INTERNATIONAL GUIDE TO STUDENT ACHIEVEMENT

Routledge The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today. There are many, often competing, claims about how to enhance student achievement, raising the questions of "What works?" and "What works best?" World-renowned bestselling authors, John Hattie and Eric M. Anderman have invited an international group of scholars to write brief, empirically-supported articles that examine predictors of academic achievement across a variety of topics and domains. Rather than telling people what to do in their schools and classrooms, this guide simply provides the first-ever compendium of research that summarizes what is known about the major influences shaping students' academic achievement around the world. Readers can apply this knowledge base to their own school and classroom settings. The 150+ entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick, easy reference. Chapter authors follow a common format that allows readers to more seamlessly compare and contrast information across entries, guiding readers to apply this knowledge to their own classrooms, their curriculums and teaching strategies, and their teacher training programs.

'The entire world, all of it, it not equal in worth to the day on which the Song of Songs was given to Israel.' Excerpts from The Bible relating to gardens. The Garden of Eden was thought to have been in West Asia. Excerpts from The Koran relating to gardens. Because gardens were so often used as a symbol of paradise, there are more references to gardens in The Koran than in The Bible. eTexts relating to Ancient Greece Plato's discussion of 'imitation' (mimesis) is explained and discussed. Book X of The Republic (c370 BC) is in the Encyclopedia. Plato's Theory of Forms led to the aesthetic principle that 'Art should Imitate Nature' which had a profound influence on western art in general and garden design in particular. Homer, excerpts from the Iliad and Odyssey relating to gardens Sir James Frazer's The Golden Bough (1890). The chapter in the Encyclopedia describes 'The Ritual of Adonis'. It is written by the founder of modern anthropology and helps to explain the Adonis Cult, which provides evidence of plants being grown in Greek courtyard gardens, and of the spirit in which sacred groves were made in Ancient Greece. eTexts relating to The Roman Empire Vitruvius Pollio on landscape architecture and garden design (27 BC) from de Architectura. Vitruvius was a Roman and wrote the oldest western book on design to have survived. It lays down the principle that places should have 'commodity, firmness and delight'. Book 1, Chapters 1-7, are in the Encyclopedia. Excerpts from Ovid's Metamorphosis (1-8 AD) and Art of Love (1 BC). Ovid's poetry provided a rich source of imagery for garden designers and for the artists who made garden sculpture. Pliny the Younger's letters describing his own gardens (c100 AD). These letters are the best surviving descriptions of Roman gardens and of how their owners used them. Pliny owned many gardens and 500 slaves. Cicero, excerpts from his letters relating to gardens Virgil's Aeneid, sections relating to gardens Life of St Martin The first outstanding monastic leader in France was St Martin of Tours (c316-397). Ibn Battuta's account of Constantinople c1300 eTexts relating to Medieval Gardens Charlemagne's 'chapter' (capitulary) on gardens gave detailed instructions for the plants to be used in the royal gardens and for the management of his lands. They are key texts for the study of medieval gardens, c800 AD. A note on 'Irmisul', the sacred tree of the Saxons, destroyed by the Christians. Guillaume de Lorris' Romance of the Rose or Roman de la Rose (c1250). This is an allegorical poem, inspired by Ovid, in which gardens and roses are associated with romantic love ('Full many a time I smote and struck the door and listened for someone to let me in') Excerpts from Boccaccio's Decameron (1353), with classical descriptions of medieval garden scenes. This gives a particular importance to past travellers descriptions of their use and form. There sections from the following accounts of visits to Persian gardens in the Encyclopedia (and engravings, to capture the flavour of Persian gardens as they were) Montesquieu's Persian letters (1721) contained little information on Persian gardens but did much to awaken interest in seraglios and the 'romance of the East'. Washington Irving, the 'father of American literature' published a famous account of the Alhambra in 1832. He was a friend of Sir Walter Scott and has the same interest in welding history with imagination. Plotinus (205-270AD) was 'rediscovered' during the renaissance, in the Platonic Academy founded at Careggi, and came to have a profound influence on renaissance design methods St Augustine's conversion took place in a garden in Milan (described in his Confessions) and was often chosen as a frontispiece to editions of his work. This famous essay, by a philosopher and scientist, in Sir Geoffrey Jellicoe's words 'magisterially lays down the fundamental principles of gardening'. It begins with the words 'God Almighty first planted a garden' and praises wildness in gardens. John Evelyn's diary accounts of gardens in France and Italy visited between 1644 and 1685. As with Montaigne's diary, they provide contemporary descriptions of French and Italian parks and gardens. Andrew Marvell's The Garden (c1650) celebrates the delights in the symbolism of seventeenth century enclosed gardens. Marvell's Upon Appleton House, to my Lord Fairfax contains some garden description. The Garden by Abraham Cowley 'I never had any other desire so strong, and so like to covetousness, asthat I might be master at last of a small house and large garden Sir Thomas Browne's essay on The Garden of Cyrus deals with the history of gardens, as viewed from 1658 (an extract is in the Encyclopedia) eTexts relating to Enlightenment Gardens René Descartes Descartes did not write either on aesthetics or on garden design, but historians continue to speak of the 'Cartesian Garden', by which they mean a geometrical garden. The Encyclopedia contains the text and a comment on his Discourse on the method of rightly conducting the reason, and seeking truth in the sciences.(1637) This short book laid the foundation for the philosophy of the Enlightenment and for Neoclassical aesthetics. John James Theory and Practice of Gardening was published in 1712, based on A J Dezallier d'Argenville and Le Blond. It became the standard book on laying out a French baroque garden and provides a fascinating insight into how this was done. James also 'introduced the concept of the ha-ha and anticipated

Pope's famous dictum on the genius of the place'. The Encyclopedia has 3 chapters, 4 plates and a discussion of James' book. Alexander Pope's and his Essay on Criticism (1711) Epistle to Lord Burlington (1731). The former summarises contemporary attitudes to gardens and the latter summarises contemporary (rationalist-Neoclassical) aesthetic theory: based on Reason, Nature and the Genius of the Place. John Serle's plan of Alexander Pope's garden at the time of his death, and his description of Pope's grotto (+ photographs of the grotto and its setting) Sir Joshua Reynolds Discourses were delivered at the Royal Academy in London between 1769 and 1790 embody 'The basic ideas of neoclassical theory in the fine arts were set forth in definitive form, with clarity and grace'. The Encyclopedia contains relevant quotations. eTexts relating to Romantic Gardens William Temple's essay 'Upon the Gardens of Epicurus: or Of Gardening' (1685) is extravagantly praised by Nicholas Pevsner. He claims this essay 'started a line of thought and visual conceptions which were to dominate first England and then the World for two centuries.' The full text is in the Encyclopedia . Joseph Addison's Essay 161 made the key association of natural scenery with liberty and freedom. Essay 37 describes a perfect garden in which reason and nature go hand in hand. Essay 414 sees the works of nature as more delightful than artificial arrangements. Essay 417 supports Locke's theory of knowledge. Essay 477 describes Addison's own garden at Bilton. William Shenstone A description of The Leasowes. This was one of the landscape gardens most admired in continental Europe, partly because it was the work of a poet and partly because it combined use and beauty - a ferme ornée. The full text of his publisher's description is in the Encyclopedia . William Shenstone 'Unconnected thoughts on gardening'. The invention of the term 'landskip gardening' is attributed to Shenstone. Edmund Burke An essay on the sublime and beautiful (1757). Taking an empiricist approach, Burke attacks Vitruvian and rationalist aesthetics. He also discusses garden design, praising Hogarth's 'line of beauty' (which Brown followed) and comparing 'smooth streams in the landscape' with 'in fine women smooth skins'. Quotations from Lancelot 'Capability' Brown, describing the principles on which he worked. Horace Walpole's essay 'On Gardening' (1780). The most brilliant and influential essay ever written on the development English park and garden design. Thomas Jefferson's descriptions of English gardens John Claudius Loudon's biography of Humphry Repton (1840). After Repton's own writings, this is the primary source of information on Humphry Repton's life and work. Jean-Jacques Rousseau one of the letters from La Nouvelle Héloïse deal's with Julie's garden. It is a romantic treatment of an ancient theme, making the association between women, sex and gardens (see above references the Song of Solomon, the Romance of the Rose and Boccaccio. Also the reference below to Goethe). Uvedale Price On the Picturesque (1794) Excerpt from Chapter 1 and Chapter 4. Price was a widely respected authority on picturesque taste in gardens. Humphry Repton 'A letter to Mr Price' (1795) Humphry Repton Sketches and Hints (1795) This is Repton's first theoretical statement on his chosen professional (Introduction and Chapter 1 on Encyclopedia) Humphry Repton Fragments on the Theory and Practice of Landscape Gardening (1816) The Fragment reproduced (No 27) comes from the Red Book for Ashridge - a favourite project and the occasion for Repton's advocacy of what became the Mixed Style of garden design. eTexts relating to Nineteenth Century Gardens Johann Wolfgang von Goethe Elective Affinities (1809). Like Rousseau, Goethe admired 'natural' gardens. He also drew gardens and designed gardens. The section reproduced in the Encyclopedia deals with the design of a romantic garden. Jane Loudon's life of her husband John Claudius Loudon (1843). Jane was a novelist and her memoir is as touching as it is important as the key source of information on her husband - who was the most influential garden writer of the nineteenth century. Loudon's influence was particularly important in America. Edward Kemp How to lay out a garden (1864 edn). Excerpts giving his views on styles of garden design and describing two gardens which he designed. It presents a somewhat depressing picture of the confusion which reigned in the mid-nineteenth century garden aesthetics - and continues to reign in many of the world's municipal parks departments.. Sir Walter Scott, excerpt from Waverly and from The Quarterly Review on gardens. Scott's remarks can be read in conjunction with those of his friends, Gilbert Laing Meason and Washington Irving. They introduced a romantic-historical dimension to garden design and appreciation. Gustave Flaubert Bouvard and Pécuchet. Flaubert satirizes the bourgeois taste in garden design displayed by the characters whose names form the title of his last novel. Famous Parks and Gardens of the World - the book was published anonymously and provides a good illustration of European gardening opinion in 1880. The Preface and Chapter 10 are in the Encyclopedia . Ludwig II of Bavaria: the romantic gardens of the 'Mad King' were rich in historical associations. eTexts relating to the History of Landscape Architecture Guide to the History of Landscape Architecture, by Tom Turner Gilbert Laing Meason. The full text of Meason's On the Landscape Architecture of the Great Painters of Italy (London 1828). Meason was the 'inventor' of the term Landscape Architecture, which has since come to be used by a world-wide profession, represented by the International Federation of Landscape Architects, by the American Society of Landscape Architects, by the UK Landscape Institute and numerous other national associations. Only 150 copies of his book were printed and its contents are not well known. This is the first time the book has been re-published. It is accompanied with an analysis of the text by Tom Turner. A clear appreciation of how landscape architecture began is regarded as central to comprehension of the modern profession. Notes on the Top twenty theorists and designers in the history of landscape architecture and on the question What is landscape architecture? John Claudius Loudon's included comments on Meason in his Gardener's Magazine (1828) and in his Encyclopedia of Architecture (1833). These comments transmitted the term to Andrew Jackson Downing and, later, to Frederick Law Olmsted - setting the course of American landscape architecture. Andrew Jackson Downing's Treatise on the Theory and Practice of Landscape Gardening. (Section 1, Section 2 and Section 9). Downing was 'the first American writer on landscape architectural topics' (Norman T Newton in Design on the Land) and an 'incalculable' influence on American garden design and landscape architecture (Oxford Companion to Gardens). Loudon's writings were his starting point. Frederick Law Olmsted's description of his winning design for the Central Park, New York, competition (1858). Olmsted 'the father of American landscape architecture' entered the profession as a result of the Greensward Plan for Central Park, done in partnership with the English architect Calvert Vaux. Norman T Newton's account of the scope of landscape architecture, from Design on the land. Geoffrey Jellicoe's account of the scope of landscape design, from the Landscape of Man Ian McHarg: notes and links on the twentieth century's outstanding landscape planner. eTexts relating to Arts and Crafts Gardens William Morris' essay on Hopes and fears for art in which he criticises carpet bedding and makes the point that gardens should be works of art and of craft. Thomas Huxley's discussion of Evolution and ethics (1859), in which he views his own garden as a 'work of art' in contrast to the 'state of nature' which existed before it was made. William Robinson The Wild Garden (1881 edn Chapters 1-5, originally published by John Murray and reproduced with their permission). Robinson is described by Jekyll (in the reference below) as 'our great champion of hardy flowers'. He urged the use of hardy plants, instead of subtropical plants and carpet bedding, in garden design. He had a sharp dispute with Blomfield (below). John D Sedding Garden craft old and new (1891) introduced his book with a chapter on The Theory of the Garden. There are 2 chapters in the Encyclopedia . Reginald Blomfield's The Formal garden in England (1901 edn, originally published by MacMillan and reproduced with their permission). A contemporary review in The Times said 'Mr. Blomfield's historical sketch of the art of gardening in England is full of interest and instruction, and his polemic against the so-called landscape gardeners is vigorous, incisive, and to our mind convincing.' The book is undoubtedly polemical, but commendably scholarly. Blomfield was the son of a bishop and had a hatred of modernism. Gertrude Jekyll's account of garden design (from Wall water and woodland gardens, 1901, originally published by Country Life and reproduced with their permission). Jekyll was the most influential writer on planting design in the twentieth century. This chapter is the clearest statement of her views on the history and theory of garden design. eTexts relating to Design Methods Design methodology: an overview by Tom Turner Surface water drainage and management (from Landscape Design October 1985) arguing for 'privileging' water in the design procedure Wilderness and plenty: construction and deconstruction (from Urban Design Quarterly September 1992) arguing that the professional structure of the construction industry would benefit from deconstruction. 'Feminine' landscape design: a tale of two tragedies (from a Sheffield Spring School lecture, April 1993) arguing for the 'way of the hunter' to be balanced by the 'way of the nester' Postmodern landscapes (from Landscape Design May 1993) arguing for landscape and garden designers to take account of postmodern ideas and theories in their work Pattern analysis (from Landscape Design October 1991) arguing for a design method based on pattern analysis, instead of the modernist Survey-Analysis-Design (SAD) method taught in most of the world's landscape and garden design schools. Revolutions in the garden (from Tom Turner's City as landscape, Spons 1996). After looking at the design revolutions which have taken place in the 1690s, 1790s, and 1890s this essay finds the seeds of a fourth design revolution in the work of Sir Geoffrey Jellicoe, Charles Jencks, and Ian Hamilton Finlay. The flowers of garden design theory (from Garden Design Journal Autumn 1999, published as 'Timeless with delight') this article suggests a design method which integrates knowledge drawn from various fields, including the fine arts, philosophy, the natural and social sciences. PAKILDA: Pattern Assisted Knowledge Intensive Landscape Design Approach (from Landscape Design May 2001). Developing the method outlined in the Garden Design Journal, this article recommends a design method for landscape design and planning. Design history and theory (from a lecture delivered at the University of Uppsala in April 2002) this article relates the PAKILDA method to the set of design objectives outlined by Vitruvius in the first century: utilitas (Commodity), firmitas (Firmness) and venustas (Delight). eTexts relating to Twentieth Century Gardens There are histories of American Garden Design in the Encyclopedia , written in 1834, 1928 and 2001. Geoffrey Jellicoe: a collection of information on his work, including an essay by Tom Turner on: Geoffrey Jellicoe, the subconscious and landscape design (1998) Garden Revolutions: an essay in which it is argued that 'structuralism can infuse gardens with post-Postmodern ideas and beliefs. It is a layered approach to garden making. '

WORLD HISTORY, VOLUME I: TO 1800

Cengage Learning Noted teachers and scholars William J. Duiker and Jackson J. Spielvogel present a balanced, highly readable overview of world history that explores common challenges and experiences of the human past and identifies key patterns over time. Thorough coverage of political, economic, social, religious, intellectual, cultural, and military history is integrated into a chronological framework to help students gain an appreciation and understanding of the distinctive character and development of individual cultures in society. This approach, with organization around seven major themes (Science and Technology, Art and Ideas, Family and Society, Politics and Government, Earth and the Environment, Religion and Philosophy, and Interaction and Exchange), helps students link events together in a broad comparative and global framework, thereby placing the contemporary world in a more meaningful historical context. Available in the following options: WORLD HISTORY, Eighth Edition (Chapters 1–30); Volume I: To 1800 (Chapters 1–18); Volume II: Since 1500 (Chapters 14–30). FUNDAMENTALS OF BIOSTATISTICS

Cengage Learning Bernard Rosner's FUNDAMENTALS OF BIOSTATISTICS is a practical introduction to the methods, techniques, and computation of statistics with human subjects. It prepares students for their future courses and careers by introducing the statistical methods most often used in medical literature. Rosner minimizes the amount of mathematical formulation (algebra-based) while still giving complete explanations of all the important concepts. As in previous editions, a major strength of this book is that every new concept is developed systematically through completely worked out examples from current medical research problems. Most methods are illustrated with specific instructions as to implementation using software either from SAS, Stata, R, Excel or Minitab.
