ICTR 2018 International Conference on Tourism Research

**Academic Conferences and publishing limited** These proceedings represent the work of researchers participating in the International Conference on Tourism Research (ICTR 2018) which is being hosted by JAMK University of Applied Sciences, Jyväskylä, Finland on 23-24 March 2018.

Food Justice

**MIT Press** The story of how the emerging food justice movement is seeking to transform the American food system from seed to table. In today's food

system, farm workers face difficult and hazardous conditions, low-income neighborhoods lack supermarkets but abound in fast-food restaurants and liquor stores, food products emphasize convenience rather than wholesomeness, and the international reach of American fast-food franchises has been a major contributor to an epidemic of “globesity.” To combat these inequities and excesses, a movement for food justice has emerged in recent years seeking to transform the food system from seed to table. In *Food Justice*, Robert Gottlieb and Anupama Joshi tell the story of this emerging movement. A food justice framework ensures that the benefits and risks of how food is grown and processed, transported, distributed, and consumed are shared equitably. Gottlieb and Joshi recount the history of food injustices and describe current efforts to change the system, including community gardens and farmer training in Holyoke, Massachusetts, youth empowerment through the Rethinkers in New Orleans, farm-to-school programs across the country, and the Los Angeles school system's elimination of sugary soft drinks from its cafeterias. And they tell how food activism has succeeded at the highest level: advocates waged a grassroots campaign that convinced the Obama White House to plant a vegetable garden. The first comprehensive inquiry into this emerging movement, *Food Justice* addresses the increasing disconnect between food and culture that has resulted from our highly industrialized food system.

## New Cultural Landscapes

**Routledge** While historical and protected landscapes have been well studied for years, the cultural significance of ordinary landscapes is now increasingly recognised. This groundbreaking book discusses how contemporary cultural landscapes can be, and are, created and recognised. The book challenges common concepts of cultural landscapes as protected or ‘special’ landscapes that include significant buildings or features. Using case studies from around the world it questions the usual measures of judgement related to cultural landscapes and instead focuses on landscapes that are created, planned or simply evolve as a result of changing human cultures, management policy and practice. Each contribution analyses the geographical and human background of the landscape, and policies and management strategies that impact upon it, and defines the meanings of ‘cultural landscape’ in its particular context. Taken together they establish a new paradigm in the study of landscapes in all forms.

## Asset Building & Community

# Development

**SAGE** Employing a broad definition of community development, this book shows how asset building can help increase the capacity of residents to improve their quality of life. It provides students and practitioners with theoretical and practical guidance on how to mobilize community capital (physical, human, social, financial, environmental, political, and cultural) to effect positive change. Authors Gary Paul Green and Anna Haines show that development controlled by community-based organizations provides a better match between these assets and the needs of the communities.

## Farm to Table

# The Essential Guide to Sustainable Food Systems for Students, Professionals, and Consumers

**Chelsea Green Publishing** In *Farm to Table*, Darryl Benjamin and Chef Lyndon Virkler explore both the roots of our current, corporate food system malaise, and the response by small farmers, food co-ops, chefs and restaurateurs, institutions, and many more, to replace the status quo with something more healthy, fair, just, and delicious. Today's consumers are demanding increase accountability from food growers and purveyors. *Farm to Table* illuminates the best practices and strategies for schools, restaurants, healthcare facilities, and other businesses and institutions, to partner with local farmers and food producers, from purchasing to marketing. Readers will also learn about the various alternative techniques that farms are employing - from permaculture to rotation-intensive grazing - to produce better tasting and more nutritious food, restore environmental health, and meet consumer demand. A one-of-a-kind resource, *Farm to Table* shows how to integrate truly sustainable principles into every juncture of our evolving food system.--COVER.

## Sustainable Diets

# Linking Nutrition and Food Systems

**CABI** This book takes a transdisciplinary approach and considers multisectoral actions, integrating health, agriculture and environmental sector issues to comprehensively explore the topic of sustainable diets. The team of international authors informs readers with arguments,

challenges, perspectives, policies, actions and solutions on global topics that must be properly understood in order to be effectively addressed. They position issues of sustainable diets as central to the Earth's future. Presenting the latest findings, they: - Explore the transition to sustainable diets within the context of sustainable food systems, addressing the right to food, and linking food security and nutrition to sustainability. - Convey the urgency of coordinated action, and consider how to engage multiple sectors in dialogue and joint research to tackle the pressing problems that have taken us to the edge, and beyond, of the planet's limits to growth. - Review tools, methods and indicators for assessing sustainable diets. - Describe lessons learned from case studies on both traditional food systems and current dietary challenges. As an affiliated project of the One Planet Sustainable Food Systems Programme, this book provides a way forward for achieving global and local targets, including the Sustainable Development Goals and the United Nations Decade of Action on Nutrition commitments. This resource is essential reading for scientists, practitioners, and students in the fields of nutrition science, food science, environmental sciences, agricultural sciences, development studies, food studies, public health and food policy.

## Bridging the gap between nutrition and agriculture in Telangana State, India

### An assessment of capacity within agricultural extension and advisory services

Food & Agriculture Org. Equipping agricultural extension and advisory services with nutrition knowledge, competencies and skills is essential to promote nutrition-sensitive agriculture. This report presents the results of an assessment of capacity within agricultural extension and advisory services, undertaken in Telangana State, India, with the global capacity needs assessment (GCNA) methodology developed by FAO and GFRAS. The methodology is available online at <https://doi.org/10.4060/cb2069en>

# Culinary Nutrition

## The Science and Practice of Healthy Cooking

**Academic Press Culinary Nutrition: The Science and Practice of Healthy Cooking is the first textbook specifically written to bridge the relationship between food science, nutrition and culinology as well as consumer choices for diet, health and enjoyment. The book uses a comprehensive format with real-life applications, recipes and color photographs of finished dishes to emphasize the necessity of sustainably deliverable, health-beneficial and taste-desirable products. With pedagogical elements to enhance and reinforce learning opportunities, this book explores what foods involve the optimum nutritional value for dietary needs, including specific dietary requirements and how foods are produced. It also considers alternative production methods, along with the impact of preparation on both the nutritional value of a food and its consumer acceptability. Other discussions focus on the basics of proteins, carbohydrates, and lipids, issues of diet and disease such as weight management, and food production and preparation. Laboratory-type, in-class activities are presented using limited materials and applications of complex concepts in real-life situations. This book will be a valuable resource for undergraduate students in culinary nutrition, nutrition science, food science and nutrition, and culinary arts courses. It will also appeal to professional chefs and food scientists as well as research chefs in product development. Gourmand World Cookbook Awards 2014: USA, Best Author or Chef for Professionals, Gourmand International Global Food Industry Awards 2014: Special Mention in Communicating Science-Related Knowledge to Consumers Aimed at Improving their Lifestyle, International Union of Food Science and Technology (IUFoST) Explores the connections among the technical sciences of nutrition, food science and the culinary arts as well as consumer choices for diet, health and enjoyment Presents laboratory-type, in-class activities using limited materials and real-life applications of complex concepts Includes photographs and recipes to enhance learning experience**

In 2016, TransForyou ranked 27th among Asian Language Service Providers by Common Sense Advisory."  
 "

## Food Fears

# From Industrial to Sustainable Food Systems

**Routledge** The industrial food system of the West is increasingly perceived as problematic. The physical, social and intellectual distance between consumers and their food stems from a food system that privileges quantity and efficiency over quality, with an underlying assumption that food is a commodity, rather than a source of nourishment and pleasure. In the wake of various food and health scares, there is a growing demand from consumers to change the food they eat, which in turn acts as a catalyst for the industry to adapt and for alternative systems to evolve. Drawing on a wealth of empirical research into mainstream and alternative North American food systems, this book discusses how sustainable, grass roots, local food systems offer a template for meaningful individual activism as a way to bring about change from the bottom up, while at the same time creating pressure for policy changes at all levels of government. This movement signals a shift away from market economy principles and reflects a desire to embody social and ecological values as the foundation for future growth.

Eco-Translation

Translation and Ecology in the Age

## of the Anthropocene

**Taylor & Francis Ecology has become a central question governing the survival and sustainability of human societies, cultures and languages. In this timely study, Michael Cronin investigates how the perspective of the Anthropocene, or the effect of humans on the global environment, has profound implications for the way translation is considered in the past, present and future. Starting with a deep history of translation and ranging from food ecology to inter-species translation and green translation technology, this thought-provoking book offers a challenging and ultimately hopeful perspective on how translation can play a vital role in the future survival of the planet.**

## The Politics of Food

## The Global Conflict Between Food Security and Food Sovereignty

**ABC-CLIO A description of the current global food system, this book challenges our ethical responsibility to the global poor and implicates us all for failing to curb global hunger and malnutrition. \* Includes citations and references to primary source documents of the United Nations, World Bank, the International Monetary Fund, and the World Trade Organization \* Offers an index of key terms and themes, such as food security, food sovereignty, and human rights**

## New Trends and Opportunities for Central and Eastern European Tourism

**IGI Global Within the past decade, there has been a re-emergence of tourism in Europe, especially in the central and eastern regions. With socialism becoming a distant memory, these former communist countries are now attractive destinations for travel. Research on this current phenomenon is essential, as professionals and scientists must stay informed on the modern development of this global region. New Trends and Opportunities for Central and Eastern European Tourism provides emerging research exploring the theoretical and practical aspects of contemporary tourism in Eastern Europe and its effect on economics and sociology. Featuring coverage on a broad range of topics such as**

monument protection, economic features, and socialist architecture, this book is ideally designed for travel agents, tour developers, restaurateurs, hotel management, economic analysts, government officials, policymakers, tourism journalists, tourism practitioners, researchers, and professors seeking current research on the development of travel in Eastern and Central Europe.

## Event Design

### Social perspectives and practices

Routledge Events are becoming more complex as their range of functions grows, as meeting places, creative spaces, economic catalysts, social drivers, community builders, image makers, business forums and network nodes. Effective design can produce more successful business models that can help to sustain cultural and sporting activities even in difficult economic times. This process requires creative imagination, and a design methodology or in other words 'imagineering'. This book brings together a wide range of international experts in the fields of events, design and imagineering to examine the event design process. It explores the entire event experience from conception and production to consumption and co-creation. By doing so it offers insight into effective strategies for coping with the shift in value creation away from transactional economic value towards social and relational value which benefit a range of stakeholders from the community to policy makers. Mega-events, small community events, business events and festivals in eight different countries are examined providing an international view of social issues in event design. A wide selection of current research perspectives is employed, integrating both theoretical and applied contributions. The multidisciplinary nature of the material means that it will appeal to a broad academic audience, such as art and design, cultural studies, tourism, events studies, sociology and hospitality.

## Theme Cities: Solutions for Urban Problems

**Springer** This book reviews a series of new urban ideas or themes designed to help make cities more liveable, sustainable, safe and inclusive. Featuring examples drawn from cities all over the world, the various chapters provide critical assessments of each of the various approaches and their potential to improve urban life. **New Urbanism:** creating new areas based on a more humane scale with neighbourhood cohesion **Just Cities:** creating more fairness in decision-making so all residents can participate and benefit. **Green Cities:** helping places become greener with environmental rehabilitation and protection **Sustainable Cities:** avoiding the waste of resources and harmful pollution in settlements **Transition Towns:** developing local initiatives for more sustainable actions **Winter Cities:** making cities in cold climates more comfortable and enjoyable **Resilient Cities:** strengthening cities to better enable them to withstand natural hazards **Creative Cities:** supporting cultural industries and attracting talented individuals **Knowledge Cities:** creating, renewing and spreading knowledge and innovation **Safe Cities:** ensuring that citizens are better protected against criminal actions **Healthy Cities:** making improvements in the health of people in cities **Festive Cities:** rediscovering the utility of festive events in settlements **Slow Cities:** enhancing locally unique activities, such as local cuisines and community interactions This volume offers a host of approaches designed to give a new direction and focus to planning policies, helping readers to fully understand the advantages and disadvantages of each potential idea. It seeks to solve the many current problems associated with urban developments, making it a valuable resource for university and college students in urban geography, urban planning, urban sociology and urban studies as well as to planners and the general public.

## The Struggle for the World

## Liberation Movements for the 21st

# Century

**Stanford University Press** What do Mexico's Zapatistas, the French National Front, Slow Food, rave subculture, and al-Qaeda all have in common? From right-wing to left-wing to no-wing, they all proudly proclaim their mission to defend their distinctive identities against modernity's homogenizing processes. This controversial book establishes fundamental similarities between anti-globalization "aurora" movements that aim to destroy the modern world and bring a radiant new dawn to humankind. While these groups often despise one another, they nonetheless share many fundamental characteristics, goals, and attitudes. Drawing on the original writings and actions of various anti-globalist groups, the authors reveal a common tendency toward charismatic leadership, good versus evil worldviews, the quest for authentic identity, concern with ritual, and unbending demands for total commitment. These movements, however they pursue world transformation and personal transcendence, are a prominent and continuing aspect of our present condition. This book is a strong reminder that, no matter what the cause, revolution is not a thing of the past and the fervent search for another world continues.

# Food and Agricultural Tourism

## Theory and Best Practice

**Routledge** This book fills a gap in the growing academic discipline of food and agricultural tourism, offering the first multidisciplinary approach to food tourism and the role it plays in economic development, destination marketing, and gastronomic exploration. It provides a comprehensive introduction to the discipline by considering food tourism in connection with both cultural values and important issues in agriculture, food consumption and safety, and rural heritage and sustainability. The book is divided into four Parts. Part I defines the elements of food tourism and explains its relationship with sustainability. Part II provides an overview of rural development and demonstrates the impact of industrialization and globalization on eating habits. Part III focuses on food tourism studies and market segmentation techniques to help students understand customer needs regarding food tourism products. Finally, Part IV looks at the financial, policy, and legal requirements relating to food tourism development, providing hands-on tools for students entering food tourism businesses or industries. Complemented by a wide range of international case studies, key definitions, and study questions, Food and Agricultural Tourism is essential reading for students of tourism, geography, and economic development studies.

# Slow Food Nation

## Why Our Food Should Be Good, Clean, and Fair

**Rizzoli Publications** By now most of us are aware of the threats looming in the food world. The best-selling *Fast Food Nation* and other recent books have alerted us to such dangers as genetically modified organisms, food-borne diseases, and industrial farming. Now it is time for answers, and *Slow Food Nation* steps up to the challenge. Here the charismatic leader of the Slow Food movement, Carlo Petrini, outlines many different routes by which we may take back control of our food. The three central principles of the Slow Food plan are these: food must be sustainably produced in ways that are sensitive to the environment, those who produce the food must be fairly treated, and the food must be healthful and delicious. In his travels around the world as ambassador for Slow Food, Petrini has witnessed firsthand the many ways that native peoples are feeding themselves without making use of the harmful methods of the industrial complex. He relates the wisdom to be gleaned from local cultures in such varied places as Mongolia, Chiapas, Sri Lanka, and Puglia. Amidst our crisis, it is critical that Americans look for insight from other cultures around the world and begin to build a new and better way of eating in our communities here.

## Sustainable and Resilient Communities

### A Comprehensive Action Plan for Towns, Cities, and Regions

**John Wiley & Sons** Many of today's communities face an unprecedented struggle to adapt and maintain their environmental, economic, and social well-being in an era beleaguered by fiscal constraints, uncertainty about energy prices and supplies, rapid demographic shifts, and accelerated climate impacts. This step-by-step guidebook for urban planners and urban designers explains how to create and implement an actionable plan for making neighborhoods, communities, and regions more environmentally healthy, resource-conserving, and economically resilient. *Sustainable and Resilient Communities* delineates measures for repairing, retrofitting, and transforming our built environments and supporting systems.

# A Decent Meal

## Building Empathy in a Divided America

**Stanford University Press** A poignant look at empathetic encounters between staunch ideological rivals, all centered around our common need for food. While America's new reality appears to be a deeply divided body politic, many are wondering how we can or should move forward from here. Can political or social divisiveness be healed? Is empathy among people with very little ideological common ground possible? In *A Decent Meal*, Michael Carolan finds answers to these fundamental questions in a series of unexpected places: around our dinner tables, along the aisles of our supermarkets, and in the fields growing our fruits and vegetables. What is more common, after all, than the simple fact that we all need to eat? This book is the result of Carolan's career-long efforts to create simulations in which food could be used to build empathy, among even the staunchest of rivals. Though most people assume that presenting facts will sway the way the public behaves, time and again this assumption is proven wrong as we all selectively accept the facts that support our beliefs. Drawing on the data he has collected, Carolan argues that we must, instead, find places and practices where incivility—or worse, hate—is suspended and leverage those opportunities into tools for building social cohesion. Each chapter follows the individuals who participated in a given experiment, ranging from strawberry-picking, attempting to subsist on SNAP benefits, or attending a dinner of wild game. By engaging with participants before, during, and after, Carolan is able to document their remarkable shifts in attitude and opinion. Though this book is framed around food, it is really about the spaces opened up by our need for food, in our communities, in our homes, and, ultimately, in our minds.

# Eating Culture

## An Anthropological Guide to Food, Second Edition

**University of Toronto Press** From ingredients and recipes to meals and menus across time and space, *Eating Culture* is a highly engaging overview that illustrates the important role that anthropology and anthropologists have played in understanding food, as well as the key role that food plays in the study of culture. The new edition, now with a full-color interior,

introduces discussions about nomadism, commercializing food, food security, and ethical consumption, including treatment of animals and the long-term environmental and health consequences of meat consumption. "Grist to the Mill" sections at the end of each chapter provide further readings and "Food for Thought" case studies and exercises help to highlight anthropological methods and approaches. By considering the concept of cuisine and public discourse, this practical guide brings order and insight to our changing relationship with food.

## Slow Tourism

### Experiences and Mobilities

Channel View Publications Bringing together scholars from the areas of tourism, leisure and cultural studies, eco-humanities and tourism management, this book examines the emerging phenomenon of slow tourism. The book explores the range of travel experiences that are part of growing consumer concerns with quality leisure time, environmental and cultural sustainability, as well as the embodied experience of place. Slow tourism encapsulates a range of lifestyle practices, mobilities and ethics that are connected to social movements such as slow food and cities, as well as specialist sectors such as ecotourism and voluntourism. The slow experience of temporality can evoke and incite different ways of being and moving, as well as different logics of desire that value travel experiences as forms of knowledge. Slow travel practices reflect a range of ethical-political positions that have yet to be critically explored in the academic literature despite the growth of industry discourse.

### Food Policy Environments:

### Discursive Effects, Material

### Consequences

Frontiers Media SA

## Slow Travel and Tourism

Earthscan It is widely recognized that travel and tourism can have a high environmental impact and make a major contribution to climate change. It is therefore vital that ways to reduce these impacts are developed and implemented. 'Slow travel' provides such a concept, drawing on ideas from the 'slow food' movement with a concern for locality, ecology and quality of life. The aim of this book is to define slow travel and to discuss how some underlining values are likely to pervade new forms of sustainable

development. It also aims to provide insights into the travel experience; these are explored in several chapters which bring new knowledge about sustainable transport tourism from across the world. In order to do this the book explores the concept of slow travel and sets out its core ingredients, comparing it with related frameworks such as low-carbon tourism and sustainable tourism development. The authors explain slow travel as holiday travel where air and car transport is rejected in favour of more environmentally benign forms of overland transport, which generally take much longer and become incorporated as part of the holiday experience. The book critically examines the key trends in tourism transport and recent climate change debates, setting out the main issues facing tourism planners. It reviews the potential for new consumption patterns, as well as current business models that facilitate hyper-mobility. This provides a cutting edge critique of the 'upstream' drivers to unsustainable tourism. Finally, the authors illustrate their approach through a series of case studies from around the world, featuring travel by train, bus, cycling and walking. Examples are drawn from Europe, Asia, Australia and the Americas. Cases include the Eurostar train (as an alternative to air travel), walking in the Appalachian Trail (US), the Euro-Velo network of long-distance cycling routes, canoe tours on the Gudena River in Denmark, sea kayaking in British Columbia (Canada) and the Oz Bus Europe to Australia.

## Crafting Food and Value in America

Univ of California Press The politics of food, land, and labor are examined through this anthropological study of American artisanal cheesemaking.

# Motivating Change: Sustainable Design and Behaviour in the Built Environment

Routledge Today's most pressing challenges require behaviour change at many levels, from the city to the individual. This book focuses on the collective influences that can be seen to shape change. Exploring the underlying dimensions of behaviour change in terms of consumption, media, social innovation and urban systems, the essays in this book are from many disciplines, including architecture, urban design, industrial design and engineering, sociology, psychology, cultural studies, waste management and public policy. Aimed especially at designers and architects, *Motivating Change* explores the diversity of current approaches to change, and the multiple ways in which behaviour can be understood as an enactment of values and beliefs, standards and habitual practices in daily life, and more broadly in the urban environment.

## 21st Century Sociology: A Reference Handbook

SAGE Publisher Description

### Globalization

### Prospects and Problems

SAGE Publications *Globalization: Prospects and Problems*, by JoAnn Chirico, provides a comprehensive and enlightening overview of globalization issues and topics. Emphasizing the theory and methods that social scientists employ to study globalization, the text reveals how macro globalization processes impact individual lives—from the spread of scientific discourse to which jobs are more or less likely to be offshored. The author presents a clear image of “the big globalization picture” by skillfully exploring, piece by piece, a myriad of globalization topics, debates, theories, and empirical data. Compelling chapters on theory, global civil society, democracy, cities, religion, institutions (sports, education, and health care), along with three chapters on global challenges, help readers develop a broad understanding of key topics and issues. Throughout the text, the author encourages readers to relate their personal experiences to globalization processes, allowing for a more

meaningful and relevant learning experience.

## Research Anthology on Food Waste Reduction and Alternative Diets for Food and Nutrition Security

**IGI Global** The world population is expected to increase exponentially within the next decade, which means that the food demand will increase and so will waste production. The increasing demand for food as well as changes in consumption habits have led to the greater availability and variety of food with a longer shelf life. However, there is a need for effective food waste management and food preservation as wasted food leads to overutilization of water and fossil fuels and increasing greenhouse gas emissions from the degradation of food. The **Research Anthology on Food Waste Reduction and Alternative Diets for Food and Nutrition Security** explores methods for reducing waste and cutting food loss in order to help the environment and support local communities as well as solve issues including that of land space. It also provides vital research on the development of plant-based foods, meat-alternative diets, and nutritional outcomes. Highlighting a range of topics such as agricultural production, food supply chains, and sustainable diets, this publication is an ideal reference source for policymakers, sustainable developers, politicians, ecologists, environmentalists, corporate executives, farmers, and academicians seeking current research on food and nutrition security.

## Commodification of Global Agrifood Systems and Agro-Ecology

## Convergence, Divergence and Beyond in Turkey

**Taylor & Francis** This book explores the shifting relations of food provisioning in Turkey from a comparative global political economy perspective. It offers in-depth ethnographic analysis, interviews and historical insights into the ambiguities and diversities that simultaneously affect the changing conditions of food and agriculture in Turkey. Specific issues examined include the commodification of land, food and labour; the expansion and deepening of industrial standardization; the expansion of a supermarket model; and concomitant changes in, as well as the simultaneous co-existence of, traditional methods of production and

marketing. Contrasting observations are drawn from diverse locales to provide examples of convergence, divergence and cohabitation in relation to transnationally advocated industrial models. Commodification of Global Agrifood Systems and Agro-Ecology employs a form of comparative perspective that allows the particular processes of restructuring of agrifood relations in Turkey to be simultaneously distinguished from, yet related to, changes taking place in global power dynamics. Yıldız Atasoy explores agrifood transformation in Turkey with a unique approach that considers a plurality of intertwined normative influences, ontological beliefs, cultural-religious narratives, political struggles and critical-interpretive positions. Based on original research, the book treats changes in food provisioning as an analytical thread capable of uncovering how the normative acceptability of capitalized agriculture and techno-scientific innovation is entangled with processes of class formation, growing inter-capitalist competition and Islamic politics. Such processes, in turn, frame income/wealth generation, landscape management, agro-ecological dynamics and labour practices, as well as the taste and smell of place.

## Hidden Hunger and the Transformation of Food Systems

### How to Combat the Double Burden of Malnutrition?

Karger Medical and Scientific Publishers Hidden hunger is not about providing enough calories, it is about a lack of micronutrients, which has life-long consequences for the children who are mostly affected. This begins with physical and cognitive developmental disorders and continues with an increased risk of non-communicable diseases and the occurrence of obesity. The book compiles the contributions of the Fourth Congress on Hidden Hunger 2019 as original articles. The focus of the congress was the problem of malnutrition and overweight, which can coexist and is termed a “double burden”. Part of the book deals with the causes of malnutrition and the challenge of achieving an agricultural system that is more focused on food quality. Another part discusses the causes and intervention approaches to tackling childhood obesity, especially in connection with malnutrition. All in all, this publication is a summary of important work by highly renowned authors on the topic of the congress: “Hidden Hunger and the Transformation of Food Systems: How to Combat the Double Burden of Malnutrition?” Like its two predecessors, the book fills an important gap by summarizing the essential aspects for science, applied research, and

politics at a high level.

## Fast Food Nation

# The Dark Side of the All-American Meal

**Houghton Mifflin Harcourt** Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

## Not Your Mother's Slow Cooker Cookbook

**Harvard Common Press** Not Your Mother's guide to 350 recipes for getting the most out of today's slow cooker.

## The Agile City

# Building Well-being and Wealth in an Era of Climate Change

**Island Press** In a very short time America has realized that global warming poses real challenges to the nation's future. The Agile City engages the fundamental question: what to do about it? Journalist and urban analyst James S. Russell argues that we'll more quickly slow global warming-and blunt its effects-by retrofitting cities, suburbs, and towns. The Agile City shows that change undertaken at the building and community level can reach carbon-reduction goals rapidly. Adapting buildings (39 percent of greenhouse-gas emission) and communities (slashing the 33 percent of transportation related emissions) offers numerous other benefits that tax gimmicks and massive alternative-energy investments can't match. Rapidly improving building techniques can readily cut carbon emissions by half, and some can get to zero. These cuts can be affordably achieved in the windshield-shattering heat of the desert and the bone-chilling cold of the north. Intelligently designing our towns could reduce marathon commutes and child chauffeuring to a few miles or eliminate it entirely. Agility, Russell argues, also means learning to adapt to the effects of climate change, which means redesigning the obsolete ways real estate is financed; housing subsidies are distributed; transportation is provided; and water is obtained, distributed and disposed of. These engines of growth

have become increasingly more dysfunctional both economically and environmentally. The Agile City highlights tactics that create multiplier effects, which means that ecologically driven change can shore-up economic opportunity, can make more productive workplaces, and can help revive neglected communities. Being able to look at multiple effects and multiple benefits of political choices and private investments is essential to assuring wealth and well-being in the future. Green, Russell writes, grows the future.

## Business & Society: Ethics, Sustainability & Stakeholder Management

**Cengage Learning Gain a solid understanding of the importance of business ethics, sustainability and stakeholder management using a strong managerial perspective within Carroll/Brown/Buchholtz's BUSINESS AND SOCIETY: ETHICS, SUSTAINABILITY, AND STAKEHOLDER MANAGEMENT, 11E. You discover, first-hand, how today's most successful business decision makers both balance and protect the interests of various stakeholders, including investors, employees, consumers, the community, and the environment. You learn how strong business decisions making skills are particularly critical as businesses navigate today's issues, such as climate change and a global pandemic. Updated chapter content and 34 timely cases examine the social, legal, political and ethical responsibilities of a business to all external and internal groups that have a stake or interest in that business. Ethics in Practice cases also provide opportunities to apply your skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.**
