Your Dreams Can Save Your Life How and why yours dreams warn you of every danger: tidal waves, tornadoes, storms, landslides, plane crashes, assaults, attacks, burglaries, etc. *BUENOS BOOKS AMERICA LLC* Although we naturally sense all the dangers of our environment through our body and subconscious, we no longer know how to use these perceptions in order to ensure our own safety. Animals are still able to do this and this enables them to be warned and to flee before the outbreak of natural disasters. However, by learning to benefit from their dreams, humans can surpass animals in this field. The fruit of more than 20 years of research, this book explains a method that is accessible to everyone, that enables the links between the body, conscious and subconscious to be re-established, in order to receive more information on the dangers of our environment. Once communication has been re-established between the body and the subconscious, it turns out that human beings are far superior to animals and to all existing technologies in sensing all kinds of dangers, whether they be natural, human or technological. By using the technique that is explained in this book, you will learn how to 'retrieve' information available to you in dreams, that is important for the safety of you and the people close to you. Through this you will also be able to, for example: - avoid accidental death by escaping before the outbreak of a natural disaster: earthquake, volcanic eruption, landslide, flood, storm, tidal wave, avalanche, tornado, etc. ; - foil the plans of attackers, terrorists, thieves, rapists or burglars; - know, before going away, for example by boat or plane, if you are going to arrive safe and sound at your destination or if it would be better to cancel this trip because of an attack, shipwreck, accident or natural disaster... ; - sense many other traps and dangers and avoid them. - the most gifted among you will also be able to develop a greater sensitivity and intuition directly in a waking state, which will enable you to react even more effectively to the dangers of your environment. - you will also learn not to become anxious for no reason when you have simple nightmares, because you will have learnt to detect what triggers them in you and you will thereby know how to distinguish them from true warning dreams of natural disasters, attacks, burglaries, accidents at nuclear power stations, etc.

Milk Production and Processing *Daya Publishing House* The book covers various aspects of dairying and milk products such as dairy farm establishment, management, production and utilisation of various dairy products. Information has been included on various aspects of dairy farming starting with selection and purchase of dairy cattle, their care and management, with respect to housing, feeding, breeding and health care during various physiological states such as growth, pregnancy and lactation and during different seasons. Details of health care management along with common diseases have been covered with all information required for educated farmers and technicians working in these areas. Various means for consistent

improvement of the stock has also been included. Production of clean milk, its procurement, processing and distribution has been covered with more emphasis on common processing technologies such as pasteurisation and sterilisation. Different forms of liquid milk available in the market has been described along with its standards and other specifications for the knowledge of common man and technicians. Manufacturing methods of milk products have been included with appropriate flow chart wherever required and various categories of milk products have been covered in detail under different chapters under milk products. This book has been prepared with emphasis on second year syllabus of Vocational higher secondary course on milk products and dairying and considering the lack of a suitable textbook for this subject. Hence the book is expected to fill the gap of a textbook for the above said and similar courses. Also the book may be accepted as a textbook/manual for educated farmers, other teaching and training programmes covering similar syllabus like that of dairy farm instructors and as a handbook for Veterinary Students and Dairy Extension Officers. With these introductory notes, we presume that the book will satisfy its readers' requirements and form a valuable textbook/reference book for all those concerned with dairy animal production and utilisation of their products ultimately benefiting the farming community.

This is critical all over the world, but none more so than in Asia. Asia is not only the world's biggest market, but also the fastest growing. This book analyzes competitive companies from 18 Asian countries that have successfully practiced new wave marketing and in so doing, provide invaluable lessons that others may find useful. Comprehensive case studies are used not only to describe how some of Asia's best companies compete, but also to analyze the concepts of new wave marketing their actions are based on. This book is unique in its depth and breadth of cases, from companies in the ASEAN region to North-east Asia, including Mongolia and SAARC. The authors of this book, Professor Philip Kotler, arguably the Father of Modern Marketing, Hermawan Kartajaya from Indonesia, and Hooi Den Huan from Singapore, are all experts in their field and have previously produced other bestsellers.
