Natural Gas Seepage

The Earth's Hydrocarbon Degassing

Springer **The book offers a modern, comprehensive, and holistic view of natural gas seepage, defined as the visible or invisible flow of gaseous hydrocarbons from subsurface sources to Earth's surface. Beginning with definitions, classifications for onshore and offshore seepage, and fundamentals on gas migration mechanisms, the book reports the latest findings for the global distribution of gas seepage and describes detection**

methods. Seepage implications are discussed in relation to petroleum exploration, environmental impacts (hazards, pollution, atmospheric emissions, and past climate change), emerging scientific issues (abiotic gas and methane on Mars), and the role of seeps in ancient cultures. With an updated bibliography and an integrated analysis of available data, the book offers a new fundamental awareness - gas seepage is more widespread than previously thought and influences all of Earth's external "spheres", including the hydrosphere, atmosphere, biosphere, and anthroposphere.

The History of the Discovery and Study of Russian Medieval Painting

Russian History and Culture This is the first study in any language to trace the emergence of the art historical interest in icon painting in the nineteenth century with its evident impact on the course of Russian modernism in the twentieth century. Given the surge in popularity of the Russian avant-garde, a book devoted to the gradual awareness of the artistic value of icons and their effect on Russian aesthetics is timely. The discoveries, the false starts, the incompetence, the interaction of dilettantes and academics, the meddling of tsars and church officials, all make for a fascinating tale of growing cultural awareness. It is a story that prepares the ground for the explosion of Russian cultural creativity and acceptability in the early twentieth century.

Fairy Tales and True Stories

The History of Russian Literature for

Children and Young People (1574 - 2010)

BRILL Russian children's literature has a history that goes back over 400 years. This book offers a comprehensive study of its development, setting Russian authors and their books in the context of translated literature, critical debates and official cultural policy.

Word and Image in Russian History

Essays in Honor of Gary Marker

Academic Studies PRes **Word and Image** invokes and honors the scholarly contributions of Gary Marker. Twenty scholars from Russia, the United Kingdom, Italy, Ukraine and the United States examine some of the main themes of Marker's scholarship on Russia—literacy, education, and printing; gender and politics; the importance of visual sources for historical study; and the intersections of religious and political discourse in Imperial Russia. A biography of Marker, a survey of his scholarship, and a list of his publications complete the volume. Contributors: Valerie Kivelson, Giovanna Brogi (University of Milan), Christine Ruane (University of Tulsa), Elena Smilianskaia (Moscow), Daniela Steila (University of Turin), Nancy Kollmann (Stanford University), Daniel H. Kaiser (Grinnell College), Maria di Salvo (University of Milan), Cynthia Whittaker (City Univ. of New York), Simon Dixon (University of London), Evgenii Anisimov (St. Petersburg), Alexander Kamenskii (Higher School of Economics, Moscow), Janet Hartley (London School of Economics), Olga Kosheleva (Moscow State University), Maksim Yaremenko (Kyiv), Patrick O'Meara (University of Durham), Roger Bartlett (London), Joseph Bradley (University of Tulsa), Robert Weinberg (Swarthmore College)

How to Rebuild and Restore Classic Japanese Motorcycles

Motorbooks Everything you need to know to restore or customize your classic Japanese motorcycle. Whether you want to correctly restore a classic Japanese motorcycle or create a modified, custom build, you need the right information about how to perform the mechanical and cosmetic tasks required to get an old, frequently neglected, and often long-unridden machine back in working order. **How to Rebuild and Restore Classic Japanese Motorcycles** is your thorough, hands-on manual, covering all the mechanical subsystems that make up a motorcycle. From finding a bike to planning your project to dealing with each mechanical system, **How to Rebuild and Restore Classic Japanese Motorcycles** includes everything you need to know to get your classic back on the road. Japanese motorcycles have been the best-selling bikes in the world since the mid-1960s, driven by the "big four": Honda, Yamaha, Suzuki, and Kawasaki. Of course certain bikes have always had a following - Honda CB750, 305 Hawk, CB400-4, Benly; Suzuki GT750, Katana, GS1000S; Yamaha XS650, RD400 Daytona, TZ; Kawasaki H1, H2, Z1R - and these have now become the blue-chip Japanese bikes leading collectors to seek out more common (and now more affordable) alternatives. This is the perfect book for anyone interested in classic Japanese motorcycles, as well as prepping a bike to build a cafe racer, street tracker, or other custom build.

Environmental Impacts of Shale Gas Extraction in Canada

Expert Panel on Harnessing Science and Technology to Understand the Environmental Impacts of Shale Gas Extraction

Council of Canadian Academies This report comes at the request of Environment Canada, which asked the Council to assemble a multidisciplinary expert panel to consider the state of knowledge of potential environmental impacts from the exploration, extraction, and development of Canada's shale gas resources. The Council's report presents a comprehensive examination of shale gas development in Canada. It does not, however, determine the safety, nor the economic benefits, of development. It reviews the use of new and conventional technologies in shale gas extraction, and examines several issues of concern including potential impacts on surface water and groundwater, greenhouse gas emissions, cumulative land disturbance, and human health. The report also outlines approaches for monitoring and research, as well as mitigation and management strategies.

Measurement Uncertainty

An Approach via the Mathematical Theory of Evidence

Springer Science & Business Media **The expression of uncertainty in measurement poses a challenge since it involves physical, mathematical, and philosophical issues. This problem is intensified by the limitations of the probabilistic approach used by the current standard (the GUM Instrumentation Standard). This text presents an alternative approach. It makes full use of the mathematical theory of evidence to express the uncertainty in measurements. Coverage provides an overview of the current standard, then pinpoints and constructively resolves its limitations. Numerous examples throughout help explain the book's unique approach.**

Renewable Energy Sources and Climate Change Mitigation

Special Report of the

Intergovernmental Panel on Climate Change

Cambridge University Press **This Intergovernmental Panel on Climate Change Special Report (IPCC-SRREN) assesses the potential role of renewable energy in the mitigation of climate change. It covers the six most important renewable energy sources - bioenergy, solar, geothermal, hydropower, ocean and wind energy - as well as their integration into present and future energy systems. It considers the environmental and social consequences associated with the deployment of these technologies, and presents strategies to overcome technical as well as non-technical obstacles to their application and diffusion. SRREN brings a broad spectrum of technology-specific experts together with scientists studying energy systems as a whole. Prepared following strict IPCC procedures, it presents an impartial assessment of the current state of knowledge: it is policy relevant but not policy prescriptive. SRREN is an invaluable assessment of the potential role of renewable energy for the mitigation of climate change for policymakers, the private sector, and academic researchers.**

Reading in Russia

Practices of Reading and Literary Communication, 1760-1930

Ledizioni **"Reader, where are you?", wondered, in the mid-1880s, Mikhail Saltykov-Shchedrin, one of the Russian writers that paid the most attention to the readership of his time. Saltykov-Shchedrin's call did not go unanswered. Over the past two centuries, various disciplines - from the social sciences to psychology, literary criticism, semiotics, historiography and bibliography - alternately tried to outline the specific features of the Russian reader and investigate his function in the history of Russian literary civilization. The essays collected in this volume follow in the tradition but, at the same time, present new challenges to the development of the discipline. The contributors, coming from various countries and different cultures (Russia, the US, Italy, France, Britain), discuss the subject of reading in Russia - from the age of Catherine II to the Soviet regime - from various perspectives: from aesthetics to**

reception, from the analysis of individual or collective practices, to the exploration of the social function of reading, to the spread and evolution of editorial formats. The contributions in this volume return a rich and articulated portrait of a culture made of great readers.
