An Unofficial Minecraft Adventure

State Sovereignty and International Criminal Law

Torkel Opsahl Academic EPublisher 'State sovereignty' is often referred to as an obstacle to criminal justice for core international crimes by members of the international criminal justice movement. The exercise of State sovereignty is seen as a shield against effective implementation of such crimes. But it is sovereign States

that create and become parties to international criminal law treaties and jurisdictions. They are the principal enforcers of criminal responsibility for international crimes, as reaffirmed by the complementarity principle on which the International Criminal Court (ICC) is based. Criminal justice for atrocities depends entirely on the ability of States to act. This volume revisits the relationship between State sovereignty and international criminal law along three main lines of inquiry. First, it considers the immunity of State officials from the exercise of foreign or international criminal jurisdiction. Secondly, with the closing down of the ad hoc international criminal tribunals, attention shifts to the exercise of national jurisdiction over core international crimes, making the scope of universal jurisdiction more relevant to perceptions of State sovereignty. Thirdly, could the amendments to the ICC Statute on the crime of aggression exacerbate tensions between the interests of State sovereignty and accountability? The book contains contributions by prominent international lawyers including Professor Christian Tomuschat, Judge Erkki Kourula, Judge LIU Daqun, Ambassador WANG Houli, Dr. ZHOU Lulu, Professor Claus Kre, Professor MA Chengyuan, Professor JIA Bingbing, Professor ZHU Lijiang and Mr. GUO Yang.

Prentice Hall Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many

other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, *Radio Frequency and Microwave Electronics Illustrated* is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in *Microwave Integrated Circuits (MICs)*. Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. *Radio Frequency and Microwave Electronics Illustrated* includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. Twelve Years a Slave

Prabhat Prakashan "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The Selected Poetry of Pier Paolo

Pasolini

A Bilingual Edition

University of Chicago Press Most people outside Italy know Pier Paolo Pasolini for his films, many of which began as literary works—*Arabian Nights*, *The Gospel According to Matthew*, *The Decameron*, and *The Canterbury Tales* among them. What most people are not aware of is that he was primarily a poet, publishing nineteen books of poems during his lifetime, as well as a visual artist, novelist, playwright, and journalist. Half a dozen of these books have been excerpted and published in English over the years, but even if one were to read all of those, the wide range of poetic styles and subjects that occupied Pasolini during his lifetime would still elude the English-language reader. For the first time, Anglophones will now be able to discover the many facets of this singular poet. Avoiding the tactics of the slim, idiosyncratic, and aesthetically or politically motivated volumes currently available in English, Stephen Sartarelli has chosen poems from every period of Pasolini's poetic oeuvre. In doing so, he gives English-language readers a more complete picture of the poet, whose verse ranged from short lyrics to longer poems and extended sequences, and whose themes ran not only to the moral, spiritual, and social spheres but also to the aesthetic and sexual, for which he is most known in the United States today. This volume shows how central poetry was to Pasolini, no matter what else he was doing in his creative life, and how poetry informed all of his work from the visual arts to his political essays to his films. Pier Paolo Pasolini was "a poet of the cinema," as James Ivory says in the book's foreword, who "left a trove of words on paper that can live on as the fast-deteriorating images he created on celluloid cannot." This generous selection of poems will be welcomed by poetry lovers and film buffs alike and will be an event in American letters.

Marianne Burkhalter + Christian Sumi

Birkhauser "Swiss architects Marianne Burkhalter and Christian Sumi are dedicated to an exploration of the nature of materials and construction. In the last fifteen years, they have built a series of remarkable buildings in wood and stone in Germany, Austria, and Switzerland. Their work is a thoughtful pursuit of the fundamentals of architectural construction-a style that, like that of Zumthor's buildings, might be called Alpine minimalism. Their interest in simple forms and shapes, in luminous color, in the natural grain patterns of wood, and in the

opportunities afforded by joinery and other forms of craftsmanship are evident in every aspect of their built work. This comprehensive monograph includes an in-depth look at 25 of Burkhalter and Sumi's projects, including their most famous built work, the Hotel Zurichberg. Essays by Eugene Asse, Detlef Mertins, Steven Spier, and Lynnette Widder, based respectively in Moscow, Toronto, London, and New York, explore their unique style and demonstrate the growing international acknowledgement of their practice. -- Publisher description.

Breaking the Glass Armor

Princeton University Press "Classical works have for us become covered with the glassy armor of familiarity," wrote Victor Shklovsky in 1914. Here Kristin Thompson "defamiliarizes" the reader with eleven different films. Developing the technique formulated in her Eisenstein's *Ivan the Terrible* (Princeton, 1981), she clearly demonstrates the flexibility of the neoformalist approach. She argues that critics often use cut-and-dried methods and choose films that easily fit those methods. Neoformalism, on the other hand, encourages the critic to deal with each film differently and to modify his or her analytical assumptions continually. Thompson's analyses are thus refreshingly varied and revealing, ranging from an ordinary Hollywood film, *Terror by Night*, to such masterpieces as *Late Spring* and *Lancelot du Lac*. She proposes a formal historical way of dealing with realism, using *Bicycle Thieves* and *The Rules of the Game* as examples. *Stage Fright* and *Laura* provide cases in which the classical cinema defamiliarizes its own conventions by playing with audience expectations. Other chapters deal with Tati's *Les Vacances de Monsieur Hulot* and *Play Time* and Godard's *Tout va bien* and *Sauve qui peut (la vie)*. Although neoformalist analysis is a rigorous, distinctive approach, it avoids extensive specialized vocabulary and esoteric concepts: the essays here can be read separately by those interested in the individual films. The book's overall purpose, however, goes beyond making these particular films more accessible and intriguing to propose new ways of looking at cinema as a whole.

Extreme Economies

Survival, Failure, Future – Lessons from the World's Limits

Random House *Winner of the Enlightened Economist Prize 2019* *Winner of Debut Writer of the Year at the Edward Stanford Travel Writing Awards 2020* *Longlisted

for the Financial Times & McKinsey Business Book of the Year Award 2019* 'Extreme Economies is a revelation - and a must-read.' Andy Haldane, Chief Economist at the Bank of England To understand how humans react and adapt to economic change we need to study people who live in harsh environments. From death-row prisoners trading in institutions where money is banned to flourishing entrepreneurs in the world's largest refugee camp, from the unrealised potential of cities like Kinshasa to the hyper-modern economy of Estonia, every life in this book has been hit by a seismic shock, violently broken or changed in some way. In his quest for a purer view of how economies succeed and fail, Richard Davies takes the reader off the beaten path to places where part of the economy has been repressed, removed, destroyed or turbocharged. He tells the personal stories of humans living in these extreme situations, and of the financial infrastructure they create. Far from the familiar stock reports, housing crises, or banking scandals of the financial pages, Extreme Economies reveals the importance of human and social capital, and in so doing tells small stories that shed light on today's biggest economic questions. 'A highly original approach to understanding what really makes economies tick.' Mervyn King, former Governor of the Bank of England

The Crime of Aggression

A Commentary

Cambridge University Press The 2010 Kampala Amendments to the Rome Statute empowered the International Criminal Court to prosecute the 'supreme crime' under international law: the crime of aggression. This landmark commentary provides the first analysis of the history, theory, legal interpretation and future of the crime of aggression. As well as explaining the positions of the main actors in the negotiations, the authoritative team of leading scholars and practitioners set out exactly how countries have themselves criminalized illegal war-making in domestic law and practice. In light of the anticipated activation of the Court's jurisdiction over this crime in 2017, this work offers, over two volumes, a comprehensive legal analysis of how to understand the material and mental elements of the crime of aggression as defined at Kampala. Alongside *The Travaux Préparatoires of the Crime of Aggression* (Cambridge, 2011), this commentary provides the definitive resource for anyone concerned with the illegal use of force.
