

Read PDF Pdf Report Development Human Bangladesh

Yeah, reviewing a books **Pdf Report Development Human Bangladesh** could ensue your near contacts listings. This is just one of the solutions for you to be successful. As understood, deed does not suggest that you have fabulous points.

Comprehending as capably as pact even more than extra will provide each success. next to, the pronouncement as well as insight of this Pdf Report Development Human Bangladesh can be taken as well as picked to act.

KEY=HUMAN - PATRICK LARSON

Village Ties Women, NGOs, and Informal Institutions in Rural Bangladesh Rutgers University Press Across the global South, poor women's lives are embedded in their social relationships and governed not just by formal institutions – rules that exist on paper – but by informal norms and practices. *Village Ties* takes the reader to Bangladesh, a country that has risen from the ashes of war, natural disaster, and decades of resource drain to become a development miracle. The book argues that grassroots women's mobilization programs can empower women to challenge informal institutions when such programs are anti-oppression, deliberative, and embedded in their communities. Qayum dives into the work of Polli Shomaj (PS), a program of the development organization BRAC to show how the women of PS negotiate with state and society to alter the rules of the game, changing how poor people access resources including safety nets, the law, and governing spaces. These women create a complex and rapidly transforming world where multiple overlapping institutions exist – formal and informal, old and new, desirable and undesirable. In actively challenging power structures around them, these women defy stereotypes of poor Muslim women as backward, subservient, oppressed, and in need of saving. **Girls' education in Bangladesh Lessons from NGOs Verlag Barbara Budrich** How do NGOs influence the promotion of gender equality in education in Bangladesh? What do they achieve and which challenges are they confronted with in local contexts? The author provides insights regarding three non-formal primary education programmes. **Understanding Security Practices in South Asia Securitization Theory and the Role of Non-state Actors Routledge** This book aims to explore the ways in which non-state actors (NSAs) in South Asia – media actors, epistemic communities, non-governmental organisations (NGOs), civil society groups and others – are involved in securitising non-traditional security challenges in the region at the domestic and regional levels. **Adaptation to Climate Change in Asia Edward Elgar Publishing** The collection of observations and recommendations in this book will prove invaluable to policy makers in countries that are facing similar threats and looking to build their adaptive capacity to cope with climate change. It will also appeal to academi **Intellectual Property and Public Health in the Developing World Open Book Publishers** Across the world, developing countries are attempting to balance the international standards of intellectual property concerning pharmaceutical patents against the urgent need for accessible and affordable medicines. In this timely and necessary book, Monirul Azam examines the attempts of several developing countries to walk this fine line. He evaluates the experiences of Brazil, China, India, and South Africa for lessons to guide Bangladesh and developing nations everywhere. Azam's legal expertise, concern for public welfare, and compelling grasp of principal case studies make *Intellectual Property and Public Health in the Developing World* a definitive work. The developing world is striving to meet the requirements of the World Trade Organization's TRIPS Agreement on intellectual property. This book sets out with lucidity and insight the background of the TRIPS Agreement and its implications for pharmaceutical patents, the consequences for developing countries, and the efforts of certain representative nations to comply with international stipulations while still maintaining local industry and public health. Azam then brings the weight of this research to bear on the particular case of Bangladesh, offering a number of specific policy recommendations for the Bangladeshi government—and for governments the world over. *Intellectual Property and Public Health in the Developing World* is a must-read for public policy-makers, academics and students, non-governmental organizations, and readers everywhere who are interested in making sure that developing nations meet the health care needs of their people. **Protection of Refugees and Displaced Persons in the Asia Pacific Region Routledge** The chapters in this book explore the impact of recent shifts in global and regional power and the subsequent development and enforcement of international refugee protection standards in the Asia Pacific region. Drawing on their expertise across a number of jurisdictions, the contributors assess the challenges confronting the implementation of international law in the region, as well as new opportunities for extending protection norms into national and regional dialogues. The case studies span key jurisdictions across the region and include a comparative analysis with China, Indonesia, Thailand, Myanmar, Malaysia, Bangladesh and Australia. This topical and important book raises critical questions for the Asia Pacific region and sheds light on the challenges confronting the protection of refugees and displaced persons in this area. Interdisciplinary in its approach, it will be of interest to academics, researchers, students and policy-makers concerned with the rights and protection of refugees. **Addressing the Challenges in Communicating Climate Change Across Various Audiences Springer** This book offers a concrete contribution towards a better understanding of climate change communication. It ultimately helps to catalyse the sort of cross-sectoral action needed to address the phenomenon of climate change and its many consequences. There is a perceived need to foster a better understanding of what climate change is, and to identify approaches, processes, methods and tools which may help to better communicate it. There is also a need for successful examples showing how communication can take place across society and stakeholders. Addressing the challenges in communicating to various audiences and providing a platform for reflections, it showcases lessons learnt from research, field projects and best practices in various settings in various different countries. The acquired knowledge can be adapted and applied to other situations. **From the Global to the Local How International Rights Reach Bangladesh's Children Routledge** From the Global to the Local develops a unique perspective on human rights governance in developing countries, where the state often lacks the required resources, capacities and expertise for implementing rights. Considering how rights that have been agreed upon in the global arena of world politics are locally implemented, this book then specifically explores how they reach the local children of Bangladesh's urban slums and poor rural areas. Andrea Schapper combines an analytical framework grounded in international relations scholarship on global governance with empirical field research methods that have their basis in sociology and anthropology. Utilising this methodology, the book examines three principles that represent a global consensus on children's rights (the protection of children from the worst forms of child labor, providing them with primary education, and delivering basic health care services to them) to illuminating the need for local and contextual solutions to transnational issues. Exploring such concerns with vigor, this book fills a gap in the study of human rights implementation and protection and will thus be of immense interest to students of Law, of International Relations and of Development Studies. **The Handbook Of Microfinance World Scientific** The Handbook of Microfinance showcases an expansive collection of works from leading academics and field practitioners. In an attempt to understand the enormous gap between the limited number of clients that are currently benefiting from microfinance services, and the huge number of potential clients that are not, the selected contributions in this comprehensive handbook have one common thread: the prevailing mismatch between demand by clients of microfinance institutions and potential clients selecting themselves out for their demand for a wider array of financial products which is not being met. The scope of the book is wide, and explores successes and failures, main challenges and debates, methodologies for impact evaluation via random trials, leading trends in Asia versus Latin America, main efforts in Africa, the importance of value chains in Central America, ethical and gender issues, savings, microinsurance, governance, commercialization trends and the potential advantages and disadvantages of it. This exhaustive Handbook also features main lessons from informal finance and 19th-century credit cooperatives addressing the above-mentioned mismatch. **Social Protection for the Poor and Poorest Concepts, Policies and Politics Springer** Social protection is fast becoming an important theme in development policy. This book examines the political processes shaping social protection policies; compares the key conceptual frameworks available for analyzing social protection; and provides a comparative discussion on social protection policies focused on the poor and the poorest. **Lessons in Sustainable Development from Bangladesh and India Springer** This Palgrave Pivot looks through social, economic, institutional, and environmental lenses to examine sustainable development in India and Bangladesh. The effects of climate change make this comparative study particularly pertinent, as rising sea levels and severe weather events will lead to displacement and migration, exacerbating existing issues. India and Bangladesh share similar cultural and socioeconomic backgrounds and, as a result, face similar challenges: rapid population growth, widespread poverty, food insecurity, and gender inequality. Developing a sustainable future will require policymakers to consider all of these elements in their efforts to create human security. **Women and Climate Change in Bangladesh Routledge** Bangladesh is by no means a high emitter of carbon, but it is nevertheless one of the countries most critically affected. There is a significant risk of damage to lives and livelihoods due to climate change in the form of cyclones, flooding and storm surges, and slow-onset impacts such as droughts, sea level rises and river basin erosion. Moreover, Bangladeshis are especially vulnerable as a high proportion of people live in extreme poverty. This book assesses the impact of climate change in Bangladesh, and presents the findings of a three-year, in-depth study undertaken at village level in different districts of the country. It examines national policies, contrasting them with what is actually happening at village level. It outlines the impact of climate change on livelihood strategies and health, and focuses particularly on the impact on gender relations, showing that although women have a significant role to play in helping communities cope with the effects of climate change, cultural customs and practices often work against this. The book argues for, and puts forward policy proposals for, recognising women's active contribution and supporting gender equality as a critical strategy in global adaptation to climate challenges. **Climate Change Impacts on Gender Relations in Bangladesh Socio-environmental Struggle of the Shora Forest Community in the Sundarbans Mangrove Forest Springer** This book explores gendered perceptions of the Sundarbans Forest in Bangladesh, and the extent to which these perceptions are affected by extreme weather events (specifically, cyclones Aila and Sidr). Based on ethnographic fieldwork in Shora, a rural village in southern Satkhira, Bangladesh, the book explores gendered activities in the forest, especially women's interaction with the forest resources. The findings present a clear picture of the Shora community's local knowledge about the Sundarbans Forest, as well as the ecological and economic contributions for the forest people. The book makes a timely contribution to the wider study of gender, post-cyclone recovery, ecology and resilience. **Beyond Access Transforming Policy and Practice for Gender Equality in Education Oxfam** This book combines analysis of policy and empirically based studies on gender, education, and development. **South-South Migration Emerging Patterns, Opportunities and Risks Taylor & Francis** South-South migration contributes significantly to the development of the emerging economies, the migration of receiving countries and, at the same time, generates a major share of remittance income flowing into the sending countries. By capturing field experience and observations from a number of research studies, this book provides a robust catalogue of data, practical experience and analysis focused on the significant issues, risks and challenges that are associated with this evolving phenomenon in international migration. The book also critically explores new theoretical perspectives by highlighting new policy directions for both sending and receiving countries relevant to making South-South migration more efficient, attractive and mutually beneficial. **Contemporary Global Perspectives on Gender Economics IGI Global** The rise of women in the workforce has led to many campaigns for wage equality and the impartial treatment of both sexes as they pursue careers previously designated as either a man's or a woman's job. The impact of these campaigns has been felt, but a sense of gender stereotyping still affects not only the social and cultural well-being of the modern organization, but the drive for innovation and economic success as well. *Contemporary Global Perspectives on Gender Economics* challenges current economic theory, targeting the way gender is often used for economic gain or increased market share. Experts realize that company growth can no longer be achieved by taking a conventional approach, but few follow through with introducing new frameworks that change the way diversity is treated. By acknowledging that issues like childcare and the wage gap are not only a woman's challenge, this book speaks to legislators and policymakers, economic developers, corporate practitioners, educational faculties, and students of all disciplines who are looking to change the way gender is viewed in the workforce. This essential reference source features chapters that combine the concepts of gender theory, sociology, and economics and cover topics including economic equality, gender bias, the history of gender economics, industrial creativity, and the impact of social connectedness on life satisfaction. **Nourishing millions Stories of change in nutrition Intl Food Policy Res Inst** The stories in this book are diverse, spanning five decades and playing out in different arenas, from local to global. They take place in developing countries all over the world, and they involve many sectors and disciplines beyond nutrition itself, including health, agriculture, education, social protection, and water and sanitation. Most importantly, they paint a nuanced picture of success as a context-specific achievement that may, or may not, endure into the future. **Handbook of Research on Women's Issues and Rights in the Developing World IGI Global** Equal rights for women are an essential aspect for establishing strong societies. By making strides on these issues, nations are helping to create valuable civilizations for their own population to establish livelihoods in. The *Handbook of Research on Women's Issues and Rights in the Developing World* is a pivotal scholarly resource that discusses the current issues facing women's rights in developing nations, as well as suggestions for improvements on these problems. Featuring in-depth discussions on relevant topics such as working-class women, gender theories, and international migration, this publication is an ideal resource for academicians, students, and researchers that are interested in learning more about the current challenges to the women's rights movement, and how to best combat them. **Economic Development Pearson UK** "Economic Development, the leading textbook in this field, provides your students with a complete and balanced introduction to the requisite theory, driving policy issues, and latest research.

Todaro and Smith take a policy-oriented approach, presenting economic theory in the context of critical policy debates and country-specific case studies, to show how theory relates to the problems and prospects of developing countries."--Publisher's description **Living on the Boundaries Urban Marginality in National and International Contexts Emerald Group Publishing** From the first chapter to the last, this immensely insightful anthology richly details and informs us about the human condition, from multidisciplinary perspectives, about urban life in global contexts. It examines the complex, often controversial issues impacting those who live on the margins of society in our densely populated cities. **Routledge Handbook of Contemporary Bangladesh Routledge** In the past decade, Bangladesh has achieved significant social and economic progress. Despite high population density, a limited natural-resource base, underdeveloped infrastructure, frequent natural disasters and political uncertainty, the country has recorded positive developments in terms of broad economic and social indicators. This Handbook presents a comprehensive and interdisciplinary resource on the politics, society and economy of Bangladesh today. Divided into six thematic sections, the Handbook focuses on relevant issues and trends on: History and the making of contemporary Bangladesh Politics and institutions Economy and development Energy and environment State, society and rights Security and external relations Written by a team of international experts in the field, the chapters provide an accessible and up-to-date insight into contemporary Bangladesh. The Handbook will be of interest to students and academics of South Asian studies, as well as policymakers, journalists and others who wish to learn more about this increasingly important country. **World Migration Report 2008 Managing Labour Mobility in the Evolving Global Economy United Nations** The task of formulating workable approaches to the management of international migration remains a formidable challenge for the community, one that will require both time and effort over the coming years. In what terms are we to develop comprehensive migration management strategies that will help us achieve coherence of action? What organizing principles should be adopted? Is there, in conceptual terms, a point of leverage to move the debate forward? Part of the problem lies in the difficulty of coming to a consensus about the fundamental nature of migration and its outcomes. Underlying the current and welcome inclination to acknowledge the potentially beneficial outcomes of migratory phenomena are many questions that are yet to be fully resolved. In the midst of that uncertainty there are suggestions worth exploring that contemporary migration – as opposed to whatever its historical antecedents may have been – is uniquely related to and defined by those processes of economic and social integration collectively known as globalization. The argument is that, whether by design or not, these developments are largely responsible for the creation of an unprecedented context in which human mobility seeks to find expression on a genuinely global scale. The World Migration Report 2008 tackles this issue directly and seeks to identify policy options that might contribute to the development of broad and coherent strategies to better match demand for migrant workers with supply in safe, humane and orderly ways. Part A of the Report explores the nature and magnitude of the need for such strategies through the observation and analysis of a wide range of contemporary migratory patterns linked to economic purposes while Part B discusses the contours of possible policy responses. **Vocational Education and Training in Times of Economic Crisis Lessons from Around the World Springer** This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries. **Ethics and Politics of Space for the Anthropocene Edward Elgar Publishing** Featuring an international, multidisciplinary set of contributors, this thought-provoking book reimagines established narratives of the Anthropocene to allow differences in regions and contexts to be taken seriously, emphasising the importance of localised and situated knowledge. It offers critical engagement with the debates around the Anthropocene by challenging the dominant techno-rational agenda that often prevails in socio-political and academic discussions. **The Palgrave Handbook of Criminology and the Global South Springer** The first comprehensive collection of its kind, this handbook addresses the problem of knowledge production in criminology, redressing the global imbalance with an original focus on the Global South. Issues of vital criminological research and policy significance abound in the Global South, with important implications for South/North relations as well as global security and justice. In a world of high speed communication technologies and fluid national borders, empire building has shifted from colonising territories to colonising knowledge. The authors of this volume question whose voices, experiences, and theories are reflected in the discipline, and argue that diversity of discourse is more important now than ever before. Approaching the subject from a range of historical, theoretical, and social perspectives, this collection promotes the Global South not only as a space for the production of knowledge, but crucially, as a source of innovative research and theory on crime and justice. Wide-ranging in scope and authoritative in theory, this study will appeal to scholars, activists, policy-makers, and students from a wide range of social science disciplines from both the Global North and South, including criminal justice, human rights, and penology. **Regional Cooperation in South Asia Socio-economic, Spatial, Ecological and Institutional Aspects Springer** This book highlights various challenges and opportunities for regional cooperation and development in South Asia. In light of the ongoing globalization process, the contributors investigate how socio-economic developments are changing the spatial organization of production as well as the profile of cities and landscapes, are stimulating the creation of maritime, terrestrial and aerial channels, and are putting increasing pressures on natural and environmental resources. The book is divided into four parts: The first part analyses the increasing intensity of regional trade, migration and investment flows; the second focuses on channels and adapted spaces. The third part addresses sustainability and natural resources, while the fourth highlights institutional issues. **The Economic Development of Bangladesh in the Asian Century Prospects and Perspectives Routledge** This book explains the macro-drivers of growth behind the economic development of Bangladesh. Few countries in the developing world have shown as exciting a promise of economic prosperity as Bangladesh. The promising nature of the Bangladeshi economy raises interesting questions pertaining to whether good governance may lead to sustained economic growth. This book looks at the strategic interventions on macro-level, specifically the policy interventions. This book will be a useful reference to making sense how economic transformation can be strengthened through state-sponsored activities and how states can inculcate a culture of innovation which can be regarded as one of the underpinnings of economic growth. **Poverty Capital Microfinance and the Making of Development Routledge** Winner of the 2011 Paul Davidoff award! This is a book about poverty but it does not study the poor and the powerless; instead it studies those who manage poverty. It sheds light on how powerful institutions control "capital," or circuits of profit and investment, as well as "truth," or authoritative knowledge about poverty. Such dominant practices are challenged by alternative paradigms of development, and the book details these as well. Using the case of microfinance, the book participates in a set of fierce debates about development – from the role of markets to the secrets of successful pro-poor institutions. Based on many years of research in Washington D.C., Bangladesh, and the Middle East, Poverty Capital also grows out of the author's undergraduate teaching to thousands of students on the subject of global poverty and inequality. **Gender Education and Equality in a Global Context Conceptual Frameworks and Policy Perspectives Routledge** The Millennium Development Goals aim to achieve basic education for all by 2015. But can such global agendas address national and local gender inequalities and will they empower women through education? This thought-provoking book offers an opportunity to engage critically with existing and emergent conceptual frameworks and methodological approaches to this global debate. It is divided into three sections that: reconceptualise the definitions of gender equality used by various social scientific disciplines, international organisations and policy makers; illustrate the methodologies used to collect the voices of young men and women and their teachers telling stories of their success in lifting the burdens of poverty and negotiating traditional gender relations; trace the impact of global gender agendas on national education policies, such as citizenship education, poverty reduction strategies, and feminist activism around adult women's learning. Gender Education and Equality in a Global Context is an invaluable introduction to the range of conceptual frameworks and innovative research methods that address issues of gender education and development. **Bangladesh I: Climate Change Impacts, Mitigation and Adaptation in Developing Countries Springer** The aim of this book is to provide information to scientists and local government to help them better understand the particularities of the local climate. Climate change is one of the biggest challenges to society. It can lead to serious impacts on production, life and environment on a global scale. Higher temperatures and sea level rise will cause flooding and water salinity problems which bring about negative effects on agriculture and high risks to industry and socio-economic systems in the future. Climate change leads to many changes in global development and security, especially energy, water, food, society, job, diplomacy, culture, economy and trade. The Intergovernmental Panel on Climate Change (IPCC) defines climate change as: "Any change in climate over time, whether due to natural variability or as a result of human activity." Global climate change has emerged as a key issue in both political and economic arenas. It is an increasingly questioned phenomenon, and progressive national governments around the world have started taking action to respond to these environmental concerns. **The Rohingya Crisis and the Two-Faced God of Janus What Lies Ahead Rowman & Littlefield** A protracted Rohingya crisis is not desirable, both from the host country's and international community perspectives. Thus, a precise understanding of ongoing predicaments might persuade others to engage in early crisis intervention, resulting in a negotiated conflict resolution. **Artificial Intelligence in Cyber Security: Impact and Implications Security Challenges, Technical and Ethical Issues, Forensic Investigative Challenges Springer Nature Bangladesh Environment and Climate Change Outlook (ECCO) 2012 Report on environmental action planning. Poverty and Water Explorations of the Reciprocal Relationship Zed Books Ltd.** Rarely has such a contentious and complex issue emerged in twenty-first century development as that of water. In this book, co-editors David Hemson, Kassim Kulindwa, Haakon Lein, and Adolfo Mascarenhas use a global spread of case studies to illustrate that water is not simply an issue of physical scarcity, but rather a complex and politically-driven issue with profound future implications, both in the developing world and outside it. The book argues that for the international community to achieve the Millennium Development Goals, governments must step in to protect the rights of the poor. Here, the links between poverty and access to clean water are explored with an eye to political reform that can end the exploitative policies of big business and help to shape a more equitable world for all. **The New Enclosures: Critical Perspectives on Corporate Land Deals Routledge** This collection explores the complex dynamics of corporate land deals from a broad agrarian political economy perspective, with a special focus on the implications for property and labour regimes, labour processes and structures of accumulation. This involves looking at ways in which existing patterns of rural social differentiation – in terms of class, gender, ethnicity and generation – are being shaped by changes in land use and property relations, as well as by the re-organization of production and exchange as rural communities and resources are incorporated into global commodity chains. It goes further than the descriptive 'what' and 'who' questions, in order to understand the 'how' and 'why' of these patterns. It is empirically solid and theoretically sophisticated, making it a robust and boundary-changing work. Contributors come from various scholarly disciplines. Covering nearly all regions of the world, the collection will be of interest to researchers from various disciplines, policymakers and activists. This book was originally published as a Special Issue of the *Journal of Peasant Studies*. **The Rohingya Crisis Human Rights Issues, Policy Concerns and Burden Sharing SAGE Publishing India** The Rohingyas have become a 'crisis' for all including the host countries, the international community and even for themselves. Much has been written about the clearance operation perpetrated by Myanmar military forces and vigilantes in 2017, forcing Rohingya survivors to migrate and seek refuge in other countries. How they have been surviving during the post-2017 period has largely been left out in academic literature. **The Rohingya Crisis: Human Rights Issues, Policy Concerns and Burden Sharing** addresses the many aspects of Rohingya lives in Bangladesh, Myanmar, India, Southeast Asian countries and in the West. This book studies the transforming public discourse about Rohingyas, the blame-game of ecological costs of Rohingya presence, and the declining relationship between the host communities and the refugees. It examines causes for escalating intra-group conflicts, decreasing international support and the repatriation failures. It analyses the critical roles of the international community, global civil society and diaspora activism, and discusses what the future might hold. 'Burden' sharing should be seen as sharing responsibilities for global justice. It is not the Rohingyas who are the burden. **India II: Climate Change Impacts, Mitigation and Adaptation in Developing Countries Springer Nature Maternal and Perinatal Health in Developing Countries CABI** The promotion of maternal health and mortality reduction is of worldwide importance, and constitute a vital part of the UN Millennium Development Goals. The highest maternal mortality rates are in developing countries, where global and regional initiatives are needed to improve the systems and practices involved in maternal care and medical access. Taking a practical policy approach, this book covers the background and concepts underlying efforts to improve maternal and perinatal mortality, the current global situation and problems that prevent progress. It includes case studies and examples of successful strategies, recommends good practices, and provides a critical analysis of knowledge gaps to inform areas for future research. **Export Success and Industrial Linkages The Case of Readymade Garments in South Asia Springer** This book uses an analysis of the garment industry in South Asia to uphold the predictions of neo-classical economic trade theory, but suggest that there is little to learn from it about business, structural, and institutional practices or critical linkages and partnerships. **The Sociology of South Asian Women's Health Springer Nature** This contributed volume is the first-known collection of essays that brings together scholarly review, critiques, and primary and secondary data to assess how sociocultural factors influence health behavior in South Asian women. The essays are authored by working scholars or healthcare practitioners from Bangladesh, India, and Pakistan. In the chapters, the contributors acknowledge social, economic, and environmental factors to recommend improved interventions and health policy for women of the region. Studies on South Asian women's health have targeted clinical evidence, with less attention on social and environmental factors driving health recovery and health outcomes. The South Asian region, more than any other part of the world, is driven by traditional and cultural forces that are possibly the most significant factors determining a

woman's health awareness and her rights to adopt healthy behavior or pursue health recovery. Women of the region share a common culture and political history, and there are benefits to understanding their problems collectively in order to design joint improvements in health policy for women. Salient, but neglected, socio-political areas that influence health behavior and health outcomes in women of the region are covered in the chapters including: Oral Narrations of Social Rejection Suffered by South Asian Women with Irreversible Health Conditions Women's Role in Decision-Making for Health Care in South Asia Poverty, Health Coverage, and Credit Opportunities for South Asian Women Refugee, Displaced, and Climate-Affected Women of South Asia and Their Health Challenges The Political Sociology of South Asian Women's Health The Sociology of South Asian Women's Health is a useful resource for students, researchers, and academicians, especially those interested in public health, gender, social policy, and occupational management, as well as healthcare practitioners, administrators, health and public policy-makers, government officers, and scholars of South Asian studies.
