Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added - On-board diagnostics and Oscilloscope diagnostics - and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.**

#### CORPORATE REPUTATION AND COMPETITIVENESS

Routledge **This unique book written by four world leaders in reputation research, presents the latest cutting-edge thinking on organizational improvement. It covers media management, crisis management, the use of logos and other aspects of corporate identity, and argues the case for reputation management as a way of overseeing long-term organizational strategy. It presents a new approach to managing reputation, one that relies on surveying customers and employees on their view of the corporate character and in harmonizing the values of both. This approach has been trialled in a number of organizations and here the authors demonstrate how improving reputation, merely by learning more about what a company is already doing, is worth some five per cent sales growth. The book is a vital, up to date resource for specialists in corporate communication, public relations, marketing, HRM, and business strategy as well as for all senior management. Highly illustrated with over eighty diagrams and tables, it includes up to the minute illustrative case studies and interviews with leading authorities in the field.**

## BRANDS AND BRANDING

---

**John Wiley & Sons** With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of Brands and Branding provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, Brands and Branding sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.
