effects, acting, architecture and style, the essays contained here open a new vista of criticism and light, for ardent fans of J.R.R. Tolkien, followers of Jackson, and all those who yearn for a deeper appreciation of cinema and its relation to culture.

APPLIED THERMODYNAMICS

New Age International This Book Presents A Systematic Account Of The Concepts And Principles Of Engineering Thermodynamics And The Concepts And Practices Of Thermal Engineering. The Book Covers Basic Course Of Engineering Thermodynamics And Also Deals With The Advanced Course Of Thermal Engineering. This Book Will Meet The Requirements Of The Undergraduate Students Of Engineering And Technology Undertaking The Compulsory Course Of Engineering Thermodynamics. The Subject Matter Of Book Is Sufficient For The Students Of Mechanical Engineering/Industrial-Production Engineering, Aeronautical Engineering, Undertaking Advanced Courses In The Name Of Thermal Engineering/Heat Engineering/ Applied Thermodynamics Etc. Presentation Of The Subject Matter Has Been Made In Very Simple And Understandable Language. The Book Is Written In SI System Of Units And Each Chapter Has Been Provided With Sufficient Number Of Typical Numerical Problems Of Solved And Unsolved Questions With Answers.

RETHINKING COMMUNITY RESILIENCE

THE POLITICS OF DISASTER RECOVERY IN NEW ORLEANS

NYU Press Explores the unintended consequences of civic activism in a disaster-prone city After Hurricane Katrina, thousands of people swiftly mobilized to rebuild their neighborhoods, often assisted by government organizations, nonprofits, and other major institutions. In *Rethinking Community Resilience*, Min Hee Go shows that these recovery efforts are not always the panacea they seem to be, and can actually escalate the city's susceptibility to future environmental hazards. Drawing upon interviews, public records, and more, Go explores the hidden costs of community resilience. She shows that—despite good intentions—recovery efforts after Hurricane Katrina exacerbated existing race and class inequalities, putting disadvantaged communities at risk. Ultimately, Go shows that when governments, nonprofits, and communities invest in rebuilding rather than relocating, they inadvertently lay the groundwork for a cycle of vulnerabilities. As cities come to terms with climate change adaptation—rather than prevention—*Rethinking Community Resilience* provides insight into the challenges communities increasingly face in the twenty-first century.

PRE-INCIDENT INDICATORS OF TERRORIST INCIDENTS

THE IDENTIFICATION OF BEHAVIORAL, GEOGRAPHIC AND TEMPORAL PATTERNS OF PREPARATORY CONDUCT

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

SHAKESPEARE AND ECOFEMINIST THEORY

Bloomsbury Publishing Ecofeminism has been an important field of theory in philosophy and environmental studies for decades. It takes as its primary concern the way the relationship between the human and nonhuman is both material and cultural, but it also investigates how this relationship is inherently entangled with questions of gender equity and social justice. *Shakespeare and Ecofeminist Theory* engagingly establishes a history of ecofeminist scholarship relevant to early modern studies, and provides a clear overview of this rich field of philosophical enquiry. Through fresh, detailed readings of Shakespeare's poetry and drama, this volume is a wholly original study articulating the ways in which we can better understand the world of Shakespeare's plays, and the relationships between men, women, animals, and plants that we see in them.

STEPPING BACK TO LOOK FORWARD

A HISTORY OF THE MASSACHUSETTS FOREST

Harvard University Press This timely collection of essays - written by nine recognized forestry and environmental specialists - tells the story of the conservation, use, and changes in the Commonwealth's forests over time. The book traces the development of pre-settlement, colonial, and post-Revolutionary War forest practices, and concludes with recommendations as to how history might be used to inform and shape future policy. Underscored is the importance of private and local leadership, such as the unique Massachusetts town forest movement. Economic contributions and educational programs are detailed, as well as the ways Massachusetts' leadership has influenced national forestry. Written for the layperson, and reflecting the particular experience and style of each contributor, the history will appeal to a range of readers from local conservation activists to forestry professionals and policymakers.

THE UNKNOWN COMPONENT PROBLEM

THEORY AND APPLICATIONS

Springer Science & Business Media The Problem of the Unknown Component: Theory and Applications addresses the issue of designing a component that, combined with a known part of a system, conforms to an overall specification. The authors tackle this problem by solving abstract equations over a language. The most general solutions are studied when both synchronous and parallel composition operators are used. The abstract equations are specialized to languages associated with important classes of automata used for modeling systems. The book is a blend of theory and practice, which includes a description of a software package with applications to sequential synthesis of finite state machines. Specific topologies interconnecting the components, exact and heuristic techniques, and optimization scenarios are studied. Finally the scope is enlarged to domains like testing, supervisory control, game theory and synthesis for special omega languages. The authors present original results of the authors along with an overview of existing ones.

INTRODUCTION TO AIRCRAFT FLIGHT MECHANICS

PERFORMANCE, STATIC STABILITY, DYNAMIC STABILITY, CLASSICAL FEEDBACK CONTROL, AND STATE-SPACE FOUNDATIONS

American Institute of Aeronautics & Astronautics Suitable for use in undergraduate aeronautical engineering curricula, this title is written for those first encountering the topic by clearly explaining the concepts and derivations of equations involved in aircraft flight mechanics. It also features insights about the A-10 based upon the author's career experience with this aircraft.

ADVANCED LOGIC SYNTHESIS

Springer This book provides a single-source reference to the state-of-the-art in logic synthesis. Readers will benefit from the authors' expert perspectives on new technologies and logic synthesis, new data structures, big data and logic synthesis, and convergent logic synthesis. The authors describe techniques that will enable readers to take advantage of recent advances in big data techniques and frameworks in order to have better logic synthesis algorithms.
