Handbook of Research on Mobile Learning in Contemporary Classrooms

IGI Global It is the responsibility of educators to utilize contemporary avenues in order to reach their students in ways familiar to them. When teaching digital natives, new techniques are necessary for making new information relevant to their experience. One way to do this is through the use of mobile devices in curricula. This

integration can make education accessible anywhere and to anyone, personalized to each student's schedule and needs. The Handbook of Research on Mobile Learning in Contemporary Classrooms expounds the current research on m-learning and strategies to leverage mobile devices in educational contexts. It also addresses the importance of communication, community, and mobility in modern classrooms, while offering a comprehensive overview of the theory and pedagogy associated with this new technology. Nonprofit organizers, K-12 educators, administrators, policy makers, students of education, and developers will find this book to be an important research companion.

Let's Brush Our Teeth!

Simon and Schuster "Daniel Tiger likes brushing his teeth every morning and night until they're shiny and clean. He even has a song to help him remember all the places to brush! This storybook comes with a punch-out cardstock toothbrush that readers can use on the pictures throughout the book to "brush" Daniel's teeth up-and-down, side-to-side, and more."--Amazon.com.

Why Don't Students Like School?

A Cognitive Scientist Answers Questions About How the Mind Works and What It Means for the Classroom

John Wiley & Sons Easy-to-apply, scientifically-based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals-the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is malleable, and that you cannot develop "thinking skills" without facts How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom. Corporate trainers, marketers and, not least, parents -anyone who cares about how we learn-should find his book valuable reading." —Wall Street Journal

Daniel and the Firefighters

Simon Spotlight A new generation of children love Daniel Tiger's Neighborhood, inspired by the classic series Mister Rogers' Neighborhood! Daniel Tiger meets the neighborhood firefighters in this 8x8 storybook based on an all-new episode from the hit PBS show, Daniel Tiger's Neighborhood! Daniel Tiger loves firefighters! Today at school, he gets to meet real firefighters, and it turns out Dr. Anna is one of them. Daniel didn't know that someone could be a doctor and a firefighter! Daniel likes firefighters, but he also likes boats, dolls, music, and more. Maybe he can grow up to be more than one thing, too! © 2020 The Fred Rogers Company

Families and Technology

Springer This timely reference takes a rigorous look at the myriad ways technology, from smartphones to dating apps to social media, is affecting family life and opening new areas for study. The book features cross-disciplinary perspectives on current trends in the role of technology in couple and family contexts. It focuses on the roles of parents in monitoring children's screen time, of technology in relationship formation, and of technology in changing family dynamics. Nuanced coverage considers the emerging conflicts and paradoxes associated with digital family life—closeness versus isolation, children versus parents as experts, and privacy versus surveillance. Contributors also identify new research opportunities as family roles and structures continue to evolve and technology becomes a greater lens for family studies. Among the topics covered: How parents manage young children's mobile media use Adolescents as the family technology innovators Online dating: changing intimacy one swipe at a time Technology in relational systems: roles, rules, and boundaries Television "effects" on international family change Interplay between families and technology: future investigations Families and Technology is a valuable resource for researchers and students in the fields of family studies, sociology, marriage and family therapy, social welfare, public health, and psychology. The book also appeals to policymakers and human services personnel dedicated to better understanding the impact of rapidly spreading technologies on families around the globe.

Fast Food Nation

The Dark Side of the All-American Meal

Houghton Mifflin Harcourt Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

Forest of Tigers

People, Politics and Environment in the Sundarbans

Routledge Acclaimed for its unique ecosystem and Royal Bengal tigers, the mangrove islands that comprise the Sundarbans area of the Bengal delta are the setting for this pioneering anthropological work. The key question that the author explores is: what do tigers mean for the islanders of the Sundarbans? The diverse

origins and current occupations of the local population produce different answers to this question – but for all, ‘the tiger question’ is a significant social marker. Far more than through caste, tribe or religion, the Sundarbans islanders articulate their social locations and interactions by reference to the non-human world – the forest and its terrifying protagonist, the man-eating tiger. The book combines rich ethnography on a little-known region with contemporary theoretical insights to provide a new frame of reference to understand social relations in the Indian subcontinent. It will be of interest to scholars and students of anthropology, sociology, development studies, religion and cultural studies, as well as those working on environment, conservation, the state and issues relating to discrimination and marginality.

Contemporary Issues in Perinatal Education

Knowledge into Practice

Taylor & Francis Providing essential knowledge and understanding that midwives, health visitors, nursery nurses and lay birth and early parenting educators need to deliver effective and evidence-based education to all new parents and families, this book explores key issues in perinatal education. Bringing together research and thinking around preconception and birth, infant sleep, nutrition, attachment and development, it also includes chapters on topics of growing importance, such as preconception education, LGBTQ+ parent education, the role of parenting advice, parent education across different cultures and teaching antenatal classes online. Each chapter includes a key knowledge update and pointers for practice. This wide-ranging and practical text is an important read for all those supporting new parents from pregnancy through the first 1000 days, especially those delivering antenatal care and birth and early parenting education.

Friends Ask First!

A Book About Sharing

Simon Spotlight A new generation of children love Daniel Tiger’s Neighborhood, inspired by the classic series Mister Rogers’ Neighborhood! Daniel remembers a time when he needed to share in this sweet board book based on an episode of Daniel Tiger’s Neighborhood. Daniel is enjoying story time with his friends and learns that it’s important to ask first before taking things away from friends to make sure they are ready to share. This book contains vignettes from an episode that focuses on sharing beloved books and toys. © 2019 The Fred Rogers Company

Julian Robertson

A Tiger in the Land of Bulls and Bears

John Wiley & Sons Julian Robertson is one of the most successful and well-known hedge fund managers of our time. For nearly twenty years his infamous fund--Tiger Management--was the talk of the town, routinely delivering double-digit performance. This biography will explore this legendary fund manager's role in the development and popularity of hedge funds, examine his investment methodology and strategy, and look at the growth of his fund and his 'Tigers'--individuals who have gone on to great success themselves. * Includes candid interviews of Robertson, his colleagues, and his peers * Uncovers the trading strategies and investment style of a legendary fund manager * Offers a rare glimpse inside the personal world of Julian Robertson READERSHIP: Those with any interest in or knowledge of hedge funds, business readers, investment professionals. Daniel A. Strachman is Managing Director of Answers Company, a New York-based money management firm that offers investment management services to individuals and institutions. He has contributed many articles on investment management and strategies to publications including the New York Post and the Financial Times and is also the author of *Getting Started in Hedge Funds* (Wiley 2000). Also available by Daniel Strachman, *Getting Started in Hedge Funds*, 0471316962 Paper. EAN - 9780471323631 Carton Quantity - 41

Daniel's Potty Time

Simon Spotlight A new generation of children love Daniel Tiger's Neighborhood, inspired by the classic series Mister Rogers' Neighborhood! Daniel Tiger goes to the potty in this relatable 8x8 storybook based on an episode of Daniel Tiger's Neighborhood. This book comes with a double-sided poster that little ones can hang up in the bathroom! Do you have to go potty? Maybe yes? Maybe no? Why don't you sit and try to go? Daniel is so excited to go to the market that he insists he doesn't need to go potty. But then he learns that it's important to try to go before leaving the house! This storybook about going to the potty includes a double-sided poster with an "I Spy" game that little tigers can play while they're sitting on the toilet. © 2019 The Fred Rogers Company

World Wildlife Crime Report 2020

Trafficking in Protected Species

UN The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

Edible Insects

Future Prospects for Food and Feed Security

Food & Agriculture Org Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The Extinction Market

Wildlife Trafficking and how to Counter it

Oxford University Press The planet is currently experiencing alarming levels of species loss caused in large part by intensified poaching and wildlife trafficking driven by expanding demand, for medicines, for food, and for trophies. Affecting many more species than just the iconic elephants, rhinos, and tigers, the rate of extinction is now as much as 1000 times the historical average and the worst since the dinosaurs died out 65 million years ago. In addition to causing irretrievable

biodiversity loss, wildlife trafficking also poses serious threats to public health, potentially triggering a global pandemic. The Extinction Market explores the causes, means, and consequences of poaching and wildlife trafficking, with a view to finding ways of suppressing them. Vanda Felbab-Brown travelled to the markets of Latin America, South and South East Asia, and eastern and southern Africa, to evaluate the effectiveness of various tools, including bans on legal trade, law enforcement, and interdiction; allowing legal supply from hunting or farming; alternative livelihoods; anti- money-laundering efforts; and demand reduction strategies. This is an urgent book offering meaningful solutions to one of the world's most pressing crises.

Debt

The First 5,000 Years

Melville House Publishing Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.

Pearson Education India

Pre-Incident Indicators of Terrorist Incidents

The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3

months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Understanding Machine Learning From Theory to Algorithms

Cambridge University Press Introduces machine learning and its algorithmic paradigms, explaining the principles behind automated learning approaches and the considerations underlying their usage.

Learning Love from a Tiger

Religious Experiences with Nature

Univ of California Press Learning Love from a Tiger explores the vibrancy and variety of humans' sacred encounters with the natural world, gathering a range of stories culled from Christian, Muslim, Hindu, Mayan, Himalayan, Buddhist, and Chinese shamanic traditions. Readers will delight in tales of house cats who teach monks how to meditate, shamans who shape-shift into jaguars, crickets who perform Catholic mass, rivers that grant salvation, and many others. In addition to being a collection of wonderful stories, this book introduces important concepts and approaches that underlie much recent work in environmental ethics, religion, and ecology. Daniel Capper's light touch prompts readers to engage their own views of humanity's place in the natural world and question longstanding assumptions of human superiority.

Proofreading, Revising & Editing Skills Success in 20 Minutes a Day

Learning Express LLC This comprehensive guide will prepare candidates for the test in all 50 states. It includes four complete practice exams, a real estate refresher course and complete math review, as well as a real estate terms glossary with over 900 terms, and expert test-prep tips.

Capital in the Twenty-First Century

Harvard University Press The main driver of inequality—returns on capital that exceed the rate of economic growth—is again threatening to generate extreme discontent and undermine democratic values. Thomas Piketty's findings in this ambitious, original, rigorous work will transform debate and set the agenda for the next generation of thought about wealth and inequality.

From Poverty to Power

How Active Citizens and Effective States Can Change the World

Oxfam Offers a look at the causes and effects of poverty and inequality, as well as the possible solutions. This title features research, human stories, statistics, and compelling arguments. It discusses about the world we live in and how we can make it a better place.

Goodnight, Daniel Tiger with audio recording

Simon and Schuster A new generation of children love Daniel Tiger's Neighborhood, inspired by the classic series Mister Rogers' Neighborhood! Wind down from a busy day and get ready for bed with Daniel Tiger in this 8x8 storybook. It's almost time for Daniel Tiger to say goodnight, but there's still so much to do! There's play time and then bath time...and don't forget tooth-brushing time! Finally it's time to get cozy under the covers for story time and a special goodnight song. Daniel Tiger's Neighborhood fans will love winding down their busy day with their favorite friend before snuggling into their own beds to say goodnight! © 2014 The Fred Rogers Company.

Daniel Visits the Doctor

Simon Spotlight Daniel Tiger goes to the doctor in this adorable new 8x8 storybook retelling of a popular episode! Daniel is feeling a little nervous before his check-up with Dr. Anna. But with a little reassurance from Mom, Daniel learns that talking about what will happen at the doctor's office helps to make the trip a lot less scary. © 2014 The Fred Rogers Company.

Backpacker

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Thinking in Systems

A Primer

Chelsea Green Publishing In the years following her role as the lead author of the international bestseller, *Limits to Growth*—the first book to show the consequences of unchecked growth on a finite planet—Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. *Thinking in Systems*, is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking out of the realm of computers and equations and into the tangible world, showing readers how to develop the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor details have enormous power to undermine the best efforts of too-narrow thinking. While readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, *Thinking in Systems* helps readers avoid confusion and helplessness, the first step toward finding proactive and effective solutions.

Air Force Combat Units of World War II

DIANE Publishing

Nature Underfoot - Celebrating Crabgrass, Silverfish, Fruit Flies, and Dandelions

Yale University Press An informed and heartfelt tribute to commonly unappreciated plants, insects, and other tiny creatures that reconsiders humanity's relationship to nature "Put aside that can of Raid for the short time it takes to read this book."--*Natural History* Named a Favorite Book of 2020 by *The Progressive* Fruit flies, silverfish, dandelions, and crabgrass are the bane of many people and the target of

numerous chemical and physical eradication efforts. In this compelling reassessment of the relationship between humans and the natural world, John Hainze--an entomologist and former pesticide developer--considers the fascinating and bizarre history of how these so-called invasive or unwanted pests and weeds have coevolved with humanity and highlights the benefits of a greater respect and moral consideration toward these organisms. With deep insight into the lives of the underappreciated and often reviled creatures that surround us, Hainze's accessible and engaging natural history draws on ethics, religion, and philosophy as he passionately argues that creepy crawlies and unwanted plants deserve both empathy and accommodation as partners dwelling with us on earth.

Investing in Cultural Diversity and Intercultural Dialogue

UNESCO This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

Thinking, Fast and Slow

Penguin UK In this work the author, a recipient of the Nobel Prize in Economic Sciences for his seminal work in psychology that challenged the rational model of judgment and decision making, has brought together his many years of research and thinking in one book. He explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. He exposes the extraordinary capabilities, and also the faults and biases, of fast thinking, and reveals the pervasive influence of intuitive impressions on our thoughts and behavior. He reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives, and how we can use different techniques to guard against the mental glitches that often get us into trouble. This author's work has transformed cognitive psychology and launched the new fields of behavioral economics and happiness

studies. In this book, he takes us on a tour of the mind and explains the two systems that drive the way we think and the way we make choices.

Environmental Anthropology

From Pigs to Policies, Third Edition

Waveland Press Environmental anthropologists organize the realities of interdependent lands, plants, animals, and human beings; advocate for the neediest among them; and provide guidance for conservation efforts. But can anthropologists' studies of small-scale systems contribute to policies that address profoundly interconnected global problems? Townsend explores this question in her concise introduction to environmental anthropology. While maintaining the structure and clarity of previous editions, the third edition has been thoroughly revised to include new research. Newly added are a chapter on the environmental impact of war and recommended readings and films. Townsend begins with a historical overview of the field, illustrating how earlier ideas and approaches help to understand how today's populations adapt to their physical and biological environments. She then transitions to a closer look at global environmental issues, including such topics as rapid expansion of the world economic system and inequality, loss of biodiversity and its implications for human health, and injustices of climate change, resource extraction, and toxic waste disposal. The final chapters caution that meaningful change requires social movements and policy changes in addition to individual actions.

Ecosystem Management

Adaptive, Community-Based Conservation

Island Press Today's natural resource managers must be able to navigate among the complicated interactions and conflicting interests of diverse stakeholders and decisionmakers. Technical and scientific knowledge, though necessary, are not sufficient. Science is merely one component in a multifaceted world of decision making. And while the demands of resource management have changed greatly, natural resource education and textbooks have not. Until now. *Ecosystem Management* represents a different kind of textbook for a different kind of course. It offers a new and exciting approach that engages students in active problem solving by using detailed landscape scenarios that reflect the complex issues and conflicting interests that face today's resource managers and scientists. Focusing on the application of the sciences of ecology and conservation biology to real-world concerns, it emphasizes the intricate ecological, socioeconomic, and institutional matrix in which natural resource management functions, and illustrates how to be more effective in that challenging arena. Each chapter is rich with exercises to help

facilitate problem-based learning. The main text is supplemented by boxes and figures that provide examples, perspectives, definitions, summaries, and learning tools, along with a variety of essays written by practitioners with on-the-ground experience in applying the principles of ecosystem management. Accompanying the textbook is an instructor's manual that provides a detailed overview of the book and specific guidance on designing a course around it. Ecosystem Management grew out of a training course developed and presented by the authors for the U.S. Fish and Wildlife Service at its National Training Center in Shepherdstown, West Virginia. In 20 offerings to more than 600 natural resource professionals, the authors learned a great deal about what is needed to function successfully as a professional resource manager. The book offers important insights and a unique perspective derived from that invaluable experience.

Factfulness

Ten Reasons We're Wrong About the World--and Why Things Are Better Than You Think

Flatiron Books INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." - Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That

doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

How to Raise Kids Who Aren't Assholes

Science-based strategies for better parenting - from tots to teens

Hachette UK As featured in *The Guardian*, *How to Raise Kids Who Aren't Assholes* is a clear, actionable, sometimes humorous (but always science-based) guide for parents on how to shape their kids into honest, kind, generous, confident, independent, and resilient people . . . who just might save the world one day. As an award-winning science journalist, Melinda Wenner Moyer was regularly asked to investigate and address all kinds of parenting questions: how to potty train, when and whether to get vaccines, and how to help kids sleep through the night. But as Melinda's children grew, she found that one huge area was ignored in the realm of parenting advice: how do we make sure our kids don't grow up to be assholes? On social media, in the news, and from the highest levels of government, kids are increasingly getting the message that being selfish, obnoxious and cruel is okay. Hate crimes among children and teens are rising, while compassion among teens has been dropping. We know, of course, that young people have the capacity for great empathy, resilience, and action, and we all want to bring up kids who will help build a better tomorrow. But how do we actually do this? How do we raise children who are kind, considerate, and ethical inside and outside the home, who will grow into adults committed to making the world a better place? *How to Raise Kids Who Aren't Assholes* is a deeply researched, evidence-based primer that provides a fresh, often surprising perspective on parenting issues, from toddlerhood through the teenage years. First, Melinda outlines the traits we want our children to possess - including honesty, generosity, and antiracism - and then she provides scientifically-based strategies that will help parents instill those characteristics in their kids. Learn how to raise the kind of kids you actually want to hang out with-and who just might save the world.

Water Resource Systems Planning and Management

An Introduction to Methods, Models, and Applications

Springer This book is open access under a CC BY-NC 4.0 license. This revised, updated textbook presents a systems approach to the planning, management, and operation of water resources infrastructure in the environment. Previously published in 2005 by UNESCO and Deltares (Delft Hydraulics at the time), this new edition, written again with contributions from Jery R. Stedinger, Jozef P. M. Dijkman, and Monique T. Villars, is aimed equally at students and professionals. It introduces readers to the concept of viewing issues involving water resources as a system of multiple interacting components and scales. It offers guidelines for initiating and carrying out water resource system planning and management projects. It introduces alternative optimization, simulation, and statistical methods useful for project identification, design, siting, operation and evaluation and for studying post-planning issues. The authors cover both basin-wide and urban water issues and present ways of identifying and evaluating alternatives for addressing multiple-purpose and multi-objective water quantity and quality management challenges. Reinforced with cases studies, exercises, and media supplements throughout, the text is ideal for upper-level undergraduate and graduate courses in water resource planning and management as well as for practicing planners and engineers in the field.

Digital Entrepreneurship

Impact on Business and Society

Springer Nature This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an

enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. "Digitalization mirrors the Industrial Revolution's impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work." Gina O'Connor, Professor of Innovation Management at Babson College, USA "This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique "must-read" book because it goes beyond theory and provides practical examples." Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA "This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures." Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany
