Women in Science and Technology Confronting Inequalities

Sage Publications Pvt. Limited **Women in Science and Technology: Confronting Inequalities comprehensively explores women's status in the Science and Technology (S&T) domain by rigorously analysing and interpreting extensive recent information on major areas such as engineering, medicine, physical sciences, biosciences and mathematics. The book forcefully demonstrates that gender-based differences and expectations play the determining role in limiting women's participation in S&T. These exist in various forms, from making subject choices in school and opting for specific disciplines in college to embracing specific career avenues such as scientific research. This book shows how the construction of gendered identities is perpetuated through a masculine culture in the informal environment of elite educational institutes and in major S&T workplaces such as academia and research laboratories, which serve together to exclude women from peer groups and opportunities for advancement. The book makes substantive recommendations for policy measures on college**

admissions, improvement of institutional and organizational environments, and recruitment and capacity building for women in S&T. It calls for substantially reducing the myriad societal and familial barriers through cooperation and understanding.

Handbook of Research on Recent Developments in Materials Science and Corrosion Engineering Education

[IGI Global](#) The latest research innovations and enhanced technologies have altered the discipline of materials science and engineering. As a direct result of these developments, new trends in Materials Science and Engineering (MSE) pedagogy have emerged that require attention. The Handbook of Research on Recent Developments in Materials Science and Corrosion Engineering Education brings together innovative and current advances in the curriculum design and course content of MSE education programs. Focusing on the application of instructional strategies, pedagogical frameworks, and career preparation techniques, this book is an essential reference source for academicians, engineering practitioners, researchers, and industry professionals interested in emerging and future trends in MSE training and education.

Financing Entrepreneurship and Innovation in Emerging Markets

[Academic Press](#) Financing Entrepreneurship and Innovation in Emerging Markets offers an original perspective on the links between macro data on innovation, data on micro-entrepreneurial processes and venture capital supply. The authors synthesize two disparate fields of research and thinking—innovation and entrepreneurship and economics—to illuminate how domestic companies compete and the business environment in which entrepreneurial firms operate. Its broad scope and firm linkages between processes at different levels leapfrogs research topics. For those investigating entrepreneurship and innovation in the early stages of economic development, this book demonstrates how micro and macro foundations of productivity, and hence economic growth and development, are inextricably intertwined. Combines macro and micro perspectives on innovation processes Reveals how economic growth and development are inextricably intertwined Uses case studies to portray the entrepreneurial firm and its role in accelerating the speed of innovation and dissemination of new technologies Identifies common flaws undermining public venture

programs, including poor design, a lack of understanding for the entrepreneurial process and implementation problems

Reclaiming Public Universities

Comparative Reflections for Reforms

Taylor & Francis This book explores the nature of public universities and higher education reforms in emerging economies, with a focus on India, South Africa and Brazil. Drawing on context-based case studies, the essays in the volume highlight the state of public universities amongst the developing world with their shared colonial past and social, caste and race inequalities. Based on comparative and multidisciplinary studies, the book provides a critical account of the policy reforms and changes on account of globalization and markets in higher education in public universities of the Global South regions. The chapters also compare methodological approaches to university reform and restructuring of public universities and higher education systems in USA, Australia, the European Union and India, and examine the California model, the Bologna process, the Melbourne model, the University of Delhi reforms, and engage critically with the New Public Management inspired reform policies. The book further lays the groundwork for understanding 'massification' in a contextual way, and the possibilities for expansion of scale of mass higher education through public provision. With its empirical findings and social theory analyses by global experts, the volume will be of great interest to scholars and researchers of education, higher education, sociology and social anthropology, development studies, public policy and administration, politics, political economy, and Global South studies. It will also be useful to educationists, policymakers and civil society organizations.

Advanced Calculus

Revised

World Scientific Publishing Company **An authorised reissue of the long out of print classic textbook, Advanced Calculus by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention Differential and Integral Calculus by R Courant, Calculus by T Apostol, Calculus by M Spivak, and Pure Mathematics by G Hardy. The reader should also have**

some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

Nursing Informatics for the Advanced Practice Nurse Patient Safety, Quality, Outcomes, and Interprofessionalism

Springer Publishing Company **Designed specifically for graduate-level nursing informatics courses, this is the first text to focus on using technology with an interprofessional team to improve patient care and safety. It delivers an expansive and innovative approach to devising practical methods of optimizing technology to foster quality of patient care and support population health initiatives. Based on the requirements of the DNP Essential IV Core Competency for Informatics and aligning with federal policy health initiatives, the book describes models of information technology the authors have successfully used in health IT, as well as data**

and analytics used in business, for-profit industry, and not-for-profit health care association settings, which they have adapted for nursing practice in order to foster optimal patient outcomes. The authors espouse a hybrid approach to teaching with a merged competency and concept-based curriculum. With an emphasis on the benefits of an interprofessional team, the book describes the most effective approaches to health care delivery using health information technology. It describes a nursing informatics model that is comprised of three core domains: point-of-care technology, data management and analytics, and patient safety and quality. The book also includes information on point-of-care applications, population health, data management and integrity, and privacy and security. New and emerging technologies explored include genomics, nanotechnology, artificial intelligence, and data mining. Case studies and critical thinking exercises support the concept-based curriculum and facilitate out-of-the-box thinking. Supplemental materials for instructors include PowerPoint slides and a test bank. While targeted primarily for the nursing arena, the text is also of value in medicine, health information management, occupational therapy, and physical therapy. **Key Features:** Addresses DNP Essential IV Core Competency for Informatics Focuses specifically on using nursing informatics expertise to improve population health, quality, and safety Advocates an interprofessional team approach to optimizing health IT in all practice settings Stimulates critical thinking skills that can be applied to all aspects of IT health care delivery Discusses newest approaches to interprofessional education for IT health care delivery

A Plan That Actually Works

Handbook for the Indian teenager to excel at JEE

Notion Press Written by a former All India Topper, this book has been touted by several iconic IITians as the most effective book on JEE planning ever written! Anagh argues that most IITians are neither born-geniuses nor unusually intense work-machines; they are smart planners instead. He takes you behind-the-scenes to reveal how smart planning works for JEE and lays out a clear framework for goal-oriented thinking. The step by step approach outlined across 11 chapters covers everything from daily routine to efficient practice to long term motivation, all explained through real life examples and presented with time-tested proofs. It talks about achieving one's goals while not missing out on a balanced life and questions people's deepest beliefs about achieving a large and meaningful goal like IIT-JEE. After finishing the book, readers will take away not just a concrete plan to prepare for JEE, but in the words of an early reviewer, a "life-altering" change in perspective towards success. "Edifying and thought-provoking! Reading this book will help you succeed not only in JEE but also in life." - Chitraang Murdia, AIR-1 in JEE Adv, 2014 "Covers a lot of important topics and explains goal setting well" - Aman Bansal, AIR-1 in JEE Adv, 2016 "Develops a holistic strategy to ace the JEE" - Ananye Agarwal, AIR-3 in JEE Adv, 2017 "Informative and Inspirational! It unravels the inner workings of a topper's mind" - Amey Gupta, AIR-8 in JEE Adv, 2014 "It will enable students to follow tested winning strategies rather than reinvent the wheel" - Kartikeya Gupta, AIR-4 in JEE Adv, 2013 "It iterates on the timeless wisdom of BhagvadGita to excel not only in JEE but any goal in life" - Vishwajeet Agarwal, AIR-5 in JEE Main, 2017. Critical CALL – Proceedings of the 2015 EUROCALL Conference, Padova, Italy

Research-publishing.net The theme of the conference this year was **Critical CALL**, drawing inspiration from the work carried out in the broader field of **Critical Applied Linguistics**. The term ‘critical’ has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become ‘naturalized’ and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.
