Behavioral Finance: Psychology, Decision-Making, and Markets *Cengage Learning* Now you can offer your students a structured, applied approach to behavioral finance with the first academic text of its kind--Ackert/Deaves' **BEHAVIORAL FINANCE: PSYCHOLOGY, DECISION MAKING, AND MARKETS**. This comprehensive text--ideal for your behavioral finance elective-- links finance theory and practice to human behavior. The book begins by building upon the established, conventional principles of finance that students have already learned in their principles course. The book clearly explains what behavioral finance indicates about observed market outcomes as well as how psychological biases potentially impact the behavior of managers. Students learn the implications of behavioral finance on retirement, pensions, education, debiasing, and client management. This book is unique as it spends a significant amount of time examining how behavioral finance can be used effectively by practitioners today. The book's solid academic approach provides opportunities for students to utilize theory and complete applications in every chapter. A wide variety of end-of-chapter exercises, discussion questions, simulations and experiments reinforce the book's applied approach, while useful instructor supplements ensure you have the resources to clearly present theories of behavioral finance and their applications. **Important Notice:** Media content referenced within the product description or the product text may not be available in the ebook version.

Handbook of the Sociology of Education in the 21st Century *Springer* This handbook unifies access and opportunity, two key concepts of sociology of education, throughout its 25 chapters. It explores today's populations rarely noticed, such as undocumented students, first generation college students, and LGBTQs; and emphasizing the intersectionality of gender, race, ethnicity and social class. Sociologists often center their work on the sources and consequences of inequality. This handbook, while reviewing many of these explanations, takes a different approach, concentrating instead on what needs to be accomplished to reduce inequality. A special section is devoted to new methodological work for studying social systems, including network analyses and school and teacher effects. Additionally, the book explores the changing landscape of higher education institutions, their respective populations, and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways. Written by leading sociologists and rising stars in the field, each of the chapters is embedded in theory, but contemporary and futuristic in its implications. This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them.

Research on the work-integrated learning of student teachers

AOSIS This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book. Communication Law

'Teaching Children about Health A Multidisciplinary Approach' *Brooks/Cole Publishing Company* **TEACHING CHILDREN ABOUT HEALTH** takes a case study approach and is written especially for the elementary classroom teacher. The goal of this text is to help teachers become more knowledgeable about and comfortable with health topics, to be more reflective in their practice of teaching about health, and better equipped with activities for incorporating health subjects into their curriculum. Each chapter considers health from a physical, social, and emotional perspective, acknowledging the mind-body connection. The authors include topics that are relevant in children's lives using a wellness/preventive health model. In addition, each chapter provides activities that can be integrated into several disciplines found in most elementary-school curricula. This text is meant to provide elementary school classroom teachers with the incentive and knowledge base they will need to include interdisciplinary lessons about the various health content

areas in their daily teaching. It recognizes that since most elementary-school programs do not have separate health education experiences for students, and since these are the primary learning years, it is the responsibility of the classroom teacher to initiate learning about health.

Health Education in Context: An International Perspective on Health Education in Schools and Local Communities *Springer Science & Business Media* This book presents an international perspective on health education and specifically the influence that context has on this aspect of education. An important feature of the book is that it draws upon the experiences and research of local experts, representing the perspectives of an extremely diverse cohort across the world (22 countries and 2 regions in total). The book addresses topics such as: the development and implementation of health education in different countries; the influence of political, cultural, societal or religious mores; governmental or ministerial drives; economic or other pressures driving curriculum reform; and the influence of external assessment regimes on health education. Asem Law of Persons and the Family An African Language Experience Aspects of the Relationship Between Language and Culture Among the Hausa People of Northern Nigeria
Partridge Africa The present book is about Hausa linguacultural practices. Its primary goal is to demonstrate aspects of the relationship between Hausa language and culture as it affects northern Nigeria, the territory with the largest concentration of native-Hausa speakers on earth today. Using various examples, illustrations and real-life situations, the book seeks to portray Hausa speakers experiences and practices as they daily exploit their language to communicate their needs and, in the process, express their culture. These experiences and practices are realised largely through Hausa verbal and non-verbal means or both which together give rise to linguacultural patterns of behaviour unique to the speakers. It is hoped that readers, particularly non-Hausas, will find the book enjoyable especially in trying to experience what native-Hausa speakers, using their language to communicate, experience during social interactions. Supported by a number of optional activities and exercises, students and teachers of Hausa will particularly find the book not only resourceful and entertaining but also reader-friendly especially with regard to the role of culture in language learning and teaching. Indeed the book has been partly written to encourage the use of Hausa culture in language teaching and learning.

Small Things In this haunting tale of love and learning, the existential chaos of a life ravaged by

circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, "where suffering has no meaning", where an individual escapes death only to find himself confronted with choices wrought by remorse and retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...
