Corporate Taxes 2003-2004

Worldwide Summaries

Capstone Large international corporations and accountants representing international interests require the most up-to-date information regarding tax issues in countries around the world. *Corporate Taxes 2003-2004* provides vital information on the corporate implications of the tax systems of over 120 countries.

Corporate Income Tax Harmonization in the European Union

Springer Through the arguments for corporate tax harmonization in the EU and describing the current stage of this process, the legislative rules which are insufficient to solve the many problems implied by the proper functioning of the Single Market, are revealed. The book also exposes the issues involved in the consolidation of the corporate tax base.

International Accounting and Reporting Issues

2018 Review

United Nations This publication reviews recent developments on the performance of enterprises in attaining Sustainable Development Goals, as well as practical implementation of aspects concerning International Financial Reporting Standards (IFRS) and International Public Sector Accounting Standards (IPSAS). It discusses implementation of recent IFRS considerations dealing with financial instruments, revenue from contracts with customers, leases and insurance contracts. Concerning IPSAS, the report looks into its overall implementation worldwide.

Ageism in Youth Studies

Generation Maligned

Cambridge Scholars Publishing Ageism is prevalent in a great deal of current scholarship in the social sciences as scholars fault youth for being delinquent or politically apathetic. Researchers ignore young people's actual voices, despite their leadership in recent global uprisings, some of which unseated entrenched dictators. Neoliberalism must be exposed in its focus on youth sub-cultures and styles rather than economic barriers caused by growing inequality and rising youth unemployment rates. Ageism in Youth Studies also discusses the debate about "Generation We or Me" and if Millennials are narcissistic. Resources about global youth studies are included, along with the results of the author's surveys and interviews with over 4,000 young people from 88 countries.

Banking reform

draft secondary legislation

Stationery Office The Financial Services (Banking Reform) Bill aims to establish a more resilient, stable and competitive banking sector; to reduce the severity of a future financial crisis; and to protect taxpayers in the event of such a crisis. It is primarily an enabling Bill, which provides HM Treasury with the requisite powers to implement the policy underlying the Bill through secondary legislation. Three illustrative draft instruments were published in March 2013 in order to aid Parliamentary scrutiny of the Bill, and the Government has continued to develop those instruments. This paper invites comments on a further four statutory instruments: Ring-fenced Bodies and Core Activities Order; Excluded Activities and Prohibitions Order; Banking reform (Loss Absorbency Requirement) Order; and the Fees and Prescribed International Organisations Regulations. Further secondary legislation is planned for pensions and building societies.

Life Insurance in Europe

Risk Analysis and Market Challenges

Springer Nature This book examines the challenges for the life insurance sector in Europe arising from new technologies, socio-cultural and demographic trends, and the financial crisis. It presents theoretical and applied research in all areas related to life insurance products and markets, and explores future determinants of the insurance industry's development by highlighting novel solutions in insurance supervision and trends in consumer protection. Drawing on their academic and practical expertise, the contributors identify problems relating to risk analysis and evaluation, demographic challenges, consumer protection, product distribution, mortality risk modeling, applications of life insurance in contemporary pension systems, financial stability and solvency of life insurers. They also examine the impact of population aging on life insurance markets and the role of digitalization. Lastly, based on an analysis of early experiences with the implementation of the Solvency II system, the book provides policy recommendations for the development of life insurance in Europe.

Public Financial Management Reforms in Turkey: Progress and Challenges, Volume 1

Springer Nature This book provides an assessment of public financial management (PFM) reforms in developing countries using Turkey as a case study. The book elaborates on revenue management, expenditure management, public budget, public financial management information systems, asset and liability management, intergovernmental fiscal relations, accounting, financial reporting, and auditing. Bringing together academics and practitioners, the book analyzes the PFM reforms in the light of theoretical explanations and practices to reveal the achievements, challenges, and future perspectives of PFM.

Global Innovation Index 2020

Who Will Finance Innovation?

WIPO The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges - including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

A guide to the European VAT directives

IBFD

OECD Investment Policy Reviews: Georgia

OECD Publishing Georgia's reform trajectory has been nothing short of remarkable. In less than two decades, successive structural, regulatory and economic reforms have propelled Georgia from one of the poorest post-Soviet states to an upper-middle income economy.

Gowers Review of Intellectual Property

The Stationery Office This report examines the importance of intellectual property (IP), ranging from patents, copyright, design and trade marks, and whether in the age of globalization, digitization and increasing economic specialization it still creates incentives for innovation, without unduly limiting access to consumers and stifling further innovation. The report does recommend a radical overhaul of the system, with the review concentrating on three areas, and setting out the following recommendations: (i) strengthening enforcement of IP rights, whether through clamping down on piracy or trade in counterfeit goods; (ii) reducing costs of registering and litigating IP rights for businesses large and small; (iii) improving the balance and flexibility of IP rights to allow individuals, businesses and institutions to use content in ways consistent with the digital age.

New Models of Financing and Financial Reporting for European SMEs

A Practitioner's View

Springer This book looks at the 23 million registered Small and Medium Enterprises (SMEs) that make up 98 per cent of the EU economy. Addressing the high end of SMEs in terms of new models for SME funding and financial reporting, this merged way of looking at SMEs reveals a 'myopic' thinking in terms of net present value and (future) cash flows generating short-termism and low risk appetite for business. This is not an accounting issue, but rather a preference toward certain financial tools. A segment of SMEs, the ones that seek new ways of funding possibilities, as well as modern technologies (MTFs listing, blockchain, ICOs, etc.) do require, even without knowing, IFRS for SMEs. This book reveals how market conditions impact the financial performance and sustainability of SMEs and also generate innovative policy interventions and financing strategies for SME integrity and efficiency. The authors frame their arguments in the context of the Capital Markets Union, looking at the Innovation Triangle, SME growth ecosystem and business models. They conclude by advocating for closing the circle of financing and financial reporting for SMEs, while considering if new financial models of financing and financial reporting are good for all the SMEs or only for some. The economy is being shaped by new models of financing and financial reporting. Read this practitioners' view to understand the current changes and challenges.

Future of solar photovoltaic

International Renewable Energy Agency (IRENA) This study presents options to fully unlock the world's vast solar PV potential over the period until 2050. It builds on IRENA's global roadmap to scale up renewables and meet climate goals.

European Foreign Policy in a Decarbonising World

Challenges and Opportunities

Routledge Contributing to the emerging literature on the geopolitical and foreign policy implications of decarbonisation and energy transition processes, this book sheds light on the future of the European Union's (EU) external relations under decarbonisation. Under the Paris Agreement on climate change, adopted in 2015, governments are committed to phasing out the emissions of carbon dioxide and other greenhouse gases over the coming decades. This book addresses the many questions around this process of decarbonisation through detailed analyses of EU external relations with six fossil-fuel exporting countries: Nigeria, Indonesia, Azerbaijan, Colombia, Qatar, and Canada. The authors systematically examine the six countries' varying dependence on fossil fuels, the broader political and security context, current relations with the EU, and the potential for developing these towards decarbonisation. In doing so, they put forward a series of findings that should hold across varying circumstances and provide a steppingstone to enrich and inspire further research on foreign policy, external relations, and international relations under decarbonisation. The book also makes an important contribution to understanding the external implications of the 2019 European Green Deal. This volume will be of great interest to students and scholars of European environmental and climate policy, climate diplomacy, energy policy, foreign policy, and climate/energy geopolitics.

The ONS Productivity Handbook: A Statistical Overview and Guide

Palgrave Macmillan ONS Productivity Handbook: a Statistical Overview and Guide examines the importance and relevance of economic productivity and serves as a reference on the subject. Areas covered include productivity analysis within various sectors and at firm level as well as measures of labour and capital inputs.

Revisiting Risk-Weighted Assets

International Monetary Fund In this paper, we provide an overview of the concerns surrounding the variations in the calculation of risk-weighted assets (RWAs) across banks and jurisdictions and how this might undermine the Basel III capital adequacy framework. We discuss the key drivers behind the differences in these calculations, drawing upon a sample of systemically important banks from Europe, North America, and Asia Pacific. We then discuss a range of policy options that could be explored to fix the actual and perceived problems with RWAs, and improve the use of risk-sensitive capital ratios.

The Greenhouse Gas Protocol

A Corporate Accounting and Reporting Standard

World Resources Inst The GHG Protocol Corporate Accounting and Reporting Standard helps companies and other organizations to identify, calculate, and report GHG emissions. It is designed to set the standard for accurate, complete, consistent, relevant and transparent accounting and reporting of GHG emissions.

Modern Regulations and Practices for Social and Environmental Accounting

IGI Global There has been an increased interest in social and environmental issues in recent years as more consideration is given to the idea of sustainability and social accounting. Social accounting can be considered a straightforward manifestation of corporate enforcement to legitimize, explain, and justify the organization's activities or an ethically desirable component of any well-functioning democracy. Social accounting can also include environmental accounting, which is focused on environmental issues. Additional study is required to better understand the relevancy of social and environmental accounting in today's modern business world. Modern Regulations and Practices for Social and Environmental Accounting discusses social and environmental accounting and considers regulations, norms, organizational practices, and the challenges of education. Covering a range of topics such as non-financial reporting and corporate social responsibility, this reference work is ideal for industry professionals, researchers, academicians, managers, practitioners, instructors, and students.

International Arbitration and EU Law

Edward Elgar Publishing This book examines the intersection of EU law and international arbitration based on the experience of leading practitioners in both commercial and investment treaty arbitration law. It expertly illustrates the depth and breadth of EU law's impact on party autonomy and on the margin of appreciation available to arbitral tribunals.

Energy Democracy

Advancing Equity in Clean Energy Solutions

Island Press The near-unanimous consensus among climate scientists is that the massive burning of gas, oil, and coal is having cataclysmic impacts on our atmosphere and climate. These climate and environmental impacts are particularly magnified and debilitating for low-income communities and communities of color. Energy democracy tenders a response and joins the environmental and climate movement with broader movements for social and economic change in this country and around the world. Energy Democracy brings together racial, cultural, and generational perspectives to show what an alternative, democratized energy future can look like. The book will inspire others to take up the struggle to build the energy democracy movement.

Developing the Capacity of ESCWA Member Countries to Address the Water and Energy Nexus for Achieving Sustainable Development Goals

Regional Policy Toolkit

United Nations The water and energy nexus regional policy toolkit was prepared as part of the United Nations Development Account (UNDA) project on developing the capacity of ESCWA Member Countries to address the water and energy nexus for achieving Sustainable Development Goals. This project aims to build the capacity of ministries and public service providers in the Arab region to examine and address the water and energy nexus in an integrated manner.

Handbook on European data protection law

2018 Edition

Council of Europe The rapid development of information technology has exacerbated the need for robust personal data protection, the right to which is safeguarded by both European Union (EU) and Council of Europe (CoE) instruments. Safeguarding this important right entails new and significant challenges as technological advances expand the frontiers of areas such as surveillance, communication interception and data storage. This handbook is designed to familiarise legal practitioners not specialised in data protection with this emerging area of the law. It provides an overview of the EU's and the CoE's applicable legal frameworks. It also explains key case law, summarising major rulings of both the Court of Justice of the European Union and the European Court of Human Rights. In addition, it presents hypothetical scenarios that serve as practical illustrations of the diverse issues encountered in this ever-evolving field.

The New Silk Road Grand Strategy and the Maghreb

China and North Africa

Taylor & Francis Examining Chinese-North African relations through the lens of President Xi Jinping's Silk Road grand strategy, this book offers a comprehensive analysis of emerging strategic and economic partnerships in the Maghreb region. China's 'Belt and Road Initiative' (BRI) is one of the most ambitious infrastructure projects in modern history. This book argues that the BRI framework is vital in understanding the shifting balance of power within the Maghreb region and between the North African countries, the EU, the US, and China. It is argued that an increasing interdependence can be observed between China and the Maghreb in energy, construction, infrastructure building, political ties, trade and investments, financial integration, people-to-people bonds, and defence. The author reveals the complexities and challenges of Beijing's BRI, exploring how this synergy will shape the Maghreb in the future. Additionally, the book argues that the balance of global politics will be critically affected by these emerging partnerships. The book will be of particular interest to students and academics focused on interstate dynamics and foreign policy in the West Asia and North Africa (WANA) region, but in its global ramifications the book is also much-needed reading for those working in International Relations, Politics and Economics, and Public Policy.

Competitiveness and Private Sector Development: Eastern Europe and South Caucasus 2011 Competitiveness Outlook

Competitiveness Outlook

OECD Publishing Examines the key policies that would increase competitiveness in the countries of the region through developing human capital, improving access to finance for SMEs and creating more and better investment opportunities.

Digital Economic Policy

The Economics of Digital Markets from a European Union Perspective

Oxford University Press The emergence of new technologies and business models has required a pro-active role from public authorities in defining the rules of evolving markets before issues cement. This book surveys the key areas of the digital economy that demand policy action, such as AI, cybersecurity, and e-commerce, and the EU long term strategic plans to govern them.

The Fourth Industrial Revolution

Penguin UK The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Transfer Pricing and Developing Economies

A Handbook for Policy Makers and Practitioners

World Bank Publications Recent years have seen unprecedented public scrutiny over the tax practices of Multinational Enterprise (MNE) groups. Tax policy and administration concerning international transactions, aggressive tax planning, and tax avoidance have become an issue of extensive national and international debate in developed and developing countries alike. Within this context, transfer pricing, historically a subject of limited specialist interest, has attained name recognition amongst a broader global audience that is concerned with equitable fiscal policy and sustainable development. Abusive transfer pricing practices are considered to pose major risk to the direct tax base of many countries and developing countries are particularly vulnerable because corporate tax tends to account for a larger share of their revenue. This handbook is part of the wider WBG engagement in supporting countries with Domestic Resource Mobilization (DRM) by protecting their tax base and aims to cover all relevant aspects that have to be considered when introducing or strengthening transfer pricing regimes. The handbook provides guidance on analytical steps that can be taken to understand a country's potential exposure to inappropriate transfer pricing (transfer mispricing) and outlines the main areas that require attention in the design and implementation of transfer pricing regimes. A discussion of relevant aspects of the legislative process, including the formulation of a transfer pricing policy, and the role and content of administrative guidance, is combined with the presentation of country examples on the practical application and implementation of the arm's length principle and on running an effective transfer pricing audit program. Recognizing the importance of transfer pricing regulation and administration for the business environment and investor confidence, this handbook aims to balance the general objective of protecting a country's tax base and raising additional revenue with investment climate considerations wherever appropriate.

The World Book Encyclopedia

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

Ten Years to Midnight

Four Urgent Global Crises and Their Strategic Solutions

Berrett-Koehler Publishers In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PricewaterhouseCoopers, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities—stresses caused by very young or very old populations in developed and emerging countries; Populism as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises—but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local

economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.

Nordic Perspectives on Transboundary Climate Risk

Current knowledge and pathways for action

Nordic Council of Ministers Available online: <https://pub.norden.org/temanord2022-531/> Climate impacts hit us directly as e.g. floods and forest fires, but also cascade over borders. How can we address these transboundary climate risks (TCRs)? To answer this, the Nordic Council of Ministers commissioned a study. As open economies, the Nordics can be exposed to TCRs. Some key trade partners have medium (e.g. China) or even high (e.g. India) risk. The study dove deeper into six food commodities. For example, climate change affects sources of maize negatively, with risks outweighing opportunities by 28:1. This can mean higher prices or disturbances in supplies. The Nordics are better prepared than most others, but not well enough. There are also important differences among them. The report makes recommendations on how Nordics can better address TCRs together. These include a joint research programme, raising awareness and engaging with the private sector.

People and Productivity

New York : McGraw-Hill Having donated a theater to a local university drama department, benefactor Shelley invites Jane Jeffrey to help her sample cuisine by prospective new caterers, a situation that turns deadly when a new production's cast member is found dead under suspicious circumstances.

The EU-Mexico Free Trade Agreement

Ardsley, N.Y. : Transnational Publishers The EU-Mexico Free Trade Agreement is the first volume in a series of monographs encompassing text and analysis of all multilateral and bilateral free trade agreements. All this adds up to the kind of information business and economic analysts need in order to make sound decisions both in the long and short terms. For example, The EU-Mexico Free Trade Agreement, containing the most detailed and practical comparison of NAFTA and the EU-Mexico Agreement available anywhere, offers a wealth of material and insight with which to build realistic answers to such critical questions as: -How is Mexico's preferential access to the EU markets for agricultural exports affected by US trade in produce, livestock and meat? - Has the EU-Mexico Agreement hurt the "big three" US auto manufacturers? - Has the mandated cooperation between Mexican and European standards-related agencies given rise to standards that conflict with NAFTA? Published under the Transnational Publishers imprint.

Appraisal and Evaluation in Central Government : Treasury Guidance

Stationery Office This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Gender Equality in Peru Towards a Better Sharing of Paid and Unpaid Work

Towards a Better Sharing of Paid and Unpaid Work

OECD Publishing The OECD review of Gender Equality in Peru: Towards a Better Sharing of Paid and Unpaid Work is the second of a series focusing on Latin American and the Caribbean countries. It compares gender gaps in labour and educational outcomes in Peru with other countries.

Environmental Performance Review of Georgia

Third Review

United Nations This series assists countries to improve their environmental policies by making concrete recommendations for better policy design and implementation. It helps integrate environmental policies into sector-specific policies such as those in agriculture, energy, transport and health. The present publication contains the third Environmental Performance Review of Georgia. The review takes stock of the progress made by Georgia in the management of its environment since the country was reviewed in 2010 for the second time. It assesses the implementation of the recommendations contained in the second review. It also discusses issues on air protection, water management, including protection of the Black Sea, waste management, biodiversity, forests and protected areas, energy, industry, agriculture, transport, forestry, tourism, health and risk management of natural and technological/anthropogenic hazards.
