LEWIS'S MEDICAL-SURGICAL NURSING EBOOK

ASSESSMENT AND MANAGEMENT OF CLINICAL PROBLEMS

Elsevier Lewis's Medical-Surgical Nursing ANZ 5th edition continues as the most comprehensive, go-to reference for developing the core aspects of professional nursing care in Australia and New Zealand. With a clear framework of person-centred care, critical thinking, clinical reasoning and evidence-based practice underpinning the assessment and management of adults with complex, acute and chronic healthcare issues, the 5th edition provides nursing students with the foundations for developing expert clinical practice. Thoroughly revised, the new edition responds to key health priorities, providing an innovative approach to addressing Indigenous health in Australia and New Zealand. Greater emphasis is also given to the issues of: self-care; examination of the nurse's role within an interprofessional team; and management of the deteriorating patient, to reflect the changing nature of nursing practice in the contemporary healthcare environment. Additional resources on Evolve eBook on VitalSource Student and Instructor Resources Review Questions Conceptual Care Map creator Student Case studies Fluids and Electrolytes tutorial Nursing Care Plans Instructor Resources Test Bank PowerPoint slides Image bank Now available in either hard cover or 2-volume set paperback formats New chapters: Chapter 3: Stress and coping. This chapter explores theoretical models of stress, the impact of stress on human functioning, and strategies for coping with stress in the context of nursing practice and healthcare delivery Chapter 5: Working with Indigenous peoples of Australia and New Zealand. Co-authored by highly respected Indigenous and non-Indigenous academics from Australia and New Zealand, the chapter role-models Indigenous and non-Indigenous health professionals working alongside each other to improve health outcomes, and the practical role that nurses can play to improve the healthcare experiences of Indigenous people. Chapter 69: Recognising and responding to the deteriorating patient. Authored by one of Australia's leaders in emergency response education, this chapter is designed to develop capability in relation to the National Safety and Quality Health Service Standards 2017, specifically Standard 8: Recognising and responding to acute deterioration. Chapter 70: Cardiopulmonary resuscitation: basic and advanced life support. Based on the Australian and New Zealand Committee on Resuscitation (ANZCOR) guidelines, this chapter promotes a problem-solving approach to the management of a patient in cardiac arrest by providing the science behind the techniques and interventions used to treat a patient in cardiac arrest.

FETAL ALCOHOL SPECTRUM DISORDERS

INTERDISCIPLINARY PERSPECTIVES

Routledge **Fetal alcohol spectrum disorders (FASDs)** have emerged as a major phenomenon within the education, health, criminal justice and social care systems of many countries, with current prevalence figures suggesting that one in a hundred children and young people have FASDs. In this publication, academics, professionals and families from around the world have shared expertise and insights on FASDs. Their combined interdisciplinary perspective makes an invaluable contribution to how we understand and address the complex social, educational and health needs associated with this growing group of children and young people. Articulating fundamental knowledge, cutting edge initiatives and emerging trends in FASDs, this book provides an evidence base that will enable services to identify and respond to the need for action on FASDs. It recognises that families - natural, foster or adoptive - are at the heart of this process, and that their rich knowledge base, grounded in their lived experience, is crucial. Any education, social care, criminal justice or health professional working with children and young people with FASDs and their families will find this book a seminal and authoritative resource.

ALCOHOL GUIDELINES

ELEVENTH REPORT OF SESSION 2010-12, [VOL. 1]: REPORT, TOGETHER WITH FORMAL MINUTES, ORAL AND WRITTEN EVIDENCE

The Stationery Office **This report raises concerns about the Government's advice on sensible drinking and recommends that alcohol guidelines are reviewed. In 1987, the "sensible limits" for drinking were defined as 21 units of alcohol a week for men and 14 for women. By the early 1990s, scientific evidence suggesting that alcohol consumption might reduce the risk of coronary heart disease, prompted a review of the guidelines, and the drinking guidelines were then couched in daily terms: men should not regularly drink more than three to four units a day and women no more than two to three units a day. The Committee is sceptical about using the purported health benefits of alcohol as a basis for daily guidelines for all the adult population, particularly as any protective effects would only apply to men over 40 years and post-menopausal women. Evidence suggests that the guidelines should not be increased and that people should take at least two drink-free days a week. While public awareness of the existence of guidelines is high, a deeper understanding of what the guidelines were and of what a unit of alcohol looked like is lacking. Through the Public Health Responsibility Deal, the Government is working with the drinks industry to ensure that over 80% of alcoholic products on shelf will have labels with alcoholic unit content and the drinking guidelines by 2013. But the Government should remain mindful that sensible drinking messages may conflict with the business objectives of drinks**

companies and exercise proper scrutiny and oversight.

CARING FOR VETERANS AND THEIR FAMILIES: A GUIDE FOR NURSES AND HEALTHCARE PROFESSIONALS

Jones & Bartlett Learning Of the approximately 20 million veterans of the U.S. armed forces, less than half utilize the Veteran's Health Administration health care system. That means the majority of veterans are receiving care from nurses and healthcare professionals who may not be trained in treating or caring for patients who have served in the military. This unique book guides nurses and healthcare professionals through the specific needs veterans can present, including but not limited to PTSD. Topics covered include, defining military culture and how to apply that knowledge to provide informed treatment, transitioning from service to civilian life and the many challenges expected during re-adjustment and re-entry, recognizing and treating substance use disorders, identifying suicidal behaviors and warning signs, long-term care for elderly veterans, and many more topics unique to the healthcare of veterans.

GOVERNMENT'S ALCOHOL STRATEGY

THIRD REPORT OF SESSION 2012-13, VOL. 1: REPORT. TOGETHER WITH FORMAL MINUTES, ORAL AND WRITTEN EVIDENCE

The Stationery Office The main focus of the alcohol strategy is binge drinking and its consequences for anti-social behaviour. Those are important issues, but the health impact of chronic alcohol misuse is also significant and greater emphasis needs to be placed on addressing that impact. In order to be effective the Strategy needs some clearer objectives to provide a framework for both policy judgements and accountability. The Committee recommends that Public Health England should have a central role in developing these objectives, and linking them to local strategies in every area across the country. The Committee supports the decision to introduce a minimum unit price for alcohol, but a transparent process must be put in place in order to ensure that the price level is evidence-based and is monitored to assess its effectiveness. The Committee concludes that: the Responsibility Deal is intrinsic to responsible corporate citizenship, but it is not a substitute for Government policy; the alcohol industry needs to acknowledge that its advertising messages do have an effect on attitudes if it wishes to be seen as a serious committed partner in the Responsibility; rules on alcohol advertising should be re-examined to reduce the likelihood of adverts influencing young people under 18; Public Health England should undertake an evaluation of the effectiveness of the Responsibility Deal and should commission a study into the principles and implications of introducing the French Loi Evin; the Department of Health's work on which models of treatment provision are most effective in addressing the health issues caused by alcohol abuse is welcome
