STUDENT GUIDE TO IFRS

TEACHING IFRS

Routledge The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of, and insights into, the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those courses. This book was originally published as a special issue of Accounting Education: An international journal.

IFRS 9 AND CECL CREDIT RISK MODELLING AND VALIDATION

A PRACTICAL GUIDE WITH EXAMPLES WORKED IN R AND SAS

Academic Press IFRS 9 and CECL Credit Risk Modelling and Validation covers a hot topic in risk management. Both IFRS 9 and CECL accounting standards require Banks to adopt a new perspective in assessing Expected Credit Losses. The book explores a wide range of models and corresponding validation procedures. The most traditional regression analyses pave the way to more innovative methods like machine learning, survival analysis, and competing risk modelling. Special attention is then devoted to scarce data and low default portfolios. A practical approach inspires the learning journey. In each section the theoretical dissertation is accompanied by Examples and Case Studies worked in R and SAS, the most widely used software packages used by practitioners in Credit Risk Management. Offers a broad survey that explains which models work best for mortgage, small business, cards, commercial real estate, commercial loans and other credit products Concentrates on specific aspects of the modelling process by focusing on lifetime estimates Provides an hands-on approach to enable readers to perform model development, validation and audit of credit risk models

FINANCIAL REPORTING UNDER IFRS

A TOPIC BASED APPROACH

John Wiley & Sons The International Financial Reporting Standards are quite different from other sets of accounting standards, and are fundamentally different from US-GAAP, in that they are based on principles, and not on detailed rules. Financial Reporting under IFRS: A topic-based approach offers a global perspective on IFRS by presenting the prescribed rationale and principles and illustrating them through numerous examples from large international companies. It aims to develop the fundamental skills necessary to read and use the information contained in all types of financial statements, through examples, activities, questions and answers. The book is broadly divided into three sections. Section one examines the structure of the Balance Sheet and the Income Statement, their links and the

accounting mechanisms used to prepare them. Section two deals with the identification, evaluation and reporting of Balance Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks. Throughout the book special topics are covered, including Derivatives and Hedge accounting (IAS 39), Business Combination (IFRS 3) and Operating Segments (IFRS 8). Financial Reporting under IFRS is ideally suited to the needs of students of accounting and financial reporting, but all users of financial statements, from creditors and investors to suppliers, customers, employees and governments will benefit from its concise, topic-based approach.

INTRODUCING PROPERTY VALUATION

Routledge This comprehensive introduction to the concepts and methods of valuing real estate helps students to progress successfully from basic principles to a more sophisticated understanding. Taking a practically oriented rather than purely theoretical approach, this textbook enables you to undertake valuation calculations yourself. Experienced tutor and valuer Michael Blackledge demonstrates how the principles can be applied in professional practice in line with the requirements and guidance provided by the Royal Institution of Chartered Surveyors. The five traditional methods of valuation are outlined and the practical applications of the two main approaches, the comparison and investment methods, are fully explored. The use of discounted cash flow and quarterly in advance calculations, topics which have often been neglected elsewhere, are also explained. Complete with extensive further reading suggestions, a full range of worked examples, clear chapter summaries and additional online exercises, this book is essential for any student of real estate and its valuation.

INTERPRETATION AND APPLICATION OF INTERNATIONAL STANDARDS ON AUDITING

Wiley Written by Steven Collings, winner of Accounting Technician of the Year at the British Accountancy Awards 2011, this book deals with the significant changes auditing has undergone in recent years, due in large part to well-publicised corporate disasters such as Enron and Parmalat, which have shaken the profession. In response, many countries have replaced pre-existing domestic standards with International Standards on Auditing (ISAs) in an attempt to ensure that auditors throughout the world apply the same level of standards during all audit assignments, and that audit quality remains consistent on a global basis. International Standards on Auditing are frequently updated to improve and clarify their application throughout the audit and accounting profession. They can be extremely complex and difficult to apply in real life situations. It is essential to apply the standards with sufficient rigor to enable an efficient audit to take place, to satisfy the regulators and ensure that the client receives and audit which is beneficial, cost effective, and which conforms to the prescribed framework; however, auditors are often criticised for failing to do so. Recognising that auditing is not always an exact science, and that in many cases the auditor is called upon to make a judgement in situations open to differing opinions, this book takes a practical and pragmatic approach to following International Standards on Auditing. Steve Collings looks at the full ISAs in their final form, as reissued following the IAASB 'Clarity Project', and give auditors guidance on how to interpret and apply them in real life situations. Each redrafted or rewritten ISA is dealt with in a separate chapter, containing case studies and illustrative examples. The book also covers the regulatory framework of auditing and gives a summary of the five ethical standards applicable to auditors, as mapped by the IAASB. Detailed appendices provide an overview of IFRS and IAS, illustrative audit tests

and illustrative financial statements.
