Design and Manufacture for Sustainable Development

John Wiley & Sons Design and Manufacture for Sustainable Development brings together a collection of papers from a conference held at the University of Liverpool in June 2002 that inspire the interchange of ideas on the theory, technology, tools, and methodology for the entire product life cycle within the framework of sustainable development. It also embraces key subjects including strategy, design, materials, manufacturing, packaging, distribution, disposal, recycling, and auditing. TOPICS COVERED INCLUDE: Philosophy of, and strategy for, sustainable technologies Design principles for sustainable development Sustainable manufacturing technologies Use of recycling/bio-degradable materials Re-use and recycling design and technologies Tools for sustainable product design Measurement and auditing Best practices and case studies Impact of emerging legislation International trends and future development. Sustainable development will have a fundamental impact on the engineering community since, through design and manufacture, we are responsible for the use of energy, materials, and processes for the complete product life cycle. This is an essential volume for the bookshelves of those wanting to be well informed about this evolving technology.

Dwell

At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.
