**Company Accounting** Company Accounting provides a thorough introduction to the theory and practice of financial reporting. By tracking the lifecycle of a company, this fifth edition continues to provide students with a logical framework for learning. Comprehensively revised and updated, Company Accounting, fifth Edition incorporates recent changes to the International Financial Reporting Standards (IFRS) as adopted by the Australian Accounting Standards Board (AASB). With an easily accessible 'how to' approach, supported by in-depth theoretical coverage and evaluations of the reporting requirements, students will find Company Accounting to be an oasis of clarity in the challenging subject area of tertiary Accounting. **Regional Conference on Science, Technology and Social Sciences (RCSTSS 2014) Business and Social Sciences** Springer This book features more than 95 papers that were presented at the bi-annual Regional Conference on Science, Technology and Social Sciences, RCSTSS 2014, which was organized by Universiti Teknologi MARA Pahang. It covers topics ranging from communications studies, politics, psychology, education, religious studies as well as business and economics. The papers, which have been carefully reviewed, include research conducted by academicians locally, regionally and globally. They detail invaluable insights on the important roles played by the various disciplines in science, technology and social sciences. Coverage includes accounting, art and design, business, communication, economics, education, finance, humanity, information management, marketing, music, religion, social sciences and tourism. Throughout, clear illustrations, figures and diagrams complement the research. The book is a significant point of reference to academicians and students who want to pursue further research in their respective fields. It also serves as a platform to disseminate research findings as a catalyst to bring out positive innovations on the development of the region. **Managing Climate Change Papers from the Greenhouse 2009 Conference** CSIRO PUBLISHING A number of international, high-level science and policy meetings have been influential in the ongoing global climate change negotiations. One of these landmark meetings was Greenhouse 2009, where those involved in research, policy and communication of various aspects of climate change provided the latest assessments of the science and likely impacts on Australia and the world. Managing Climate Change provides an important snapshot of the issues presented at the Greenhouse 2009 conference. The book gives a summary of the state of climate change science, approaches to handling the impacts and adaptation measures we are likely to face, and how to communicate the issue in order to generate better decision making and behavioural change towards sustainability. It features the latest Australian research and includes chapters on emerging fields such as the need to include behavioural and social patterns to address climate change, as well as adaptation measures for agriculture, energy use and infrastructure that may be required. The announcements, ideas and discussions at the Greenhouse 2009 conference continue to make an important contribution to addressing and tackling climate change. **Intellectual Capital Accounting Practices in a Developing Country** Routledge This book examines and explains the intellectual capital reporting practices, with a human capital focus, of firms located in the developing nation of Sri Lanka. The study ascertains the following: first, to what extent the industry groups, based on the number of shareholders, differ in their ICR practices; and second, to what extent firms in Sri Lanka differ from counterparts in other nations in their intellectual capital reporting practices. An important aspect of this book is looking at the practices from a critical perspective to providing a more balanced view of 'good' and 'bad' effects of intellectual capital. The book meticulously outlines an extensive literature review, research methods, the theoretical perspective, findings with an engaging discussion, and concluding remarks. Indra Abeysekera's fine research project is an impressive contribution to an emerging area of interest throughout academia and industry. **Tumors in Domestic Animals** John Wiley & Sons Since the third edition of Tumors of Domestic Animals there has been an enormous expansion of our knowledge about the molecular mechanisms of tumor development and the ancillary aids used to diagnose neoplasms. The fourth edition condenses this new body of information and presents it in a way that is useful to diagnostic pathologists, residents, veterinarians, and oncologists. The format of the previous editions has been maintained, but the text and the illustrations are substantially changed or entirely different. Readers will be able to find salient clinical information, prevalence data, biological behavior, and most importantly, accurate information about gross and microscopic lesions to help diagnostic pathologists establish an accurate morphological diagnosis. The editor and authors of Tumors of Domestic Animals, all recognized experts in their fields, recognize the need for accurate morphological diagnoses in veterinary patient care, particularly with the numerous treatment modalities now available to oncologists and owners. This landmark reference in veterinary pathology provides the applicable information that clinical veterinarians need and want to make decisions about treatment of the animals in their care. **Handbook of Research on New Challenges and Global Outlooks in Financial Risk Management** IGI Global Risk affects many different companies, industries, and institutions, and the COVID-19 pandemic has caused more challenges than before to arise. In the wake of these new challenges, new risk management strategies must arise. Risk affects many companies differently, though in the aftermath of a global pandemic, similar management strategies may be adapted to maintain a flourishing business. Financial risk management has become increasingly important in the last years, and a profound understanding of this subject is vital. The Handbook of Research on New Challenges and Global Outlooks in Financial Risk Management discusses the financial instruments firms use to manage the difference kinds of financial risks and risk management practices in a variety of different countries. This book offers an international focus of risk management, comparing different practices from all over the world. Covering topics such as bank stability, environmental assets, and perceived risk theory, this book is a valuable research source for regulatory authorities, accountants, managers, academicians, students, researchers, graduate students, researchers, faculty, and practitioners. **International Accounting and Reporting Issues 2014 Review** United Nations The International Accounting and Reporting Issues 2014 Review is focused on the interrelated topics of compliance monitoring and enforcement mechanisms in relation to corporate reporting, auditing and regulation of professional accountants within the context of achieving high-quality corporate reporting. In order to facilitate sharing of experiences among members States and also to provide practical examples of compliance monitoring and enforcement mechanisms in relation to international corporate reporting standards and codes, the UNCTAD secretariat, in cooperation with top experts on these topics, prepared country case studies on Australia, Belgium and Canada. Chapter I analyzes the key elements that member States need to consider when building efficient monitoring and enforcement systems for companies, audit firms and professional accountants. It highlights standards and guidance for good practices and discusses the main challenges to establish efficient mechanisms for the monitoring of compliance and enforcement. The respective country case studies are contained in chapters II through IV. **The Academic Book of the Future** Springer This book is open access under a CC-BY licence. Part of the AHRC/British Library Academic Book of the Future Project, this book interrogates current and emerging contexts of academic books from the perspectives of thirteen expert voices from the connected communities of publishing, academia, libraries, and bookselling. **Ethics and Auditing** ANU E Press Ethics and Auditing examines ethical challenges exposed by recent accounting and auditing 'lapses' through a study of interconnected moral, legal and accounting issues. The book aims to engage a broad readership in the discussion of audit failure and reform. With its range of intellectual and practical perspectives, Ethics and Auditing provides critical analyses of auditor independence, conflicts of interest, self-regulation, the setting and enforcing of auditing standards, and ethics education. **Accounting Education at a Crossroad in 2010 Typology of Knowledge, Skills and Competences Clarification of the Concept and Prototype** European Communities The third in a series of Cedefop publications dealing with technical aspects of the European Qualification Framework and European Credit Transfer System, this book analyses current practice in countries that have made progress with evaluating and defining competence. It proposes a typology of knowledge, skills and competence, to be used not as an instrument of 'harmonisation' between countries, but as a template to enable comparison. The aim is to promote mobility in every sense, bringing work-based learning and knowledge acquired in higher education closer together. **Materiality in Financial Reporting An Integrative Perspective** Emerald Group Publishing This book offers an integrated perspective of materiality from the different angles of accounting, auditing, internal controls, management commentary, financial analysis, management control, forensic analysis, sustainability reporting, corporate responsibility, assurance standards, integrated reporting, and limited legal considerations. **Guide for the Care and Use of Laboratory Animals Eighth Edition** National Academies Press A respected resource for decades, the Guide for the Care and Use of Laboratory Animals has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The Guide sets the framework for the humane care and use of laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and Use of Laboratory Animals provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates. **Feeding a Hungry Nation Climate Change, Food and Farming in Australia Whistleblowing in the Australian Public Sector Enhancing the Theory and Practice of Internal Witness Management in Public Sector Organisations** ANU E Press The product of one of the world's most comprehensive research projects on whistleblowing, evidence from over 8,000 public servants in over 100 federal, state and local government agencies shows that whistleblowers can and do survive, and that often their role is highly valued. Public sector managers face significant challenges in better managing and protecting whistleblowers. There is great variation between the many public agencies making the effort, and the many agencies where the outcomes - for managers and whistleblowers alike - are still likely to be grim. This book is compulsory reading for all public sector managers who wish to turn this negative trend around, and for anyone interested in public accountability generally. **Principles of External Auditing** Wiley Global Education Principles of External Auditing has become established as one of the leading textbooks for students studying auditing. Striking a careful balance between theory and practice, the book describes and explains, in non-technical language, the nature of the audit function and the principles of the audit process. The book covers international auditing and accounting standards and relevant statute and case law. It explains the fundamental concepts of auditing and takes the reader through the various stages of the audit process. It also discusses topical aspects of auditing such as legal liability, audit risk, quality control, and the impact of information technology. Brenda Porter is currently visiting Professor at Exeter University and Chulalongkorn University, Bangkok. **Open Access and the Humanities Contexts, Controversies and the Future** Cambridge University Press If you work in a university, you are almost certain to have heard the term 'open access' in the past couple of years. You may also have heard either that it is the utopian answer to all the problems of research dissemination or perhaps that it marks the beginning of an apocalyptic new era of 'pay-to-say' publishing. In this book, Martin Paul Eve sets out the histories, contexts and controversies for open access, specifically in the humanities. Broaching practical elements alongside economic histories, open licensing, monographs and funder policies, this book is a must-read for both those new to ideas about open-access scholarly communications and those with an already keen interest in the latest developments for the humanities. This title is also available as Open Access via Cambridge Books Online. **Financial Accounting Open Access in Theory and Practice The Theory-Practice Relationship and Openness** Routledge Open Access in Theory and Practice investigates the theory-practice relationship in the domain of open access publication and dissemination of research outputs. Drawing on detailed analysis of the literature and current practice in OA, as well as data collected in detailed interviews with practitioners, policymakers, and researchers, the book discusses what constitutes 'theory', and how the role of theory is perceived by both theorists and practitioners. Exploring the ways theory and practice have interacted in the development of OA, the authors discuss what this reveals about the nature of the OA phenomenon itself and the theory-practice relationship. Open Access in Theory and Practice contributes to a better understanding of OA and, as such, should be of great interest to academics, researchers, and students working in the fields of information science, publishing studies, science communication, higher education policy, business, and economics. The book also makes an important contribution to the debate of the relationship between theory and practice in information science, and more widely across

different fields of the social sciences and humanities **Viruses in Foods Springer Science & Business Media** This is the first book to focus entirely on viruses in foods. It collates information on the occurrence, detection, transmission, and epidemiology of viruses in various foods. Although methods for bacterial detection in food are available, methods for detection of viruses in food, with the exception of shellfish, are not available. It is important, therefore, to develop methods for direct examination of food for viruses and to explore alternate indicators that can accurately reflect the virological quality of food. This book addresses these issues along with strategies for the prevention and control of viral contamination of food. **The Future of Audit Keeping Capital Markets Efficient** At a time when increased independence requirements for auditors, legal backing for auditing standards, and increased audit documentation requirements have occurred, this book examines key issues in the market for audit services in Australia. It investigates issues including: the understandability of audit and the state of the audit expectations gap; auditors' business acumen and industry expertise; the auditors' use of materiality; whether or not the increasingly prescriptive nature of auditing is creating a distraction from the 'real' audit task and stifling auditors' judgement; whether or not CLERP 9 reforms involving audit partner rotation and restrictions on non-audit service provision are efficient and effective and reactions to the increasing scrutiny of auditors and audit firms by regulators. With its thorough coverage of contemporary issues, this book intersperses the authors' summaries, interpretations and recommendations with the perceptions, expressed in their own words in order to faithfully convey their candid assessments, of users of audit reports, purchasers and suppliers of the audit product, auditing standard setters and regulators of the audit market. **Karbon Emisyon Yönetiminde Karbon Yönetim Muhasebesi EĞİTİM YAYINEVİ** Başta karbondioksit (CO2) olmak üzere sera gazlarındaki belirgin artış nedeniyle ortaya çıkan iklim değişikliğinin 21. yüzyılın en büyük sorunlarından biri olduğu konusunda genel bir fikir birliği bulunmaktadır. Bu değişikliğin ve etkilerinin oluşmasında ise doğrudan ve dolaylı karbon salınım kaynaklı faaliyetleri nedeniyle şirketlerin birinci dereceden sorumlu tutuldukları görülmektedir. Ancak şirketlerin çevresel stratejileri ve eylemleri üzerinde önemli derecede etkili olduğu belirtilen, iklim değişikliğini algılama biçim ve düzeylerinin farklılaşabileceği görülmektedir. Bu çalışmada temel olarak, iklim değişikliği konularının şirketler tarafından nasıl algılandığının belirlenmesi ve karbon yönetiminde kullanılan yönetim muhasebesi teknikleriyle ilişkisinin incelenmesi amaçlanmıştır. Bu amaç doğrultusunda, çalışma üç bölüme ayrılmıştır. Çalışmanın birinci bölümünde genel olarak iklim değişikliği kavramı, küresel ve şirketler üzerindeki etkileri, iklim değişikliği risk ve fırsatları, kurumsal çevre yönetimi, stratejileri ve kurumsal karbon yönetimine ilişkin açıklamalar yer almaktadır. **The Encyclopaedia of Sports Medicine: An IOC Medical Commission Publication, The Olympic Textbook of Science in Sport John Wiley & Sons** This new volume in the Encyclopaedia of Sports Medicine series, published under the auspices of the International Olympic Committee, delivers an up-to-date, state of the art presentation of the scientific aspects of conditioning, injury prevention, and competition. The book covers the key areas of scientific knowledge in sport and is divided into: physiology and biochemistry; nutrition; anthropometry; immunology; cell biology; biomechanics, engineering and ergonomics; psychology; pharmacology; limitations to performance; special populations; and exercise and health. Presented in a clear style and format, The Olympic Textbook of Science in Sport, draws on the expertise of an international collection of contributors who are recognized as leaders in their respective fields. It will be indispensable for all sport scientists and medical doctors who serve athletes and sports teams and is an invaluable reference for students of sport and exercise science. **The Whistleblowing Guide Speak-up Arrangements, Challenges and Best Practices John Wiley & Sons** Choose the best speak-up arrangements for your organisation The last five years have seen dramatic and fundamental changes in whistleblower procedures for organisations. Prompted by a spate of important public disclosures, organizations are now mandated by law to implement effective arrangements enabling employees to speak up about perceived wrongdoing. Currently few resources exist to help with this. To help fill the gap, The Whistleblowing Guide examines the opportunities and challenges associated with different types of whistleblowing and speak-up arrangements, making recommendations based on best practices you can trust. Identifies the major organisational, structural and cultural obstacles to speaking up through speak-up arrangements Proposes effective whistleblowing and speak-up arrangements Explains the specific policy and legislation requirements that can promote or impede the effective implementation of speak-up arrangements, and how these can be translated into commercial and public organizations across sectors and cultures Makes a clear distinction between internal and external reporting arrangements The Whistleblowing Guide offers conceptual clarification about these key issues, including a focus on internal and external speak-up procedures, organisational response and communication, impartiality and trust. **Prosperity Better Business Makes the Greater Good Oxford University Press, USA** What is business for? On day one of a business course, students learn that the purpose of business is maximizing shareholder profit. This single idea pervades thinking and teaching about business around the world - but it is fundamentally wrong, according to the author of this book. This idea has had disastrous and damaging consequences for economies, the environment, politics, and societies. In this book, the author challenges the fundamentals of business thinking by proposing a new agenda for establishing the corporation as a force for promoting economic and social wellbeing in its fullest sense - for customers and communities. The author presents a prescription for improving corporations, their ownership, governance, finance, and regulation. Drawing insights from business, law, economics, science, philosophy, and history, the author demonstrates how the corporation can realize its full potential to contribute to the economic and social wellbeing of the many, not just the few. **Research Methods for Accounting and Finance Goodfellow Publishers Ltd** Research Methods for Accounting and Finance is an essential text for accounting and finance students undertaking research for the first time. It demystifies the research process by providing the novice researcher with a must-have guide through all of the stages of the research process, from identifying a research topic to the finished project. **Systematic Searching Practical ideas for improving results Facet Publishing** In resource poor, cost saving times, this book provides practical advice on new methods and technologies involved in systematic searching and explores the role of information professionals in delivering these changes The editors bring together expert international practitioners and researchers to highlight the latest thinking on systematic searching. Beginning by looking at the methods and techniques underlying systematic searching, the book then examines the current challenges and the potential solutions to more effective searching in detail, before considering the role of the information specialist as an expert searcher. Systematic Searching blends theory and practice and takes into account different approaches to information retrieval with a special focus being given to searching for complex topics in a health-related environment. The book does not presume an in-depth prior knowledge or experience of systematic searching and includes case studies, practical examples and ideas for further research and reading. The book is divided into three parts: Methods covers theoretical approaches to evidence synthesis and the implications that these have for the search process, including searching for complex topics and choosing the right sources. Technology examines new technologies for retrieving evidence and how these are leading to new directions in information retrieval and evidence synthesis. People considers the future of the information specialist as an expert searcher and explores how information professionals can develop their skills in searching, communication and collaboration to ensure that information retrieval practice is, and remains, evidence-based. Systematic Searching will be essential reading for library and information service providers and information specialists, particularly those in a health-related environment. It will also be of interest to students of library and information science, systematic reviewers, researchers and practitioners conducting complex searches in settings including social care, education and criminal justice. **Auditor's Dictionary Terms, Concepts, Processes, and Regulations John Wiley & Sons** The Dictionary of Auditing is a one-stop resource for key auditing terminology, concepts, and processes essential to auditors and of increasing interest to those that work with them. Covers key regulatory developments such as Sarbanes Oxley and provides links for further reading. **The Practice of Sheep Veterinary Medicine** This book is intended to be a reference text for veterinarians who provide clinical services to sheep producers. It is directed first and foremost at Australian sheep-raising systems, but the approaches described herein will have wide application in all countries where sheep are raised under extensive grazing conditions. Most of the important conditions of sheep in Australia are relatively straightforward to diagnose, but the establishment of effective and economically sound control strategies is often the most difficult part of health management, particularly for those who are less familiar with sheep production systems. With six initial chapters focusing on providing readers with a basic understanding of the business and science underpinning sheep production, this book focuses its remaining chapters on reproduction and disease conditions, ordered largely on a systems basis. The book provides details about the way disease processes develop and manifest in sheep flocks, with numerous references for those who wish to read further. Thanks to the strengths of both its wool industry and its sheep meat industry, Australian sheep production is a profitable and fulfilling agricultural pursuit for a large number of farm owners. This book is intended to assist those who work in the industry to add to the profitability and efficiency of sheep production systems, the quality of sheep products and the welfare of the sheep in those systems. **Opening Science The Evolving Guide on How the Internet is Changing Research, Collaboration and Scholarly Publishing Springer** Modern information and communication technologies, together with a cultural upheaval within the research community, have profoundly changed research in nearly every aspect. Ranging from sharing and discussing ideas in social networks for scientists to new collaborative environments and novel publication formats, knowledge creation and dissemination as we know it is experiencing a vigorous shift towards increased transparency, collaboration and accessibility. Many assume that research workflows will change more in the next 20 years than they have in the last 200. This book provides researchers, decision makers, and other scientific stakeholders with a snapshot of the basics, the tools, and the underlying visions that drive the current scientific (r)evolution, often called 'Open Science.' **Against the Odds Escapes and Evasions by Allied Airmen, World War II Escapes and Evasions by Allied Airmen, World War II** A collection of personal accounts from some of the 700 Allied airmen who escaped captivity, or evaded capture in enemy territory during the Second World War. Some are simple tales of unaided walking through the enemy's lines during the confusion of battle, while others are narratives of well planned and clever deceptions that led to freedom **The Critical Decade Climate Change and Health Sustainability Accounting and Accountability Routledge** This exciting book is one of the first textbooks in this fast growing field. Contributed to, and edited by an impressive array of internationally renowned authorities, it draws on real life examples and case studies. **Research Methods for Business & Management A Guide to Writing Your Dissertation Goodfellow Publishers Ltd** This updated and revised edition offers a comprehensive overview of key research methods and the main choices available when undertaking research in business and management. New to this edition is a comprehensive, practical guide on how to write your dissertation - invaluable to all. It is a clear, concise and practical guide containing wealth of outstanding examples for each method covered. Central to this edition is the 'methods map' (chapter 4), which sets out a logical process for researchers to articulate their position in relation to five key aspects of their research philosophy. In addition, the editors have developed a free app to accompany the book and this enables novice researchers to quickly develop a comprehensive justification of their particular research design in an interactive way. Taking you through the entire life cycle of a dissertation, the text covers everything from the purposes of research through to chapters on gathering primary and secondary data; using literature; quantitative and qualitative research; managing your research; using data and research ethics. Individual chapters are allied to a powerful critical commentary showing how some of the world's leading scholars have used particular methods in their own research. Carefully constructed to achieve the greatest clarity for the student the text gives the reader: \* In-text exercises \* End of chapter\* review questions with solutions\* Exemplar papers identified and discussed for each of the main methods \*Directed further reading for developing understanding in key areas It is an essential learning aid for upper level undergraduates and postgraduates across a wide range of business and management courses and it comes with a range of supported learning materials including tutorials, lecture slides and tutor notes. Kevin O'Gorman is Professor of Management and Business History and Head of Business Management in the School of Languages and Management in Heriot-Watt University, Edinburgh. He trained in Glasgow, Salamanca and Rome as a philosopher, theologian and historian. His research interests have a dual focus: Origins, history and cultural practices of hospitality, and philosophical, ethical and cultural underpinnings of contemporary management practices. Using a wide range of methodological approaches he has published over 80 journal articles, books, chapters, and conference papers in business and management studies. Robert MacIntosh is Professor of Strategy and Head of the School of Management and Languages at Heriot-Watt University. He trained as an engineer and has worked at the Universities of Glasgow and Strathclyde. His research on the ways in which top teams develop strategy and on organizational change has been published in a wide range of outlets. He has a long-standing interest in research methods for business and management studies and has published on the relevance of management research using methods that include ethnography and action research. He has consulted extensively with public and private sector organizations and sits on the board of the charity Turning Point Scotland. **Principles of Contemporary Corporate Governance Cambridge University Press** Offers comprehensive coverage of the key topics and emerging themes in private sector corporate governance. **The Future of the Accounting Profession: Auditor Concentration The American Assembly** Integrated Reporting A New Accounting Disclosure Springer This book is a timely addition to the fast-growing international debate on Integrated Reporting, which offers a holistic view of the evolution and practice of Integrated Reporting. The book covers the determinants and consequences of Integrated Reporting, as well as examining some of the most relevant issues (particularly in the context of the United States) in the debate about Integrated Reporting. **French Grammar in Context Analysis and Practice Hodder Education** Taking authentic texts from a variety of sources - the human body on CD-ROM, a fish recipe, 'L'Etranger' and many others - this book uses them as a starting point for the illustration and explanation of key areas of French grammar. It includes a range of exercises, many of them text-based. **Jubb, Kennedy & Palmer's Pathology of Domestic Animals - E-Book: Elsevier Health Sciences** With an emphasis on the disease conditions of dogs, cats, horses, swine, cattle and small ruminants, Jubb, Kennedy, and Palmer's Pathology of Domestic Animals, 6th Edition continues its long tradition of being the most comprehensive reference book on common domestic mammal pathology. Using a body systems approach, veterinary pathology experts provide overviews of general system characteristics, reactions to insult, and disease conditions that are broken down by type of infectious or toxic insult affecting the anatomical subdivisions of each body system. The sixth edition now boasts a new full-color design, including more than 2,000 high-resolution images of normal and abnormal organs, tissues, and cells. Updated content also includes evolved coverage of disease agents such as the Schmallenberg virus, porcine epidemic diarrhea virus, and the porcine deltacoronavirus; plus new information on molecular-based testing, including

*polymerase chain reaction (PCR) and in-situ hybridization, keep you abreast of the latest diagnostic capabilities. Updated content includes new and evolving pathogens and diagnostic techniques. Updated bibliographies give readers new entry points into the rapidly expanding literature on each subject. NEW! High-resolution color images clearly depict the diagnostic features of hundreds of conditions. NEW! Introduction to the Diagnostic Process chapter illustrates the whole animal perspective and details the approaches to systemic, multi-system, and polymicrobial disease. NEW! Coverage of camelids is now included in the reference's widened scope of species. NEW! Team of 30+ expert contributors offers the latest perspective on the continuum of issues in veterinary pathology. NEW! Expanded resources on the companion website include a variety of helpful tools such as full reference lists with entries linked to abstracts in Pub Med and bonus web-only figures. NEW! Full-color design improves the accessibility of the text. **Science as an Open Enterprise** The Science as an open enterprise report highlights the need to grapple with the huge deluge of data created by modern technologies in order to preserve the principle of openness and to exploit data in ways that have the potential to create a second open science revolution. Exploring massive amounts of data using modern digital technologies has enormous potential for science and its application in public policy and business. The report maps out the changes that are required by scientists, their institutions and those that fund and support science if this potential is to be realised.*
