HOW TO PERSUADE PEOPLE WHO DON'T WANT TO BE PERSUADED

GET WHAT YOU WANT -- EVERY TIME!

John Wiley & Sons The art of persuasion as taught by one of the world's most sought-after speakers and pitchmen In this daring book, Joel Bauer teaches you how to persuade by making your messages entertaining. Learn the secrets behind "The Fright Challenge," "The Transformation Mechanism," and other persuasion tactics used by pitchmen, carneys, and conjurers to convince people to their way of thinking. Along with coauthor Mark Levy, Bauer has taken these ethical, entertainment-based techniques, and has made them practical for everyday use-capable of influencing one person or a thousand, in business and in life. Joel Bauer (Los Angeles, CA) is an expert in performance-based live marketing who The Wall Street Journal online referred to as "undoubtedly the chairman of the board" of corporate tradeshow rain-making. Mark Levy (Chester, NJ) has written for the New York Times, has authored or coauthored three books, and is the founder of Levy Innovation, a consulting firm that makes individuals and companies memorable.

SOUL CIRCUS

Hachette UK A young woman is brutally murdered and PIs Strange and Quinn are forced to confront their own part in the crime. Private Investigator Derek Strange and his partner, Terry Quinn, are running a PI business in the seedy underbelly of Washington DC are approached by a young man asking them to find his girlfriend who has gone missing. And so Strange and Quinn find her. Just another day? Not quite. In the grimy underworld inhabited by Strange, nothing is that simple. For Strange and Quinn's efforts have led to a young mother being brutally murdered - a devastating discovery that causes them both to question the morality by which they live. And yet at the same time they need to continue the search for another missing girl, a teenage runaway who shows up in a porn video. And who hasn't been seen since. Bleak, gritty and moving, SOUL CIRCUS superbly brings to life the devastating story of life and death in Washington's black ghettos.

THEORY OF PRODUCTION AND COST

Springer Science & Business Media **Production theory and the theory of cost both belong to the central areas of business administration, for all considerations concerning the economic organization of industrial manufacturing processes start from these. Two developments in the past 30 years have had a considerable influence on the structure and the concentration on points of emphasis in this book. I am referring to findings from KOOPMANS' activity analysis and to the formulation by GUTENBERG of a production function concept that focuses on industrial production processes. Activity analysis has made it possible to develop, from a uniform approach, different types of production functions which describe the concrete principles of production in the productive sector of a business enterprise; this has created a common basis for all production concepts in business administration. The Gutenberg Production Function with its different kinds of adjustment to a changing output has opened up a flexibility to theoretical and practical considerations that gave rise to a large number of additional studies in this area. Considerations in cost theory were in particular need of considerable extensions in the direction of cost minimal combined adjustment processes. By means of the organization of its contents, this book will take both approaches into due account. In that way, it is vastly different from other books dealing with the same subject. As a matter of course, traditional analytical methods and ways of thinking also constitute a large part of the book.**

A COURSE IN MICROECONOMIC THEORY

Princeton University Press **David M. Kreps** has developed a text in microeconomics that is both challenging and "user-friendly." The work is designed for the first-year graduate microeconomic theory course and is accessible to advanced undergraduates as well. Placing unusual emphasis on modern noncooperative game theory, it provides the student and instructor with a unified treatment of modern microeconomic theory--one that stresses the behavior of the individual actor (consumer or firm) in various institutional settings. The author has taken special pains to explore the fundamental assumptions of the theories and techniques studied, pointing out both strengths and weaknesses. The book begins with an exposition of the standard models of choice and the market, with extra attention paid to choice under uncertainty and dynamic choice. General and partial equilibrium approaches are blended, so that the student sees these approaches as points along a continuum. The work then turns to more modern developments. Readers are introduced to noncooperative game theory and shown how to model games and determine solution concepts. Models with incomplete information, the folk theorem and reputation, and bilateral bargaining are covered in depth. Information economics is explored next. A closing discussion concerns firms as organizations and gives readers a taste of transaction-cost economics.

MANAGING POLICY REFORM

CONCEPTS AND TOOLS FOR DECISION-MAKERS IN DEVELOPING AND TRANSITIONING COUNTRIES

Kumarian Press * **A toolbox for designing, managing, and influencing policy reform in government and civil society** *
Based on experience in over 40 countries This comprehensive book provides concepts and tools to navigate the "how" of policy change in order to enhance democratic governance. It teaches decision-makers how to implement policy more effectively and increase performance feasibility of these reforms. The research--part of the USAID Implementing Policy Change Project--stems from work with government officials, private sector entrepreneurs, and civil society groups, from regional to national and local levels in over 40 countries. The book includes dynamic tools for designing, managing, and influencing policy reforms in government, donor agencies, NGOs, civil society groups, and the private sector.

THE THEORY OF MORAL SENTIMENTS

TOBACCO: THE GROWING EPIDEMIC

PROCEEDINGS OF THE TENTH WORLD CONFERENCE ON TOBACCO OR HEALTH, 24-28 AUGUST 1997, BEIJING, CHINA

Springer Science & Business Media This book contains the full proceedings of the Tenth World Conference on Tobacco or Health, held 24-28 August 1997 in Beijing, China, and hosted by the Chinese Association on Smoking and Health and the Chinese Medical Association. Tobacco is now causing a worldwide epidemic of premature death and disability, affecting first men and then women in developed countries, and now increasingly affecting developing countries. The theme "Tobacco: The Growing Epidemic" was chosen to reflect the increasingly global nature of the problem.

FOREIGN DIRECT INVESTMENT

ANALYSIS OF AGGREGATE FLOWS

Princeton University Press The 1990s saw global flows of foreign direct investment increase some sevenfold, spurring economists to explore FDI from a micro- or trade-based perspective. Foreign Direct Investment is one of the first books to analyze the macroeconomics of FDI, treating FDI as a unique form of international capital flow between specific

pairs of countries. By examining the determinants of the aggregate flows of FDI at the bilateral, source-host-country level, Assaf Razin and Efraim Sadka present the first systematic global analysis of the singular features of FDI flows. Drawing on a wealth of fresh data, they provide new theoretical models and empirical techniques that illuminate the vital country-pair characteristics that drive these flows. Uniquely, *Foreign Direct Investment* examines FDI between developed and developing countries, and not just between developed countries. Among many other insights, the book shows that tax competition vis-à-vis FDI need not lead to a "race to the bottom." *Foreign Direct Investment* is an essential resource for graduate students, academics, and policy professionals.

INVESTMENT ANALYSIS AND PORTFOLIO MANAGEMENT

Penned by a widely respected author team, this investments text takes an empirical approach to explaining current, real-world practice. Providing the most comprehensive coverage available, the text emphasizes investment alternatives and teaches students how to analyze these choices and manage their portfolio. Like the editions before it, the sixth edition includes excellent coverage of portfolio theory, capital market theory, security analysis, and international investments.

PUBLIC POLICY ANALYSIS

Policy Press This book is an English version of a successful text* on public policy analysis originally written for policy practitioners in Switzerland and France. It presents a model for the analysis of public policy and includes examples of its application in everyday political-administrative situations. This English version introduces supplementary illustrations and examples from the United Kingdom. Structured and written accessibly for readers who may not have an academic background in the social sciences, *Public Policy Analysis* applies key ideas from sociology, political science, administrative science and law to develop an analytical framework that can be used to carry out empirical studies on different public policies. British scholars, practitioners and students are introduced all too rarely to ideas from the Francophone world, and this book will contribute to remedying that. It will be particularly relevant for students and practitioners of public administration.

INTERNATIONAL CORPORATE FINANCE

International Financial Management, 7e combines a strong foundation in international finance theory with current,

practical applications. It provides thorough, up-to-date treatment of cutting-edge international finance issues along with traditional treatment of international financial management. This book is known for its readability and clear explanation as well as its extensive use of hands-on, real world applications and student-oriented pedagogy.

MARKETING

A GUIDE TO THE FUNDAMENTALS

John Wiley & Sons The late great Peter Drucker defined marketing as “looking at the business through the customers’ eyes.” Even though organizations are becoming increasingly customer-focused, marketing is still one of the most misunderstood areas of business. This guide explains what marketing is and the techniques marketers use. Topics covered include: • The marketing mix • Pricing policy • Different methods of market research This guide to the fundamentals will be invaluable for anyone aiming to excel in a customer-focused organization.

A HISTORY OF ISLAM IN 21 WOMEN

Simon and Schuster Khadija was the first believer, to whom the Prophet Muhammad often turned for advice. At a time when strongmen quickly seized power from any female Muslim ruler, Arwa of Yemen reigned alone for five decades. In nineteenth-century Russia, Mukhlisa Bubi championed the rights of women and girls, and became the first Muslim woman judge in modern history. After the Gestapo took down a Resistance network in Paris, British spy Noor Inayat Khan found herself the only undercover radio operator left in that city. In this unique history, Hossein Kamaly celebrates the lives and achievements of twenty-one extraordinary women in the story of Islam, from the formative days of the religion to the present.

MICROECONOMIC THEORY OLD AND NEW

A STUDENT'S GUIDE

Stanford University Press **Microeconomic Theory Old and New: A Student's Guide** has two main goals. The first is to give advanced undergraduate and graduate students an understanding of the core model of economics: Walrasian general equilibrium theory. The text presents in detail the three building blocks of Walrasian theory—establishing Pareto efficiency in a barter economy, establishing the efficiency of competitive markets, and accounting for market failure. Each is discussed verbally, graphically, and using mathematics. After reading this book, students will have an understanding of how the seemingly disparate pieces of conventional economics fit together as a system. Although the text focuses on the intellectual framework of standard economic theory, relevant mathematical techniques are discussed. The second goal is to present contemporary extensions and emerging alternatives to the Walrasian model. Some of the theoretical inconsistencies in the model are presented, drawing on the work of Samuelson, Boadway, Chipman and Moore, Ng, and Suzamura, among others. The text then presents challenges to the basic assumptions of the Walrasian system, posed by findings in behavioral economics and evolutionary game theory. Understanding both the Walrasian system and the theoretical and experimental critiques of classical economics is essential to those who ultimately work within the traditional framework and to those looking for an alternative, making this a must read for all students of economics.

AGRICULTURAL PRODUCTION ECONOMICS

PRINCIPLES OF ECONOMICS

WHEN IS GROWTH PRO-POOR?

CROSS-COUNTRY EVIDENCE

World Bank Publications **Growth is pro-poor if the poverty measure of interest falls. This implies three potential sources of pro-poor growth: (a) a high rate of growth of average incomes; (b) a high sensitivity of poverty to growth in average incomes; and (c) a poverty-reducing pattern of growth in relative incomes. I empirically decompose changes in poverty in a large sample of developing countries into these components. In the medium run, most of the variation in changes in poverty is due to growth, suggesting that policies and institutions that promote broad-based growth should be central to pro-poor growth. Most of the remainder is due to poverty-reducing patterns of growth in relative incomes,**

rather than differences in the sensitivity of poverty to growth in average incomes. Cross-country evidence provides little guidance on policies and institutions that promote these other sources of pro-poor growth.

FACING THE DEVELOPMENT CHALLENGE IN MOZAMBIQUE

AN ECONOMYWIDE PERSPECTIVE

Intl Food Policy Res Inst **This study responds to some of Mozambique's basic development challenges and provides qualitative and quantitative insights for policymaking from an economywide perspective. The report highlights the importance of agricultural development showing agriculture's large sectoral multiplier effects and that applying scarce capital to agriculture is generally more effective than applying it to industry and services. A novel CGE model is developed and used in a series of analyses focused on the impact and design of economic policy. Issues addressed are aid dependency, biases in price incentives facing the agriculture sector, improvement in agricultural technology and marketing margins, risk-reducing behavior and gender roles in agricultural production, and food aid distribution. The study also provides a future perspective and analyzes the Mozambican economy using dynamic macroeconomic modeling techniques, demonstrating that sophisticated analytical tools can be of significant value, even in "data-poor" situations.**

MICROECONOMICS AND BEHAVIOR

McGraw-Hill/Irwin **Robert Frank's Microeconomics and Behavior covers the essential topics of microeconomics while exploring the relationship between economics analysis and human behavior. The book's clear narrative appeals to students, and its numerous examples help students develop economic intuition. This book introduces modern topics not often found in intermediate textbooks. Its focus throughout is to develop a student's capacity to "think like an economist."**

ADVANCED MICROECONOMIC THEORY

This advanced economics text bridges the gap between familiarity with microeconomic theory and a solid grasp of the principles and methods of modern neoclassical microeconomic theory.
