
Acces PDF Pdf Ricerca Di E Biologici Aspetti Addiction

Thank you for downloading **Pdf Ricerca Di E Biologici Aspetti Addiction**. Maybe you have knowledge that, people have look numerous times for their chosen novels like this Pdf Ricerca Di E Biologici Aspetti Addiction, but end up in infectious downloads.

Rather than enjoying a good book with a cup of coffee in the afternoon, instead they are facing with some malicious bugs inside their computer.

Pdf Ricerca Di E Biologici Aspetti Addiction is available in our digital library an online access to it is set as public so you can get it instantly.

Our digital library spans in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Merely said, the Pdf Ricerca Di E Biologici Aspetti Addiction is universally compatible with any devices to read

KEY=ADDICTION - EATON TRINITY

LA COMUNITÀ TERAPEUTICA AD ORIENTAMENTO GESTALTICO NELLA CURA DEI COMPORTAMENTI ADDITIVI E PATOLOGIE ALCOLCORRELATE

Booksprint Nel panorama della riabilitazione delle persone con problematiche di dipendenza patologica, un ruolo importante rivestono le comunità terapeutiche ad orientamento gestaltico le quali, durante il periodo della pandemia SARS-CoV-2 per l'autore possono essere considerate un setting terapeutico privilegiato per la cura e la guarigione della tossicodipendenza. Attraverso percorsi di consapevolezza, il cooperative learning e la mindfulness, la persona può iniziare in comunità a vivere una nuova esperienza di apprendimento-cambiamento spontanea ed autentica sia con sé stesso che con l'altro recuperando le abilità emotive, sociali e cognitive. Valori quali: onesta, fiducia e rispetto vengono recuperate e coniugate con spazio, tempo e relazione divenendo chiavi ermeneutiche nel processo di guarigione della tossicodipendenza in cui la persona impara a costruire la competenza al contatto e recuperare la propria autenticità.

FARMING FOR HEALTH

GREEN-CARE FARMING ACROSS EUROPE AND THE UNITED STATES OF AMERICA

Springer Science & Business Media Farming for Health describes the use of farms, farm animals, plants and landscapes as a base for promoting human mental and physical health and social well-being. The book offers an overview of the development of 'Farming for Health' initiatives across Europe, resulting from changing paradigms in health care and the demand for new social and financial

activities in agriculture and rural areas. The contributors are drawn from a range of countries and disciplines.

ADDICTION MEDICINE

Oxford University Press Substance use and related addictive disorders rate amongst the top four risk factors contributing to the global burden of disease and form an increasingly important part of medical and healthcare practice. Substance use disorders can cause, mimic, underlie or complicate a large number of common medical and psychiatric disorders. Making a correct diagnosis of the substance use disorder can facilitate clinical diagnosis, avoid unnecessary tests, shorten hospital stay and make the clinician and patient's life easier and safer. Part of the successful Oxford Specialist Handbooks series, the second edition of Addiction Medicine is a concise and practical guide for students, practitioners of medicine and other health professions who come into contact with people with substance use disorders. Providing up-to-date practical assessment, diagnosis, treatment and management options, this edition expands on the first edition through updated content and global coverage of addiction medicine. Edited by a global team of experienced psychiatrists specialized in addictions, Addiction Medicine, Second edition contains everything you need to know to assist in the assessment, diagnosis and clinical management of patients with substance use and related addictive disorders.

BEHAVIORAL ADDICTIONS

CRITERIA, EVIDENCE, AND TREATMENT

Academic Press "Behavioral Addictions is a timely landmark achievement and a must read for anyone interested in addictive and compulsive behavior and its treatment. Rosenberg and Feder have brought us leading addiction experts, who clearly present the growing evidence for including behavioral addictions in the DSM-5 and how best to treat them. While gambling is the first to be included in the DSM-5 chapter on substance related disorders, other behavioral addictions are likely to follow as evidence grows. This is the most important new textbook in addiction psychiatry in recent years." - Richard Frances MD, Founding President, American Academy of Addiction Psychiatry DSM-V broke new ground in May of 2013, designating a new disorder called "behavioral addiction." Clinicians immediately wanted to know: how is a behavioral addiction different from an impulse control disorder? What are the criteria for determining that some behaviors are addictions rather than impulses? What, if anything, does this mean in terms of effective treatment? Behavioral Addictions is the first and most authoritative text ever written on the subject of behavioral addictions. This comprehensive work explains the criteria used to determine addiction, the evidence for identifying assorted behaviors as addictions, and the evidence-based treatment for each. With contributions from preeminent experts covering an exhaustive list of behavioral addictions, this book is unique in its coverage of behavioral addictions, their criteria, and treatment. It is a valuable and timely resource for any clinician treating addictions. A guide to understanding the new DSM-V designation of behavioral addiction Defines the

criteria for behavior to be considered an addiction designation Discusses the evidence for behaviors meeting addiction criteria Identifies what is now, likely will be, and is not a behavioral addiction per evidence Discusses behaviors formerly considered impulse control disorders Presents evidence-based treatment for each behavioral addiction

WOMEN & DRUG ABUSE

INFANT RESEARCH AND ADULT TREATMENT

CO-CONSTRUCTING INTERACTIONS

Routledge *Infant Research and Adult Treatment* is the first synoptic rendering of Beatrice Beebe's and Frank Lachmann's impressive body of work. Therapists unfamiliar with current research findings will find here a comprehensive and up-to-date overview of infant competencies. These competencies give rise to presymbolic representations that are best understood from the standpoint of a systems view of interaction. It is through this conceptual window that the underpinnings of the psychoanalytic situation, especially the ways in which both patient and therapist find and use strategies for preserving and transforming self-organization in a dialogic context, emerge with new clarity. They not only show how their understanding of treatment has evolved, but illustrate this process through detailed descriptions of clinical work with long-term patients. Throughout, they demonstrate how participation in the dyadic interaction reorganizes intrapsychic and relational processes in analyst and patient alike, and in ways both consonant with, and different from, what is observed in adult-infant interactions. Of special note is their creative formulation of the principles of ongoing regulation; disruption and repair; and heightened affective moments. These principles, which describe crucial facets of the basic patterning of self-organization and its transformation in early life, provide clinical leverage for initiating and sustaining a therapeutic process with difficult to reach patients. This book provides a bridge from the phenomenology of self psychological, relational, and intersubjective approaches to a systems theoretical understanding that is consistent with recent developments in psychoanalytic therapy and amenable to further clinical investigation. Both as reference work and teaching tool, as research-grounded theorizing and clinically relevant synthesis, *Infant Research and Adult Treatment* is destined to be a permanent addition to every thoughtful clinician's bookshelf.

ANNUAL REVIEW OF CYBERTHERAPY AND TELEMEDICINE, 2009

ADVANCED TECHNOLOGIES IN THE BEHAVIORAL, SOCIAL, AND NEUROSCIENCES

IOS Press *Cybertherapy - the provision of healthcare services using advanced technologies - can help improve the lives of many of us, both patients and health professionals, while tackling the challenges to healthcare systems. This book is divided in four main sections: Critical Reviews; Evaluation Studies; Original Research; and Clinical Observations.*

TARGETED THERAPIES FOR SOLID TUMORS

A HANDBOOK FOR MOVING TOWARD NEW FRONTIERS IN CANCER TREATMENT

Humana Press This volume provides readers a comprehensive and state-of-the-art overview about the range of applications of targeted therapies for solid tumors. The sections of the book have been structured to review the oncogene addicted tumors, the pharmacology and clinical development of new molecularly targeted agents, the use of biomarkers as prognostic, predictive and surrogate endpoints, and the evaluation of tumor response and specific malignancies treated with targeted agents. The book also covers some of the newest developments in cancer therapy that are not adequately covered by any current available literature. Written by recognized experts in the field, Targeted Therapies for Solid Tumors: A Handbook for Moving Toward New Frontiers in Cancer Treatment provides a unique and valuable resource in the field of molecular oncology, both for those currently in training, and for those already in clinical or research practice.

MENTALIZING IN CLINICAL PRACTICE

American Psychiatric Pub This timely and ambitious book helps clarify the meaning and clinical applications of the mentalization construct. The authors propose that mentalizing is the central corrective process of all psychotherapies.

WHAT CAUSES ADHD?

UNDERSTANDING WHAT GOES WRONG AND WHY

Guilford Press Synthesizing a wealth of recent neuropsychological research, this groundbreaking book focuses on the multiple pathways by which attention-deficit/hyperactivity disorder (ADHD) develops. Joel T. Nigg marshals the best available knowledge on what is actually going on in the symptomatic child's brain and why, tracing the intersecting causal influences of genetic, neural, and environmental factors. In the process, the book confronts such enduring controversies as the validity of ADHD as a clinical construct. Specific suggestions are provided for studies that might further refine the conceptualization of the disorder, with significant potential benefits for treatment and prevention.

THE MIND-BRAIN RELATIONSHIP

Other Press, LLC The recent explosion of knowledge in neuroscience has enormous implications for the practice of psychoanalysis, and The Mind-Brain Relationship offers an indispensable introduction to the seemingly unfamiliar, intimidating, and yet exciting and essential field of neuropsychanalysis.

FATHER-DAUGHTER INCEST

WITH A NEW AFTERWORD

Harvard University Press Through an intensive clinical study of forty incest

victims and numerous interviews with professionals in mental health, child protection, and law enforcement, Judith Herman develops a composite picture of the incestuous family. In a new afterword, Herman offers a lucid and thorough overview of the knowledge that has developed about incest and other forms of sexual abuse since this book was first published. Reviewing the extensive research literature that demonstrates the validity of incest survivors' sometimes repressed and recovered memories, she convincingly challenges the rhetoric and methods of the backlash movement against incest survivors, and the concerted attempt to deny the events they find the courage to describe.

STANDING IN THE SPACES

ESSAYS ON CLINICAL PROCESS TRAUMA AND DISSOCIATION

Routledge Early in these essays, Bromberg contemplates how one might engage schizoid detachment within an interpersonal perspective. To his surprise, he finds that the road to the patient's disavowed experiences most frequently passes through the analyst's internal conversation, as multiple configurations of self-other interaction, previously dissociated, are set loose first in the analyst and then played out in the interpersonal field. This insight leads to other discoveries. Beneath the dissociative structures seen in schizoid patients, and also in other personality disorders, Bromberg regularly finds traumatic experience -- even in patients not otherwise viewed as traumatized. This discovery allows interpersonal notions of psychic structure to emerge in a new light, as Bromberg arrives at the view that all severe character pathology masks dissociative defenses erected to ward off the internal experience of trauma and to keep the external world at bay to avoid retraumatization. These insights, in turn, open to a new understanding of dissociative processes as intrinsic to the therapeutic process per se. For Bromberg, it is the unanticipated eruption of the patient's relational world, with its push-pull impact on the analyst's effort to maintain a therapeutic stance, that makes possible the deepest and most therapeutically fruitful type of analytic experience. Bromberg's essays are delightfully unpredictable, as they strive to keep the reader continually abreast of how words can and cannot capture the subtle shifts in relatedness that characterize the clinical process. Indeed, at times Bromberg's writing seems vividly to recreate the alternating states of mind of the relational analyst at work. Stirring evocative in character and radiating clinical wisdom infused with compassion and wit, *Standing in the Spaces* is a classic destined to be read and reread by analysts and therapists for decades to come.

DISSOCIATION IN CHILDREN AND ADOLESCENTS

A DEVELOPMENTAL PERSPECTIVE

Guilford Press Illustrates the critical association between pathological dissociation and trauma, and provides a clear synthesis of what is known about the psychobiology of dissociative disorders and the effects of pathological dissociation on cognition and memory. Amply illustrated with clinical vignettes, it also offers an array of diagnostic and treatment techniques.

PROBLEM GAMBLING IN EUROPE

CHALLENGES, PREVENTION, AND INTERVENTIONS

Springer Science & Business Media *Problem Gambling in Europe Challenges, Prevention, and Interventions* Edited by Gerhard Meyer, University of Bremen, Germany Tobias Hayer, University of Bremen, Germany Mark Griffiths, Nottingham Trent University, United Kingdom As a leisure activity, gambling dates back to ancient times. More recently, the surge in avenues for gambling—casinos, sports betting, lotteries, and remote media (e.g., Internet, mobile phone, interactive television) among them—finds growing numbers of people losing control over their gambling behaviour, usually at great personal and financial expense. *Problem Gambling in Europe* is the first book to offer a robust international knowledge base compiled by an interdisciplinary panel of researchers in gambling behaviour. Reports from 21 countries throughout Western, Eastern, Northern, and Southern Europe reveal wide variations in types of wagering activities, participation by populations, social and criminal consequences related to pathological gambling, the extent to which governments acknowledge the problem, and efforts to control it (often with the involvement of the gaming industries). For each country, noted experts discuss: Current legislation regulating gambling. Forms of gambling and their addictive potential. Participation rates and demographics. Prevalence of pathological gambling. National policies to address problem gambling. Prevention strategies and treatment methods. *Problem Gambling in Europe* brings insight and clarity to a widespread and complex phenomenon, and will be of considerable interest to all parties working to reduce their negative effects: social science researchers in addictions, gambling behaviour, and public health; clinical, social, and health psychologists and psychiatrists; treatment practitioners; the gaming industry; regulators; and policy makers.

COGNITIVE PSYCHOLOGY AND EMOTIONAL DISORDERS

John Wiley & Sons Incorporated There has been an explosion of interest in applying the methods of experimental cognitive psychology to help understand emotional disorder, especially most common anxiety & depressive disorders. This book reviews this work.

CARBOHYDRATES IN HUMAN NUTRITION

REPORT OF A JOINT FAO/WHO EXPERT CONSULTATION, ROME, 14-18 APRIL 1997

Food & Agriculture Org. "The Joint FAO/WHO Expert Consultation on Carbohydrates in Human Nutrition was held in Rome from 14 to 18 April 1997"--P. XV.

CLINICAL INTERVENTIONS IN SYSTEMIC COUPLE AND FAMILY THERAPY

Springer This timely update presents modern directions in systemic therapy

practice with couples and families, focusing on clinical innovations from Italy, Portugal, and Spain. Top therapists discuss their breakthrough family work in treating familiar pathologies such as depression, borderline personality disorder, infidelity, and addictions, providing first-hand insight into meeting relational dysfunction with creativity and resourcefulness. The book applies novel conceptualizations and fresh techniques to complex situations including multi-problem families, involuntary clients, disability-related issues, anorexia, love and sex in aging, and family grief. From tapping into the strengths of siblingship to harnessing the therapeutic potential of the Internet, the book's cases illustrate the rich variety of opportunities to improve client outcomes through systemic couple and family therapy. This practical guide: Demonstrates strategies for therapists to improve practice Exemplifies methods for reducing the gap between clinical theory and practice Identifies multiple dimensions of systems thinking in case formulation and therapy Offers new insights into treating classic and recent forms of psychopathology Provides a representative picture of couple and family therapy in southern Europe Clinical Interventions in Systemic Couple and Family Therapy is of particular relevance to practitioners and clinicians working within couple and family therapy, and is also of interest to other professionals working in psychotherapy and professional mental health services.

TRAUMA AND THE BODY: A SENSORIMOTOR APPROACH TO PSYCHOTHERAPY (NORTON SERIES ON INTERPERSONAL NEUROBIOLOGY)

W. W. Norton & Company OGDEN/TRAUMA AND THE BODY

PATHOLOGICAL GAMBLING

A CLINICAL GUIDE TO TREATMENT

American Psychiatric Pub The past five years have witnessed dramatic advances in research on pathological gambling -- a diagnosis often overlooked by clinicians who are unaware not only of the personal and social consequences of pathological gambling, but also of the possible treatment options. Today, clinicians can choose from an array of treatment options to substantially improve the lives of patients with this disabling illness. Eloquenty attesting to this extraordinary progress, this remarkable clinician's guide comprises the most extensive coverage on public health, clinical characteristics and treatment, psychotherapy and psychopharmacology, and interventions for adolescents, adults, and older adults. Written by the world's leading researchers on psychiatric aspects of gambling, this truly comprehensive volume discusses how to diagnose pathological gambling and provides the tools to do so. Here, 32 experts detail the clinical phenomenology, etiology, and treatment of pathological gambling, highlighting the current clinical approaches most likely to lead to early identification, symptom remission, and improvement maintenance. Useful appendixes provide specific tests, scales, and diagnostic criteria following four major sections of the book: Public Health and Epidemiology discusses prevalence and definitions of recreational, problem, and

pathological gambling; the relationship between the different levels of gambling severity; and gambling's effects on societal, familial, and individual health and well-being. Clinical Characteristics covers the symptoms and sequelae of pathological gambling and the differences among adolescents, older adults, and men and women, and shows that pathological gambling -- rather than being categorized as a single disorder -- shares important features with many disorders, among them obsessive-compulsive spectrum disorders, affective spectrum disorders, addiction, and impulse-control disorder. Etiology details the realms of both psychology (behavioral, cognitive, and dispositional theories) and neurobiology (noradrenergic, serotonergic, dopaminergic, and opioidergic systems as well as familial and inherited factors) to explain the behavior of pathological gambling -- knowledge that may prove useful in understanding a range of addictive and impulsive disorders. Prevention and Treatment emphasizes the vital role of the clinician in prevention efforts, including a prevention strategy tailored specifically for adolescents and young adults; discusses a variety of behavioral and pharmacological interventions for patients including self-help and professional-based interventions for family members; and concludes with assessments useful in diagnosing pathological gambling and monitoring symptom change. Psychiatrists, psychiatric researchers, and other mental health care professionals will welcome this book as their most up-to-date source for invaluable knowledge about and research from the world's recognized experts on pathological gambling.

UNREPPRESSED UNCONSCIOUS, IMPLICIT MEMORY, AND CLINICAL WORK

Routledge Unrepressed Unconscious, Implicit Memory, and Clinical Work analyses the psychological and neurobiological characteristics of what nowadays goes under the name of "unrepressed unconscious", as opposed to Freud's earlier version of a kind of "repressed unconscious" encountered and described initially in his work with hysterical patients. Pioneering Italian psychoanalyst and neuroscientist Mauro Mancina has distinguished this seminal Freudian concept from an earlier version of the unconscious (preverbal and pre-symbolic) that he terms "unrepressed", and which he describes as "having its foundations in the sensory experiences the infant has with his mother (including hearing her voice, which recalls prosodic experiences in the womb). In connection with this description of two different kinds of unconscious, a 'double' system of memory has been identified: if a traumatic event or series of events takes place when the nervous system is not ready to encode them linguistically and register them within the declarative memory system, they leave a trace within the implicit memory and particularly within the right brain, which both Mancina and Schore see as the seat of implicit memory.

HEALTH PROMOTION IN SCHOOL

THEORY, PRACTICE AND CLINICAL IMPLICATIONS

Nova Science Pub Incorporated In addition to the role of educating future citizens, schools today respond to other social needs, especially to help promote

health. The school, in fact, is a unique place to intercept the ways of thinking of children, adolescents and young adults. Very often, however, the school attaches great social responsibility without adequate support to achieve it. From this comes the need to provide educational resources to the roles and responsibilities in order to address the issues that the company asks them to deal with and that the issues of health and education are anointed synergistically. The present work aims to create a link between the promotion of health and school, describing in the first part, the international reference standards, the various theoretical approaches that exist today, and the evolution of the various models of intervention: from the bio-medical to the bio-psycho-social to interactive-dialogical. The second part, after having carried out a historical analysis of some of the themes in the last decade which have resulted in a particularly difficult management of the school (smoking, bullying, delinquency, intercultural) presents some methodological guidelines designed to intervene at the operational level, for the benefit of school leaders, teachers, health workers, parents, psychologists and educators.

COMBATting DRUG ABUSE AND RELATED CRIME

COMPARATIVE RESEARCH ON THE EFFECTIVENESS OF SOCIO-LEGAL PREVENTIVE AND CONTROL MEASURES IN DIFFERENT COUNTRIES ON THE INTERACTION BETWEEN CRIMINAL BEHAVIOUR AND DRUG ABUSE

SOCIETY AND THE ADOLESCENT SELF-IMAGE

Princeton University Press Over 5,000 high-school students of different social, religious, and national backgrounds were studied to show the effects of family experience, neighborhoods, minority groups, etc. on their self-image and response to society. Originally published in 1965. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

ADHERENCE TO LONG-TERM THERAPIES

EVIDENCE FOR ACTION

World Health Organization This report is based on an exhaustive review of the published literature on the definitions, measurements, epidemiology, economics and interventions applied to nine chronic conditions and risk factors.

ANNUAL REVIEW OF CYBERTHERAPY AND TELEMEDICINE

ADVANCED TECHNOLOGIES IN THE BEHAVIORAL, SOCIAL AND NEUROSCIENCES. 2012

IOS Press The book underlines the progress cybertherapy has made in treating a

variety of disorders it also explores the challenges still to be faced, including the development of easy-to-use and more affordable hardware and software, as well as objective measurement tools. It also highlights the need to address potential side effects, and the importance of implementing more controlled studies to evaluate the strength of cybertherapy in comparison to traditional therapies, and will be of interest to all those involved in the delivery of healthcare today. pIOS Press is an international science, technical and medical publisher of

NETWORKING

THE NET AS ARTWORK

BoD - Books on Demand Networking means to create nets of relations, where the publisher and the reader, the artist and the audience, act on the same level. The book is a first tentative reconstruction of the history of artistic networking in Italy, through an analysis of media and art projects which during the past twenty years have given way to a creative, shared and aware use of technologies, from video to computers, contributing to the creation of Italian hacker communities. The Italian network proposes a form of critical information, disseminated through independent and collective projects where the idea of freedom of expression is a central theme. In Italy, thanks to the alternative use of Internet, during the past twenty years a vast national network of people who share political, cultural and artistic views has been formed. The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today. It builds a reflection on the new role of the artist and author who becomes a networker, operating in collective nets, reconnecting to Neoavant-garde practices of the 1960s (first and foremost Fluxus), but also Mail Art, Neoism and Luther Blissett. A path which began in BBSes, alternative web platforms spread in Italy through the 1980s even before the Internet even existed, and then moved on to Hackmeetings, to Telestreet and networking art by different artists such as 0100101110101101.ORG, [epidemiC], Jaromil, Giacomo Verde, Giovanotti Mondani Meccanici, Correnti Magnetiche, Candida TV, Tommaso Tozzi, Federico Bucalossi, Massimo Contrasto, Mariano Equizzi, Pigreca, Molleindustria, Guerriglia Marketing, Sexys shock, Phag Off and many others.

THE YEARS OF ALIENATION IN ITALY

FACTORY AND ASYLUM BETWEEN THE ECONOMIC MIRACLE AND THE YEARS OF LEAD

Springer The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental

health care and factory work during these two decades.

CYBERTHERAPY

INTERNET AND VIRTUAL REALITY AS ASSESSMENT AND REHABILITATION TOOLS FOR CLINICAL PSYCHOLOGY AND NEUROSCIENCE

John Wiley & Sons The goal of this book is to analyze the processes by which cybertherapy applications will contribute to the delivery of state-of-the-art health services. Particular attention is given to the clinical use of virtual reality technology.

HANDBOOK OF PERINATAL CLINICAL PSYCHOLOGY

FROM THEORY TO PRACTICE

Routledge The book examines the major issues in perinatal clinical psychology with the presence of theoretical information and operational indications, through a biopsychosocial approach. The multiplicity of scientific information reported makes this book both a comprehensive overview on the major perinatal mental health disorders and illnesses, and a clinical guide. It covers perinatal clinical psychology through a journey of 15 chapters, putting the arguments on a solid theoretical basis and reporting multiple operational indications of great utility for daily clinical practice. It has well documented new evidence bases in the field of clinical psychology that have underpinned the conspicuous current global and national developments in perinatal mental health. As such, it is an excellent resource for researchers, policy makers, and practitioners - in fact, anyone and everyone who wishes to understand and rediscover, in a single opera, the current scientific and application scenario related to psychological health during pregnancy and after childbirth.

SURGICAL ENGLISH

Springer Science & Business Media Surgeons around the world need a basic knowledge of English to keep up to date with advances in their field. Fluency in surgical English is important for your professional development, enabling you to attend English-speaking patients with confidence, to study (or work) in other hospitals, speak confidently at international meetings, and to write articles for international journals. This book will provide you with the basic tools to handle day-to-day situations without stress and will help you to improve your English, no matter what your level. To our knowledge, this is the first English book written specifically by surgeons for surgeons. We are sure that surgical specialists from all over the "non-English-speaking world" (general surgeons, thoracic surgeons, vascular surgeons, neurosurgeons, gynecologists, plastic surgeons) will enjoy reading it.

GUIDELINES FOR THE PSYCHOSOCIALLY ASSISTED PHARMACOLOGICAL TREATMENT OF OPIOID DEPENDENCE

World Health Organization These Guidelines review the use of medicines such as

methadone, buprenorphine, naltrexone and clonidine in combination with psychosocial support in the treatment of people dependent on heroin or other opioids. Based on systematic reviews of the literature and using the GRADE approach to determining evidence quality, the guidelines contain specific recommendations on the range of issues faced in organizing treatment systems, managing treatment programmes and in treating people dependent on opioids. Developed in collaboration with internationally acclaimed experts from the different regions of the globe, this book should be of interest to policy makers, program managers, and clinicians everywhere who seek to alleviate the burden of opioid dependence.

BOOKS AND CULTURE

HEALTH FOOD JUNKIES

THE RISE OF ORTHOREXIA NERVOSA - THE HEALTH FOOD EATING DISORDER

Harmony HEALTH FOOD JUNKIES is the first book to identify this new eating disorder, orthorexia nervosa, and to offer detailed, practical advice on how to cope with and overcome it.

PSYCHOTHERAPY FOR BORDERLINE PERSONALITY DISORDER

MENTALIZATION-BASED TREATMENT

Oxford University Press, USA Borderline Personality disorder is a severe personality dysfunction characterized by behavioural features such as impulsivity, identity disturbance, suicidal behaviour, emptiness, and intense and unstable relationships. Approximately 2% of the population are thought to meet the criteria for BPD. The authors of this volume - Anthony Bateman and Peter Fonagy - have developed a psychoanalytically oriented treatment to BPD known as mentalization treatment. With randomised controlled trials having shown this method to be effective, this book presents the first account of mentalization treatment for BPD. The first section gives an overview of BPD, including discussion of nosology, epidemiology, natural history, and psychosocial aetiology. It additionally summarises the present state of our research knowledge about effective psychotherapeutic treatments and use of medication. The second section outlines the authors' theoretical approach and contrasts it with other well known methods, including DBT, CAT, and CBT. In the extensive final section, the authors outline their clinical approach starting with how treatment is organised. A detailed account of the transferable features of the model is provided along with the main strategies and techniques of treatment. Numerous clinical examples are given to illustrate the core techniques and detailed information provided about how to apply aspects of the mentalization based treatment approach in everyday practice. Aimed at mental health professionals, along with counsellors, psychotherapists, and psychoanalysts, the book will be a valuable tool, providing an effective means of treating those suffering from Borderline Personality Disorder.

A COGNITIVE-BEHAVIORAL APPROACH

TREATING COCAINE ADDICTION

MENTAL DISORDERS IN THE CLASSICAL WORLD

BRILL *Mental Disorders in the Classical World* seeks to show through interdisciplinary work how the first medical scientists and their lay contemporaries conceptualized mental disorders and attempted to diagnose, understand and treat them.

ERVING GOFFMAN

EXPLORING THE INTERACTION ORDER

Blackwell Publishers *Erving Goffman* was one of the most pre-eminent authors of the post-war period in social science. His ideas have had an extraordinary influence and have become well known to a wide audience. This is the first systematic appraisal of the legacy of his work. The book brings together a group of eminent scholars from sociology, linguistics and social psychology, all of whom are internationally known for their own work. Contributors include Adam Kendon, Randall Collins, Robin Williams, Emanuel A. Schegloff, Christian Heath, Stephen C. Levinson, P.M. Strong and Anthony Giddens. The contributors analyse and seek to build on Goffman's work in a sympathetic yet critical way. Some chapters describe the main parameters of the "interaction order", as Goffman portrays it, serving as a useful introduction to his approach. Others show how future investigations of the interaction order may be developed. This book will become a standard source for undergraduates and postgraduates in linguistics, social psychology and sociology, and for anyone interested in the development of modern social theory in general.

PSYCHOLOGICAL ASSESSMENT OF ADULT POSTTRAUMATIC STATES

Amer Psychological Assn [This] book was written in response to [the] burgeoning of new information and the growing need for integrative analyses of posttraumatic disturbance and its measurement. It is intended as a practical, empirically grounded guide to the assessment of traumatic events and associated posttraumatic states. It addresses phenomena such as acute stress disorder (ASD), posttraumatic stress disorder (PTSD), stress-related psychotic states, various dissociative reactions and symptoms, and what has been referred to as complex PTSD. This volume is divided into 3 sections: etiology and phenomenology, general assessment issues, and specific assessment approaches.

PAIN

CLINICAL MANUAL FOR NURSING PRACTICE

Designed to be totally relevant to UK practice, this text introduces the multifaceted problem of pain control with which nurses are daily confronted. Taking the whole person approach, it covers methods of pain relief provision, from the use of simple

relaxation techniques, to the use of drugs.
